Yahoo Group Archive: dxsoft-rus

Yahoo Group summary: DXsoft russian language support

These Yahoo Groups messages were archived in WARC format by ArchiveTeam in 2017. This PDF was generated by Digital Library of Amateur Radio & Communications from the WARC files in 2026.

Date span: 2005-01-15 through 2017-08-09

Source WARC: dxsoft-rus.q1hTwDj.warc.gz

Source item: https://archive.org/details/yahoo-groups-2017-08-11T01-03-25Z-3fb49a

Messages included in this PDF: 3054

Message records with no body available in the source archive: 4

Messages omitted as spam from this PDF: 1

Yahoo replaced the domain portions of email addresses with @... in the archived messages. Characters lost in Yahoo's archived text appear as ?.

Messages are presented in ascending Yahoo message-ID order. Gaps indicate records absent from the source WARC or messages omitted from this PDF as spam.

Ситуация такая:
трансивер + Hamport 1.0 + AALog 2.47
на трансивере - 14.165.00
в Hamport - 14.165.00
окно "New QSO" AALog - 14.164
Причем, может быть и правильная индикация. Например перестраиваюсь на 14.166.00 - все "показания" совпадают, далее 14.167.00 - снова AALog "отстает" - показывает 14.166 Какой-либо системы не заметил. Мелочь, но как-то некузяво :-)
Далее:
В "свойствах интерфейса" переключаю отображение частоты на вид MM.KKK.HH
в этом случае отсчёты частоты трансивера, хампорта и окна "new QSO" лога одинаковы. НО при сохранении новой связи в окне лога частота отображается в виде MM.KKK. так и должно быть? В таком случае эта точка после килогерц выглядит совершенно неуместной.
Каково мнение автора на этот счёт?
Посмотрел сейчас - формат частоты в виде 14165.0 - тоже наблюдается несоответствие между хампортом и логом в случае "круглых" значений (в смысле - без долей килогерц), но уже на 0.1 KHz :-)
Частота в формате 14.16500 - в окне ввода всё ОК, но при сохранении исчезает последняя цифирка...

А можно-ли считать нормальным, если из всех, поставленных в очередь на печать, и выбранных "галочками" в окне QSL service записей, в окне Preview отображается и печатается только ОДНА QSL - последняя в списке. Чтобы напечатать другие QSL (каждую - отдельно)нужно вручную снимать-ставить "галочки"... Это одно.
Далее - утилита AALabels - вроде-бы с претензией на технологию WYSWYG, но... Вам прислать скриншот, как выглядит на экране то, что более-менее нормально будет отпечатано на принтере? На процесс даже несложного редактирования столько бумаги уходит...

302. Switcher 2.10 is released

Yahoo group: dxsoft-rus
Date: 2005-12-29 11:42:19 UTC
From: Sergei Podstrigailo
Topic: 302 Message: 302

Hello All,

DXsoft switcher 2.10 can be downloaded from http://www.dxsoft.com/switcher.zip or http://www.hamport.com/switcher.zip

??????? ????????? ?????? ?? PCI-??????:

The /LPTxNNNN parameter defines LPT-port with non-standard base address (for example, LPT-port at PCI-card). There NNNN is hexadecimal base address of a port, 'x' is just letter 'x', not number, for example /LPTxE080

> Заранее благодарю.

Запускаем AAllabels
открываем любой шаблон
И двигаем поля как нам хочется
Если надо могу подослать свои шаблоны.
Единственно если надо несколько связей
каждое следующее поле надо со своей цифрой

Data-1 Time-1 Band-1и т.д.
Data-2 Time-2 Band-2
Data-3 Time-3 Band-3

Всем добрый день!

А подскажите как можно (кроме как ручками)
выровнять все поля (данные о связи)
по высоте и ширине? (не размер шрифта)
А чтобы все поля были ровно и в столбцах
и в строках.

355. SeaTTY 1.70 is released

Yahoo group: dxsoft-rus
Date: 2006-04-27 07:09:58 UTC
From: Sergei Podstrigailo
Topic: 355 Message: 355

Hello All,

I just have uploaded SeaTTY 1.70 to the main site and mirror:

http://www.dxsoft.com/seatty.zip
http://www.hamport.com/seatty.zip

--
Best regards,
Sergei

==========
SeaTTY versions history

V1.70
Minor improvements of raw log files handling were made.
V1.65
NOAA Weather Radio SAME messages decoding was made.
Voice message is automatically saved to a wave-file (5 min maximum),
SAME header of a message - to a text file.
V1.60
User can select a soundcard by "Setup->Soundcard Number" menu now.
The "Setup->Put Time Stamps in Raw Logs" option was made.
When this option is selected, SeaTTY writes local or UTC time at
beginning of each string of a raw log file.
V1.50
The documentation was updated. Some minor bugs were fixed.

SH на YA можно поменять, для этого заходим в Tools--> Award references-->RDA dist и удаляем все районы с SH, вместо них прописываем новые районы с YA.
Я так все английские поменял на русские названия, файл лежит на http://ra4fjv.narod.ru/base/aalogrda.zip , правда там SH не менял на YA...

В 2,47 и не увидит, будет учтено в 3-й версии

и как изменить бывшую Якутию YA на SH????

Уже не надо, мне бы назад SH на YA поменять :-)

Hello, dxsoft-rus.

1. Инересно, кто нибудь пользуется Auto CQ с 10-ти
секундной паузой? Я думаю, что вряд ли. Можно ли,
уважаемые авторы, эту паузу сделать начиная с 1 секунды?
2. Непонятно, зачем в режиме N6TR & Macros
autostart курсор перескакивает через nnnnn милисекунд
в окно принятого номера, если окно позывного пустое (не
введено ни одного символа)? Можно ли это исправить? Сделать
так, что бы, если окно ввода позывного в режиме Macros autostart
пустое, то курсор оставался бы на месте в окне ввода
позывного.

попробовал у себя ,тоже выскакивает надпись по русски "класс не
зарегистрирован". вроде как проявляется при попытке подвинуть по
экрану окно нового qso.

на компе стоит хрюша ,завтра попробую на другом,там 98.

Здравствуйте, dxsoft-rus.

в ходе испытаний программы вводили некоторое кол-во кусо вручную, затем влили часть кусо, введенных в LOG-EQF в режиме "импорта из другого лога". все записи добавились. но при просмотре статистики оказалось, что импортированные связи не попали в нее (особенно это было заметно по областям России). во всех записях территории/регионы России определялись правильно. моды и диапазоны были в том же формате. рескан ничего не дал. лечилось только удалением этих связей и затем вводом их вручную снова. после этого статистика выровнялась. может есть более гуманные способы правки статистики?

Здравствуйте, Vladislav.

Вы писали 28 декабря 2006 г., 15:42:04:

У меня что-то подобное было когда после переустановки
операционки на компе, с CD-диска скопировал инсталированую прогу
CWTYPE. Иногда прога без моего ведома сама автоматом что-то
выдавла. Тыкался, мыкался, грохнул все на компе "CWType".
поновой установил прогу и все макросы переписал. Все работает
без проблем. Трансивер с компом подключен через COM-1.

AS>> чаще при нажатии на манипулятор в эфир летит хаотическое сочетание
>>> AS> точек тире и всего чего угодно, кроме того что передаешь :-(Иногда вообще
>>> AS> без всяких нажатий вдруг выдает в эфир серию чего-то :-)
>>>
>>> AS> Наводки? Вряд ли. Когда были наводки то комп глючил явно. Потом побороли.
>>>
>>> AS> Мысли, советы? Может быть подобрать резисторы, которые идут на ноги
>>> AS> порта? Или в настройках программы что?
>>>
>>> AS> Help!!!
>>>
>>> AS> 73! Алексей, RV3MI
>>>
>>> Попробуйте:
>>> 1) Снизить мощность до минимума - прошло или нет?
>>> 2) По цепи манипуляции поставьте LC-фильтр из двух дросселей (последовательно по
>>> каждому проводу) и двух конденсаторов (параллельно) прямо в разъеме, входящем в
>>> трансивер / порт LPT
>>>
>>>
>>> --
>>> Best regards,
>>> Andrey RN3FT mailto:andreyk@...
>>>

AS>> Ок, Андрей!
AS>> Я говорил - мощность вообще не причем - так происходит когда трансивер вообще выключен
:-)
AS>> а вот фильтры надо попробовать. Хотя думаю что оптопары решат
AS>> проблему. После НГ надо заняться этим вплотную.

> Я думаю что все дело в компутере и его настройках, аналогичная
> ситуация у меня была одном компе, на другом все это пропадает, надо
> просто попробовать в различных прогах, и тогда все станет ясно, в
> CWtype имено у меня так и было , на одном компе рабобатет, на другом

> нет..

>>

AP> Да уж. :-)

AP> 73! UA9XC

"Да уж" что?

Разве был официальный анонсированный релиз версии 3?

Пока это бета-версия, и сам автор, видимо, решает выложить её и быть "заваленным" просьбами о "доделках" / "переделах" или с группой тестеров отладить большинство часто случающихся ошибок, чтобы ими не "нервировать" общественность.

ИМХО, поэтому распространение и осуществляется при непосредственном контакте с автором.

Не далее как вчера, общался с Александром (кстати он доступен по всем основным интерактивным каналам связи, емайл, ICQ, и т.д.), есть некоторые не доконца нерешённые вопросы коммуникации v3 с внешними приложениями непосредственно из лога (в данном случае, разговор шёл о работе RTTY непосредственно из Лога).

Лично я уже давно использую v3 (не самый последний релиз) для повседневной работы в эфире.

Учитывая бесплатность приложения и то, что им занимаются в "свободное" от работы и семьи время (+ RZ4AG не редок в тестах!), можно бы было поблагадарить Автора и спросить чем можно подсобить проекту, вместо того чтобы...

С уважением и надеждой на понимание,

Андрей.

73! de Andy, RZ3EM

Во-первых он уже давно не такой новый, а во-вторых я не просто так его не выкладываю на общее обозрение. Посему желающие получить 3-ю версию обращайтесь ко мне. НО! Я оставляю за собой право отклонить просьбу, т.к. не хочу что бы в соседней ветке на QRZ.RU появилось "сделай как у Анипкина".

Надеюсь на понимание.

Приветствую, Александр!
Не получил ссылки на AAlog 3, поэтому, просьба продублировать на rd3an@...
Свои соображения по 3-ей версии уже писал года полтора назад, очень хотелось бы посмотреть и протестировать. Желательно указать дату создания версии в "About", чтоб конкретно знать о какой дате речь.
73! Геннадий

Связка AATest/CwType.

Есть ли такая горячая кнопка, которая заставляет CwType
перейти в режим передачи с клавиатуры?

Как настроить программу так, чтобы при ответе корреспонденту
после нажатия кнопки можно еще было продолжать вводить позывной?
(нашел только кол-во букв автостарта передачи)

683. SeaTTY 1.74 beta is published

Yahoo group: dxsoft-rus
Date: 2007-09-21 16:30:11 UTC
From: Sergei Podstrigailo
Topic: 683 Message: 683

Hello All,

I just have uploaded SeaTTY 1.74 beta to the main site and mirror:

http://www.dxsoft.com/seattyb.zip
http://www.hamport.com/seattyb.zip

--
Best regards,
Sergei

==========

SeaTTY versions history

V1.74
The "Shift" menu can be used to select normal deviation (800 Hz)
or narrow deviation (300 Hz) in HF-FAX mode now. Narrow
deviation is used at Long wave band.
Some minor bugs were fixed.
V1.73
The "Setup->Clear Rx Window Once a Day" option was made.
V1.72
Invisible buffer is not used now. Receiving window contains
all received symbols until it is manually cleared.
Some internal changes were made.
V1.71
Minor bugs in text displaying were fixed.
V1.70
Minor improvements of raw log files handling were made.
V1.65
NOAA Weather Radio SAME messages decoding was made.
Voice message is automatically saved to a wave-file (5 min maximum),
SAME header of a message - to a text file.
V1.60
User can select a soundcard by "Setup->Soundcard Number" menu now.
The "Setup->Put Time Stamps in Raw Logs" option was made.
When this option is selected, SeaTTY writes local or UTC time at
beginning of each string of a raw log file.
[...]

684. SeaTTY 1.75 beta is published

Yahoo group: dxsoft-rus
Date: 2007-10-03 15:17:26 UTC
From: Sergei Podstrigailo
Topic: 684 Message: 684

Hello All,

I just have uploaded SeaTTY 1.75 beta to the main site and mirror:

http://www.dxsoft.com/seattyb.zip
http://www.hamport.com/seattyb.zip

The "Setup" menu was rewritten.

Station ID filter was made. This filter allow to select messages which
should be automatically saved in NAVTEX and RTTY modes. Station ID is
four letters after "ZCZC " sequence.

Mask for ID filter can include wildcards,
"?" means "any symbol",
"#" means "any digit".

That is "I???" mask means "any ID, starting from I",
"AB##" mask means "any ID starting from AB and ending by two digits".

Your feedbacks are very welcome!

--
Best regards,
Sergei

685. SeaTTY 1.76 beta is published

Yahoo group: dxsoft-rus
Date: 2007-10-11 11:24:39 UTC
From: Sergei Podstrigailo
Topic: 685 Message: 685

Hello All,

?????? ??? ??????? ????????? ????:

http://www.dxsoft.com/seattyb.zip
http://www.hamport.com/seattyb.zip

??????? ??????????? Station ID ? ?????? ????????? ? ? ????? ?????.

Station ID's of RTTY and NAVTEX messages are included in message filenames and are shown in the message tree now.

There are examples of filenames with ID:

071010-213818-KA57.TXT
071011-180001-794_.TXT

Old filename convention is supported also.

--
Best regards,
Sergei

725. AALog 3.0

Yahoo group: dxsoft-rus
Date: 2008-07-29 03:56:28 UTC
From: Alexander Anipkin
Topic: 725 Message: 725

Hello dxsoft-rus,

Версия 3.0 (публичная бета) лога старого поколения выложена по адресу
http://www.dxsoft.com/download/aal3.zip

Пищалок и перделок которые используют 2-3 человека из тысячи, нет и
никогда не будет. Лог представляет собой
MOE видение каким должен быть лог. Кто с этим видением не согласен -
есть множество других логов нового
поколения.

Лог ни коим образом не затрагивает данных от предыдущей версии, обе
версии могут работать параллельно.

Для миграции с 2.* на 3.0 запустите ярлык "Convert log from ver 2 to
ver 3", лог при этом должен быть закрыт.

Рекомендую сначала нажать кнопку "Check for error" и только если нет
ошибок импортировать.

После импорта зайти в Internal Callbook и выполнить сканирование
логсета. Затем запустить пункт Tools|Fill
missed QSO data fields. Затем обновить статистику Tools|Update award
statistic.

Еще 2 важных замечания:

1. RDA, URDA, County, JCC, JCG теперь вносятся в поле Subdivision, а
не в State.
2. Для работы с TrueTTY и CwType используйте ~[jМакрос] вместо ~[iМакрос]

Hello All,

?????? ??? ??????? SeaTTY 22.0 ?? ???????? ???? ? ???????:

http://www.dxsoft.com/seatty.zip
http://www.hamport.com/seatty.zip

--
Best regards,
Sergei

==========

V2.20
Message filename shows time of message start, not time of message end now.
"Setup / Other / EOM timeout in SAME" option was made.
An error was fixed - messages with station ID in filename couldn't be really deleted.
"Auto start" and "Auto stop" procedures were slightly optimized in HF-FAX mode.
V2.10
"Setup / Other /Ignore EOM in SAME" option was made.
It is useful if SAME system transmit EOM _before_ voice message.

Здравствуйте, dxsoft-rus.

вопрос пользователям ААлог-а.
как то набрался терпения и после добавления DX информации почистил
базу менеджеров.так как было много дублей после установки обновлений.
можно ли ее (базу) теперь добавлять после переустановки лога простым еопированием?

??????? ??????????? ?????????? ?????????? ??????????/????????? ??? HF-FAX.

--
Best regards,
Sergei

==========

SeaTTY versions history

V2.21
Options for tuning auto start / auto stop parameters of FAX mode were made.
See "Interface/FAX" page.
V2.20
Message filename shows time of message start, not time of message end now.
"Setup / Other / EOM timeout in SAME" option was made.
A bug was fixed - a message with station ID in filename couldn't be really deleted by
"Delete" command.
"Auto start" and "Auto stop" procedures were slightly optimized in HF-FAX mode.
V2.10
"Setup / Other /Ignore EOM in SAME" option was made.
It is useful if SAME system transmit EOM _before_ voice message.
V2.0
The documentation was updated.
Some issues occurred under Windows Vista were fixed.
Default working directory of software is located in "Application Data"
("ProgramData" under Vista) in place of "Program Files" now.
V1.80
GMDSS DSC (HF and VHF) messages decoding was made.
V1.76
Station ID's of RTTY and NAVTEX messages are included in message filenames
and are shown in the message tree now.
V1.75
The "Setup" menu was rewritten.
Station ID filter was made. This filter allow to select messages which
should be automatically saved in NAVTEX and RTTY modes. Station ID is
four letters after "ZCZC " sequence.

ну это не так страшно :-) сегодня после рашн, добавил адиф в основной
лог,но сруз не показал, кое какие добавления . запустил рескан, но он
как то вначале притормозил. думал завис. раньше на более медленных
машинах такого не было. затем попробовал рефреш датабазе. но тоже
самое. после этго из статистики выпало стран 30. после рескана вообще
был скромный список :-(запустил на ночь. все равно ранний подъем.
комп 1.8 ГГц 1Г ОЗУ. в логе 17.3 тыс связей.
сохранил адиф. попробую подсунуть его в в версию 3.0

p>>>> версия 2.47
>>> переходите на 3.0 :)
p>> на другом компе поставил, но еще не пробовал. нужно зарегистрировать
> она не требует регистрации... пока не требует...
понятно. попробую.

спасибо за комменари вчера вспоминал как это сделать. забыл, хотя
недавно соседу показывал. вчера уже подсунул адиф. оставил на ночь
обновлять статистику. утром посмотрел, вроде связи все попали и
статистика еть, нужно дальше разбираться.
попробую еще нормальный путь , 2 в 3 :-)

806. AALog ver. 3.0.0.1118

Yahoo group: dxsoft-rus
Date: 2009-03-30 19:05:20 UTC
From: Rudolf RD4WA
Topic: 806 Message: 806

Здравствуйте.
В старой версии 2.47 при экспорте из ADI , созданного контест-программой, в поле примечание ставилось название контеста, взятое из ADI-файла.
В версии 3.0.0.1118 при экспорте из ADI в примечаниях появляются следующие непонятные записи (импортировал 2076 куэсо):
Contest exch: 00001/00001 - 1 импортированная связь
Contest exch: 02076/00240 - 2076 импортированная связь

Первая часть дроби номер куэсо, вторая часть дроби имеет разное значение.
Как добиться правильного импорта названия контеста?

Best regards!
Sayfullin Rudolf, RD4WA.

Привет, Андрей.
Да ваш ответ правильный. Видимо и у Вас такие же проблемы с импортом связей через ADIF. :-)

А вот Александр что-то молчит. :-(

Best regards!
Sayfullin Rudolf, RD4WA.

Я работаю в контестах в TR4W. Затем сливаю QSO в Аалог. Использую этот логер уже в течении 5 лет. Более 140 тыс связей в журнале.
Тем более мне не понятно, почему импорт из ADI в последней версии происходит не так как происходил, например в версии 2.47.
Вот для примера строка из ADI:
<CALL:3>H2T <BAND:3>80M <MODE:3>SSB <QSO_DATE:8>20090328
<TIME_ON:6>000019 <RST_SENT:2>59 <RST_RCVD:2>59 <CONTEST_ID:10>CQ-WPX-SSB
<FREQ:8>3.766750<SRX:5>00001<STX:5>00001<EOR>
Как видно поля все описаны, а импорт неправильно совершает сама программа.
Мне нравится AALog и своим друзьям-HAM советую использовать его. Но есть и недостатки - отсутствие русского HELP для версии 3 и вот такие помарки.
Best regards!
Sayfullin Rudolf, RD4WA.

Да, вот еще вопрос:
Как в лог вносить связи которые проводил не в on-line, например перед тестом?
Как не пытался поставить другую дату и время все равно вносится только текущая дата и время.
Неудобно как то после внесения данных по QSO, затем снова открывать введенное и редактировать (время приходится редактировать аж 2 раза).
В версии 2.47 снимаешь галочку и можно было ввести любую дату и время сразу.
Best regards!

Так ведь и запускаю из AALog.
Все записи в BM черные, некоторые выделены жирно-черным цветом.
Может быть я где-то нарушил связку этих программ или не нажал в AALog нужную кнопку?
Настройки по цветовому выделению по умолчанию.

Здравствуйте, Александр.
Окно кластера открыл. Подключился.
Вот инфо из окна диалога.

QRX ... # 1 in line
*** Connected to: RN6BN at 127.0.0.1
Welcome to the RN6BN AR-Cluster node Telnet port!
Please enter your call:

В окне команды набираю позывной, жму ENTER, далее появляется следующие
строки и все замирает

7 nodes, 72 local / 72 total users Uptime 32 23:23
RD4WA de RN6BN 04-Apr 0840Z arc >

Но нажатие кнопок с командами в окне кластера ни к чему не приводит (нет ни
самой команды поданной в кластер, нет также откликов из кластера). В окне
команды набираю команду, жму ENTER, опять ничего не происходит.
При нажатии кнопки "Send spot using current data(with comments)" диалогое
окно не выводится и нет никакой реакции.

Best regards!
Sayfullin Rudolf, RD4WA.
73!

Здравствуйте, ALL.
Спасибо Александр за советы. С BM разобрался (--- Tools ---
Settings---Notificatsions ... Справа, поставить верхнюю точку (Будут
отображаться,) - помогло.
И с кластером тоже сейчас все О'К.
Спасибо за хорошую программу. При наличии 140 000 QSO в версии 3 обработка
всего массива связей происходит быстро (минут 40-50) вместо 5-6 часов в
версии 2.47.
Компьютер PIV 3000 ГГц.
>

> Alexander mailto:aalog@hamport.com
>

У меня еще вопрос возник по DXAtlas. Как его подключить к программе, что бы
он показывал трассу до кореспондента, позывной которого введен в окно
позывного "New QSO" и если необходимо, то показывал все позывные и трассы
взятые из BM?
Вроде бы такая возможность имелась в DXAtlas.

Best regards!
Sayfullin Rudolf, RD4WA.

Здравствуйте.
Такая проблема тоже наблюдается. При том устанавливали на трех разных компах. На двух комьютерах апдейт установился без проблем, а на одном не хочет ставится. В командном окне при инсталяции апдейта говорит что не может выполнить скрипт, а инсталяцию заканчивает. При запуске программы выдается ошибка Windows. Версия 1118 на этом компе работает без проблем.
Пробовали деинсталировать версию 1118 и поставить с нуля версию 1120. Все равно выскакивает ошибка Windows при запуске программы.

Интерсно, а какие скрипты (SQL и т.п.)выполняет инсталировщик? И чем отличается версия 1118 от 1120? На одной и той же машине старая версия работает, а новая нет и выдает ошибку. Может не хватает каких-то компонентов Windows, используемых в новой версии? Windows на всех 3 машинах WindowsXP.

Best regards!
Sayfullin Rudolf, RD4WA.

Нет, то Open Ukrainian Championship RTTY!
А я имею ввиду Чемпионат Украины RTTY!
То же самое, что и Чемпионаты SSB и CW, только четыре тура по часу каждый.
Положение могу выслать в приват.

К тому, что сказал Андрей, добавлю, что надо ставить версию 1126, иначе
не будет работать IMPORT из других логов.

Мне её пристал RD4WA, которому в свою очередь прислал Анипкин. На
сайте пока нет. Я думаю, что Александр протестирует её и выставит,
так как с предущими версиями были некоторые проблемы в виде вирусов,
а в версии 1125, которая на сайте как 1124, не работает в IMPORT.
Если надо, обратитесь к Анипкину.

Hello dxsoft-rus, www.dxsoft.com/aatest.zip - Нормально огтрабатывается вызов макроса по Alt+f4 (не закрывает

884. фича'с реквест:)

Yahoo group: dxsoft-rus
Date: 2009-11-11 20:25:01 UTC
From: Eugene Kuznetsov
Topic: 884 Message: 884

Здравствуйте!

Хотел бы предложить пару фич, вдруг покажутся актуальными...

1. AATest
Хотелось бы, чтобы логгер запоминал диапазон и вид работы при отсутствии CAT и связей в логе.
А то, в минитесте, к примеру, выставишь 80, закроешь-откроешь, а потом в первых qso приходится диапазон со 160 на 80 менять.
В любом случае не помешала бы возможность группового редактирования QSO, для исправления таких глупых своих ошибок.

2. AALog
Я в основном работаю из разных RDA и QTH-локаторов. Хотелось бы иметь соответствующие поля (My RDA и My Loc) в каждой связи, чтобы потом печатать это на QSL. My QTH - мало одного.
Также, не помешало бы поле "вид прохождения" для УКВ (tropo/es/ms/eme/iono и т. п.)

И, самое странное=), хотелось бы иметь возможность хранить свой позывной в каждой связи (RK1AA, RK1AA/1, RK1AA/M, RK1AA/3/M и т. п. Это, конечно, можно сделать при помощи создания отдельного лога под каждую поездку, но когда вся работа заключается в таких поездках - замучаешься вспоминать, что откуда.

Прошу прощения, если коряво объяснил.

73! Евгений RK1AA

> замучаешься вспоминать, что откуда.

В AALog поле называется UsedCall (NewQSO - закладка More)

В AALabels поля называется MyCall-#

Приветствую всех!

Андрей, RW9WA:
> Привет всем и Евгению персонально!
> Лично я предпояитаю логи за разные райны хранить отдельно, называя их по
> имени,
> например RW9WA
> RW9WA/P BA-01 RW9WA/P BA-02 RW9WA/M BA-37 RW9WA/4/M TA-12 и т.д.

Вот, поехал я, к примеру в город Иваново, дорога часов 12 пути с остановками.
По дороге:
RK1AA/M Лен. область
RK1AA/P Лен. область на остановке в беседке
RK1AA/1/M Вологодская
RK1AA/3/M Ярославская и Ивановская
Всего около 180 связей.
Ну, не готов я 4 лога заводить под это дело:)
Особенно, учитывая, что с каждым позывным отработано по несколько районов RDA в каждой из областей. А еще и на двоечке работал иногда - локатор спрашивают и, вероятно, хотят видеть его на QSL.

Конечно, все это можно держать и в примечании (кроме позывного), но это неправильно и неудобно.

Сейчас у меня все в самодельной базе в MS Access, оттуда же печатаются карточки...

Понимаю что на вкуси цвет.... Но, если я наберу в окне Find (поиск) позывной
> корреспондента, например RK1AA, то увижу все связи с RK1AA и внизу
> окна
> будет видно каким позывным и из какого района я работал.
> Что касается распечатки. Я так сделал до появления поля Used Call, > поэтому

А где это поле!? Может быть, у меня версия не последняя?

> руки не доходять переделывать :-) Я в поле NOTE, через мультиредактирование,
> по F4, заношу такую инфо RW9WA/M BA-45 RFF-009 (через 2 проблела между
> позывным RDA и RFF, так читается при распечатке легче). На QSL это
> распечатывается
> в конце строки из поля NOTE.

> Может кому пригодится :-)
> Например вместо RFF (или вместе с RFF) можно добавить WW LOC или любую
> другую информацию.

Да, таких полей становится все больше и больше%)

Наверное, вопрос решаем решаем только добавлением настраиваемых полей в отдельной таблице...
Что-то вроде

Параметр | Значение

Свой CALL | RK1AA/P
RDA | SP04
OBL | SP
WW LOC | KO59EX
IOTA | EU133
WFF | RFF-165
... | ...

Причем отдельно принятые, отдельно переданные.

Этот я, так, размышляю, не более того...

Здравствуйте, .

при импорте адиф файла в AA3 версии 25, часть связей не залилась.
кк оказалось это связи за 80 и 160 метров. AALог не захотел
распознавать диапазоны 1800 и 3500. хотя, когда выдавал ошибки, то
правильно обзывал их 80 и 160м. вот пример связи.

QSO: 3500 CW 2009-04-11 2145 RW6CW 599 29 RW0A 599 32 0

из кабрилы выбрал все забракованны связи в один файл. попытался
кабрилу импортировать - теже ошибки. проблема с диапазоном возможно.
остальные диапазоны все благополучно залились.
может проблема в версии ?

прошу прощения. на радостях забыл написать письмо, хоть и собирался.
было уже далеко за поночь.к месту подоспело новое обновление. хотя
упоминалась версия 26 , на деле оказалась версия 28. после апдейта все
сразу залилось. до того ни adi, ни cbr файлы с частотами 1800 и 3500 не
импортировались в основной лог. пробовал грубо разделять 1.800, но
при импорте ААЛОГ вообще завис :-(. правда после импорта в графе band
160 метров не проставились, пришлось через мультиредактирование
добавлять.

From: Александр RW6CW
Topic: 893 Message: 893

Здравствуйте, dxsoft-rus.

после конвертации из AA2.47 в AA3 нарушилась статистика по РДА
программе.
нужно все глобально переносить.
вроде есть какая то утилитка для этого.
сосед пробовал - не получилось. грубо вручную поправил несколько сот
связей. а у меня счет на тысячи.
есть ли ньюансы по работе с этой утилиткой ?
буду очень признателен.

Александр и Всем привет.
По поводу AAlog и LOTW.

1. Import LoTW report по основному позывному, зарегистрированному в LoTW (например ER3DX), работает без проблем.
2. Соответственно, если зарегистрирован дополнительный позывной (например ER3DX/p), то Import LoTW report не работает (и не должен).
3. В данном случае необходимо зайти в LOTW, Your QSOs, Download Report и выбрав из выпадающего меню нужный позывной (в данном случае ER3DX/p) скачать в ADIF формате данные из LOTW.
Выглядит это так
<APP_LoTW_OWNCALL:7>ER3DX/P
<STATION_CALLSIGN:7>ER3DX/P
<CALL:5>G0KBL
<BAND:3>17M
<MODE:2>CW
<QSO_DATE:8>20081005
<TIME_ON:6>101300
<QSL_RCVD:1>Y
<QSLRDATE:8>20100211
<DXCC:3>223
<eor>
4. Если теперь сделать импорт в AAlog, то он воспримет буквально строку <QSL_RCVD:1>Y и соответственно внесет запись о подтверждении бумажной QSL.
5. Сам AAlog формирует информацию по LOTW правильно
<LOTW_QSL_RCVD:1>Y
<LOTW_QSL_SENT:1>Y
6. Необходимо, что бы AAlog понимал, что импорт сделан из LOTW и корректно вносил запись о подтсверждении LOTW, т.е понимал что <QSL_RCVD:1>Y является <LOTW_QSL_RCVD:1>Y.
7. Может быть в меню Files, Import добавить что то вроде ADIF_LoTW.
---

8. Будет ли продолжена работа по усовершенствованию сетевого модуля для AAtest?
Очень хочется работать на оном :)

Всех с праздником!
--

С уважением,
er3dxl mailto:er3dx_a@...

Извините за оверквотинг.
Качаем с сервера файл-рапорт на нужный позывной.

Скачавши файл-репорт с ЛоТВ идем в меню Files->Import->LoTW report
В ответ на запрос о скачивании с сервера LoTW, отвечаем <No>
В появившемся в первой строке окна выбираем скачанный lotwreport.adi

в продолжение
не далее как вчера пытался сохранить выбранные в поиске связи. хотя
там вроде есть формат текстового айла, но все время сохраняется в
формате типа adif.
а было бы очень неплохо бы и увидеть список выбранных связей и в
читаемом текстовом виде, нпримерно как файл *.log в aatest.

1012. Проблемы с Win7

Yahoo group: dxsoft-rus
Date: 2010-03-16 15:34:34 UTC
From: R3ARC
Topic: 1012 Message: 1012

Hello, DXsoft Subscribers!

После перехода на 64 битную Win7 столкнулся с проблемой
управления PTT трансивера программой TrueTTY.
Поскольку на сомременных матерях последовательные порты
отсутствуют как таковые, пришлось применить конвертер
USB-COM "TRENDnet TU-S9". Система устройство распознало
и дрова под Win Vista приняла. При тестировании конвертера
система пишет, что устройство работает нормально и конфликтов
не обнаружено. При запуске TrueTTY и попытке в Setup программы
прописать "PTT port" на котором висит конвертер, все изображение
с экрана монитора исчезает, экран заливается синим цветом и
на дальнейшие действия компьютер не реагирует. Возврат в систему
с перезагрузкой либо Ctrl+Alt+Del, либо выключением питания.
Вешать на разные USB порты пробовал, запускать ПО от имени Админа
тоже, применить конвертер другого производителя - та же ситуация.
На другом компе под XP все работает нормально.
Что еще можно ковырнуть?

With best regards, Алексей RA3AKF.

Оперативки 12 Гиг

> Совершенно очевидно, проблема с драйвером USB-COM конвертера.
> Значит, нужен правильный драйвер.

Да, у меня тоже очень сильные подозрения на драйвер.
Конвертер "TRENDnet TU-S9", дрова брал тут:
http://downloads.trendnet.ru/TU-S9/Driver/ => Driver_TU-S9_Vista.zip 180Kb
Драйвер с фирменного диска из комплекта поставки не подошел.
Еще пробовал другой, китайский конвертер с дровами под Висту
с диска из поставки (продавец утверждал, что эти же дрова и под Win7),
но результат тот же - синий экран и висяк.
Может попробовать другой драйвер воткнуть,
например этот: Driver_TU-S9_v2021_2k_xp_2003.zip 1.4Mb

> Кстати, а USB/COM конвертер в системе один?
> От нескольких "экономичных" конвертеров (без EEPROM конфигурации)
> бывают очень злобные глюки.

Да, один. Когда китайский не пошел, я его из системы удалил
вместе с драйверами.

With best regards, Алексей RA3AKF.

Hello, DXsoft Subscribers!

Проблема, похоже, разрешилась.
Мне удалось найти драйвер driver_tu-s9(cd1.32) 4,42Мб
В отличие от Driver_TU-S9_Vista.zip 180Kb от 2006 года,
по описанию он под Win98/Vista, но от 2009 года и встал
под Win7 замечательно.
Всем большое спасибо за помощь!

P.S. Если кому нужен, вышлю.

With best regards, de RA3AKF.

Hello dxsoft-rus, www.dxsoft.com/aatest.zip - исправлено неверное переключение на USB_CW вместо LSB_CW при клике

1023. про AATest 1.81

Yahoo group: dxsoft-rus
Date: 2010-03-28 05:40:50 UTC
From: prostoham
Topic: 1022 Message: 1023

Здравствуйте, Alexander.

хотел пожаловаться на ААТест.
первый раз такое случилось.
немного повещал вчера wpx
собирал интересные для меня станции.
один раз на всякий случай сохранял лог.
после продолжал. остановился на 44 связи.
утром включил. провер очередную связь. нужно быдо давать номер 45 , у
меня выдает 37.
проверил список связей. оттуда пропали связи с 37 по 44.
программу закрывал штатно. вот только перед выходом не сохранял :-(
доверился.
за многие годы ее пользования первый такой случай :-(
можно ли их, связи где то увидеть ?

Здравствуйте, Alexander.

разобрался вроде.
копию делал на флэшку.
там и записался файл, который должен быть в папке программы.
взял оттуда . все нашлось :-)

1041. import в AALog

Yahoo group: dxsoft-rus
Date: 2010-07-25 14:59:34 UTC
From: Анатолий (ER3DX)
Topic: 1041 Message: 1041

Всем привет,

отработал в IOTA используя AATest, все как обычно без проблем.
Теперь решил соответственно сделать импорт в AALog.
Все работает без проблем. Единственное - как бы сделать так, чтобы
номера IOTA, присутствующие во всех форматах AATesta поместились
аккуратненько в поле IOTA AALoga.

В старой версии можно было воспользоваться импортом из текстового
файла.
А как тут?

Спасибо за внимание.

Обрати внимание, в какую дирректорию установилось обновление!
Скорее всего при установке создалась дублирующая,
туда обновление и слилось.

что то не получается. все надо вводить заново каждый раз.

только в настройке - станция со времен рда остался номер, который
тоже нужно каждый раз удалять.
после очистки лога после очередного теста он почему то остается.
сейчас пока набираю отчет за ATCC. потом еще раз проверю.

нужную длиткльность тура выставил, 1 час.
при вводе записей второго тура, прзывноей краснеет, программа
отмечает, как повторную связь и проставляет 0 очков.
проблема вроде решилась нажатием комбинации alt+K. помогло, но при
переходе на 3 или 4 тур . перестала было реагировать, снова пошли
дупы. не помогало ни alt+K, ни ctrl+K. потом всеже включился следующий
тур. исправилось после того как заново ввел время (тоже самое)

Проверка времени тура и отслеживание повтора важны в процессе
самого теста. Заносите CTRL-ENTER после ввода всех данных
qso. Уж что записали на бумагу то и получится, следили то вы сами.

1079. SeaTTY 2.31 is published

Yahoo group: dxsoft-rus
Date: 2010-11-06 16:11:48 UTC
From: Sergei Podstrigailo
Topic: 1079 Message: 1079

Hello All,

I just have uploaded SeaTTY 2.31 to the main site and mirror:

http://www.dxsoft.com/seattyb.zip
http://www.hamport.com/seattyb.zip

--
Best regards,
Sergei

==========
SeaTTY versions history

V2.31
The "Setup / Other / Start SAME message by 1050 Hz tone" option was made.
V2.30
More settings for spectrogram and oscillogram colors were made.
V2.21
Options for tuning auto start / auto stop parameters of FAX mode were made.
See "Setup/FAX" page.
V2.20
Message filename shows time of message start, not time of message end now.
The "Setup / Other / EOM timeout in SAME" option was made.
A bug was fixed - a message with station ID in filename couldn't be really deleted by
"Delete" command.
"Auto start" and "Auto stop" procedures were slightly optimized in HF-FAX mode.
V2.10
"Setup / Other /Ignore EOM in SAME" option was made.
It is useful if SAME system transmit EOM _before_ voice message.
V2.0
The documentation was updated.
Some issues occurred under Windows Vista were fixed.
Default working directory of software is located in "Application Data"
("ProgramData" under Vista) in place of "Program Files" now.

From: Alexander Baharev
Topic: 427 Message: 1082

Здравствуйте,
Работал в EPC PSK63 QSO Party
В списке поддерживаемых тестов этого нет, по этому использовал EPC
Russia DX Contest.
Кроме, естественно неверно подсчитанных очков заметил следующее.
"Короткие" принимаемые номера писались в лог нормально, а в "длинные"
добавлялся 0. Например, номер EPC11422 писался в лог EPC110422
Планируется ли поддержка этого теста и других секции EPC - EPC Ukraine DX
Contest?

1083. вопрос про AAtest

Yahoo group: dxsoft-rus
Date: 2010-12-01 20:27:17 UTC
From: Alex_R6CW
Topic: 1069 Message: 1083

Здравствуйте, Alexander.

много лет пользуюсь вашим творением. с удовольствием. перешел с не с
TRLOG.
остальные почему то не очень понравились. сейчас стоит 1.90
обычно в тесте работал на бумажку. последний ww cw лень было писать и
стал набивать сразу лог правда работал на пиле по тадиции.
дело не в этом. работал новым озывным R6CW.
после выбора теста поменял в настройках и старый позывной RW6CW на
новый. работад для души, подбирал интересные станции.
днем нужно было уехать по делам. решил закрыть лог. но перед выходом
сохранил в адифе наработанное.
после возвращения снова запустил лог и продолжил работу. поздно ночью
перед выключением компа снова на всякий сдеал копию в адиф. и на отдых
. отром продолжил работу, не проверив позывной. через некоторое время
обратил внимание что статистика выдает около 70 связей, хотя помню,
что закончил ночью на 140. нажал пересчет - то же самое. зашел в
кофиг - станция а там снова стоит старый позывной. посенял его на
новый - статистика после персчета вообще показала 7 связей :-(
закрыл отркрыл. снова чтарый колл, но связей все равно 70. проврил
адиф файл, там вроде все связи. а в текущем логе отсутствовали связи
после повторного запуска лога днем и до выключения компа ночьь.
попытался посмотреть файлы defaul.dat, backup.dat но там прослеживлись
только связи до дневного отключения компа. исчзнувших тоже не было.
хорошо хоть догадался делать копии :-) а то там были неплохие дэхи.
зашел на сайт, там тоже версия 1.90.
видимо этот гюк произошел от смены позывных в настройках. но почему то
не сохранялся позывной новый, хотя перед этим набивал лог уже на новый
позывной. но после выхода в настройках снова оказался старый :-(
кстати я тогда спрашивал Вас про повторы в разных турах. потом тупо
набил лог. оказалось что не на все подряд позывные программа давала
ДУПЫ.
жаль, не сохраняются личные данные при формировании отчета .
приходится все время набирать заново.

спасибо :-)
благо адифе все сохранилось :-)))

мой сосед после первого РДА теста в конце теста очистил лог.
обменивались в эфире впечатлениями. было 3- й час МСК. и он
запустил очистку лога. комп был небыстрый и связи на глазах исчезали
как в кино. %-) бывает.

в adif-е все сохранилось. исчезло из текущего тест-лога.
придется посидеть , вернуть на место связи.
вероятно этот сбой произощел из-за смены позывного.
в*.dat файлаг при просмотре тоже не заметил пропавших связей.
вопрос могут ли/должны ли в настройках сохраняться последний
введенный позывной и личные данные.
данные те, которые заносим в шапку cabrillo

сеть есть. но нужно контолировать и принтер :-(вдруг бланк карточки
застрянет. или порошок закончится :-(
попробовал запустить в сети ААЛог. начал стартовыать, но кк
незарегистрированный и вырубился.
в принципе вопрос исчерпан :-)
спасибо за ответ.

не получилось что то.
файл создал, поместил, куда следует.
стартует, уже как заренистрированный и
процентах на 10 бегунка закрывается.
папка на основном компе расшарена, разрешено изиененине файлов по
сети.
на основном компе в это время лог не запущен.
на обоиз машинах SP3.

еще как вариант yfdthyjt можно попробовать radmin.

Здравствуйте, Dxsoft-rus.

возник вопрос, кто каким принтером пользуется для распечатки
карточек/не наклеек.
у разных принтеров разные установки на минимальный формат бумаги.

p.s. давно дома пользовался струйником canon bjc-2100. удобно то, что
загрузка верхняя. положил стопку карточек, нажал пуск и ОК.
единственный недостаток, на глянцевых карточках не очень хорошо
печатал.
сейчас стоит лазерник LBP-2900. пытался найти лазерник с верхней
загрузкой, но таких сейчас уже нет.
еще не пробовал, можно ли в лоток загружать некоторое количество
карточек, но подозреваю могут быть проблемы.

Russian WW PSK Contest?
Если в конфигурации выбрать Russian PSK DX Contest, то не учитываются виды модуляции: PSK31,63,125. Соответственно в отчёте моды PSK в файле cabrillo должны быть идентифицированы следующим образом:
BPSK31 - PS;
BPSK63 - PM;
BPSK125 - PO.

Я так думаю, что AALog-ом пользуются не только контестмены.
Вижу так - тянуть мышкой за угол и равномерное пропорциональное
увеличение или уменьшение окна. Как дополнение, сочетание
клавиш Ctrl+S (например) и размер становится стандартным,
как при запуске.
Или как вариант: три сочетание клавиш и как действие - уменьшенное окно,
стандартное окно и увеличенное окно. Возможно два состояния: стандартный
размер и увеличенный. Но вариант с мышкой был бы самым удобным!
С точки зрения пользователя ;-)

Здравствуйте, Alexander.

> Мужики, вопрос про AATEST!!!

1) Хотелось бы все-таки если будет реализована возможность клиент-серверной архитектуры. Для увеличения помехоустойчивости и в случае дисконекта и сбоев - самостоятельной репликации отключившейся станции при соединении в сеть.
2) Самостоятельной загрузки конфига контеста при подключении к серверу.
3) Выбора вариантов программной блокировки (только один сигнал на одном бенде / только один сигнал на всех бендах и т.д., или её отсутствия (иногда требуется, когда можно мульта и только мульта на другом бенде брать). Т.е. иметь возможность реализовывать разные конфигурации SO1R, SO2R, MOST, MO2T, M/M и т.д.
4) Возможности подключения более чем к одному кластеру с фильтрацией спотов (например показывается только последний при совпадении комбинации Позывной - Частота до 0,1 Кгц)
5) Сохранять в кластере позывной и пароль, чтобы каждый раз при переподключении его не вбивать - в условиях теста - это отвлекает.
6) В оптимале - запускать кластер (хост!) на отдельной машине (сервере) в этом случае, при отключении инета - переподключать его не мешая рабочим ПК.

Это то, что оперативно вспомнилось :)

Заранее благодарю!

Андрей

Описано! Но хотелось бы как в популярных программах (TR4W, N1MM, 5M etc),
т.е. после набора нескольких символов в окне ввода позывного
(оговаривается в меню программы 2,3,4 и т.д.), автоматически шла
передача, во время передачи контрольного номера еще добирался
позывной, без всяких тайм аутов и дополнительных макросов.
Другими словами ПО ЧЕЛОВЕЧЕСКИ, без дополнительных проблем.

ST0R определяется как южный судан, но в дипломной статистике весь
судан свален в одном месте. нет отдельной строчки.
пересканировал статистику - не помогло. раньше была фишка refresh
database. сейчас не нашел ее.

Испольую CwGet для приема морзянки (вернее даже не приёма, а контроля)
в хэлпе к AAlog цитирую "Может взаимодействовать с программами CwType,
CwGet".... У меня ничего не происходит. Вообще. Понимаю что руки мои
кривоваты.
Ну а вообще хотелось бы в журнале получать количество переданных и
принятых групп :)

Добрый день, Александр!

Ошибок не заметил, но есть пожелания:
1. При переключении диапазона на трансивере, Bandmap не переключает диапазоны, приходится дополнительно мышкой щелкать по кнопкам диапазонов. Хочется что-бы переключалось автоматом.
2. Желательно, что-бы сработанные уже станции как-то выделялись на Bandmap. Например как это работает в связке с Band master. Там отработанный позывной становится серым.
3. Лично мое мнение что окно DX cluster в новом виде совершенно не информативно и не нужно. Лучше вернуть на его место TableView или сделать возможность выбора.
И последняя хотелка - что-бы bandmap был раскрашен в соответствии с band планом. Или хотя-бы линиями разделить разные участки диапазона (ну не помню я наизусть где например кончается участок CW на 24 мГц и начинается Digi).

В остальном все очень нравиться. Много лет пользуюсь Вашим логом, несколько раз пытался выбрать альтернативный лог но всегда возвращался назад.

С уважением, Глеб RM5P (ex. RU3PU)

Кнопочкой щелкайте и переключайте
table view/band view

> Или в Config/Station позывной или страну не заполнили?

контест выбрат тот, РДА.
стоит 191 и 195 версии программы.
в 195 изначально вместо района РДА в передаваемом номере стоят
порядковые номера связи. хотя в кофиге станции стоит KR61.
это не мешало ,т.к. работал на отдельном ключе.
очки тоже считала по своему , всем россиянам, независимо от /р по 10
очков, иностранцам - ноль.
мульты считала только РДА районы, но на некоторые не реагировала,
страны за мульты не считала.
в середине теста попробовал скопировать файлы с записями теста в
191 версию. но и там на передачу только серийные номера и подсчет
очков такой же.

после теста сегодня первый раз попал в шэк, запукстил поочередно
195, потом 191. в обоих стоят все прведенные связи, хотя работал в
195. возможно в конфиг файлах остались пути к этой папке.
НО. при запуске в 195 стоял REF, а в 191 RCC контест.
замена тестов и пересчет очков ничего не дали.
попробую еще скачать с сайта свежий аатест. сконфигурировать и туда
подставить только лог из старого.
первый раз такой косяк вылез

посмотрел свой лог. до EU HF импортировались нормально WAz, ITU,
Continent. после импорта в ААЛог связей за WAE CW зоны
импортировались прцентов 15 от общего числа связей. в графе
континент стоят вопросительные знаки и на несколько десятков
связей выдает континент правильно.
после подписи в TQSL связи из ААтест вроде нормально
импортировались в LoTW. да и ААЛог не ругался при импорте
тестовых связей.
к сожалению не запомнил , когда поставил1151.

Сразу бросается в глаза, что эта утилита очень похожа на Corel Draw.

Я проехался по 6 районам. 6 логов. Со многими радиолюбителями
по 4-6 связей. У меня стоит задача: разослать карточки, чтобы все
связи с каким-то радиолюбителем уместились на одной-двух
наклейках.
Причём на каждой связи нужно указать другой мой RDA.

Это такой, приблизительно, вид:

to UT2GW
RU4W/m UD-10 03.09.2011 06-33 14 SSB
RU4W/m UD-15 03.09.2011 07-35 14 SSB
RU4W/p UD-32 03.09.2011 15-23 7 CW итд.

Если с вводом данных QSO всё более-менее понятно, то с районами
сложнее. Возможен ли ввод с ЛОГОв, а не печать данных каждый раз?

Александр, если это будет полезно для всех, дайте какой-то алгоритм,
как сделать подобные наклейки именно в этом LOGe, поскольку все
связи там.

я в таких случаях поступаю так
после столбика модуляция ставлю тег ноте . при ведение журнала в ноте
для всего жунрнала указываю номер рда.

в свое время подсказал Андрей RM8W.
при создании лога в его конфигурации в поле QTH указываете свой RDA. и
как подсказал Александр во 2-м варианте есть колонка QTH.
плучается все просто, сам так делал

большое спасибо за подсказку. работает.
правда есть НО.
можно выбрать только или LoTW или eQSL.
остальное придется ручками. больше кнопок не нашел.

Всем привет!

У меня почему-то AALog не видит, что установлен CWType.
В меню Config - Options на вкладке External Programs напротив CWType
кнопка Get It!

Несколько раз нажимал, скачивал и ставил, перезагружал комп, всёравно
эта кнопка не пропадает. Сам виндовс в установленных
программах/компонентах CWType отображает.

Посоветуйте, пожалуйста, что можно сделать.

Спасибо! Получилось!

Еще одно пожелание по AALog'у: в окне New QSO на закладке "More"
после перезапуска лога из поля Operator пропадает информация, в то
время, как поля My QTH и Used callsign остаются заполненными.
Прошу сделать, чтобы и в поле Operator информация сохранялась.

Еще прошу разрешить для окна New QSO ввод буквы "ё", а запретить для
поля callsign ввод ";" и ","

Здравствуйте, Александр.
Настройки вернее выбор программ Band Master и DX Atlas
на вкладке External Programs не стало галочек. Ставлю напротив Band Master
всё нормально работает, на против DX Atlas лог виснет и окошко
вкладки не закрывается

Для очистки окна есть же и другие комбинации. Может сделать где-нить,
в настройках галку, которая разрешает ввод буквы. Ну совсем не
возможно ввести город Орёл и т.д. ... :-)

Здравствуйте, Vjatseslav.

> Памятник букве Ё уже установлен где-то, поэтому в логе предлагаю оставить
> как есть.

Я не предлагаю полностью убрать функцию очистки окна по кнопке Ё, я
предлагаю, дать пользователю самому решать, нужно ли ему очищать ВСЁ
по букве Ё или дать возможность вводить её в окне New QSO.

Александр,вопрос по Spot List:
1.Смена диапазона-Rig Freq поменялась-а диапазон в окне Spot List
нет,только руками.Это так задумано?
2.Шкала в Spot List очень сильно растянута,у меня монитор 24 дюйма и во
всю высоту на 28 мгц я вижу только 55 килогерц диапазона,очень мало.
В band master я вижу диапазон от 28,0 до 28,700.
Может все это как то настраивается,но я не нашел.И еще:может ли
программа принимать споты Web кластера,хорошо бы если она могла
принимать споты Web и Telnet кластеров одновременно и отдельно.

Да. Мне кажется удобным мониторить споты на разных диапазонах, в то же
время крутить ручку трансивера на другом диапазоне.

Не уходит,
появляется окно Error с сообщением
The "Callsign" field should not be empty!

> Можно вводить в это же поле следующий позывной

> Привыкнуть можно :-) Когда зовут много, работать
> удобно, особенно на pile up с USA, JA, EU...
Как то мудрено все,
может надо сделать проще, как в AATest, DXpedition mode.

Позывной ENTER,
Позывной ENTER,
.....,
Позывной ENTER.

Дешево и сердито как говорится.

Это мое мнение.
Я лично работаю в Pile Up именно так, а потом переношу связи
в AALog.
Немного неудобно, но при работе получаешь удовольствие минимальными
нажатиями.

Всем 73!

Да, действительно стоит галка в меню
Program Propertios, Interface Settings, "Enter" key save data
>>

> Анатолий, суть функции немного другая. Ты можешь накидать себе кучу

Да, работает.
Не привычно.

Привыкнув к работе в AATest, как то трудно сразу сообразить, но все
имеет право на жизнь.

Всем успехов!

Обнаружил в листе ожидания много ненужных колонок
таких как QTH, STATE, Grid, IOTA, QSL via...
зачем они нужны? При вводе связи в лист ожидания
программа не заполняет даже поле Name для тех, с кем
была связь.

Предлагаю сделать заполнение имени и оставить колонки:
Callsign Mode Band Freq Name

И еще, ввожу позывной в поле под надписью "Pile-Up mode",
нажимаю Enter и виндовс почему-то издаёт звуковой сигнал
"динь!". Как это отключить?

Если в листе ожидания записано несколько станций, то
не получается следующего выбрать не по порядку.
Предлагаю добавить функцию выбора по двойному клику
мыши на строке из списка ожидания.

Олег, эта закладка поделена между этим режимом и Draft QSO list.
А там эта информация используется.

> При вводе связи в лист ожидания

From: Serge Systerov
Topic: 1358 Message: 1359

Добрый день, Александр!

Попытался сегодня создать форму печати конверта. Вставил поле с моим адресом и поле "Address", сохранил и вызвал ее в QSL Service, загрузив один позывной. Заполнил окно с адресом. После нажатия кнопки "Печать" увидел только поле с моим адресом, а поле адресата было пустое.
Тестировал на работе на .1156 и дома - .1128
Что-то я не так сделал?

По этой же теме есть такое предложение: думаю, что будет очень не удобно печатать QSL и тут же конверты, поскольку не некоторых принтерах, возможно, потребуется перестраивать лоток подачи, потом обратно...
Попробовал печать конверта при пустой очереди позывных, она вообще не пошла.
И второе: после заполнения адресного окна надо одновременно напечатать два конверта (туда и оттуда), а для этого надо будет постоянно менять шаблон.
Может быть стоит поместить в корень программы эти два шаблона и создать две дополнительные кнопки "Env_to" и "Env_from". Хотя иногда требуется и размер конверта менять (это я на случай печати напрямую, без стикеров).
Может немного сумбурно, но надо закругляться.

С уважением, Сергей

1362. импорт ADIF из ААтест в ААЛог

Yahoo group: dxsoft-rus
Date: 2011-11-29 08:54:10 UTC
From: Alex_R6CW
Topic: 1358 Message: 1362

Здравствуйте.

почему то после телеграфного ВВ, связи в ААЛог импортировались без значений зон. соответственно статистики по ним нет. те, что подтверждаются в LoTW, получают инфу и по зонам.
версия 1151

пока писал письио, проверил. то, что импортировалось из ААТест нигде нет зон, начиная с августа этого года.

естьли возможность исправить эту ошибку, или перебивать вручную зоны?
когда открывается окно QSO, то там территория присутствует, а зон нет.
и этой связи нет в статистике по дипломам.

1372. AALog ошибка "класс не зарегистрирован"

Yahoo group: dxsoft-rus
Date: 2011-12-22 16:41:44 UTC
From: EW2WW (Borisov ARC)
Topic: 1283 Message: 1372

GD всем!

После обновления 1157 заметил такую ошибочку.
При вводе новой связи я прохожу по полям Tab-ом. Раньше после выбора
поля Band сразу перескакивало на RST sent (кажется), теперь
перескакивает на частоту в MHz, а после нее выпадает окошко с надписью
"Класс не зарегистрирован". Окошко закрываешь и идешь дальше.
Но уж очень неудобно каждый раз закрывать :)
Есть идеи?

1412. SeaTTY 2.35 is released

Yahoo group: dxsoft-rus
Date: 2012-01-30 14:53:44 UTC
From: Sergei Podstrigailo
Topic: 1412 Message: 1412

Hello All,

? ?????? ??? ??????? SeaTTY 2.35 ?? ???????? ???? ? ???????:

http://www.dxsoft.com/seatty.zip
http://www.hamport.com/seatty.zip

--
Best regards,
Sergei

==========
SeaTTY versions history

V2.35
Maximum number of RTTY/NAVTEX Station ID filter items is increased to 32.
Filter for GMDSS DSC message format was made.
Some minor improvements were made.
V2.31
The "Setup / Other / Start SAME message by 1050 Hz tone" option was made.
V2.30
More settings for spectrogram and oscillogram colors were made.
V2.21
Options for tuning auto start / auto stop parameters of FAX mode were made.
See "Setup/FAX" page.
V2.20
Message filename shows time of message start, not time of message end now.
The "Setup / Other / EOM timeout in SAME" option was made.
A bug was fixed - a message with station ID in filename couldn't be really deleted by
"Delete" command.
"Auto start" and "Auto stop" procedures were slightly optimized in HF-FAX mode.
V2.10
"Setup / Other /Ignore EOM in SAME" option was made.
It is useful if SAME system transmit EOM _before_ voice message.
V2.0
The documentation was updated.
Some issues occurred under Windows Vista were fixed.
Default working directory of software is located in "Application Data"
("ProgramData" under Vista) in place of "Program Files" now.
[...]

1415. DX4WIN--AALog3

Yahoo group: dxsoft-rus
Date: 2012-02-08 17:16:14 UTC
From: RW3CW
Topic: 1415 Message: 1415

Здравствуйте!

Познакомился с AALog3. Первые впечатления: 5+!
Использовал в разные годы разные логгеры.
Последний DX4WIN 7.02
Решил переходить.

Для меня важно осуществить переход без потери данных о дипломах и уже
отобранных на них QSL. Конвертацию пришлось делать через АДИФ,
формируя его из файлов DX4WIN: (ADIF DX4WIN эту информацию не содержит)
- .dxn - поля фиксированной длины, причем последнее поле Note for this QSO -
почему-то завернуто на вторую строку.
- .dxq - три поля с разделителями.
- MNG.txt - три поля с разделителями - файл QSL mng

Мой сын на Perl написал программу, которая из трех перечисленных файлов формирует
один файл с разделителями для последующей загрузки и обработки в Microsoft Excel.
Возможности по обработке данных в EXcel огромные. Можно сделать все что угодно.

Вторая программа из .xls готовит .adi для загрузки в AALog3.
Есть несколько вопросов.

1.Можно ли в AALog3 загрузить отметки отобранных на диплом (один или несколько) связей?
если да, то какое поле ADIF использовать?

2. Делал экспорт из AAlog3. Для QSL обмена Queued и Printed в поле QSL_sent
выгружается одно значение - Q. Как-же они различаюся?

3. Что означает в журнале поле QSL moral? в АДИФ такого поля не нашел.
Где найти список всех полей ADIF, которые принимает AAlog3? Поля аппаратного
журнала отличаются от полей АДИФ.

4. Не нашел файл, в который грузятся ошибки импорта. Может его и нет ?

5. Поиск по позывному. Не смог найти возможности установки интернет адреса для
QRZ.ru (НЕ QRZ.COM!)
Адрес с сайта мне нужен на русском языке для оправки QSL DIR+SASE, а на QRZ.com
адрес на английском.

Здравствуйте, Alexander!.

Вы писали 9 февраля 2012 г., 21:00:11:

Большое спасибо за ответ.

>> 1.Можно ли в AALog3 загрузить отметки отобранных на диплом (один или несколько) связей?
>> если да, то какое поле ADIF использовать?
> AALog использует унифицированную схему учета дипломов. В ней, к
> сожалению, не предусмотрена такая функция. Теоретически, можно в поле
> примечания для связи заносить признак (по собственному усмотрению) того
> что QSO помечено для какого-то диплома.

В DX4WIN для дипломов DXCC, WAS, WAZ, WPX, IOTA, County award есть возможность
сделать отметки SUBM или CHKD, которые при экспорте выводятся в соответствующие
поля файла .dxn

Я все эти поля соберу в Excel"е в одно поле, например в Ваше APP_AALOG_MARK и
загружу в AALog3. Потом разберемся.

>>
>> 2. Делал экспорт из AAlog3. Для QSL обмена Queued и Printed в поле QSL_sent
>> выгружается одно значение - Q. Как-же они различаюся?
> В adif нет статуса Printed. Но в голову пришло как это обойти. Сделаю.

ОК.
>>
>> 3. Что означает в журнале поле QSL moral? в АДИФ такого поля не нашел.
>> Где найти список всех полей ADIF, которые принимает AAlog3? Поля аппаратного
>> журнала отличаются от полей АДИФ.
> Это поле для обозначения того насколько просто получить QSL от него

ОК.
Автор UR5EQF на вопрос: какие поля стандарта АДИФ его логгер принимает при
импорте, ответил - все.
В Logger32 в файле adif.txt перечислены поля, которые используются.
Я сделал экспорт из AALog3 несколько QSO и увидел поля с незнакомыми
именами. Поэтому и попросил у Вас список всех используемых полей.
Мне будет проще сформировать файл импорта.

>> 4. Не нашел файл, в который грузятся ошибки импорта. Может его и нет ?
> В случае если лог не сохранил какие либо связи, то после импорта
> появится окно со списком этих связей.

Окно появляется в процессе импорта. Определить в каком поле ошибка очень трудно.
Например, формат времени в DX4WIN HHMMSS. В случае, если время 00:14 или 01:15
поле получается длиной 4 или 5 позиций, чего AALog3 не принимает, а в окне импорта

выводится строка с указанием на ошибку в первом поле - DATA. Поэтому и возник у меня вопрос.

>> 5. Поиск по позывному. Не смог найти возможности установки интернет адреса для
>> QRZ.ru (НЕ QRZ.COM!)
> в данный момент поиск не предусмотрен. Но поскольку qrz.ru сделал
> нормальный интерфейс с логгерами - в планах.

ОК. Буду ждать.

Александр, пожалуйста сообщите куда и сколько перечислить за регистрацию AALog3 и BandMaster.
DxAtlas я использую уже более 10 лет. Очень хорошая программа. Жаль на Вашу AALog3 поздно наткнулся, давно нужно было перейти.

Деньги мне удобней перечислить через Сбербанк или Почту России.

Еще раз спасибо и изините если занял Ваше время.

С уважением

73! Alex RW3CW

> AATest+CWType

Всем привет,
у меня тоже был эффект тормозов (AATest+CWType). Похоже он только на RDXC, на других тестах не замечал.
При отключении внутреннего "кластера" эффект пропадал, что и приходилось делать когда работал на общий вызов.

Вопрос не для этого рефлектора ;)

Что касается частоты, то на форуме уже раздолбали - где-то стоит частота типа "3800" (т.е. край диапазона)
робот так не понимает, ставят 3799 - все проходит.
Что касается номеров - то скорее всего есть пара строк где не указан принятый номер.

Не видя лога - сложно ответить на такие вопросы.

В результате внимательного изучения лога были обнаружены искомые три ошибки

1 3800 исправленно на 3799
2 удалено тире в принятом номере
3 найден пропущенный номер - поставил 001 8))

вот такие не простые отношения с роботом 8)))

Topic: 1415 Message: 1450

Здравствуйте, Александр!.

Вы писали 9 февраля 2012 г., 21:00:11:

>> 1.Можно ли в AALog3 загрузить отметки отобранных на диплом (один или несколько) связей?
>> если да, то какое поле ADIF использовать?

>RZ4AG
> AALog использует унифицированную схему учета дипломов. В ней, к
> сожалению, не предусмотрена такая функция. Теоретически, можно в поле
> примечания для связи заносить признак (по собственному усмотрению) того
> что QSO помечено для какого-то диплома.

В загрузочном файле для импорта отметки отобранных на дипломы QSL поместил
в поле QSL quality (ADIF <ADD_AALOG_QSL_QUAL>). Можно поместить отметки для
6-ти дипломов. Использовать поле по назначению не предполагается.

>> 2. Делал экспорт из AAlog3. Для QSL обмена Queued и Printed в поле QSL_sent
>> выгружается одно значение - Q. Как-же они различаюся?

>RZ4AG
> В adif нет статуса Printed. Но в голову пришло как это обойти. Сделаю.

Я составил таблицу эскпорта из AALlog3 в АДИФ формате:

Поля qsl_sent qsl_sent_via

none N
queued Q
printed Q
sent via buro Y B
sent via direct Y D
requsted via oqrs R
do not need I

Я не уверен в достоверности этой таблицы, т.к. значение Q одинаковое сразу в
двух полях qsl_sent и qsl_sent_via.
Как по логике этой таблицы сформировать файл импорта? Подскажите пожалуйста.
Buro и Direct загружаюся в поле qsl_sent_via, остальные -в qsl_sent. Зачем?
Я задавал вопросы по QSL-ингу в рефлекторе:
http://forum.qrz.ru/thread19906-2.html
Ответов не получил.

>> 4. Не нашел файл, в который грузятся ошибки импорта. Может его и нет ?

>RZ4AG
> В случае если лог не сохранил какие либо связи, то после импорта
> появится окно со списком этих связей.

Как этот список использовать? В нем ЛЮБАЯ ошибка импорта отсылает
к первой позиции загружаемой строки импортируемого файла - <QSO_DATE:8> и CALL.
Что, из этого окна карандашом выписать связи, самому найти поле, в котором
AAlog3 нашел ошибку и ее исправить?
А если таких ошибок много? Ведь производится экспорт/импорт из одного
лога в другой и несовпадения обязательно будут.
Обычно логгер пишет BAD.adi. С ним все ясно и понятно.
>>
>> 5. Поиск по позывному. Не смог найти возможности установки интернет адреса для
>> QRZ.ru (НЕ QRZ.COM!)

>RZ4AG
> в данный момент поиск не предусмотрен. Но поскольку qrz.ru сделал
> нормальный интерфейс с логгерами - в планах.

Ждем. Адреса для директов нужны на русском языке.

>> Адрес с сайта мне нужен на русском языке для оправки QSL DIR+SASE, а на QRZ.com
>> адрес на английском.
>>
Оплатил регистрацию через систему «WebMoney»
AALog, AAVoice,

Здравствуйте, Александр!

Нравится Ваш логгер. Все больше и больше.
Вот лишь -

После очистки окна New QSO клавишей ~, остаются данные от прежнего QSO
в окнах:
-QSLing - QSL message
- Endclosed
по-моему это лишнее и мешает

-More... - во всех, кроме SATname и SATmode
логично и помогает.

Вот еще:

В окне Spot List ставлю флаг Displey comments, устанавливаю ширину столбцов.
При новой загрузке AALog3 поле Comment на экран не выводится, хотя галка установлена.
Ширина столбцов также не запоминается.

В основном окне выбираем Awards statistic for calling.
По Select Band выбираем HF и убираем галки с окон 2190 и 60м. Сохраняем.
Выгружаем AAlog и запускаем заново.
Идем в окно New QSO. CNTR W
В Awards ststistic for ... (Band/Modes) столбец диапазона 60м исчез, а вместо 2190,
исчез 160м.

Вот еще, если позволите:

1. При экспорте лога в формате АДИФ поле MY QTH (в выходном файле MY_CITY) выводится дважды.

```
<QSO_DATE:8>20070526
<TIME_ON:4>0708
<TIME_OFF:4>0708
<CALL:3>B7P
<BAND:3>15m
<FREQ:9>21.000000
<MODE:2>CW
<RST_SENT:3>599
<RST_RCVD:3>599
<QSLMSG:1>B
<MY_CITY:4>Урыв
<OPERATOR:2>31
<QSL_VIA:6>BG7KUB
<QSL_SENT:1>N
<QSL_RCVD:1>Y
<CQZ:2>24
<ITUZ:2>33
<DXCC:3>318
<MY_CITY:4>Урыв
<APP_AALOG_QSL_QUAL:2>-1
<EOR>
```

Экспорт в форматах Text File, CSV File производится нормально.

2. Окно "Filter settings" > "Export log data" в окне "Export to" - нет возможности обзора для выбора файла экспорта, имя нужно вводить вручную. Для импорта такая возможность есть.

Вот еще вариант.
До 1 апреля с.г. я пользовался DX4WIN 7.02, в котором заложена возможность помечать отобранные на дипломы карточки отметками SUBM и CHKD.
Отметки в этом логгере я ставил в течение 10-лет. Без суеты, с удовольствием.
При необходимости можно быстро сформировать заявку, выгрузив ее в текстовый файл .csv.
При переходе на AALog3 в загрузочном файле импорта отметки отобранных на дипломы QSL поместил в поле QSL quality (ADIF <ADD_AALOG_QSL_QUAL>). Можно поместить отметки для 6-ти дипломов. Использовать указанное поле по его назначению не вижу необходимости.
В дальнейшем удобно помечать связи при получении как карточек, так и других подтверждений. AALog позволяет отобранные связи экспортировать в текстовый файл .csv для загрузки и окончательной обработки в EXCEL.
Для преобразования .CSV в .adi всем желающим вышлю программу на PERL csv2adi.pl.

Непонятки:

Меню Awards Manager, диплом RDA.
Пример. Нахожу район ТВ-16, двойной щелчек - появляеся окно QSO, call - RA3RRS,
в поле NOTE(Call) заношу почтовый адрес. Сохраняю. Закрываю окно Contact list for ТВ-16.
Ищу район ST-22. Двойной щелчек - QSO - call RN6HCK. Открываю его окно NOTE(Call) - а
в нем уже прописан адрес RA3RRS. Это как?
Это системная ошибка или я что-то не так делаю?
Поздно обратил внимание, накосячил в логе много. Стёр. Остался выгруженный из DX4WIN
файл.
Буду ждать рекомендаций автора.
Пока ответов на большинство моих вопросов нет. Рефлектор работает, свои письма получаю.
Молчил и форум http://forum.qrz.ru/thread19906-136.html
Остается ждать.

Некоторые особенности логгера:

1. Статистика дипломов. Например, РДА.
Статистику можно посмотреть:
- бумажные CFM, Lotw CFM, eQSL CFM, каждый вид подтверждения в отдельности.
- бумажные CFM + Lotw CFM вместе
- бумажные CFM + eQSL CFM вместе

Но ведь на РДА, да и не только на него, принимается зачет по всем трем видам CFM, в опции Awards manager необходим выбор всех комбинаций CFM, а не только двух предложенных.

2. Коли опция называется "Дипломный менеджер", то результатом ее работы по моему глубокому убеждению должна стать заявка на диплом!
Если заявки нет, зачем такой менеджер?
Я уже писал здесь о том, что возможности делать пометки после получения карточек в логгере не заложено. Автор предлагает:

> Как вариант. В поле Notes for QSO для нужных связей добавляем строку
> #DXCC# (ну или какая больше нравится)
> И потом в фильтр добавляем условие Notes for QSO contain #DXCC#

Т.е. заявку на диплом придется формировать вручную с помощью фильтра.
Зачем в таком случае нужен дипломный менеджер? Получить на экране таблицу статистики и смотреть на нее?

Я выразился не точно. Нужен текстовый файл (лучше .csv) с отобранными
на диплом связями, а заявку из этого файла подготовить в соответствии с требованиями
учредителя диплома нет никаких сложностей.

> Дальше. Если идти в направлении пометки связей, то надо делать признак
> зачета на любой диплом. Пока не понятно как это все хранить.

А вот это вопрос концепции логгера. Я ставил вопросы о QSL-инге, импорте, доступу к
QRZ.RU, отметках отобранных на дипломы карточек в форуме
http://forum.qrz.ru/thread19906.html
и в данном рефлекторе. Мне не нравится как реализованы эти функции. Для себя я их
переделал так как мне нравится.
Но, одно дело показать автору незначительные шероховатости в его программном продукте,
и совсем другое - предлагать что-либо исправить или изменить в заложенных в логгер
функциях. Поэтому я и не просил и не буду просить автора об этом.
Он сделал так как посчитал нужным.
Я начал искать логгер на замену DX4WIN более года назад. Пробовал разные, читал форумы.
Даже термин такой: "хотелки" пользователей запомнился! Но автор, если судить по датам
первых сообщений форума, концепцию своего продукта выработал лет пять назад, внести
существенные изменения очень сложно, да и хотелок от этого не убавится.

Задавал аналогичные вопросы в форуме http://forum.qrz.ru/thread19906-136.html

Две цитаты:

Подскажите пожайлуйста как заполняется окно QSL service "Adress for envelop label"?
В NOTE (QSO и Call, пробовал в оба) заносил почтовый адрес с сайта QRZ.ru, но в
окне "Adress for envelop label" он не появляется.
Писал адрес непосредственно в окно, на печать ничего не выводится.
В HELP не нашел, в форуме тоже.

Попробовал импортировать почтовый адрес. В строку АДИФ файла включил поле
<ADDRESS:6>VIDNOE
Строка нормально загрузилась, поле ADDRESS - проигнорировано.

Форум, похоже, приказал долго жить. Тишина с 06.04.2012.

Вообще ничего не понимаю. Какой косяк? Я задал вопрос автору.
Как в окно QSL service "Adress for envelop label" занести почтовый
адрес и потом его напечатать на конверте?
Окно есть, как занести туда данные? с клавиатуры впечатать?
Зачем тогда такое окно? Я же автора спросил.

>> Форум, похоже, приказал долго жить. Тишина с 06.04.2012.

> a65br с вытягиванием данных в него из интернета, пожалуй, не плоха.

Какой же это косяк?
Я первый раз вопрос про окно адреса задал в рефлекторе 29 марта.
И только сегодня уяснил, что что эта функция не нужна пользователям
логгера. Заложенную в начале разработки логгера функцию за ненадобностью
реализовывать не стали. Все ясно и понятно, непонятно причем здесь косяк.

Здравствуйте, Andy!.

Вы писали 17 апреля 2012 г., 22:19:00:

> Алекс, зачем так шуметь, вам же АВТОР и ответил :)
> Вы обнаружили то, что до вас вообще никому не нужно было. К чему такой кипиш?!
> Для пользователей все это "хотелки", а для автора - работа, в большей степени
> затрагивающая время, но не приносящая лично ему отдачу. Так что лишний раз
> сказать СПАСИБО! - не грех.

Вы о чем, Андрей?
Я задал конкретный вопрос. В опции QSL service есть окно для почтового адреса.
Я спросил как его заполнить и как напечатать адрес на конверте.
Вы пользователь AALog3? У вас есть ответ на этот простой вопрос?
Ответа не вижу. Раз нет ответа - просто промолчите. Этот вопрос я задал первый раз
в форуме 29.03.2012. Прошло 3 недели. Ответа, в том числе и от вас, не получил.
Написал в рефлектор, присоединился к вопросу, который задал A65BR.
Вы в качестве кого в этом рефлекторе? Если судить по использованному
вами сленгу, то могу предположить.
О каких хотелках речь идет? Я свои хотелки реализую сам, почитайте мои
письма в этот рефлектор.
Писал о косяках AALog3, считая что помогаю автору шлифовать его продукт.
Уверен - он деньги на своем логгере не зарабатывает. Отдыхает в HAM RADIO!
Сейчас 22:30 мск.
Из дома уехал в 06:00. Проблемы на работе, пробки в дороге, невестка на 5-м месяце-
-нервная, внучка всю дорогу в детсад орала - не выспалась, старший сын - Мерса боднул
и т.д и т.п.

Вернулся домой включил трансивер, надел гарнируру, уткнулся в монитор и забыл
про всё!
А вы мне предлагаете еще и собачиться в HAM RADIO. Мне этого не надо!
Я здесь от проблем отдыхаю.

С праздником, Днем Радиолюбительства!

73! Alex

На удивительный рефлектор я подписался 2,5 месяца назад.
В нем мне и переводы делают, и учат как дифирамбы автору
писать.
Вот только на конкретные вопросы почему-то отвечать или
забывают, или не желают.
Ну да ладно, переживем.

Коллеги! Я устал повторять одно и тоже: у меня нет просьб
к автору. Нет!
Процитируйте если найдете. Я писал сначача в форуме, затем
в этом рефлекторе лишь об огрехах программы и задавал
вопросы, если мне было что-то непонятно. Вы мои письма
вижу невнимательно читаете.
Будет Сергей исправлять ошибки или нет - его дело. Скорее
всего будет.
В который раз повторяю - ответов на большинство своих
вопросов я не получил. Про апельсины в бочках упоминал,
читайте Ильфа и Петрова.

Ну, не знаю почему так, но меня постоянно отбрасывает к сообщению "заполните все формы", хотя я их заполняю в соответствии с инструкцией, и на этом всё заканчивается.
Кстати, не принимаю участия в обсуждении программы в рефлекторе по простой причине: подписался, сообщения получаю, но большую часть из сообщений а также прочитать свои отправленные сообщения, т.е. участвовать в обсуждении весьма проблематично, не хватает ума настроить кодировки, потому как в отображаемом рефлекторе вместо текста на экране выводится какая-то галиматья, а сидеть по полчаса перебирать все шрифты ну никакого желания нет.

Вы писали 21 апреля 2012 г., 15:25:35:

> Хвала тебе, Велики и Могучий Русский язык!
> Александр, просьб нет и ответа не получил, это и есть
> просьба...

Очень сложно мне сирому и убогому обладателю всего лишь
5-значного позывного понять глубокое умозаключение гуру
с 4-значным позывным. Поэтому обращаюсь с просьбой
к переводчику Сергею, который переводит
> с русского на понятный.
Не сочтите за труд, переведите вышеприведенную цитату.

> Автор программы Александр, RZ4AG,
> раз вы Сергея
> упомянули, понятно почему не видите ответов автора :-)))

Перед Александром извиняюсь. Сергея прошу перевести на
понятный язык и эту цитату.

> Давайте без обид, хочется много, а вот можется не всегда..
> У нас тут как-то было тихо, без скандалов, нашли ошибку,
> сообщили, ждем обновления.

> 73! Андрей RM8W ex RW9WA
> ICQ 7359988

Я писал о том, что в HAM SPIRIT лично я отдыхаю. От рефлектора
устал. Вместо обсуждения конкретных вопросов логгера - сплошная
бодяга. Сначала были "кипиши", теперь я стал и инициатором скандалов.
Не нравится - "тихо" варите логгер в своей кастрюле, в собственном соку
и в своей кодировке.
Звиняйте, но бананів нэма, а от бочковых апельсинов у меня уже
изжога.

Добрый день!
Собрался потестировать свежий ААТест в Весеннем полярном спринте.
По-порядку...подключил к серверу 2 машины (работаю SO2R с двумя
компами в сетке).
Вроде все ОК...
Подключаюсь к RBN...как только вывалился первый спот - ААТест сразу
завис на компе с сервером :(отключаю ААТест на втором компе от сети,
на первом компе выключаю ААТест аварийно. Отключаю AAServ.exe
Очищаю сервак.
Открываю ААТест на обоих компах...снова подключаю оба компа к сети.
Подключаюсь к RBN...снова завис при первом же споте :(
До теста 10 минут.
Меняю ААТест на проверенный 1.95 (с exe-ком от 24 июля 2011 года;
кстати НЕ виснет!!!).
Начинаю тест...вбиваю связь на первом компе - даю номер 001 и...в окне
New QSO где должен в поле Nr Sent появиться 002 нет ничего!!!
На втором компе по-прежнему 001, хотя первая связь занеслась в лог.
Перезагружаю ААТест на обоих компах...синхронизирую...есть 002 в поле
Nr Sent...уфф думаю - наверное сам чего-то не так нажал.
Ввожу связь на втором компе в лог...даю номер 002...при этом вместо
003 в поле Nr Sent опять пусто, а на другом компе - 002...
Короче плюнул я и бросил это дело.
Кстати при работе на одном компе SO1R все ОК! Номера нормально
увеличиваются. Проблема только при работе в сетке.
Так-что не получилось у меня нормально поработать в Весеннем спринте
:(
Александра прошу обратить внимание на версию 1.95
Не виснет ААТест в этой версии!
Ну и поправить бы Весенний спринт при работе в сети!

73, Константин
RU4SS
P.S. Буду работать 1 мая в RCC-cup на 1.95 версии...до встречи!

Dear Alex_R6CW,

Проблема с передаваемыми номерами имеет место при работе в сетке -
была в SAC CW (в 1.100 исправлено), теперь выяснилось, что и в
Весеннем спринте есть.
Насчет подвиса...это связано с кластером.
Если работать без кластера - проблем нет.

Пытаюсь инсталлировать кластер монитор и аавойс
Всё шло хорошо, но на пути к счастливому финалу меня ждала засада, прошу помощи:
Итак, Кластер монитор после установки и запуска говорит: TProgress Bar property out of range и на этом всё заканчивается.
С ААвойсом интереснее, он после установки и запуске выводит сообщение:
Access violation at adress 004778c4 in module AA.Voice.exe
после чего закрыть его можно только через диспетчер команд.
Переустановка эффекта не дала.
Интернет VPN от билайна.
Все помощники начинаются с момента, когда программы УЖЕ инсталлированы и остаётся их только настроить в работу, а вот сам момент инсталляции по умолчанию как бы типа загрузил и всё, уже работает.
Самое интересное состоит в том, что кластер в ААлоге (3) трудится как пчёлка, а кластер монитор и аавойс я заимел желание пристегнуть к ААтесту, хотя в тестах кластером и аавойсом никогда не пользовался, а тут хотелка вдруг проснулась.
Так что, не судьба что ли?

Здравствуйте.

небольшой глюк. может только у меня ?

в версии 1.99 и в 1.100
при открытии программы , не видно окна статистика. нажимай
кнопку
или нет.
пробовал изменять размер экрана, все равно не видно :-(
откуда его доставать ?

спасибо, помогло :-)
в обоих версиях параметр этого окна был left=1361.

в какой то из версий было подобное.
тоже лечилось увеличением разрешения экрана до максимума и сдвигом
окна куда надо.
в этот раз наверное слишком далеко его задвинули :-)

Здравствуйте, Dxsoft-rus.

еще одна проблемка.
при создании файла отчета, например кабрилло, постоянно нужно заново
вводить домашний адрес. по выходу из программы не сохраняется.
есть ли таблетка от этого?

Андрей, Вячеслав, день добрый!
Спасибо за ответы и совет.
Такая задача (типа конвертация из ADI в CBR) появляется в различного рода Днях активности, которые как-бы и не соревнования (с их формализованной системой контрольных номеров и т.п.) и в то же время, организаторы просят отчет в формате CBR (Ермак), что с точки зрения судей - предпочтительно.
Было бы здорово, если бы AALog такую возможность предоставлял...
Да, Андрей, править 407 QSO ручками - занятие еще то... :)
Чисто случайно вышел из положения с помощью программы adif2cabr_201 (автор SP7DQR).
Но нашему AALog'у было бы неплохо уметь формировать CBR файлы! :)
Еще раз всем спасибо!
Дмитрий / RK1AS

Вот один из вариантов:
- выгружаете QSO из AALog3 в формате ADIF
- импорт .adi файла в UR5EQF
- экспорт из UR5EQF .cdr (Формат "Ермак")
на 5 минут работы.
Не получится - пришлите мне свой .adi файл, через 10 минут получите обратно в формате "Ермак". Самому нужно будет лишь заполнить заголовок.

Доброго всем дня

Хотя ранее я уже и обращался за помощью, но поскольку вопрос по умолчании был похоронен, мне чисто любопытно, как же запустить этот самый замечательный кластер? Интересен момент именно инсталляции и подключения. Пробовал на 4-х компах с разными системами, везде результат нулевой. Кластер в ААлоге работает, пробовал ради любопытства установить другие кластеры - всё запускается впол-пинка. Но мне интересно запустить именно ЭТОТ кластер.
Спасибо
RN4CA

From: Сергей Емельянов
Topic: 1554 Message: 1556

Получается везде одинаково: кластер монитор после установки и попытке запуска говорит:
TProgress Bar property out of range и на этом всё заканчивается.
Программу скачивал с сайта.

Раз Вы ответили, то осмелюсь задать ещё один вопрос про
инсталляцию ААвойс, он после установки и запуска выводит сообщение:
Access violation at adress 004778c4 in module AA.Voice.exe
И всё.
По доброте душевной мне сбросили программу с кряком, загрузил - заработало сразу.
Естественно эту программу удалил, не пользуюсь кряками, но увидел, что программа работает.

Вообще то изначально я понимал так, что кластер монитор как бы недостающая часть ААтеста, и единственно хотел бы увидеть ААтест с кластером. Понимаю по сообщениям, что народ пользует ААтест с кластером, ну хоть кто нибудь подскажите, как его запустить.

Тогда я не понимаю, почему в ААтесте после открытия окна кластера нет меню настроек для коннекта с сервисом. То есть выходит неактивное окно с неактивными закладками. И появляется сообщение, что надо чего-то догрузить. Поэтому я и подумал, что кластер монитор и есть та самая недостающая прибамбасина для кластера в ААтесте.

1592. SeaTTY 2.36 is released

Yahoo group: dxsoft-rus
Date: 2012-09-06 18:47:20 UTC
From: Sergei Podstrigailo
Topic: 1592 Message: 1592

Hello All,

??????? ?????? ?????? SeaTTY:

http://www.dxsoft.com/seatty.zip
http://www.hamport.com/seatty.zip

--
Best regards,
Sergei

==========

SeaTTY versions history

V2.36
1000 Hz deviation is supported in HF-FAX mode now.
Minor bug with working frequency saving (if AFC is switched on) is fixed.
V2.35
Maximum number of RTTY/NAVTEX Station ID filter items is increased to 32.
Filter for GMDSS DSC message format was made.
Some minor improvements were made.
V2.31
The "Setup / Other / Start SAME message by 1050 Hz tone" option was made.
V2.30
More settings for spectrogram and oscillogram colors were made.
V2.21
Options for tuning auto start / auto stop parameters of FAX mode were made.
See "Setup/FAX" page.
V2.20
Message filename shows time of message start, not time of message end now.
The "Setup / Other / EOM timeout in SAME" option was made.
A bug was fixed - a message with station ID in filename couldn't be really deleted by
"Delete" command.
"Auto start" and "Auto stop" procedures were slightly optimized in HF-FAX mode.
V2.10
"Setup / Other /Ignore EOM in SAME" option was made.
It is useful if SAME system transmit EOM _before_ voice message.
V2.0
The documentation was updated.
Some issues occurred under Windows Vista were fixed.
Default working directory of software is located in "Application Data"
("ProgramData" under Vista) in place of "Program Files" now.
V1.80
GMDSS DSC (HF and VHF) messages decoding was made.

Приветствую!
Спасибо за программу!
Заметил при тестировании, что множитель считается немного неправильно.При повторной связи снова засчитывает этот множитель. Хотя это только участникам проблема - думаю программа судейская посчитает. По Положению: Множитель: преффиксы по списку диплома WPX и номера по списку диплома RDA (у башкир) на каждом диапазоне один раз за время теста.

Замечательно.
Нельзя ли еще добавить опцию Do Not Need в окне Edit QSO info в правом нижнем углу - по отношению к получению карточки. Хорошо бы если бы эта опция появилась и в фильтре через F9, а также под правой кнопкой мыши в выпадающем меню.

Поясню зачем. Сам получаю запрос от корреспондента на директ и оплату через ПайПал, в этом случае он свою карточку не высылает, да и не нужна она, как правило. Т.о. Карточка в итоге отправлена, но не получена - строка в логе окрашивается в соответствующий цвет. Если цвет "гасить" галочкой в поле QSL received, то некорректная информация получается.

Заранее спасибо.

Олег / A65BR

Ну есть же кнопки для каждого диплома: QSL, eQSL, LOTW. Для одного диплома , к примеру, eQSL засчитываются, так жмем кнопку eQSL. Для другого эта кнопка неактивна. Также и с автозачетом.

Приветствую всех!
Переустановил операционную систему XP.
Установил ААЛог 2.47
Все ок...но...когда делаю поиск по журналу Find QSO...вылезает окно
Insufficient disk space
Непонятно, на каком диске (сетевом или где папка Hamradio с базами)
недостаточно места?
Вроде на обоих есть с запасом.
Поскажите, в чем может быть причина?

Здравствуйте.

Поздновато, но пора переходить на AALog3.
Скачал, через адиф файл перегнал ЛОГ из 2.47.

1. Не могу понять, почему при выделении нескольких связей, нажимаю CTRL+L - отмечается в Queued только последняя, одна. Надо вставать на каждую связь и нажимать CTRL+L - неудобно.

2. Как сделать, чтобы при печати лейблов, печаталось в МГц, печатает в метрах. На примере, в Aallabels, печатается в МГц, а непосредственно из QSL service - в метрах.

3. Почему на лейблах время печатается с секундами? Как убрать секунды при печати? И время, например 07:33, печатается 7:33, как сделать при печати чтобы 0 (нолик) тоже печатался?

Спасибо. Все получилось, сделал.

Еще такой вопрос. В 2.47 ЛОГи были разделены на три Log set: A,B,C.
Было удобно:
в A делал все свои ЛОГи,
в B - сына,
в C - выездные, СПСные и пр.

В 3-й такого не вижу. Программа указывает только один Default log set.

Еще вопросик :-)

В случае, если на карточке надо указать менеджера. На наклейке указывается
просто позывной менеджера, без приставки "via". Как сделать, чтобы эта
приставка появилась перед менеджером?

В Aallabels перепробовал все, не получается.

Многовато для 6 тыс. Мой Лог около 40 тыс связей, ЛОГсетов внутри много, а
размер всего 40 Мб.
Надо пофиксить базу.
Если в комплекте есть restore.bat, запустите. Ну не буду повторять, что текущий
файл GDB по F5 в другое место на время проведения чистки.

Собственно говоря , bat файл в папке AAlog один: restore.
 Помнится мне, в прошлом (?) году на форуме уже рассматривался вопрос о восстановлении базы с помощью restore.bat, но , к сожалению, у меня этих сообщений не осталось...

> Надо автора попытать...

Садюги! :)))

Значится так... я не зря про restore.bat говорил. Этот файл запускает пару программ, которые чистят базу от глюков и заодно сжимают. Саму базу можно сжать только внешними средствами. Вот для этого в вашем каталоге и были (или еще остались) утилиты работы с БД.

Ну а если:
>Этих .bat было с десяток, для каждого конкретного случая. Я их уже
>давным-давно убрал у себя... на данный момент в них нет нужды.

так ить хозяин-барин, пусть тогда базы будут большими... зачем в избе веник, тараканы все съедят :))))

Кроме того, очень неплохо порой научиться паре приемчиков работы с SQL, шоб потом бамбук в стороне не курить. И в этих удаленных .bat были примеры работы с базой.

From: Serge Shepelin
Topic: 1700 Message: 1700

Здравствуйте, Alexander.

У меня сейчас в AALOG3 стоит версия 1140. Когда я начал конвертировать в ADIF для автозачёта в RDA, окозалось, что не всё получается. Андрей Корпачёв сказал мне, что не хватает некоторых обновлений. До этого мне версии были не очень нужны. Сейчас мне хотелось бы обновить лог по всем версиям от 1140 до 1157. Подскажи как это сделать, чтобы не поднимать старую перписку из рефлектора.

From: <rv9ax@...>
Topic: 1717 Message: 1717

Александр, приветствую.
Уже обращался ранее с подобным, еще раз хочу напомнить и уточнить.
Одна из проблем в ААЛоге (на мой взгляд) неправильное распределение позывных по CQ (WAZ) зонам. В основном это касается американских и канадских позывных. Как результат в таблице диплома WAZ полная чепуха с 1-й по 5-ю зоны. Т.е. ААЛог сортирует позывные по цифре и еще какому-то непонятному признаку, что не есть правильно. Совершенно однозначный признак зоны это штат, отсюда и надо "плясать"
Предлагаю:
1. При загрузке ЛоТВ брать оттуда не только штат, локатор и ИОТУ если таковые имеются, но и номера зон. Они почти всегда есть, но не 100%
2. В случае отсутствия информации по зонам в ЛоТВ или же станция в ЛоТВ не представлена - вводим штат вручную - всего 2 буквы и, как следствие, должна автоматически корректироваться зона.

Вот как пример WA3C - ААЛог определяет 5-ю зону сразу после связи. Получаем ЛоТВ, появляется штат - OH, зона остается 5-я. Руками пытаемся править... Открываем W8... OH... AALog предлагает 04,05 зоны... Этого не может быть! Огайо не находится в 5-й зоне.
Очень надеюсь на понимание.
73!

Вот как-то так:
10/12/11
В связи с поступающими вопросами, касающимися изменений, внесенных в программу DXCC относительно разделения Российской Федерации на европейскую и азиатскую части, CPP информирует, что в основу данного решения ARRL были положены изменения, внесенные в положения диплома WAC на заседании Административного Совета ИАРУ еще в 1985 году (см. Календарь ИАРУ N 132 от 10.01.1986 г.). В августе 2011 г., на конференции ИАРУ - 1-й регион, между ARRL и Союзом радиолюбителей России была достигнута договоренность о том, что в соответствии с границами WAC Республика Коми и Пермский край в программе DXCC будут отнесены к европейской части РФ, а Республика Башкортостан и Оренбургская область останутся в Азии.
Что касается достижений радиолюбителей Пермского края и Республики Коми по дипломной программе DXCC, то данные изменения никак на них не повлияют и их результаты не будут аннулированы.

Всем привет!
Озадачился опробовать RTTY на связке RigExpertPlus + TrueTTY. Не могу заставить работать FSK порт.
У кого нибудь работает ЭТО в режиме RTTY FSK - именно FSK, AFSK не интересует.

В настоящее время и уже года 2 с половиной для RTTY FSK использую вышеназванный РигЕксперт в связке с Миксой. Все нормально, все работает - в смысле COM7 - FSK. Более того - работает MMTTY в RTTY FSK.

А вот TrueTTY - никак не хочет. Может дело в USB драйверах? Я пользую те, что названы РигЕкспертом - FTD. А на веб-сайте dxsoft предлагаются другие. Насколько это критично? При нынешних драйверах COM порт FSK создается в системе, но TrueTTY его или не видит или не корректно использует. Управление PTT по порту FSK отсутствует, а если выбрать другой порт - CW/PTT (у меня COM5), то управление PTT есть, но манипуляции FSK естественно там не будет.

Кто что может подсказать?
Заранее спасибо.

Сергей,
Спасибо за ответ!
В личку ничего не получал, потому сюда и написал.

Да, РигЕксперт (и не только) работает по виртуальному ком-порту и на режим FSK выделен отдельный порт.
Вся документация есть на сайте http://www.rigexpert.com/index?f=downloads
Вот по интерфейсу http://www.rigexpert.com/files/manuals/plus/rep_manual.pdf

В двух словах - РигЕксперт Плас с драйверами для USB порта создает 4 виртуальных ком-порта:
1.CAT
2.CW/PTT
3.WinKey
4.FSK

В COM-порте для FSK имеется возможность управления PTT по линии RTS либо интерфейс автоматически переводит трансивер в режим передачи при появлении FSK манипуляции. Эти опции возможно выбрать джампером внутри интерфейса.

При попытках работы с TrueTTY переход на передачу не происходит ни при каких условиях.
При попытке установить галку в свитч Produce FSK output at TxD выскакивает сообщение об ошибке.

Имею положительный опыт настройки RigExspertPlus RTTY FSK в MMTTY и N1MM, так что если будут вопросы плана "а как там это работает?" - с удовольствием отвечу.

Ну я же отвечал в личку:

Вообще-то, большинство USB/COM конвертеров не поддерживают скорости ниже 300
Бод, поэтому и RTTY FSK не работает.

Если работает с Миксом - значит, там еще какой-то интерфейс для FSK
организован, НЕ в виде обычного COM-порта...

rgn> Я пользую те,

Я вобщем то не уверен, как это работает, но вдруг поможет. Если в Миксе открыть установки FSK Serial Port, то все окошки погашены в отличии от Других портов и в погашеных окошках установлены параметры - Baud Rate - 1200, Data bits - пусто вообще, Parity - None, Stop Bits - 1.5

Сергей,
Подарить, к сожалению, нет такой возможности.

TrueTTY находится на одном из первых мест по приему телетайпа в рейтингах, хотелось бы самому проверить. Будет жаль если Вы оставите программу без внимания.

Вообще вернее было б конечное время, ибо связь порой длится не 1 мин. и записывают в ЛОГ именно последнюю минуту. Но это по-старинке. Программа пишет оба времени, так что для того, чтоб АДИФ скушать, можно любое.

Добрый день

Основа всего - aalog.gdb. При его наличии, все на месте и все легко восстанавливается. Но если система была Win7 и выше, то важно было скопировать ПРАВИЛЬНЫЙ aalog.gdb.

Мне тоже интересно, что такое ПРАВИЛЬНЫЙ aalog.gdb?
У меня в WIN всего один файл с расширением GDB.

P.s. если не ошибаюсь, после переустановки системы, достаточно просто скопировать в удобное место ВСЮ папку ААЛог3 и будет счастье?

В windows vista и выше, если программа установлена в Program Files,

операционная система сама создает копию изменяемых данных в профиле

пользователя, т.е. в папке Users\Имя_пользователя\где-то-там-далеко. И

работает именно с той копией данных.

ааааааааааа, вот оно как, у меня в WIN8 на диске Д папка РАДИО и в ней уже
ААЛог
запрятан :-) Все там и пишется (наверное) :-))))

Здравствуйте.

Сам я до сих пор пользуюсь AALog 2.47, никак не могу перейти на новую версию :-)

Сбой AALog 3.1 был у UA9XL - менеджер наших СПС-позывных. Все восстановилось. Спасибо за дельные советы. Новый ЛОГ установил ему уже на диске D, на всякий случай. Система Windows7.

Все три нижеуказанные файла ранее были установлены по умолчанию, и находились в папке C:\Program Files\AALog3.

1778. макрос своего позывного и номера

Yahoo group: dxsoft-rus
Date: 2013-06-14 11:25:20 UTC
From: Alexey Shcherbakov
Topic: 1778 Message: 1778

Добрый день!

А нет ли такой возможности, при работе CWType совместно с AATest
использовать некий макрос, который будет брать позывной и номер из программы AATest?

актуально для очных соревнований, где надо быстро сменить позывной и номер между турами.
По идее, задал эти поля в AATest, а CWType получало бы их типа как [my number] и [my call]

Так же было бы здорово, если бы можно было использовать макрос с данными частоты второго
места в сети (в AATest это инфо есть в team frq map)

Dear Alexey,

~[imyCall] - макрос своего позывного, прописанный в AATесте
(config/station/user exchange).
~[isNumberSent] - макрос передаваемого номера, прописанный в AATесте
(config/station/user exchange).

Про частоту второго радио тоже актуально - но пока такой возможности
нет...

1786. вопрос про AATест

Yahoo group: dxsoft-rus
Date: 2013-07-29 20:15:45 UTC
From: Alex_R6CW
Topic: 1786 Message: 1786

Здравствуйте, Dxsoft-rus.

в прошедшем IOTA по традиции воспользовался испытанным логом.
но вот при формировании отчета и adif выяснилось, что в них не попадают номера островов.
да и впроге их приходилось вносить в поле notes. по другому не получалось.
можно ли победить эту проблему?

Есть и там , и там. В кабрилле , где положено..., в ADIFe поле
<SRX_STRING:X>xxx/xxxxx - Nqso/Niota
> да и впроге их приходилось вносить в поле notes. по другому не
> получалось.
просто в поле принятого номера
> можно ли победить эту проблему?
??? - по умолчанию AATest v. 1.105

спасибо. уже разобралдся :-)
а то пытался в поле принятого номера вбивать / не давал AATест.

н еразобрался сам перед тестом ,сам виноват.

в откротом для редактирования окне все добавляется. НО. обязательно
буквы континентов нужно набирать заглавными. маленькие буквы программа
не сохраняет.

1792. AALog 3.2

Yahoo group: dxsoft-rus
Date: 2013-09-14 14:14:03 UTC
From: Alexander Anipkin
Topic: 1792 Message: 1792

Приветствую

Выпущен AALog 3.2 build 1168

Полный инсталлятор
http://www.dxsoft.com/aal3.zip

Обновление
http://www.dxsoft.com/aal3-upd.zip

+ вы можете загрузить список пользователей LoTW (Files - Import - LoTW users list) и в окне новых связей AALog будет показывать что станция участвует в LoTW
+ можно настроить клавиша Ins для быстрого переключения между окном ввода связей и основным окном
- если окно ввода переведено в режим Write log, то это отображается в верхней строке и часы прячутся
- снова можно вводить рапорты 59+10 db, для увеличения значения S в рапорте используйте Ctrl-"+"/Ctrl-"-"
+ нажатие Alt+Backspace возвращает в окно позывного последний сохраненный позывной
+ в правом нижнем углу основного окна оотображается число выделенных связей
- поле freq в окне ввода новых связей теперь доступно в любом режиме. При выходи из этого поля AALog постарается установить верный диапазон в поле Band
+ Добавлен поиск QRZ.RU <http://qrz.ru/> и HamQTH.com. Теперь AALog может искать в QRZ.COM <http://qrz.com/>, QRZ.RU <http://qrz.ru/>, Hamcall, HamQTH.com, dxsummit.fi, ik3qar.it
+ можно выбрать какие интернет базы включены для поиска, а какие не использовать.
+ добавлена возможность сохранять и загружать списки полей в окне выбора отображаемых/экспортируемых полей
- поправлены мелкие баги

Приветствую

Мда... Пора на свалку...
Заменил клавиши вставки прошлого позывного на Ctrl+Alt+Backspace
Давайте неделю-две оставим на быстро добавляемые хотелки и к 5-6 октября
выложу с ними версию.

Итак
1. Alt+Backspace -> Ctrl+Alt+Backspace
2. Чтобы в Internal callbook окне Quick search был намертво зафиксирован
английский язык

Кому еще какие МЕЛОЧИ нужны?

Кому еще какие МЕЛОЧИ нужны?

Пользую Лог на 2-х компах, дома и за городом.

При заливке подтверждений LOTW приходится заливать

подтверждения отдельно по дате на каждом из компов.

Т.е. если на одном утром обновился, то вечером на другом

придется обновлять подтверждения за неделю.

Не очень принципиально, но из хотелок на будущее.

73! Андрей Корпачев RM8W ex RW9WA, UA9WEE

А смысл? Если на карточке хочется мегагерцы печатать - можно поменять
название. Вместо метров прописать мегагерцы.

Наоборот, надо добавить новый формат частоты *14.120.000*, чтобы корректно
работала закладка "Draft QSO list"

Смысл в том, что мне как бы все равно, что я работал на 14,038 или на 14,039 . Я работал на 14 мГц.

Прописал я мегагерцы, но при печати формируется окошко в мГц, иногда с запятой после цифры, а бывает что и нолик выскакивает, посмотрите на приаттаченном файле.

не понимаю зачем в Frecuency format выбор до герца, неужели это кому то интересно.

И еще бы одну хотелку воплотить: редактировать лист перед печатью, как было в 2.47.

Андрей, повторюсь. Если вам удобнее видеть диапазон в мегагерцах, то никто
не мешает вам настроить это.
Config - Bands list - Edit Band Info
Меняете Band caption на мегагерцы и используете это поле в лейблах.

Здравствуйте, RM8W-Ufa.

Вы писали 15 сентября 2013 г., 19:58:21:

==

Кому еще какие МЕЛОЧИ нужны?

=;

Всем привет,

про хотелки

хорошо бы сделать функцию показа членов LOTW

в окне Spot LIST кластера, чтобы было видно сразу всех (ну примерно как в бэндмастере),

а то надо сначала щелкнуть по позывному чтобы узнать про его увлечение LOTW

в окне New QSO .

Спасибо за понимание.

Александр! Есть предложение по DX Notebook. Как во 2-й версии сделать автоматическую загрузку при старте лога. Но с возможностью в любое время отключить. И еще, для наглядности, разукрасить в разные цвета строки с дх-ами. На пример: если до начала экспедиции остается 3-5 дней - строка с информацией окрашивается в светло-желтый цвет, экспедиция началась - в светло-зеленый, и к розовый, если экспедиция прошла. Думаю, будет очень удобно.
На этом пока всё. Всего доброго! С уважением, Вилли DF7GG.

Здравствуйте, Александр.

Напомню старую просьбу.

При вводе новой связи после поля BAND, выскакивает окошко с ошибкой "Класс не зарегистрирован".

Нажимаешь ОК и потом переходит на поле RST.

Как-то Вы обещали подправить, но видимо забылось ;)

Вот такая хотелочка у нас :)

Sergei Podstrigailo пишет:

> Не знаю зачем, но в TrueTTY и DTMF-декодер есть :-)

То RU4SS
Действительно :-)
Тогда вдвойне непонятно, зачем тебе 2tone декодер,
да еще и сопрягать его с TrueTTY ?!
Получить гибрид или новый интеллектуальный продукт? :-)))

Dear Sergei,

Т.е. в добавлении 2tone нет смысла?
Он и так, по сути, присутствует в TrueTTY???

73, RU4SS

Не планируется ли сделать "будильник" в списке спотов? Чтобы при появлении new one подавался звуковой сигнал? Очень актуальная фича для НЧ диапазонов.

Если речь о BandMaster (канадском), то он работает совместно с AALog (например с eqf такой совместимости нет) и может очень многое, вот по памяти: 1- фильтры: по диапазонам, модам, новым территориям, степень важности спотов (1-4),... 2- выбор цвета для шрифтов, фона кластера (по видам мод) 3- показывает сплит (др. цвет частоты), показывает повторы, сработан, но не подтвержденные (др. цвет спота) 6 октября 2013 г., 12:13 пользователь Андрей Лашов написал: > ** > > > А можно ли Bandmaster связать с AALOG? 1851. AALog v3.2 - дата LoTW report

Yahoo group: dxsoft-rus
Date: 2013-11-19 11:59:19 UTC
From: Alexei Sirotin
Topic: 1851 Message: 1851

День добрый!

Ситуация - делаю импорт подтверждений из LoTW.
Время 00:15 local (19/11/2013), соответственно 22:15 UTC (18/11/2013).
Всё происходит нормально.
Однако в следующий раз при импорте из LoTW программа предлагает запросить у LoTW данные о QSL начиная с даты 19/11/2013.
Получается, что в данном случае QSL за последние 1 час 45 минут 18/11/2013 не будут импортированы.

Может быть в данной форме запроса к LoTW предлагаемую дату брать из предыдущего ответа LoTW о крайней QSL - <APP_LoTW_LASTQSL:19>2013-11-18 20:16:08 ?

From: RM8W-Ufa
Topic: 1851 Message: 1852

1. Есть предложение по добавлению в печать новой функции.

При распечатывании лейблов было бы желательно

видеть сколько листов занимает печать, в зависимости от

размера лейбла и количества посланных на печать связей:

Говорят DX4WIN это умеет J

При этом можно выделить все, а на печать послать

определенное кол-во листов.

2. Добавить (желательно СРОЧНО) сортировку по полям My QTH, Used
callsign и Operator.

ААЛог - официальный лог Олимпиады в Сочи-2014. Все связи спецстанций

Олимпиады будут сливаться в один ААЛог.

А в чем тайный смысл - выделить все, а печатать не все?
После выделения "все" нажимаем кнопку принт, в открывшемся окне видим все листы... нажимаем на "принт" и ТАМ (если надо) устанавливаем сколько листов печатать. Только не могу понять, зачем такие заморочки.

Саша, пора вернуться к "галочкам" при выделении QSO для печати... Я знаю - обещанного три года ждут, по моему, уже прошло два срока. :)

Subject: Re: [dxsoft-rus] AALog v3.2 - QUEUE

А в чем тайный смысл - выделить все, а печатать не все?

Это просьба R7AA, ОН сейчас распечатывает логи R01DTV/: Связей много, а времени не всегда.

Вот Василий и спросил о возможности послать на печать все 20 тыс. связей, а распечатать их по возможности

по листам.

После выделения "все" нажимаем кнопку принт, в открывшемся окне видим все листы... нажимаем на "принт" и ТАМ (если надо) устанавливаем сколько листов печатать. Только не могу понять, зачем такие заморочки.

да я не спал пару ночей, все работа, работа. Написал а потом и сам сообразил как J

Все пошел спать, а то завтра опять в первую смену. Вечерком и ночью немного

по собираю DX В CQ WW:

Фишка в том, что принтера лазерные греются, на 4-5 листе прилипает бумага,
потому что вытекать клей начинает. НЕ всегда, но на простых принтерах так.

Как Вы видите практически эту операцию (выделить все, а печатать часть)?
Вы выделели все... распечатали, к примеру четверть. Дальше какие Ваши
действия? Ждете когда принтер "остынет" или тупо откладываете на потом...?
И к компу, а тем более к Логу прикасаться нельзя, а если Чубайс подойдет к
выключателю? :)
Вы же понимаете, что после того как распечатаны наклейки, для этих QSO надо
поменять статус "в печать" или "отправлено".
Мое мнение, в этой части, в QSL service сделано все верно и достаточно, а
вот "фильтр" для этого сервиса (не только то о чем писал RM8W) надо
расширить (писал об этом лет 5 назад).

Это вопрос не ко мне! Я тему не начинал.
Я знаю как бы я поступил, потому что то, чего вы пытаетесь выяснить, я выполняю
каждый день. Ну не в радио, конечно.

1861. AALog v3.2 - Нужная галка

Yahoo group: dxsoft-rus
Date: 2013-11-24 09:44:51 UTC
From: RM8W-Ufa
Topic: 1851 Message: 1861

Вроде уже упоминалось, но напомню в ААЛоге -

сделать галку показывать, не показывать повторные связи в Spot list.

Во время теста не хватает 22 дюймового монитора, экран быстро забивается.

А так как в тестах работаю давно, <лишнего мусора> не будет видно.

При работе вместе с ААЛОГ и смене вида работы в окне NEW QSO на нецифровые виды TrueTTY уходит с экрана. Это нормально.
Потом при вызове TrueTTY из трея не управляется трансивер - пропадают настройки выбранного порта в сетапе.
Давно не обновлялся. Сегодня поставил последнюю версию и такая бяка проявилась.
И что делать?

OP> виды TrueTTY уходит с экрана. Это нормально.
OP> Потом при вызове TrueTTY из трея не управляется трансивер -
OP> пропадают настройки выбранного порта в сетапе.

>А вид работы тоже при этом меняете обратно на цифровой?
>Если да - должен восстановить.
Да, например при переходе с телефона на цифровой. Самостоятельно появляется
окно, принимаю, пытаюсь передавать, но трансивер уже не управляется.
Быстренько в сетап, выставляю PTT и работаю очередного RAEM.

>И когда последний раз проверяли - работало :-) Какие точно настройки порта
используются?
Работало все нормально, версия была 2.76, поставил 2.90.
Настройки порта когда работает - Com port, Com 4

>Обе программы (и TrueTTY и AALog) - последних версий?
Сейчас последних
>Настройки портов делаются _не_ из AALoga?
>(Стоит галка "позволить TrueTTY самому настраивать порт" ?)
Нет, в AALoga, установлено use TrueTTY for digital modes и далее в
конфигурации use programm defaults
Сергей, мне пришла мысль, может попробовать переустановить?

Я считал, что use programm defaults определяет, что устанавливается внешней
программой т.е. TrueTTY.

OP> Сергей, мне пришла мысль, может попробовать переустановить?

>Да вряд ли здесь переустановка поможет.
Все таки попробую. Это совсем недолго.

>Надо мотивировать Александра на воспроизведение бага и его исправление :-)
Вам виднее, только как он его воспроизведет? Я не менял настройки ААлога и
TrueTTY много лет, все работало.
Баг с портами проявился только у меня и UX3IW. Мало.
Олег

Писал писал - кодировка почему-то изменилась. Сам прочел через Штирлица.
И вложения здесь не проходят.
В общем получается, что пришлось ставить явные настройки порта в ААЛОге и
что если на кнопке в ААЛОГе стоит галочка на кнопке use programm macros то
работает ини файл из system32, а не тот что в папке TrueTTY. Я далек от
программирования, но зачем так запутано? И как раньше все работало?

Привет всем!

У меня CwType V2.10 и TrueTTY V2.90, AALog 3.2.0.1168+Win XP.
Программы лежат в отдельной папке \HAMPROGS\.
Сейчас нет времени всё проверить,но проблема эта у меня давно..
TrueTTY работает без проблем,а CwType-слетает PTT.
Может сегодня вечером посмотрю.

Удалите TRUETTY.INI из system32

Тогда при запуске TrueTTY он автоматически перейдет в дефолтный рабочий каталог
и подхватит ини-файл оттуда.

И явные настройки порта и макросов из AALog'а лучше не использовать -
оставить "Use program default".

OP> работает ини файл из system32, а не тот что в папке TrueTTY. Я далек от
OP> программирования, но зачем так запутано?

Да не зачем, а "почему" - приходится колебаться вместе с линией
партии (Microsoft), иначе под Vista/Win7/Win8 - сам себя не найдёшь...

Когда AALog запускает TrueTTY, он запускает его
в каталоге system32. Если там файла TRUETTY.INI нет -
TrueTTY переходит в прописанный при установке рабочий
каталог и использует ini-файл оттуда.

Рабочий каталог - это НЕ тот файл, в котором TRUETTY.EXE
находится! Это каталог, прописанный в свойствах ярлыка.

Это примерно
"C:\Documents and Settings\All Users\Application Data\TrueTTY"

(зависит от настроек системы).

Он все появится с XX9XXX
>Тогда при запуске TrueTTY он автоматически перейдет в дефолтный рабочий
каталог и подхватит ини-файл оттуда.
Смотря как запускать. Если автоматом с ААЛОГа то не факт.
>И явные настройки порта и макросов из AALog'а лучше не использовать -
оставить "Use program default".
После долгих экспериментов пусть останется как есть. Все таки все сейчас
работает.

OP> работает ини файл из system32, а не тот что в папке TrueTTY. Я далек
OP> от программирования, но зачем так запутано?

>Да не зачем, а "почему" - приходится колебаться вместе с линией партии

:-(
>Когда AALog запускает TrueTTY, он запускает его в каталоге system32. Если
там файла TRUETTY.INI нет - TrueTTY переходит >в прописанный при установке
рабочий каталог и использует ini-файл оттуда.
При установке с нуля в каталоге TRUETTY файла TRUETTY.INI нет. Я его потом
записываю туда из сохраненных.
>Рабочий каталог - это НЕ тот файл, в котором TRUETTY.EXE находится! Это
каталог, прописанный в свойствах ярлыка.
>Это примерно
>"C:\Documents and Settings\All Users\Application Data\TrueTTY"
>(зависит от настроек системы).
Вот при таком ярлыке бардак даже при автономном запуске. Может подхватиться
INI на "свое усмотрению".
Когда создан ярлык "руками" от TRUETTY.EXE где в свойствах ярлыка объект и
рабочая папка в одном каталоге том где находится TRUETTY.EXE тогда все
нормально запускается.
Сергей, когда-то этот вопрос обсуждался. Сейчас выскочила проблема после
установки пришлось по новой перебирать варианты. Просто в описании указано,

что файл .ini ВСЕГДА ищется в рабочем каталоге. А тут еще каталог system32.
До этого я считал, что рабочий каталог программы - тот где TRUETTY.EXE
Ну в общем пока все пусть так остается как я настроил.
Спасибо за участие!
Олег

Добрый день!

Не получается импортировать LoTW users list. XP SP3, только что переустановил AALog, скачав еще раз дистрибутив. После сноса не чистил реестр. Систему складывал на днях, еще не замусорена. Установка в c:\amator\AALog3. Работаю из-под пользователя, который входит в гр. локальных администраторов. Дополнительно проверил права безопасности на каталог установки. Включил снифер. Он показывает, что нет никаких обращений: ни по DNS, ни по IP. В предыдущей установке при загрузке отключал файрволл с перезагрузкой службы. Подскажите, куда дальше копать?

Добрый день!

Не получается импортировать LoTW users list. XP SP3, только что переустановил AALog, скачав еще раз дистрибутив. После сноса не чистил реестр. Систему складывал на днях, еще не замусорена. Установка в c:\amator\AALog3. Работаю из-под пользователя, который входит в гр. локальных администраторов. Дополнительно проверил права безопасности на каталог установки. Включил снифер. Он показывает, что нет никаких обращений: ни по DNS, ни по IP. В предыдущей установке при загрузке отключал файрволл с перезагрузкой службы. Подскажите, куда дальше копать?

До этой версии стояла версия 1157. Из нее подложил. Базе уже 10 лет.
Где-то окривела.

Попробовал переименовать базы (с той, что установилась из дистрибутива).
Загрузка прошла успешно. Когда вернул все назад и попробовал ввести позывной
- снова эта ошибка:

Aalog

DM.qLoTWUsers:

Can't format message 13:796 -- message system code -4.

Dynamic SQL Error.

SQL error code = -204.

Table unknown.

LOTW_USERS.

At line 1, column 29.

OK

Судя по ошибке о несуществующей таблице, базу aalog подложили старую?

Ну так все верно в крайней версии структура изменилась немного.
Самое простое - скачать обновление и поставить поверх. В обновление включен
конвертор базы.

1884. RE: [dxsoft-rus] AALog3.2_LoTW

Yahoo group: dxsoft-rus
Date: 2013-12-14 06:38:55 UTC
From: Serge Systerov
Topic: 1878 Message: 1884

Доброе утро, Александр!

Не сразу удалось примениться, т.к. работал во вторую смену. Все получилось, правда апдейт 1168 с первого сайта не прошел. Было сообщение что <битый> архив. Может плохо скачался.

Напрашивается пожелание: вместе с версией на сайте выкладывать примечание к версии.

СЕРГЕЮ:

Похоже в новых версиях cwtype и truetty контролируется использование COM-портов программами. Даже при поочередном запуске у меня <слетали> настройки. Смотрю, другие тоже отмечают это.

Это здорово, работать через разные порты. Можно программы держать открытыми одновременно. Но для этого придется дорабатывать интерфейс (заложить еще один порт и <слить> сигналы управления). А пока это произойдет, хорошо бы в программах заложить чек-бокс, дающий возможность работать на один порт, поочередно, конечно.

Сергей

Здравствуйте, Dxsoft-rus.

вопрос такой. есть возможность выписывать карточкине не в шэке , где
стоит программа. в результате их печати, будут ставиться отметки
в поля , что карточка отправлена. если после печати карточек
заливать обратно в основной лог такой адиф файл с отметками, то будут ли соответственно изменяться
поля об отправке qsl?

Спасибо!
У кого занесены в ЛОГ, то можно пройтись по каждому и исправить, нажав на кнопку (зеленую), Change Territory, и затем в окне зажать AUTO, далее APPLY или OK.
Может можно автоматически, но у меня их немного, сделал так.

А есть список по RAEM?

Удачи!

From: Eugene Baranov
Topic: 1897 Message: 1897

Здравствуйте.

При вводе QSO использование в полях Name or QTH "ё" или "~" приводит к сбросу текущей связи, включая позывной. Я знаю, что этой клавише не повезло, но напомню. :)

С уважением, Евгений Баранов, UA3GGP.

1898. Хотелки...

А подскажите пожалуйста, как правильно добавить в список стран новую страну, типа Z81, чтобы и AAlog и DXatlas работали правильно?

Для DX-Atlas надо скачать "заплатку" для префиксов с сайта :-)
http://www.dxatlas.com/Download.asp

1902. [dxsoft-rus] вопрос по AATesr

Yahoo group: dxsoft-rus
Date: 2014-01-11 14:16:19 UTC
From: Андрей Лашов
Topic: 1890 Message: 1902

Срочно помощь требуется - меньше часа до чемпионата РФ, запустил ААтест, открыл конфигурацию станции, вбил локатор - а номер неправильно отображается, должен быть 001 LO21, а реально LO21001, и, ЧСХ, сам лог ругается на такой номер при попытке внести ЩСО. Другую программу уже не успею скачать, установить и освоить.

Что в поле User Exchange в меню Config-station стоит?
должен быть ТОЛЬКО локатор. Только что проверил - все правильно отображает:
001LN28

Александр добрый вечер!
лог устанавливал с нуля на новый ноут у моего товарища,скачал с сайта
установочный файл,поставил лог и в папку подкинул INI и GDB файлы.

Нельзя подкидывать GDB от старой версии. Проще всего скачайть пакет
обновления и поставить поверх. При инсталляции поправится формат базы.

Александр,стояла версия 1168 на стационарном компе,затем был приобретен
ноутбук и на него установлена аналогичная версия 1168.
Несколько дней работало,а затем.....

1917. AALog 3.2

Yahoo group: dxsoft-rus
Date: 2014-02-01 15:07:54 UTC
From: Сергей Юлаев
Topic: 1792 Message: 1917

Здравствуйте, Dxsoft-rus.

WinXP sp3, AALog 1168. Юзаю давно, и не помню ставил Full, или
обновление
В окнах "Новое" и "Редактирование" стали некорректно работать "Горячие
клавиши" "ALT+"(с подчеркнутыми буквами). Точнее, работают только
ALT+M, Q, G. Собственно и определилось, когда заметил, что не работает
ALT+S (сохранение). CTRL+ работают, хотя проверил не все. Да и к логу
претензий нет. Мышью тоже все управляется нормально, поэтому не могу
локализовать, когда это случилось (думается уже в 2014)
В результате "танцев с ...", выяснилось, что аналогичная история с
версией 1156, лежащей в другой папке (другом диске), и вообще не используемой ни разу
(не вспомню зачем оставил). Поэтому не стал пока переустанавливать
1168, решил спросить...
И более того, запустил AATest (последний
раз использованной в ONY 2014), там тоже не работает ALT+S и ALT+цифра
(вкл/откл окна), хотя там использую Enter и мышь, (но должно работать, судя по описанию...)
В обозримом прошлом (когда еще работало), каких либо новых софтин не
ставил (кр. WIFI карточки с драйверами), и автоматическое обновление
WinXP)
Как-то много, слов получилось...

--
С уважением,
Сергей Юлаев, UA3AAJ mailto:ua3aaj@...

В Окне Ввода почему-то S не подчеркнута, но Alt+S сохраняет связь в
журнал, здесь же Alt+H открывает "Help". Больше ничего не проверял...
лень...
У меня тоже WinXP (и автоматическое обновление
WinXP) sp3, AALog 1168

Здравствуйте, Dxsoft-rus.

Здравствуйте, Vjatseslav.

Вы писали 1 февраля 2014 г., 19:22:02:

>В Окне Ввода почему-то S не подчеркнута, но Alt+S сохраняет связь в журнал, здесь же Alt+H открывает "Help". Больше ничего не проверял... лень...
>У меня тоже WinXP (и автоматическое обновление
>WinXP) sp3, AALog 1168
·_'___

Ну дык, и у меня еще недавно все работало... И ALT+S и ALT+H и прочее. А теперь только ALT+Мода, +Qth, +Grid
А S действительно не подчеркнута, но это ошибка графики, а функционально, это отличие "горячих клавиш" и ALT+S
чуть ли не основная.
Подожду немного, может Александр что скажет, и начну новый "танец с ..."
Ведь оно работало! И на ноуте, под Win7, до сих пор.[]
PS Думается ,учитывая полную аналогию в 1156 и в AAtest, "дело было не в бобине"...

>Раскладка на клавиатуре в этот момент какая? Русская или английская?
При любой. Стоял Punto Sw., выключал и включал яз панель Win
-аналогично

From: EW2WW (Borisov ARC)
Topic: 1810 Message: 1923

AALog 3.2 вРН ДЕКЮРЭ?
GD, Alex.

Установлено: XP и ААлог 3.1.0.1157

Потихоньку перебираюсь на Виндовс 7. Поставил на другой винт

семерку и ААлог версии 3.2.0.1168

Подставил пару файлов из старого (ьазу связей и размеры граф)и всё работает вроде ОК.

Такиеже поля, цвета, все логи видны. НО: Когда решил сегодня ввести связь, то только нажал Insert

мне выдает ошибку. Не поленился переписать.

DM.qLoTWUsers:

Can't format message 13:796 -- message system code - 4.

Dynamic SQL Error

SQL error code = - 204.

Table unknown.

LOTW_USERS.

At line 1, column 29.

И как теперь вводить связи?

Ну и раз тут написал, задам и второй вопрос.

Когда обновляю статистику по LoTW online, некоторые QSO выпадает окно, что они skip.

Присмотрелся, есть косячёк, время не совпадает где на 3, где больше минут.

Получается в LoTW связь пошла в зачёт на DXCC, а птичку в логе программа не ставит.

Есть какой-то выход?

Заранее спасибо за ответ.

Доброе утро

Уже много раз отвечал на этот вопрос. В 1168 изменился формат базы данных,
добавились поля для списка с участниками LOTW. Нужно преобразовывать базу.
Выложил http://www.dxsoft.com/upd_db.zip
Распаковать в каталог с AALog и запустить 1120.bat

Здравствуйте. Последние дни в запросе на QRZ.RU постоянно ответ:
500 Internal Server Error
nginx Это только у меня? И почему? Да и остальные почти всё просят что-то вводить. :) А вот где ввести их раз и навсегда - подзабыл. С уважением, Евгений Баранов, UA3GGP.

1929. AAlog + Hamport problem

Yahoo group: dxsoft-rus
Date: 2014-02-27 22:19:16 UTC
From: Eugene Baranov
Topic: 1929 Message: 1929

Здравствуйте.

Имеется AAlog (1168), Hamport (1.0), W2k, IC-746, IC-703.

1. Связь IC-746 <=> Hamport работает прекрасно! Но при переходе на другой диапазон с трансивера, в логе всегда корректно меняется частота, иногда меняется диапазон, и никогда не меняется Mode. А чтобы все 3 окна правильно - ни разу не было. :(

2. В Hamport IC-703 в списке нет, поэтому RIG2 - none. А хотелось бы. Скачал IC-703.ini , подбросил ему в папку, позже в созданную там же папку Rigs - всё одно, не появляется он в списке TRX. :(

Помогайте пожалуйста.

С уважением, Евгений Баранов, UA3GGP.

From: Eugene Baranov
Topic: 1929 Message: 1932

Здравствуйте.
Александр, спасибо, намёка хватило.

Кидал в папку Hamport; в папку Rigs внутри неё. Пробовал Hamport переименовывать в Omni-Rig, переносить её в корневой - не видит ни один новый инишник. Оказалось, надо было найти папку C:\Program Files\Afreet\OmniRig\Rigs , после этого все инишники стали видны.
Ну кто бы догадался?
Как я люблю Portable версии абсолютно всех программ, AAlog тоже не стал бы исключением. :)
Знаю, молчу. :)

По первому вопросу тоже прояснилось правкой Hamport.ini .
Теперь не переключается в только в режим SSB. Видимо надо как-то сказать логу, что USB и LSB - это SSB. Наверно в Hamport.ini ? А как?

С уважением, Евгений Баранов, UA3GGP.

From: Alexander Anipkin

Для начала добиться того что б Omnirig видел ini файл. Куда вы кидали ini-шник?

Скажу по секрету, если скопировать папку аалога на другой комп - он там будет работать нормально. Единственная цель инсталятора - скопировать файлы, не все могут zip распаковать. Ну и соответственно папку омниригг тоже скопировать и его один раз запустить до запуска аалога. Hamport для работы AALog не является необходимым.

1934. (no subject)

Yahoo group: dxsoft-rus
Date: 2014-03-31 04:59:14 UTC
From: Serge Systerov
Topic: 1934 Message: 1934

Добрый день!

Есть несколько вопросов и предложений:

1. По печати адреса на конвертах. Когда-то уже задавал этот вопрос. Александр прислал AAlabels весом 3,38 МБ. Нашел шаблон, использующий это адресное поле, но он почему-то не работает. Давно это было. Не могу точно сказать, работал ли: Вставляю адрес, а на выходе чистый лист. Пробовал при пустой очереди печати и при выборе позывного.
2. У меня не совсем гладко получается с подключением внешних программ, в частности CwType и TrueTTY. Если выбираю их запуск "When AALog start" , программы грузятся, но без конфигурации COM портов (обе программы используют один порт). Если выбрать вариант запуска "When relevant mode is selected", то после открытия окна New QSO вылетает ошибка открытия COM-порта. При этом телетайп даже еще не грузился. Загрузился только CwType в соответствии с модой. Проверил рабочие директории - C:\Documents and Settings\All Users\Application Data\CwType. INI-файл там правильный лежит. Дал пользователю полный доступ к каталогу, подкаталогам и файлам. Пользователя включил в локальную группу администраторов. Если включаю телетайп, он подгружается, но опять с ошибкой драйвера. Вопрос, необходимо ли для нормальной работы использовать 3 COM-порта? Или есть возможность научить AALog работать с двумя: выгружая предыдущую задачу (вместе с портом) при смене моды. Пусть это будет медленно, но без конфликта. Т.е. первую опцию использовать для двухпортовой конфигурации, а вторую для одного порта.
3. Для повседневной работы на CQ очень не хватает горячей клавиши для перехода в окно передачи. Т.е. есть Alt+C для занесения позывного. Если после этого хочется сразу перейти в окно ввода, то для этого необходимо 4 раза нажать табуляцию или энтер. Предлагаю в CwType и TrueTTY для горячей клавиши задействовать Alt+G (может сочетание уже есть, но я его не могу обнаружить) : И чтобы совсем при работе не отвлекаться на мышку есть предложение также заложить сохранение QSO в лог из окна CwType или TrueTTY по Alt+S. Именно +S, а вход в меню по этим клавишам надо убрать. А то получается, что работаешь и вдруг случайно, скажем, нажимаешь Alt+E и попадаешь в окно макросов. А они при работе нафиг не нужны. Только задержки получаются. Даже если и нужно их отредактировать, то здесь уже без мыши сложно будет обойтись. Нужно оставить только минимально необходимый набор горячих клавиш для работы в режиме передачи.
4. И последнее. В AA Test при работе телеграфом и телетайпом иногда хочется что-то передать с клавиатуры, помимо зашитых макросов. Через "CW terminal" это делать не совсем быстро, да и неудобно (задействована клавиша Ctrl, а не Alt). Что если для такой цели применить педаль? Т.е. при ее нажатии фокус программы бы перемещался в окно ввода символов CwType или TrueTTY, а при отжатии - возвращался назад? Для этих целей можно использовать какой-нибудь пин COM-порта:

Topic: 1935 Message: 1935

При изменении вида работы программа изменяет не только вид работы в трансивере, но и полосу пропускания приема (в моем случае на IC-7400 переводится на второй фильтр). Можно ли сделать, чтобы вид работы переключался, а полоса пропускания из программы не изменялась?
Олег

Была в свое время проблемка при работе в контесте миксом (ssb/cw), а именно чтобы из под ААТеста при нажатии функциональных клавиш запускался макрос соответствующей программы (AAVoice в SSB, CWType в CW)...по началу не получалось.
Но Александр RZ4AG в итоге все сделал как надо, все работает, правда управление PTT у этих программ - на разных com-портах, иначе никак...

1938. RE: [dxsoft-rus]

Yahoo group: dxsoft-rus
Date: 2014-04-10 05:56:15 UTC
From: Serge Systerov
Topic: 1936 Message: 1938

Доброе утро, Сергей!

Наконец то собрался ответить... Меня по работе уже начинает трясти от всякой бумажной писанины. "Взбесившийся принтер" понятие, как никакое, правильно описывает состояние дел. После этих гор Регламентов и отчетов с использованием автоматизации уже и делом не хочется заниматься. Ну да ладно, это уже лирика...

Я использую версии 3.2.0.1168, 2.10, 2.90.
1. Только что попробовал выставить в AALog режим "запуск программ при выборе соответствующей моды". Включил трансивер, сразу попал на CW. При этом автоматически загрузилась CWType, но с ошибкой COM-порта (т.е. в программе поля параметров порта - пустые). CwType предупредил, что Working directory was changed to default directory
C:\Documents and Settings\All Users\Application Data\CwType
Как я уже писал, работаю с правами администратора, ini-файл по этому пути в норме и права наследует. Читал, что ini может еще быть в system32. Скопировал туда, перезапустил все задачи, но результат тот же. Не знаю, где еще глюк искать...

2. Если выбрать ражим "запуск программ самостоятельно". CwType гружу самостоятельно. Настройки порта на месте. Если в трансивере меняю режим на SSB, то CwType сворачивается в панель задач. При этом фиксируется ошибка "COM-port open error!" и AAlog сообщает об ошибке "DM.pFIBDatabase1:Cannot perform operation --DB is not open". Если развернуть программу, то поля, конечно, уже пустые. При снятии задачи через Диспетчер идет предупреждение от DCOMа, что остаются активными объекты, а при закрытии AAlog - сообщение о недоступности ЭрПиСи сервера.

3. Сергей, все же очень прошу в новых версиях CW и RTTY заложить переход в окно передачи по "горячей клавише". И, если удастся, было бы здорово иметь возможность сохранения qso по Alt+S из окна этих программ...
Я потому и затеял эту "возню" с передачей данных из полей этих программ в ААЛог, что мне приятнее (и гораздо удобнее) работать на клавиатуре, не используя ни мышь, ни манипулятор.

С уважением, Сергей

Вообще-то, AALog примерно это и пытается сделать -
при переключении в CW отключает порты в TrueTTY,
при переключении в цифровую моду - отбирает их у CwType
и отдает обратно TrueTTY.

Другой вопрос, что, как мне кажется, лучше бы он
этого и не пытался делать...

Хотя, вроде бы, если все программы самых новых версий -
все работает адекватно (когда настроишь).

SS> Т.е. первую опцию

4
SS> раза нажать табуляцию или энтер.

Вообще-то, поля ввода в TrueTTY предназначены
для тех, кто не пользуется AALog'ом :-)

Тем, кто пользуется, лучше сразу в поля ввода AALog'a
данные и вводить.

SS> Предлагаю в CwType и TrueTTY для горячей
SS> клавиши задействовать Alt+G (может сочетание уже есть, но я его не могу
SS> обнаружить) : И чтобы совсем при работе не отвлекаться на мышку

Вот тут тоже есть противоречие -
при работе телеграфом - удобнее не отвлекаться на мышь,
а при телетайпом - удобнее как раз не отвлекаться на клавиатуру :-)

Особенно это справедливо при работе в соревнованиях, но для другой
цели я не помню когда последний раз трансивер включал :-)

По тексту сложно читать, поэтому все вынесу сюда...
SP> а ААлогу скажите "Use program defaults".
SS> Сергей, вот здесь не понял. Где эта опция лежит?... А при выборах
режимов указываю, чтобы использовались программные макросы.

SP> Впрочем, достаточно использовать кнопку F1...F12 с пустым макросом.
Для RTTY - даже лучше с макросом "~[lf] "
SS> Попробую... Но до функциональных клавиш далеко тянуться, да и смотреть
на них при этом приходится.

SP>Кстати, чтоб два раза не вставать - крик души -
SS> Да, Сергей. Давно уже понял, что пробел в конце очень важен. А чаще даже
перевод строки использую. Для всех надо в хэлп вставить эту рекомендацию.
Правда, многие (тут я скромно потупил глазки :)) читают его по диагонали.

SP> С одной стороны - желание понятное,
а с другой - для настройки на корреспондента - тоже мышь не используете?
SS> Я использую узкополосный фильтр, так что мышью в спектр некуда тыкать.
Лишь изредка для подстройки отвлекаюсь, когда немного в стороне подходят. А
так у меня указательный палец правой руки "щупает" пипку на символе "J" (это
чтобы легче было вернуться назад к клавиатуре), а левой кручу валкодер.

... Прервусь, убегаю на смену.

Это не ошибка, это информационное сообщение.
То есть это как раз говорит о правильном функционировании комплекса.

SS> Как я уже писал, работаю с правами администратора, ini-файл по этому
пути в
SS> норме и права наследует. Читал, что ini может еще быть в system32.
SS> Скопировал туда, перезапустил все задачи, но результат тот же. Не знаю,
где
SS> еще глюк искать...

Не надо туда ini-файл копировать. Удалите взад :-)
Посто настройте и сохраните параметры портов в CwType,
а ААлогу скажите "Use program defaults".
То же и про макросы, кстати.

SS> 2. Если выбрать ражим "запуск программ самостоятельно". CwType гружу
SS> самостоятельно. Настройки порта на месте. Если в трансивере меняю режим
на
SS> SSB, то CwType сворачивается в панель задач. При этом фиксируется ошибка

сообщение о
SS> недоступности ЭрПиСи сервера.

Ну вот тут надо разбираться - что за баг и как с ним бороться.

SS> 3. Сергей, все же очень прошу в новых версиях CW и RTTY заложить переход
в
SS> окно передачи по "горячей клавише".

Ну, логичное желание...

Впрочем, достаточно использовать кнопку F1...F12 с пустым макросом.
Для RTTY - даже лучше с макросом "~[lf] "

Кстати, чтоб два раза не вставать - крик души -

ПОЖАЛУЙСТА, в RTTY заканчивайте и начинайте любой макрос пробелом или
переводом строки!

Нет больше сил от "FGHGJBVHJBCQ CQ de UA9OVGJKJKNJULFYHJ".

В RTTY отсутствие передачи - это НЕ пробел, это МУСОР !

SS> И, если удастся, было бы здорово иметь
SS> возможность сохранения qso по Alt+S из окна этих программ...

Ну можно ведь сохранять по любой другой из 36х комбинайий с F1...F12,
прописав макрос сохранения ...

SS> Я потому и затеял эту "возню" с передачей данных из полей этих программ
в
SS> ААЛог, что мне приятнее (и гораздо удобнее) работать на клавиатуре, не
SS> используя ни мышь, ни манипулятор.

С одной сторны - желание понятное,
а с другой - для настройки на корреспондента - тоже мышь не используете?

Ну то есть можно и так, конечно, но зачем?

1942. Идеи: стар ое и новое

Yahoo group: dxsoft-rus
Date: 2014-04-10 09:10:30 UTC
From: OG2K Anton
Topic: 1942 Message: 1942

"Кому еще какие МЕЛОЧИ нужны?"

aalog версия 3.2.0.1168

спасибо за

1) alt+backspace, повтор позывного
2) selected" и количество в журнальном списке
3) write-mode название в вверхней части и остановку времени

Я считаю, что одна из самых сильных сторон aalog-a, это простота и лаконичность.
Одно из сильнейших сторон - Удобство работы с клавиатуры.

уже упомянутые мною ранее

#1606
возможность менять цвет фона выбранной записи, когда открывается окно для новой записи. она становится неактивной (это на уровне виндовс темы).

#1611
в окне новой записи, было бы удобно изменять дату клавишами "-" и "+"

#1613
когда я открыл импортировал старый адиф файл в базу, захотелось изменить поля, которых не было в списке опций. например "аппаратура".

#1614
кнопка "применить" в окне настроек, позволит быстро применять настройки и выбирать цвет. по крайней мере в "цветах и шрифтах"
не нужно выходить,

#1615
когда в поле даты новой записи пишу год, нажатия записываются в буфер и только когда буфер заполнен 4 знаками, программа отображает все четыре цифры.
1-9-9-2
?-?-?-1992
было бы здорово видеть то что пишешь.
1-9-9-2
1-9-9-2

#туда-же
год при вводе вместо 1-9-8-7(таб), проще 1-3(таб) (я вписывал карточки 1976-1999 годов, это очень неудобно, каждый раз карточка разная), "двухзначные" года предлагаю вынести в настройки.

#1616
в поле даты новой записи
когда пишешь дате 25011992(таб), получается 25/01/1992
когда пишешь дату 250192(таб), получается 25/09/1992
когда вводишь карточки разных лет, часто приходится менять год, нудобно исправлять
+не видно что пишешь в поле "год" (№1615)
когда пишешь
240507(таб) получается 24/07/2007
210904(таб) получается 21/09/2007 (год не изменятся)

#1617
когда в поле времени ввода новой записи
пишешь:
0010, получается 0100
0059, получается 0509
все времена, начинающиеся с 00XX

#1618
- moving from band "frequency" to "rst sent" field cause error "aalog: class not registred",
переключение после поля частоты в поле полученного рапорта вызывает ошибку
омниригг и другие программы не поставлены.
антивирус отключал
система чистая
где копать? какие логи просматривать?
>>>> это вроде перестало происходить, но стоить проверить

#1682
"ситуация своего pileup-а"
при записи журнала с одновременным включёным кластером (band master), позывной корреспондента заменяется про-споченным через кластер моим-же позывным, т.к. частота совпадает. запись обычно пропадает, корреспондент уже ушёл, другие зовут, его уже не слышно. обидно.
задача: не заменять позывной из кластера, если в поле уже что-то написано. (можно через крестик в настройках). очень надо

#1689
при загрузке редактора журнала "menu>config>log manager", выбор не загруженного лога и попытка отредактировать название лога приводит к выводу формы, но она пустая. ввожу новые значение названия лога - название изменяется, но при попытке отредактировать - опять пустое.
понял, почему он так себя вёл.
сам журнал не относился ни к коему "лог сету", но это не решает проблему ошибки.
добавил журнал в сет, поле теперь можно изменять.
задача: если журнал не в сете: не давать записать его свойства.
или журнал всегда должнен быть в каком-то сете / не давать запись нового журнала, если ему не определён сет

#1713
-было бы здорово видеть статистику "выборки". допустим: в журнале подсвечено (выделено) несколько записей (допустим за одни сутки).
задача: посмотреть статистику только за выбранный промежуток журнала.
-За выделенный произвольно - возможно, но будет мееееедленно. Если за сутки, за неделю и т.д. - не вопрос.
-идея изначально была отправить тикет как за "сутки", но потом подумали предложил "по выделению", думал что будет проще, оказывается наоборот.
тогда DAILY STATISTICS by band/mode

#1714
сейчас показывается только по:
number of QSOs per band
здорово если бы было:
number of QSO per band and mode >>
>> for current log
>> for current log set
>> for selection
print table (enter)
cw ssb rtty .....
20m 45 345 4
40m 56 34 44
15m 0 33 88
или как-нибудь так :)

#1715
- пытаюсь удалить лог. программа отвечает "you can't delete last log".
почему? зачем?
хочу оставить log set пустым, но не могу этого сделать
- Это совсем последний лог или последний в логсете?
- последний в новом лог-сете. помимо того есть ещё 4 логсета с журналами.

новое

№1 "прошлые связи"
"прошлые связи" с корреспондентом показывает, делая поиск либо только по одному логу, по одному сету логов, либо по всей базе
работая в другом логе, программа не показывает связи с этим корреспондентом (можно через галочку в настройках)

№2 qsl manager
горячая клавиша изменяет значение QSO когда карточка получена. либо пробел либо enter, в зависимости что важнее для откртия QSO из списка.
сейчас приходится брать в руки мышку и кликать внизу крестик
(расскажите, если это можно сделать с клавиатуры)

№3 qsl manager
F7 всегда передвигает курсор в поле поиска (в принципе работает ALT+S), но удобней было бы F7 (даже если выбрана запись в списке)

№4 qsl manager
поле даты отправления карточки внизу есть, а поле получения нет

№5 qsl manager
при выделении нескольких записей и нажатии на чек-бокс "QSL rcvd" статус о принятии приминяется только к последней выбранной записи. когда на карточке несколько записей одного позывного, при его поиске выходят несколько связей, что целесообразно отметить одним нажатием, сейчас приходится делать 6 нажатий для 3 связей (мышкой)

№6 qsl manager
поиск QSO по разным логам, лога-сетам и по всей базе (в qsl manager использую первым столбиком "used collsign", как идея - можно сделать возможным отображения названия лога, в каком запись найдена) сейчас приходиться закрывать qsl manager, открывать другой журнал и оттуда опять открывать qsl manager

№7 qsl manager
после открытия другого журнала и запущенном dx atlas, последний активируется = фокус смещается из главного журнала, это здорово, что в dx atlas передаётся информация о новом местоположении, но этот фокус можно вернуть обратно в aalog

№8 новой qso
esc очищает все поля в окошке новой qso (этой функции предназначен "апостроф", не могу понять почему не выбран esc?) у меня финская ракладка включепна и апостроф в оочень неудобном месте, через shift около-твёрдый-знак, и он появляется только при двойном нажатии.
в письме рефлектора от 6/1-14 замечание UA3GGP "подкрепляет" мою идею (про "ё")

№9 новой qso
новая запись, 3-QSL, traditional QSL rcvd, (x) QSL received, выбор даты, кнопка today не работает, нужно выбирать из календарной сетки

№10 проверка и обновление DXCC и других текущих/критических данных автоматически
конкретика: включаю лог, он мне заявляет: дорогой, у нас стало одной dxcc больше, или "меньше". (естесственно через крестик в настройках)

№11 проверка новой доступной версии аалог-а, стоит вообще всю линейку ваших програм проверять (естесственно через крестик в настройках)

№12 сайт
на страницах
http://dxsoft.com/en/products/aalog/ и
http://dxsoft.com/ru/products/aalog/ не понятно, какая версия выложена для скачивания (нету нигде "в...1168")
не понятно, где получить информацию о том, какая последняя версия доступна для скачивания.

http://dxsoft.com/ru/products/aalog/history/ описание истории версий заканчивается "Version 2.3 beta (05 Jul 2002)" и
http://dxsoft.com/en/products/aalog/history/ описание истории версий заканчивается "Version 3.2 (20 Sep 2013)"
>> опять же не понятно когда вышла последняя версия бета *1168*

№13 не понимаю логику с "обновлением"
-- AALog v 3.2 update from build 1112 and later — 6 977 615 bytes
-- AALog v 3.2 обновление с build 1112 и выше — 6 977 615 байт
можно эти задачи посвятить установочному пакету?

aatest

№1 при работе "поиском", отработав станцию, было бы здорово, если программа запоминала ещё частоту и показывала бы в отдельном окошке "диапазон" все станции , которые были отработаны на данный частоте (+-2кГц). конкретика: работаю-работаю-работаю-меняю диапазон-работаю-работаю-возвращаюсь обратно, начианю искать-искать и слушать кто-там, кто-там. программа показывает, что на этой частоте я отработал эту-эту-и-эту станцию, понял что это тот, ах-да! уже отработал, пошёл дальше. своеобразная "память" частот, на которых происходили связи.

с уважением,
Антон Тетерин

1944. external programs

Yahoo group: dxsoft-rus
Date: 2014-04-11 06:15:47 UTC
From: Serge Systerov
Topic: 1944 Message: 1944

Всем доброе утро!

Продолжу. Сейчас попробовал выполнить такую настройку:
AALog - External programs - Use CwType... - select "When AALog start"
Когда стал закрывать окна, вылетела ошибка "Can't connect to CwType!"
Я все программы установил в пути c:\amator\. Когда-то, на другом компьютере, они стояли в другом месте. Проверил права на этот каталог. Снял наследование, стал владельцем его и всех подкаталогов и провалил полный доступ на все содержимое для текущего пользователя. Все равно получил такую же ошибку.
Не убирая эту настройку, попробовал то же выполнить для TrueTTY. Ошибки при выходе не было. Перегрузил ААЛог. При старте подгрузились обе программы, но обе с пустыми настройками Ком-портов.
Есть подозрение, что путь до внешних программ Александр держит в базе, а она почему-то не обновилась на новые пути их установки, во всяком случае, для CW. Предположил по аналогии с работой, где прикладные программы держат пути в таблицах sql.

С уважением, Сергей

XP+SP3
Попробовал CW запустить от локального админа - ошибка DXSOFTEX.DLL
initialization error.

Посмотрел в реестре ключи, такая структура:

...\ua9osv\truetty\...
и
...\ua9ov\cwtype\...

Сергей, может прислать их экспорт для анализа?

Ось какая?

От висты и новее - нужно по одному разу запустить
каждую программу "as administrator" по правой кнопке мыши,
чтобы позволить нужную информацию в реестр записать.

Та же ошибка была при запуске TrueTTY. Но при последующих запусках от
admina этих ошибок уже не было. При подгрузках программ во время запуска
ААЛог все равно Ком-порты не грузятся.

1949. RE: [dxsoft-rus] external programs

Yahoo group: dxsoft-rus
Date: 2014-04-11 08:06:39 UTC
From: Serge Systerov
Topic: 1944 Message: 1949

Добрый день, Александр!

На закладке External programs выбрано использование Телеграфа, Телетайпа и ОмниРига.

В конфигурации Телеграфа - Старт при выборе соответствующей моды - COM Port (via Win API) - PTT port: COM4 - PTT pin: RTS - CW pin:DTR - Use program macros.

В конфигурации Телетайпа - Старт при выборе соответствующей моды - COM Port - PTT port: COM4 - PTT pin: RTS - Use program macros.

Блин: Смотрю настройки Телетайпа и озадачился. Почему тип порта не через API. Открыл, а там есть выбор Use program defaults. Вот, видимо, что имел в виду Сергей. А я сразу и не врбился к чему это относится. Помню всегда были советы использовать API. Я их и придерживался. Сейчас обкатаю.

Subject: RE: [dxsoft-rus] external programs

Добрый день, Александр!

На закладке External programs выбрано использование Телеграфа, Телетайпа и ОмниРига.

В конфигурации Телеграфа - Старт при выборе соответствующей моды - COM Port (via Win API) - PTT port: COM4 - PTT pin: RTS - CW pin:DTR - Use program macros.

В конфигурации Телетайпа - Старт при выборе соответствующей моды - COM Port - PTT port: COM4 - PTT pin: RTS - Use program macros.

Блин: Смотрю настройки Телетайпа и озадачился. Почему тип порта не через API. Открыл, а там есть выбор Use program defaults. Вот, видимо, что имел в виду Сергей. А я сразу и не врбился к чему это относится. Помню всегда были советы использовать API. Я их и придерживался. Сейчас обкатаю.

XP+SP3
Попробовал CW запустить от локального admина - ошибка DXSOFTEX.DLL
initialization error.

Посмотрел в реестре ключи, такая структура:

.\ua9osv\truetty\...
и
.\ua9ov\cwtype\...

Сергей, может прислать их экспорт для анализа?

1951. RE: [dxsoft-rus] external programs

Yahoo group: dxsoft-rus
Date: 2014-04-11 08:45:14 UTC
From: Serge Systerov
Topic: 1944 Message: 1951

Сдвиг уже есть:

Когда выбрал загрузку обеих программ при старте Лога (и использовании настроек программ по умолчанию) при старте обе программы загрузились, но также без загрузки портов.

А вот когда настроил на загрузку при выборе соответствующей моды, телеграф прогрузился с нормальными настройками порта. Когда перешел в SSB он свернулся. При этом не было ошибок Ком-порта как раньше. А вот когда перешел в телетайп, всплыло окно телеграфа, а не телетайпа (он вообще не загрузился).

Я использую пути до рабочих директорий:

C:\Documents and Settings\All Users\Application Data\CwType. Внутри лежит ини-файл. Там же есть подпапки Test и Wrk с соответствующими ини.

А вот для телетайпа сделал так:

C:\Documents and Settings\All Users\Application Data\TrueTTY

C:\Documents and Settings\All Users\Application Data\TrueTTY_T

C:\Documents and Settings\All Users\Application Data\TrueTTY_W

Везде лежат нормальные, рабочие ини-файлы.

В реесте прописаны пути до :Application Data\CwType и : Application Data\TrueTTY. Лог, очевидно, берет пути из реестра. Продолжу дальше добивать настройку, а сейчас опять надо на работу собираться.

Сергей и Александр, БОЛЬШОЕ спасибо за помощь!

При старте порты и должны быть обнулены. Это сделано для того что б программы не боролись за порт. Когда требуется нужная программа, она вызывается и в нее заливаются нужные настройки.

В настройках CWType случайно, в список RTTY не добавлен? Там должно быть ТОЛЬКО CW

Нет, Александр, там только CW, а в телетайпе только цифровые виды.

Не сразу заметил, но при каждом переключении моды в трансивере вылетает ошибка DM.pFIBDatabase1:Cannot perform operation --DB is not open. А так, телеграф заработал стабильно, передает все поля в лог: Завтра с телетайпом поразбираюсь

Всем доброе утро!

Как и предположил (в 2 часа ночи, перед засыпанием, :)), перевод трансивера в режим PKT вызвало сворачивание телеграфа и загрузку телетайпа. И перевод в режим RTTY не меняет выбора программ. Все работает как часы! Так что осталось подкорректировать ини-файл ОмниРига.

Саша, чето ошибка с путем доступа.

Кстати, сейчас RN6BN по его старому пути недоступен. Там был другой уже адрес, на R7 начинался.

Замените в файле кластеров адрес RN6BN на r7ab.73.ru:23

С командной строки задайте

>telnet
появится пригласительная строка
Microsoft Telnet> o [имясайта]

Пройдет, значит в винде все в порядке.

1967. AALog 3 импорт файлов

Yahoo group: dxsoft-rus
Date: 2014-04-22 18:30:04 UTC
From: Alex_R6CW
Topic: 1967 Message: 1967

Здравствуйте, Dxsoft-rus.

при импорте файлов предлагается:

1. use update mode
2. update exists only
чем эти два режима отличаются ?

появилась возможность дна другом компе заняться выпиской карточек.
появившиеся изменения нужно добавить в основной лог.

по идее нужно добавить только изменившиеся данные.
как правильно это сделать ?

1968. AALog 3 печать QSL

Yahoo group: dxsoft-rus
Date: 2014-04-22 18:58:45 UTC
From: Alex_R6CW
Topic: 1968 Message: 1968

Здравствуйте,.

возможно ли в шаблоне карточки сделать колонку со статусом QSL. т.е.
указывать pse или cfm за конкретную связь.
актуально, когда много связей, но некоторые уже подтверждены
корреспондентом.

From: Alexander Anipkin
Topic: 1967 Message: 1969

Update mode работает по принципу - такая связь в логе есть? Если нет - добавляем, если есть обновляем данные о ней на основе ADIF.
Update exists - новых связей НЕ ДОБАВЛЯЕТ, обновляет только существующие.

1972. Проблема New QSO

Yahoo group: dxsoft-rus
Date: 2014-05-05 15:02:52 UTC
From: Андрей _RK6ABM
Topic: 1972 Message: 1972

Добрый день!

Проблема в следующем:

окно New QSO открывается в SSB 160м частота 000000.

Ранее открывалось с той моды,диапозона,и частоты где было закрыто.

Вычислил ,что виноват aalog.ini.Можно ли исправить?

From: Eugene Baranov
Topic: 1975 Message: 1975

Здравствуйте.

А не сложно сделать, чтобы при выключенном трансивере он помнил последний band и mode, который был при включенном трансивере? Так было бы удобнее.
Но если сложно, то и не надо.

С уважением, Евгений Баранов, UA3GGP.

Скорее всего поставлена галка Use OmniRig, а подключения к трансиверу нет

окно New QSO открывается в SSB 160м частота 000000.

Если настроена связь с TRX, то лог первым делом цепляется к омниригу и опрашивает его. А там нули... Но в, принципе, можно подумать, но это тянет за собой еще и обработку этой ситуации в нескольких местах

Чёт я не догоняю... зачем ставить "галку" ИмниРиг, если CAT-система не используется и потом просить что-то сделать в Логе? Уберите эту "галку" и все будет запоминаться.
Есть куча других вещей которые надо бы сделать в Логе, но ... увы.

1978. Re: [dxsoft-rus] Проблема New QSO

Yahoo group: dxsoft-rus
Date: 2014-05-07 21:02:20 UTC
From: Eugene Baranov
Topic: 1978 Message: 1978

Здравствуйте.
По разному бывает, Вячеслав, быть может и не догоняете. :) На столе 5 трансиверов, не все подключены к компу и не все могут быть подключены, у Icom only 4 зараз, например, а в OmniRig и всего только 2. Вот включил я трансивер без связи с компом - а в логе 160м кажет. А я на нём последний раз работал в 1984 году и вряд ли буду в дальнейшем. И несколько раз в день при включении лога выставлять диапазон и вид излучения в течение многих лет немного неудобно.

С ПРАЗДНИКОМ ВСЕХ!

Для разрядки:
Празднование Дня радио в Рязанском Государственном Радиотехническом Университете ежегодно собирает у стен учебного заведения тысячи студентов и выпускников. Начинается праздник крестным ходом в ночь на 7 мая вокруг памятника А.С. Попову, возле здания Университета. Празднующие поздравляют друг друга словами "Попов воскрес!" на что принято отвечать "Воистину Попов!". Данная традиция связана с давним спором о приоритете изобретения радио между Поповым и Маркони. Фразой "Воистину Попов!" подчеркивается приоритет Попова. Практикуется дарить друзьям крашеные радиолампы (по аналогии с пасхальными яйцами).

Студенты, выпускники и преподаватели Радиотехнического факультета УГТУ-УПИ в Екатеринбурге ежегодно в 22.00 по местному времени проводят факельное шествие от здания факультета до памятника Попову, при этом местные власти вынуждены перекрывать движение основных магистралей, по которым движется празднующая колонна участников шествия.
73!
С уважением, Евгений Баранов, UA3GGP.

Чёт я не догоняю... зачем ставить "галку" ИмниРиг, если CAT-система не используется и потом просить что-то сделать в Логе? Уберите эту "галку" и все будет запоминаться.

1981. AALog 3.3 build 1174

Yahoo group: dxsoft-rus
Date: 2014-05-31 09:45:18 UTC
From: Alexander Anipkin
Topic: 1981 Message: 1981

Приветствую

Выложено обновление.
Внимание! Если используете свой префикс лист сохраните его перед обновлением!

- решена проблема с Merge Database
- можно выбрать поведение кнопки ~/Ё
- возвращена нормально смена языка в полях Name и QTH по Alt+Backspace, предыдущая связь вызывается Ctrl+Alt+Backspace
- в Internal callbook окне Quick search зафиксирован английский язык
+ добавлена подсказка на кнопки сохранения/восстановления списков полей экспорта
+ отображаются участники LoTW в Spot-list
- исправлена проблема с выскакивающим окном ошибки при переходе из поля "frequency" в "rst sent" при отсутствии на компьютере OmniRig
- если журнал не относился ни к какому логсету, новозможно было отредактировать его настройки. Теперь невозможно сохранить журнал не выбрав лог сет
+ добавлена возможность показа статистики связей за произвольный период.
+ в префикс лист добавлены российские префиксы Крыма и Севастополя (украинские остались на месте так же)

полный пакет
www.dxsoft.com/aal3.zip
www.hamport.com/aal3.zip

обновление с предыдущих версий

Может только заставка?
Тонкости не проверял, при загрузке тоже вижу 68, а при занесении позывных с Крыма, видит как Крым, РФ. Это было одним из добавлений в релиз. Это было всего проще пмроверить.

Крым не показатель, это действительно 1168, а вот в полном релизе
действительно 1174.

Вынужден покаяться...
Как говорится Семен Семеныч....
Ставлю 1174, а на компе 2 ААлога.
Отделил отдельно старые экспедиции RN9WWW, UE9WDA, UE9WF, RM9W и т.п.
Лог и так огромный. Так вот заливал файл обновление в папку основного лога,
а при установке НЕ ОБРАЩАЛ внимания, что путь для установки указан для
запасного Лога! так что будьте бдительнее :-)

73! Андрей RM8W
P.S. RZ4AG прости, что отвлек от дел насущных :-)

Dear Sergei,
А у принимающей стороны, при передаче мною 599 001 001, не выйдет ТОО PPQ
PPQ на экране?
Сам всегда пробелом разделял, но тут почитал EU7SA, у народа
поспрашивал, говорят что правильно дефисом (который в верхнем
регистре) номера разделять.
Вот и засомневался...

2005. TrueTTY - USOS

Yahoo group: dxsoft-rus
Date: 2014-06-21 17:03:17 UTC
From: OG2K Anton
Topic: 1981 Message: 2005

вопрос о смене регистра букв и цифр, но и СИНХРОНИЗАЦИИ.
подробнее на английском у
http://www.iw5edi.com/ham-radio/26/a-rtty-tutorial-for-beginners

----------cut----------
Unshift-On-Space – To Use It or Not?

USOS is not the easiest concept to understand. Here's another way of thinking about it:
The transmitting station and the receiving station must always be synchronized regarding LTRS case and FIGS case. When signals are strong this is no problem, but when sigs are weak or covered by QRM/QRN/QSB often the synchronization is lost.
This is how we get those TOOAPPQAPPQ messages. Think of the space character as a "synchronizer".
With USOS ON (the default in most TNC's), every time a space character is sent, the transmitter and receiver are BOTH re-synchronized automatically. This happens with EVERY space character, not just in the exchange.
For example, when you send 599-001-001, the synchronizing is done only once – at the start of the transmission, just before the "5″. On the other hand, if you send 599 001 001, the synchronizing is done three times – once before the "5″ and once before each "0″.
Your chance of receiving the correct FIGS character has improved significantly.

----------cut----------

2006. [dxsoft-rus] TrueTTY - USOS - часть2

Yahoo group: dxsoft-rus
Date: 2014-06-21 22:13:24 UTC
From: OG2K Anton
Topic: 1981 Message: 2006

ещё мысли на эту тему у
http://www.dxlabsuite.com/dxlabwiki/RTTYFiguresLettersUSOS

я понимаю это так. когда мы передаём что-то, мы не знаем включен ли
USOS на другой стороне или нет. если же он включен (по какой-то
причине), то после символа пробела будет следовать автоматическое
переключение на буквенный регистр. чтобы этого не происходило, пробел не
используется, а используется какой-нибудь символ из цифренного регистра.

после пробела, нужно переводить передачу в цифренный регистр, 599,
пробел + перевод в буквенный, перевод в цифренный, 599 и т.д.
в первой части ещё говорилось о синхронизации передатчика-приёмника во
время "символа пробела".

думаем о том, что будет принимать получатель, мы ведь не знаем как и
чем он принимает наш сигнал. если будет что-то невнятное и непонятное -
будет переспрашивать / номера не совпадут - связь не засчитается -
напрасно потраченное время.

отличных выходных и 73

----------cut----------
Figures, Letters, and Unshift On Space (USOS)

RTTY uses the 5-bit Baudot code. 5 bits can represent 25 or 32
characters, but 32 characters isn't enough to convey 26 letters, 10
digits, and assorted punctuation and other symbols. Monsieur Baudot
solved this problem by defining two banks of characters. The Letters
bank conveys the 26 letters, space, carriage return, and line feed
characters. The Figures bank conveys the numbers, space, punctuation,
and symbol characters. A Shift to Letters character means interpret all
subsequent characters as letters, and a Shift to Figures character
means interpret all subsequent characters as Figures. Thus the 5-bit
character 00011 conveys the letter A if the last shift character
received was Shift to Letters, or the symbol - (hyphen) if the last
shift character received was Shift to Figures. These shift characters
are often abbreviated as LTRS and FIGS.

The problem with this scheme is that failure to receive a LTRS or FIGS
character due to QRM, QRN, or QSB causes all subsequent characters to
be misinterpreted. The sequence

11011, 10000, 11000, 11000

which is FIGS 5 9 9 will be decoded as TOO if the FIGS character is not
successfully received.

One way to minimize the damage caused by missing Shift characters is a policy called Unshift on Space, abbreviated USOS. When this policy is in force, the receiver interprets a received space character to mean receive a space character AND shift to Letters. A transmitter must know that a receiver has (or may have) USOS enabled so that it appropriately inserts FIGS characters after spaces when sending text like

123 456 789

These FIGS characters would not be required in the absence of USOS and do reduce transmission speed, but improve resilience in the face of interference or fading if USOS is enabled. You can enable USOS on the RTTY tab of WinWarbler's Configuration window.

Despite USOS, garbled LTRS or FIGS characters can cause a word to be misdecoded -- TOO being a common example. To decode less common examples, clicking on a received word in WinWarbler's Receive pane while depressing the Ctrl key will replace the each character in that word with its analog in the opposite bank, and toggle the character's underlining in the Receive Pane. If you receive a garbled word, try Ctrl-clicking it; if that doesn't make it intelligible, Ctrl-click it again to return it to its original state.

From: Konstantin Vakhonin (home)
Topic: 1981 Message: 2007

Dear OG2K,

599-001-001 передается быстрее, при этом реже происходит смена
регистра (точнее - лишь 1 раз перед 599).
Но если в самом начале передачи произошел сбой -
то уже и до конца передачи правильный регистр цифр не восстановится (ткс UA9OV).
599 001 001 передается дольше, это его единственный недостаток.
Каждый выбирает сам...

73, Константин

From: Alexander Anipkin
Topic: 2008 Message: 2008

Приветствую

Выложил новую версию.

+ добавлены районы Крыма для RDA Contest и области для RDXC
+ запоминается частота последнего CQ и по CTRL+R можно вернуться на эту частоту, так же частота последнего CQ отображается на BM
+ добавлена возможность включения автоматического перехода в режим поиска после смены частоты на указанную величину
+ добавлена программная блокировка CW и RTTY при работе в сети

www.dxsoft.com/aatest.zip
www.hamport.com/aatest.zip

Dear Alex_R6CW,

Да нет, некорректно отображается Крым.
Должны подставляться RK или SE в поле принятого номера при вбитии
крымского позывного (в RDAC & RDXC).
Надо обновить файл cty_rus.dat (добавить туда крымские префиксы в
евр.Россию).
Где-то у меня был, не могу найти сейчас :(

> RU4SS

Так и предполагал...
Я глянул даты обновления файлов rda.dom и rus.dom в архиве
(11.08.2014) и успокоился... Про cty_rus.dat как-то не вспомнил
Но автор четко написал "...в новой версии
"+добавлены районы Крыма для RDA Contest и области для RDXC"
Надо было читать "отредактируйте(скачайте) cty_rus.dat"
Тогда вопрос стоит по другому - где его (обновленный) можно взять?
Или априори заложено, что user должен сам редактировать любые
изменения? Я не против, но тогда надо озвучить"что и как" и боле вопросов не
будет...

Dear Sergei,

Та я подумал, что это будет узкий ДСП-фильтр, позволяющий сузить полосу.
Смотрю - ширина полосы та же...вот и возник вопрос :)
Для моего 1000-ка это актуально, т.к. пока использую режим AFSK на передачу и нет возможности в режиме USB выбрать в трансивере узкий фильтр.
Вот сделаю новый интерфейс, позволяющий передавать в режиме FSK - проблема изчезнет.

2032. Кубок CPP DI

Yahoo group: dxsoft-rus
Date: 2014-09-14 11:38:41 UTC
From: Konstantin Vakhonin (home)
Topic: 2032 Message: 2032

Добрый день, коллеги!
"Поработал" я в Кубке CPP диги.
2 моды, по положению: RTTY-45 и BPSK-63.
Начал работать в 2 радио, хотя, с ограничениями по переходам, это не особо помогало.
Работал в связке AATest + TrueTTY.
2 компа в сетке.
Что сказать...вот что запомнилось:

1. Не запоминаются настройки вида излучения и скорости в TrueTTY.
Ставлю RTTY и скорость 75 бод.
Закрываю софт.
Открываю софт.
Вижу BPSK31.
Смотрю скорость – 45 бод.
Предложение: запоминать последние оперативные настройки софта при закрытии программы и их выводить при повторном открытии софта.

2. Не понравилось то, что при захвате позывного с монитора, курсор сразу переходит в поле принятого номера, что автоматически влечет за собой захват номера на этом компе (на другом номер увеличивается на единицу).
При этом вбитый позывной может быть dupe, или просто не смогу сработать.
Время идет...
Не могу работать на другом компе, пока не сработаю на 1-м с захваченным номером, надо чтить регламент соревнований :)
Предложение: При захвате позывного курсор должен быть в поле принятого позывного (справа от него) и номер захватываться лишь при переводе курсора в поле принятого номера.

3. Во 2 туре при включении 2-х компов в сеть…вместо 119LO36 на обоих компах стало 001LO36.
Вручную меняю на 119LO36.
Вбиваю связь на 1-м компе.
На 2-м номер меняется на 002LO36.
Во 2-м туре работал в 1 радио.
Тут без комментириев, надо разобраться.

4. AATest не воспринимает моду BPSK63!
Выбираю в TrueTTY вид излучения BPSK63.
В AATest-е, по началу, в окне New QSO, этот вид появляется.
Но только я сдвигаю частоту валкодера – вид излучения в окне New QSO исчезает, внизу в окне появляется надпись Wrong mode on TX.
При этом QSO сохраняется лишь нажатием кнопки Save в окне New QSO (макросом ~[ls] связь не сохраняется – AATest зависает напрочь).
Тоже надо разбираться.

5. Макрос ~[iVarNumberSent] в TrueTTY не работает (передает полный
номер вместе с локатором); работает только в CWType.
Предложение: сделать возможным использование макроса и в TrueTTY.

6. В кабрилле за все связи проставился вид излучения - RY, хотя было много связей и BPSK63 (PM).
Придется поправлять, листая лог в AATest-е.
Тоже косяк...

Вот как-то так вышло мое участие в Кубке СРР цифровыми видами связи.
Одно мученье :(

Понял Сергей, спасибо.
Сейчас подумал насчет перевода курсора при захвате номера...
Думается, вопрос неоднозначный...
Если человек работает в 1 радио, или тест с НЕномерными контрольными
номерами, то выгоднее оставить все как есть - т.е. при захвате номера
курсор сразу прыгает в поле принятого номера.
При этом не надо делать лишнее движение (переводить пробелом курсор из
поля с позывным в поле номера).
НО...
Если работает SO2R или коллективка, и тест "номерной", то можно
сделать (хотя бы как опцию) возможность, при захвате номера, вставания
курсора справа от позывного, без автоматического захвата номера.
Но это вопрос скорее к Александру :)

2035. Восстановление базы дан ных

Yahoo group: dxsoft-rus
Date: 2014-09-27 05:29:15 UTC
From: Андрей Лашов
Topic: 2035 Message: 2035

Случайно удалил Аалог вместе с базой данных, потом файл GDB восстановил утилитой Unerase, переустановил лог - а он не запускается, ругается на базу данных: message system code 4 выдает, и говорит, что восстановленный файл is not valid database. Что нибудь можно сделать?

2041. Идеи: старое и новое

Yahoo group: dxsoft-rus
Date: 2014-10-01 20:09:10 UTC
From: OG2K Anton
Topic: 2041 Message: 2041

"Кому еще какие МЕЛОЧИ нужны?"

Я считаю, что одна из самых сильных сторон aalog-a, это простота и лаконичность.
Одно из сильнейших сторон - Удобство работы с клавиатуры.

уже упомянутые мною ранее:

#1606
возможность менять цвет фона выбранной записи, когда открывается окно для новой записи. она становится неактивной (это на уровне виндовс темы).

#1611
в окне новой записи, было бы удобно изменять дату клавишами "-" и "+"

#1614
кнопка "применить" в окне настроек, позволит быстро применять настройки и выбирать цвет. по крайней мере в "цветах и шрифтах"
не нужно выходить,

#1615
когда в поле даты новой записи пишу год, нажатия записываются в буфер и только когда буфер заполнен 4 знаками, программа отображает все четыре цифры.
1-9-9-2
?-?-?-1992
было бы здорово видеть то что пишешь.
1-9-9-2
1-9-9-2

#туда-же
год при вводе вместо 1-9-8-7(таб), проще 1-3(таб) (я вписывал карточки 1976-1999 годов, это очень неудобно, каждый раз карточка разная), "двухзначные" года предлагаю вынести в настройки.

#1616
в поле даты новой записи
когда пишешь дате 25011992(таб), получается 25/01/1992
когда пишешь дату 250192(таб), получается 25/09/1992
когда вводишь карточки разных лет, часто приходится менять год, неудобно исправлять
+не видно что пишешь в поле "год" (№1615)
когда пишешь
240507(таб) получается 24/07/2007
210904(таб) получается 21/09/2007 (год не изменятся)

#1617
когда в поле времени ввода новой записи

пишешь:
0010, получается 0100
0059, получается 0509
все времена, начинающиеся с 00XX

#1682
"ситуация своего pileup-а"
при записи журнала с одновременным включёным кластером (band master), позывной корреспондента заменяется про-споченным через кластер моим-же позывным, т.к. частота совпадает. запись обычно пропадает, корреспондент уже ушёл, другие зовут, его уже не слышно. обидно.
задача: не заменять позывной из кластера, если в поле уже что-то написано. (можно через крестик в настройках). очень надо

#1689
при загрузке редактора журнала "menu>config>log manager", выбор не загруженного лога и попытка отредактировать название лога приводит к выводу формы, но она пустая. ввожу новые значение названия лога - или журнал всегда должнен быть в каком-то сете / не давать запись нового журнала, если ему не определён сет
>>>(обновление от 30/9-14): после вывода сообщение "you need to select log set", окошко с данными будущего лога закрывается, все данные стираются, нужно писать заново. вывод: не закрывать окошко, после сообщения "you need to select log set", как в добавок, можно подсветить поле, что нужно указать.

#1714
сейчас показывается только по:
number of QSOs per band
здорово если бы было:
number of QSO per band and mode >>
>> for current log
>> for current log set
>> for selection
print table (enter)
cw ssb rtty .....
20m 45 345 4
40m 56 34 44
15m 0 33 88
или как-нибудь так :)

#1715
- пытаюсь удалить лог. программа отвечает "you can't delete last log". почему? зачем? хочу оставить log set пустым, но не могу этого сделать
> Это совсем последний лог или последний в логсете?
- последний в новом лог-сете. помимо того есть ещё 4 логсета с журналами.
- (добавление от 30/9-14:) зато даёт удалить весь логсет, даже если в нём есть неудаляемый лог

№1 "прошлые связи" - АКТУАЛЬНО
"прошлые связи" с корреспондентом показывает, делая поиск либо только по одному логу, по одному сету логов, либо по всей базе. работая в другом логе, программа не показывает связи с этим корреспондентом (можно через галочку в настройках)

№2 qsl manager
горячая клавиша изменяет значение QSO когда карточка получена. либо пробел либо enter, в зависимости что важнее для откртия QSO из списка.
сейчас приходится брать в руки мышку и кликать внизу крестик (расскажите, если это можно сделать с клавиатуры)

№3 qsl manager
F7 всегда передвигает курсор в поле поиска (в принципе работает ALT+S), но удобней было бы F7 (даже если выбрана запись в списке). одна и таже кнопка ассоциируется с qsl поиском

№4 qsl manager
поле даты отправления карточки внизу есть, а поле даты получения нет. добавить поле получения даты

№5 qsl manager
при выделении нескольких записей и нажатии на чек-бокс "QSL rcvd" статус о принятии приминяется только к последней выбранной записи. когда на карточке несколько записей одного позывного, при его поиске выходят несколько связей, что целесообразно отметить одним нажатием, сейчас приходится делать 6 нажатий для 3 связей (мышкой)

№6 qsl manager - ОЧЕНЬ АКТУАЛЬНО
поиск QSO по разным логам, лога-сетам и по всей базе (в qsl manager использую первым столбиком "used callsign", как идея - можно сделать возможным отображения названия лога, в каком запись найдена) сейчас приходиться закрывать qsl manager, открывать другой журнал и оттуда опять открывать qsl manager

№7 qsl manager и другое
после открытия другого журнала и запущенном dx atlas, последний активируется = фокус смещается из главного журнала, это здорово, что в dx atlas передаётся информация о новом местоположении, но этот фокус можно вернуть обратно в aalog

№8 новая qso
esc очищает все поля в окошке новой qso (этой функции предназначен "апостроф", не могу понять почему не выбран esc?) у меня финская ракладка включена и апостроф в оочень неудобном месте, через shift около-твёрдый-знак, и он появляется только при двойном нажатии.
-- в письме рефлектора от 6/1-14 замечание UA3GGP "подкрепляет" мою идею (про "ё") --

№9 новая qso
новая запись, 3-QSL, traditional QSL rcvd, (x) QSL received, выбор даты, кнопка today не работает, нужно выбирать из календарной сетки

№10 автоматическая проверка и обновление DXCC и других текущих/критических данных автоматически
конкретика: включаю лог, он мне заявляет: дорогой, у нас стало одной dxcc больше, или "меньше".

№11 автоматическая проверка новой доступной версии аалог-а, стоит вообще всю линейку ваших програм проверять

№13 не понимаю логику с "обновлением", можно эти задачи посвятить установочному пакету? или "какие удобства добавляет выбор устанавливаемого пакета: полного или обновления?"
AALog v 3.3 Build 1175 installation package (single file) — 10 388 518 bytes
AALog v 3.3 Build 1175 update from build 1112 and later — 7 005 961 bytes

---

новое (30/9-14):

№14 удаление лога выдаёт ошибку "DM.dsLogList.DeleteQuery: Can't format message 13:87 -- message code -4. Deadlock. Update conflicts with concurrent update. Concurrent transaction number is 169351".
После экспериментов, понял, что я не могу удалить лог, если открыт текущий "лог сет". При смене последнего, появляется возможность удалить лог.
Вывод: поменять сообщение об ошибке на сообщение "Для удаления лога, откройте другой лог из другого лог сет-а", либо что-то вроде этого.

№15 "tools > move contacts to another log", добавить выскакивающее сообщение "contacts were moved succefully" после того, когда процесс завершён.

#16 "statistic > date interval for statistic", добавить кнопку "clear all"

№17 "file > import date", добавить выскакивающее сообщение "contacts were moved succefully" после того, когда процесс завершён.

№18 QRZ.com subscription - отображение информации

№19
- fixed bug with "-" and "+" keys in RST fields. You can enter 59+10dB now.
To increase/decrease S-report use Ctrl-"+"/Ctrl-"-" keys
(добавление от 30/9-14:) после 59, при нажатии ctrl+"+", может появляться "59+10dB" и до "+30дБ" с шагом в 5дБ, а также в обратном направлении.

с уважением,
Антон Тетерин
OG2K

---
aalog 3.3.1175
спасибо за:

№12 сайт, на страницах
http://dxsoft.com/en/products/aalog/ и http://dxsoft.com/ru/products/aalog/ не понятно, какая версия выложена для скачивания (нету нигде "в...1168")
не понятно, где получить информацию о том, какая последняя версия доступна для скачивания.
http://dxsoft.com/ru/products/aalog/history/ описание истории версий заканчивается "Version 2.3 beta (05 Jul 2002)" и
http://dxsoft.com/en/products/aalog/history/ описание истории версий заканчивается "Version 3.2 (20 Sep 2013)"
>> опять же не понятно когда вышла последняя версия бета *1168*

#1618
- moving from band "frequency" to "rst sent" field cause error "aalog: class not registred",
>> вроде вылечилось

#1713 ("statistic > date interval for statistic")
-было бы здорово видеть статистику "выборки". допустим: в журнале подсвечено (выделено) несколько записей (допустим за одни сутки). задача: посмотреть статистику только за

выбранный промежуток журнала.
-За выделенный произвольно - возможно, но будет мееееедленно. Если за сутки, за неделю и т.д. - не вопрос.
-идея изначально была отправить тикет как за "сутки", но потом подумали предложил "по выделению", думал что будет проще, оказывается наоборот. тогда DAILY STATISTICS by band/mode

---
aalog версия 3.2.0.1168
спасибо за:

1) alt+backspace, повтор позывного
2) selected" и количество в журнальном списке
3) write-mode название в вверхней части и остановку времени

From: OG2K Anton
Topic: 2045 Message: 2045

№20 20:04 04/10/2014

ситуация: работаю в одном журнале. в закладке "new qso", "5 - more" выставил свой локатор, используемый позывной и имя оператора. поменял журнал, а поля-то не изменились. во второй журнал пишется поля, изменённые в первом. поля потом через multi-edit исправляю.

1) при открытии журнала, "new qso", "5 - more" подгружать данные из свойств журнала. "my qth" = "grid", "used callsign" = "call", "operator", "power".

2) в "new qso", "5 - more" добавить крестик (x) "запомнить поля для _этого_ журнала"
- ввиду того, что журнал может быть одним, а поля локатора, оператора, позывного и мощности могут менятся в зависимости от места нахождения, аппаратуре, оператора и т.д. - сохранять последние введёные значения, иначе последние подгружать по умолчанию из свойств журнала при его следующем открытии.
- данные о (x) хранить в свойствах журнала.

№21 20:18 04/10/2014

какая разница между окнами "file, create/open log F3" и "config, log manager", может стоить их объединить?

№22 2014 10 07 - "F4, multi-edit"

в списке для изменения списка радиосвязей, можно использовать _все_возможные_ поля файла adif, например "equipment" (MY_RIG).
http://www.adif.org/304/ADIF_304.htm#Fields

заранее благодарен,
Антон

From: 'RX3RZ, Serge' rx3rz@tamb.ru [dxsoft-rus]
>достаточно нажать комбанацию клавиш "CTRL"+"C"

А тогда нужно еще "отбиться" от выпавшего автоматом меню с помощью Esc. А потом заметить, что при использовании в окне ввода QSO сочетаний Ctr-Ins, Shift-Ins, фокус перемещается в основное окно лога, а с ним улетает и курсор. Много ненужных движений. Я бы поддержал добавление Copy в меню и изменение логики этих двух команд.

С уважением, Евгений Баранов, UA3GGP.

2050. Давно забытое старое...

Пойдем официальным путем, ибо этим "хотелкам" (две из них были во 2-й версии) уже от 3 до 6 лет...

1."Галочки" для связей отправляемых в печать из окна "QSL-service".

2. Подсказки для IOTA в соответствующем поле "Окна Ввода".

3. Показывать картинку (если она есть) в окне ввода при повторной связи (про несколько картинок не стоит заморачиваться... вряд ли у кого их несколько на один позывной, DIGI-мазохисты не в счет).

* Далее... двойной клик... картинка открывается в другом, большем окне (с возможностью маштабирования и перетаскивания в любое место) поверх любых окон.*

* Кому не нужна (не нравится) - эту функцию сделать отключаемой.*

4. Это из "новых": при поиске инфо в инете, в закладке qrz.ru <http://qrz.ru> (если отсутствуют данные для российских позывных) - сделать "кнопку" поиск в базе ГРЧЦ.

* Вячеслав, ES1BA*

Сменился URL у LoTW. В новой версии AALog будет поправлено. Надеюсь в эти выходные выложить. Как быстрый вариант, можно добавить в файл hosts строку с нужным адресом. Файл лежит \Windows\System32\Drivers\etc
В него добавить строку
12.178.70.18 p1k.arrl.org

2055. AALog 3.4

Yahoo group: dxsoft-rus
Date: 2014-10-12 14:32:37 UTC
From: Alexander Anipkin
Topic: 2055 Message: 2055

Приветствую

Загружена на серверы новая версия AALog 3.4 build 1178

+ работа с платной частью QRZ.COM
+ возможность фильтровать в окне Awards manager по разным статусам
- исправлено имя сайта для загрузки подтверждений LoTW
- исправлена ошибка при ручном импорте отчета LoTW
- добавлены сообщения о завершении импорта/экспорта
- исправлены мелгие баги

полный пакет:
www.dxsoft.com/aal3.zip
www.hamport.com/aal3.zip

обновление:
www.dxsoft.com/aal3-upd.zip
www.hamport.com/aal3-upd.zip

Александр, приветствую вас.

Один микровопрос.

В DXCC у меня ZK2 идёт как ZK2, а должен быть как E6.
Это у меня так или ещё просто не меняли?

Удачи во всём!
73! Сергей (RJ3AA).

Можно в LoTW посмотреть, там есть E6 и нет ZK2.

Ну и конечно на сайте ARRL в DXCC Country list:
http://www.arrl.org/files/file/DXCC/2013%20DXCC%20Current_a.pdf

Сергей.

2064. [lotw-rus] проблема

Yahoo group: dxsoft-rus
Date: 2014-10-15 06:43:30 UTC
From: eu1fq
Topic: 2051 Message: 2064

Нуждаюсь в помоще по восстановлению загрузки подтверждений LoTW в AALOG.
Суть проблемы.
С начала октября перестали подтвержаться связи LoTW в AALOG. По совету Александра прописал в hots 12.178.70.18 p1k.arrl.org и все заработало. В воскресенье, 12 октября обновился до версии
3.4.0.1178. Опять перестала работать загрузка подтверждений LoTW. Ни прописка в hots адресса, ни другие
танцы с бубном ни к чему не привели.
Тогда я, на компьютере дочери, где одна и таже операционка (WindowsXP3)и никогда не стоял AALOG, установил
полную версию 1178, ввел ключик, перебросил из архива aalog.ini, call.lst, tables.ini и, естественно AALOG.GDB
и все прекрасно заработало.
Тогда на своем компьютере снес все следы AALOG, кщательно почистил различными прогами реестр на остатки следов предыдущей версии и установил 1178. Нет загрузки подтверждений LoTW !!!
Что только ни делал, и прописку в hots, и устанавливал различные даты, и Firewall и антивирус отключал, - ничено
не помогло! eQSL и LoTW users list загружает, а LoTW report нет!
Тупой перенос всей папки AALOG с оного компа на другой тоже не дал результата.
Наверно где то в глубине операционки остались следы от старой версии.Это подтверждает и то, что при установке
программы 1178 не был запрошен ключек!!!, а сразу установилась зарегистрированной.
Не знаю что дальше то и делать. Сносить всю систему нет никакого желания. Много чего нужно сохранять и переуствнавливать.
А постоянно перебрасывть AALOG.GDB с одного компа на другой тоже не дело.
В общем нужно как-то восстановить загрузку подтверждений LoTW или корректно удалить следы старой версии и по новой,
как на "чистый" компьютер, установить AALOG
Буду признателен за помощь.
Николай, 73!

2073. bugs/ideas

Yahoo group: dxsoft-rus
Date: 2014-10-16 22:33:52 UTC
From: OG2K Anton
Topic: 2073 Message: 2073

спасибо за:

#1714
сейчас показывается только по: > number of QSOs per band

#1614
кнопка "применить" в окне настроек, позволит быстро применять настройки
и выбирать цвет.
=== цвета "new qso" теперь меняются при нажатии кнопки (ок).
=== цвета главного окна через (ок),(ок)

№7 qsl manager и другое
после открытия другого журнала и запущенном dx atlas, последний
активируется = фокус смещается из главного журнала, это здорово, что в
dx atlas передаётся информация о новом местоположении, но этот фокус
можно вернуть обратно в aalog

№15 "tools > move contacts to another log", добавить выскакивающее
сообщение "contacts were moved succefully" после того, когда процесс
завершён.
==== спасибо, работает, но после закрытия окно импорта, а не после
выполнения функции копирования. идея в том, чтобы пользователь знал,
что процесс переноса завершён на этапе нажатия кнопки "go!", что
логически даёт ему понять, что он нажал на кнопку и функция выполнена.
почему? бывает, переношу связи из одного журнала в другой, их много,
пошёл чай наливать, пришёл - у меня на экране до сих пор тоже окошко,
тот же список и та же кнопка. думаю: "программа перенесла или нет?"
"Contacts was .." >> "Contacts were ..", во множественном числе.

№17 "file > import date", добавить выскакивающее сообщение "contacts
were moved succefully" после того, когда процесс завершён.
==спасибо, вот здесь работает как надо!

№18 QRZ.com subscription - отображение информации
===работает, но не понимаю какой толк в платной подписке, если зайдя в
qrz.com через встроенный браузер, показывается адрес и имя, даже фотка.
в "платной" закладке - только текст. объясните, пожалуйста, какова была
задумка? я представлял себе, что на уровне XML данные будут аж
запрыгивать в поля окна "new qso" :-)
+пароль можно превратить в звёздочки

№19 туда-же
+copy photo, > "new qso", picture > "paste from clipboard" не работает

№20 при открытом окне "information for og2k", сработал = добавил лог в
журнал, пишу следующего, допустим "oh2fnz"(таб), в окне информации нет
изменений. ничего не подгружает. приходится мышкой кликать "иконка" +

"lookup on internet" - просвятите, если это где-то нажимается,
ставится галочка.

#23 12/10-14 ошибка базы при вводе длинного позывного (больше чем 19 символов) "wrong search string ... select distinct ... order by qsodate.." лучше: просто игнорировать, ничего не выдавать, показывать. если показывать сообщение "слишком длинный позывной", окошко нужно будет закрывать. лучше наверное просто подсветить красным, как "неправильный" позывной

№24 12/10-14 ввод позывного не содержащего цифры.
не давать делать, подсвечивать как "неправильный"

№24 "multi-edit", добавить выскакивающее сообщение "Batch edit done." после того, когда процесс завершён. аналогия #15

#25 "config, options, color and fonts settings" добавить кнопку "restore default color theme"

#26 "filter settings, "delete option" error "aalog: list index of #bounds (-1)", хочу удалить запись - выскакивает сообщение об ошибке. потому что не выделена строчка (=фильтр). выбирать в фокус первую строчку при открытии окна "filter settings"

#27 по таблице DXCC подставлять IOTA в окошко "new qso"

Буду рад тестировать.
Сделаем журнал лучше - все вместе. :)

2075. AALog & CWType

Yahoo group: dxsoft-rus
Date: 2014-10-18 13:00:42 UTC
From: <rv9ax@...>
Topic: 2041 Message: 2075

Александр, приветствую.
Волею судьбы перебрался на новый ноутбук с Window 8.1.

AALog + OmniRig работают, CWType тоже, но по отдельности...
ААЛог не видит CWType в Properties/External Programs - надпись Get It на кнопке не уходит, как только не пытался ставить программу.

ААЛог установлен в корне C:\, CWType пробовал по разному, но всё равно, в сцепке они не работают.

Что может быть?

С уважением
Олег A65BR

Нужно каждую из программ один раз запустить "от имени администратора" из
меню по правой кнопке, чтобы нужные значения в реестр записалисью.
Даже если текущий пользователь - и без того админ.

С уже давно Ё разобрались, отключаемо. А esc используктся для остановки
передачи в CwType и trueTTY. Кроме того, эта же клавиша используется в
AATest для очистки. В принципе, если будет много желающих, можно сделать
выбор чем чистить.

Здравствуйте.
Александр, напомню о своей мелкой хотелке, которую уже озвучивал, но не уверен, что она вошла в план.
При нахождении в окне New QSO, нажатие Ctr-Ins or Shift-Ins приводит ещё и к перемещению курсора в основное окно. Думаю, что это вряд ли кому нужно, скорее всего незамеченный глюк, и нуждается в устранении.
С уважением, Евгений Баранов, UA3GGP.

Здравствуйте, Александр.
У меня пара вопросов по ААлог, а именно почему то?
при выборе Lookup in the internet в окне Edit QSO info не передаётся информация
по выплывающему списку name, via, iona и т.д. , ?а выскакивает сообщение об ошибке.
TrueTTY V2.95 ?не заполняется поле Subdiv. Все остальные
?поля из программы ?TrueTTY заполняются в окне New QSO AAlog, а поле
?Subdiv не получается.

> завершён.
>
> Сделано в прошлой версииContatacts was moved""

В XP работает не совсем корректно... При осуществлении процесса переноса, поверх окна "Move contacts to another log" появляется окошко "Process progress", но течение самого процесса оно не показывает... когда все же перенос (наверное) завершен это окошко исчезает... Закрываем окно ."Move contacts to another log" и только тогда
видим сообщение "Contacts was moved".

Здравствуйте, Александр.
У меня пара вопросов по ААлог, а именно почему то
при выборе Lookup in the internet в окне Edit QSO info не передаётся информация
по выплывающему списку name, via, iona и т.д. , ?а выскакивает сообщение об ошибке.
TrueTTY V2.95 ?не заполняется поле Subdiv. Все остальные
?поля из программы ?TrueTTY заполняются в окне New QSO AAlog, а поле
?Subdiv не получается.

From: OG2K Anton
Topic: 2088 Message: 2088

```
------------------------------
------------------------------
актуально (версия 3.4.0.1178) последнее предложение №33
------------------------------
------------------------------

№20 ситуация: работаю в одном журнале. в закладке "new qso", "5 - more"
выставил свой локатор, используемый позывной и имя оператора. поменял
журнал, а поля-то не изменились. во второй журнал пишутся поля,
изменённые в первом. поля потом через multi-edit исправляю.
1) при открытии журнала, "new qso", "5 - more" подгружать данные из
свойств журнала. "my qth" = "grid", "used callsign" = "call",
"operator", "power".
2) в "new qso", "5 - more" добавить крестик (x) "запомнить поля для
_этого_ журнала", тогда изменённые данные будут запомнены для этого
журнала.
- ввиду того, что журнал может быть одним, а поля локатора, оператора,
позывного и мощности могут менятся в зависимости от места нахождения,
аппаратуре, оператора и т.д. - сохранять последние введёные значения,
иначе последние подгружать по умолчанию из свойств журнала при его
следующем открытии.
- данные о (x) хранить в свойствах журнала.

№21 какая разница между окнами "file, create/open log F3" и "config,
log manager", может стоить их объединить?

№1613, №22 МУЛЬТИРЕДАКТИРОВАНИЕ
когда я открыл импортировал старый адиф файл в базу, захотелось
изменить поля, которых не было в списке опций. например "аппаратура". У
вас очень удобный интерфейс к редактированию записей, база готова,
просто добавьте полей. Часто работаю с адиф файлами других
радиолюбителей, которые приходится "доводить напильником". "F4,
multi-edit" в списке для изменения списка радиосвязей, можно
использовать _все_возможные_ поля файла adif, например
"equipment" (MY_RIG), "power" (TX_PWR).
http://www.adif.org/304/ADIF_304.htm#Fields

> одна и таже кнопка ассоциируется с qsl поиском.
Имя окна точное???
(OG2K: "qsl manager" (F7), "search contacts")

№32 "New QSO", добавить открытие "QSL manager" по F7.

№31 предлагаю добавить в QSLing каким образом получена карточка:
"received via buro, received direct, received via OQRS" +
"received enclosed" окна: 1) "Edit QSO info", "QSLing" 2) "New QSO",
"QSLing", "Traditional QSL rcvd" (по аналогии как сделано с "sent")

> №5 "qsl manager" (F7), "search contacts"
> при выделении нескольких записей и нажатии на чек-бокс "QSL rcvd" или
> CTRL+R, статус о принятии применяется только к последней выбранной
> записи. когда на полученной карточке несколько записей об QSO одного
> позывного, при его поиске выходят несколько связей, что целесообразно
> их отметить одним нажатием. Сейчас приходится делать 6 нажатий для
> 3 связей (мышкой)
тут надо решить как поступать, если не нароком выделены свзяи с разным
статусом. Например 2 со статусом "rcvd" и 2 "not rcvd". Поведение не
очевидно.
(OG2K: я не предлагаю изменять статус всех найденных связей, а только
выделенных, например через CTRL+клик) ("эту, эту и эту"), CTRL+R.

> №10 автоматическая проверка и обновление DXCC и других
> текущих/критических данных автоматически конкретика: включаю лог, он
> мне заявляет: дорогой, у нас стало одной dxcc больше, или "меньше".
не понял.

(OG2K: автоматическая проверка обновления на сайте
www.country-files.com, автоматический импорт и установка. Вас, в свою
очередь, это избавит от необходимости поддерживать актуальной DXCC
таблицу, т.к. пользователи это будут делать сами так часто, как им это
необходимо. Пользователи будут рады, т.к. информация по дипломам -
свежая).

> №11 автоматическая проверка новой доступной версии аалог-а, стоит
> вообще всю линейку ваших програм проверять
подумаю над этим.

> №13 не понимаю логику с "обновлением", можно эти задачи посвятить
> установочному пакету? или "какие удобства добавляет выбор
> устанавливаемого пакета: полного или обновления?" AALog v 3.3 Build
> 1175 installation package (single file) — 10 388 518 bytes
> AALog v 3.3 Build 1175 update from build 1112 and later — 7 005 961
> bytes
обновления проводят корректировку в базах данных на предмет их
приведения к самому свежему формату.
(OG2K: понимаю. можно ли эту проверку включить в начало
полного инсталлятора? если инсталлятор находит установленный Аалог на
компьютере - запускает функцию обновления, если нет - продолжает
штатную установку, вам легче - выкладывать только один файл,
пользователям легче - меньше думать, при автоматической проверке и
обновлении - тоже плюс)

#23 ошибка базы при вводе длинного позывного (больше чем 19
символов) "wrong search string ... select distinct ... order by
qsodate.." лучше: просто игнорировать, ничего не выдавать, показывать.
если показывать сообщение "слишком длинный позывной", окошко нужно
будет закрывать. лучше наверное просто подсветить красным (или
ошибочным), как "неправильный" позывной

№24 ввод позывного не содержащего цифры. не давать делать, подсвечивать
как "неправильный"

№24 "multi-edit", добавить выскакивающее сообщение "Batch edit done."
после того, когда процесс завершён. аналогия #15

#25 "config, options, color and fonts settings" добавить кнопку
"restore default color theme"

#26 "tools, filter F9, (окно "filter settings"), в списке есть
один созданный фильтр, нажимаю "delete option", выскакивает сообщение об
ошибке: "aalog: list index of bounds (-1)", потому что не выделена
строчка (=фильтр). выбирать в фокус первую строчку при открытии окна
"filter settings" или не давать нажать кнопку удалить пока строчка не
выделена.

№30 "tools, filter F9, (окно "filter settings"), в списке есть
один созданный фильтр, нет возможности отредактировать его. приходиться
его удалить и создать новый. добавить возможность редактировать фильтр,

не удаляя его.

#27 по таблице DXCC подставлять IOTA в окошко "new qso"
есть DXCC префиксы, которые 100% соответствуют островам и имеют
только один IOTA номер, например OH0 (Оландский о-ва) - EU-002.
В окне "new qso", подставлять автоматически в поле IOTA, если по
префиксу позывного, набранного в поле callsign, найдена соответсвующая
IOTA.
инфа: http://www.rsgbiota.org/xml/tags.php
БД (связка DXCC=IOTA) стоит хранить локально и делать запрос на
обновление раз в неделю.

№20 при открытом окне "information for og2k" (lookup in the internet),
сработал = добавил лог в журнал, пишу следующего, допустим
"oh2fnz"(таб), в окне информации нет изменений. ничего не подгружает.
приходится мышкой кликать "иконка" + "lookup on internet" - просвятите,
если это где-то нажимается, ставится галочка. можни ли автоматически
подгружать информацию из интернета?

№28 "new qso", "lookup in the internet", "qrz.com (web)", по
фотографии правым кликом "copy photo", обратно в "new qso", "1 - notes"
"picture" правым кликом "paste from clipboard" не работает. Никаких
ошибок/сообщений не появляется. Через установленный на компьютере
firefox "copy-paste" работает. вывод: в встроенном браузере, программа
не копирует изображение в буфер.

№29 Как с клавиатуры а) открыть окно "lookup in the internet" ,
допустим из окна "new qso"? б) перезагрузить содержимое окна ?

спасибо за:
(есть комментарии)

> #16 "statistic > date interval for statistic", добавить кнопку "clear
> all"
на каждом поле del нажать 2 клика вместо одного.
(OG2K: 1) не понял ваших инструкций
2) понял, что на клавиатуре кнопка (del) очищает выделенное поле даты
3) понял что кнопка "help" не работает
4) после установке интервала даты, при повторной подгрузке окна выбора
даты "date interval" в поле "to date" значение поля дата не
сохраняется.)

> №15 "tools > move contacts to another log", добавить выскакивающее
> сообщение "contacts were moved succefully" после того, когда процесс
> завершён.
Сделано в прошлой версии
(OG2K: спасибо, работает, но после закрытия окно импорта, а не
после выполнения функции копирования. идея в том, чтобы пользователь

знал, что процесс переноса завершён на этапе нажатия кнопки "go!", что логически даёт ему понять, что он нажал на кнопку и функция выполнена. почему? бывает, переношу связи из одного журнала в другой, их много, пошёл чай наливать, пришёл - у меня на экране до сих пор тоже окошко, тот же список и та же кнопка. думаю: "программа перенесла или нет?" при появлении сообщения после переноса связей, понимаю, что программа перенесла связи. + (граматическая ошибка "Contacts was .." >> "Contacts were ..", во множественном числе.)

№18 QRZ.com subscription - отображение информации
> работает, но не понимаю какой толк в платной подписке, если через
> "QRZ.COM (WEB)" зайдя в qrz.com через встроенный браузер, показывается
> адрес и имя, даже фотка. в платной закладке "QRZ.COM (XML)" - только
> текст. объясните, пожалуйста, какова была задумка? я представлял
> себе, что на уровне XML данные будут аж запрыгивать в поля окна "new
> qso" :-) +пароль можно превратить в звёздочки
Сделано в прошлой версии
(OG2K: работает, так в чём была задумка поддержки платной версии, если бесплатная и так работала?)

№1677, №19 ПОЛЕ ВВОДА РАПОРТА
Приветствую, имеется ли возможность записи в рапорте кроме 59, значение "59+" или "59+10" или "59+10dB" ?? спасибо
- fixed bug with "-" and "+" keys in RST fields. You can enter 59+10dB now. To increase/decrease S-report use Ctrl-"+"/Ctrl-"-" keys
(OG2K: после 59, при нажатии ctrl+"+", может появляться "59+10dB" и до "+30дБ" с шагом в 5дБ, а также в обратном направлении.)

спасибо за:

#1682 СМЕНА ПОЗЫВНОГО ИЗ КЛАСТЕРА
"ситуация своего pileup-а"
при записи журнала с одновременным включёным кластером (band master), позывной корреспондента заменяется про-споченным через кластер моим-же позывным, т.к. частота совпадает. запись обычно пропадает, корреспондент уже ушёл, другие зовут, его уже не слышно. обидно.
задача: не заменять позывной из кластера, если в поле уже что-то написано. (можно через крестик в настройках). очень надо
(OG2K: работает)

#1714 STATISTICs show by band AND by mode
сейчас показывается только по:
number of QSOs per band
здорово если бы было:
number of QSO per band and mode >>
(OG2K: работает)

#1614
кнопка "применить" в окне настроек, позволит быстро применять настройки
и выбирать цвет. по крайней мере в "цветах и шрифтах" не нужно выходить,
(OG2K: цвета "new qso" теперь меняются при нажатии кнопки (ок); цвета
главного окна через (ок),(ок))

> №7 qsl manager и другое
> после открытия другого журнала и запущенном dx atlas, последний
> активируется = фокус смещается из главного журнала, это здорово, что
> в dx atlas передаётся информация о новом местоположении, но этот
> фокус можно вернуть обратно в aalog
вроде сделал в прошлой версии
(OG2K: работает)

> №17 "file > import date", добавить выскакивающее сообщение "contacts
> were moved succefully" после того, когда процесс завершён.
Сделано в прошлой версии
(OG2K: спасибо, вот здесь работает как надо!)

> №14 удаление лога выдаёт ошибку "DM.dsLogList.DeleteQuery: Can't
> format message 13:87 -- message code -4. Deadlock. Update conflicts
> with concurrent update. Concurrent transaction number is 169351".
> После экспериментов, понял, что я не могу удалить лог, если открыт
> текущий "лог сет". При смене последнего, появляется возможность
> удалить лог. Вывод: поменять сообщение об ошибке на сообщение "Для
> удаления лога, откройте другой лог из другого лог сет-а", либо что-то
> вроде этого.
посмотрю
(OG2K: с удалением логов вроде стало работать лучше)

#1679 ОТОБРАЖЕНИЕ КОЛИЧЕСТВА ВЫДЕЛЕННЫХ СТРОК
задача: быстро посчитать сколько связей в таблице: при выделении через
SHIFT или CTRL, в нижнем-правом углу рядом с написью "QSOs in log"
появляется надпись "76 QSO selected". Очень не хватает. Когда это же
делаешь через фильтр, показывается сколько отфильтровано и на
калькуляторе нужно считать сколько "выделено".

#1608 ПЕРЕКЛЮЧЕНИЕ МЕЖДУ ГЛАВНЫМ ЖУРНАЛОМ И НОВОЙ
очень удобно переключаться в режим новой записи кнопкой ИНСЕРТ, после
чего кнопка ИНСЕРТ становится неактивной, как идея, можно переключаться
обратно в главный журнал. иначе приходится переключаться на уровне
виндовс АЛТ+ТАБ, при условии, если открыты только две программы.
(OG2K: "INS")

#1610 ИНДИКАЦИЯ РЕЖИМА ВВОДА
да, я заметил, что цветом отображается режим записи журнала или
реального времени. было бы здорово видеть режим написан текстом
"журнал" или "онлайн". или сделать, как вы предложили, чтобы часы
останавливались.
(OG2K: "CTRL+ALT+W", "Writelog mode is ACTIVE!")

#1612 ПОВТОРЕНИЕ ПОСЛЕДНЕГО ВВЕДЁННОГО ПОЗЫВНОГО
когда записываешь с одной карточки несколько связей, возможность

вставить тот-же позывной что и в предыдушей записи. что обеспечит
эффективность ввода лога от одного и того же позывного.
(OG2K: "CTRL+ALT+BACKSPACE")

№1678 ПОВТОРНАЯ СВЯЗЬ
Появляется ли где-нибудь табличка, где отображается рядиосвязи с одной
и той же станцией? Допустим, я ввожу "OH2F", таблица делает поиск по
базе и показывает "OH2FNZ, OH2FTX, OH2FNX", и связи с ними проведённые.
Делает поиск по всем логам/только по этому/только по набору лога.
(OG2K: "New QSO", CTRL+Q, "callsign", "OH*")

решили не делать

#1611, #1615, #1616, #1617 - решили не ковырятся с датами

> №1 "прошлые связи" - АКТУАЛЬНО
> "прошлые связи" с корреспондентом показывает, делая поиск либо только
> по одному логу, по одному сету логов, либо по всей базе. работая в
> другом логе, программа не показывает связи с этим корреспондентом
> (можно через галочку в настройках)
> Показывает прошлые связи с корреспондентом если логи в одном логсете.
> Т.е. на "того же" человека.
Другой логсет - это фактически другая станция и логично не показывать
эти связи.
(OG2K: решил свою задачу скопировав все журналы в один лог-сет)

> №6 qsl manager - ОЧЕНЬ АКТУАЛЬНО
> поиск QSO по разным логам, лога-сетам и по всей базе (в qsl manager
> использую первым столбиком "used callsign", как идея - можно сделать
> возможным отображения названия лога, в каком запись найдена) сейчас
> приходиться закрывать qsl manager, открывать другой журнал и оттуда
> опять открывать qsl manager
не понял. Пожалуйста называйте окна тми именами как они названы в
логе.
(OG2K: решил свою задачу скопировав все журналы в один лог-сет, теперь
все отображаются в одной таблице. первым столбцом вывел "used
callsign", по нему и понимаю, из какого журнала связь нашлась)

> №8 новая qso
> esc очищает все поля в окошке новой qso (этой функции предназначен
> "апостроф", не могу понять почему не выбран esc?) у меня финская
> ракладка включена и апостроф в оочень неудобном месте, через shift
> около-твёрдый-знак, и он появляется только при двойном нажатии.
> -- в письме рефлектора от 6/1-14 замечание UA3GGP "подкрепляет" мою
> идею (про "ё") --
С уже давно Ё разобрались, отключаемо. А esc используктся для остановки
передачи в CwType и trueTTY. Кроме того, эта же клавиша используется в
AATest для очистки. В принципе, если будет много желающих, можно сделать

выбор чем чистить.

> №9 новая qso
> новая запись, 3-QSL, traditional QSL rcvd, (x) QSL received, выбор
> даты, кнопка today не работает, нужно выбирать из календарной сетки
Today только переставляет на текущую дату
(OG2K: буду кликать today и выбирать из сетки)

> #1606 возможность менять цвет фона выбранной записи, когда
> открывается окно > для новой записи. она становится неактивной (это
> на уровне виндовс темы).
(OG2K: вроде привык :)

> №4 qsl manager
> поле даты отправления карточки внизу есть, а поле даты получения нет.
> добавить поле получения даты
Имя окна точное???
(OG2K: прошу прощения, поле даты там не было, было поле КАКИМ ОБРАЗОМ
карточка выслана.)

#1713 STATISTICs selected only
было бы здорово видеть статистику "выборки". допустим: в
журнале подсвечено (выделено) несколько записей (допустим за одни
сутки). задача: посмотреть статистику только за выбранный промежуток
журнала.

Благодарю,
73!

2089. ideas / bugs

From: OG2K Anton
Topic: 2089 Message: 2089

```
------------------------------
------------------------------
актуально (версия 3.4.0.1178) последнее предложение №34
------------------------------
------------------------------
```

№34 окно "MULTIEDIT" значение "operator" больше чем 10 символов приводит к ошибке "DM.tmpQuery: Can't format message 13:198 -- message system code -4. Arithmetic exception, numeric overflow, or string truncation". а) если позывным работоло больше операторов, например "OH2FNZ OG2K", в моём конретном случае нас было четверо. то записать не удаётся б) выдавать сообщение на человеческом языке "Разрешённая длинна поля 256 символов".

№35 окно "new qso", трансивер отключён. омниригг работает. нахожусь в нормальном режиме записи, не "write log". вписываю позывной, перехожу в поле "диапазон", выбираю "20м", смотрю на трансивер 14.236, вписываю в поле частоты. нажимаю (таб), значение поля сбрасывается на "0.000". Не сбрасывать введёную частоту.

№37 пришло время делать бэкапы, господа. как? добавить в меню "file" опцию "quick export", которая проэкспортирует все журналы всех лог-сетов со стандартными параметрами в запрошенную папку. например, "file > quick export", окно "quick export", выбор журналов через крестики, выбор папки (например, на флешку), (enter), окно "quick export completed". На фоне происходит запуск одной и той же функции export с параметрами "format adi, all selected, all fields" для каждого выбранного журнала. Файловая маска:
20141030_OG2K.adi
20141030_OH0_OH2FNZ.adi
20141030_OH2FNZ_5.adi
Будет очень-очень удобно делать резервное копирование. на эту операцию своих девяти журналов ушло 15 минут, когда я делал каждый по отдельности.

Отличного настроения,
/A

```
#36 горячие клавиши и QSLing

окно // функция

"Aalog" журнал - главное окно
Queued CTRL+L
Received CTRL+R
Printed CTRL+P
Sent via buro CTRL+S
Sent direct CTRL+D
QSL don't need -
Received CTRL+R

QSL manager (F7)
Queued CTRL+Q
Printed CTRL+P
Sent via buro CTRL+B
Sent direct CTRL+D
Requested via OQRS -
QSL don't need CTRL+O
Received CTRL+R

Award manager (F8), двойной щелчок левой по выделенной ячейке, из
списка по QSO правой кнопкой, "Mark QSL as ..."
Not sent -
Queued CTRL+L
Printed CTRL+P
Sent via buro CTRL+S
Sent direct CTRL+D
Requested via OQRS CTRL+O
QSL don't need -
Received CTRL+R

Предлагаю сделать выпадающий список функций по клику правой кнопке и
горячие клавиши - одинаковыми во всех окнах.

Значит в настройке лога у вас не стоит галка "use system time"

Редактировать через Global edit (F4) В хелпе все написано.

2094. [dxsoft-rus] AALOG и зимнее врем я.

Yahoo group: dxsoft-rus
Date: 2014-11-08 17:39:00 UTC
From: Eugene Baranov
Topic: 2094 Message: 2094

To RA4DB.

{Только что заметил, что ААлог, в отличие от других программ, сам не "перевелся" на зимнее время... Как мне его перевести на нормальное время? }

Ну, наверно прочитать, наконец help :)) и поставить галку 'Use system time' в Log manager, раз в компьютере время нормальное.
73.
С уважением, Евгений Баранов, UA3GGP.

Антон, все ГОРАЗДО проще. вам нужен файл aalog.gdb и все (ну еще можно ini скопировать для полного счастья). Единственное, файл, в случае установки в program files в Win Vista/7/8, находиться в профиле пользователя, а не там где лог установлен. Настраиваете в меню Run команду архивирования/копирования этого файла и все.

Что, никто не знает , что ли, что меняется при внесении нового значения в поле Time offset?? Ай-ай-ай, а так иронизировали, хелп читать советовали..
Так и придется вручную менять.

При внесении в поле Time offset значения минут (без знака) ко всем
выделенным связям добавятся нужное число минут. Если произойдет переход
через 24 часа - сменится дата.
При внесении в поле Time offset значения минут с минусом ото всех
выделенных связей отниметься нужное число минут. Если произойдет переход
через 0 часов - сменится дата.

в вашем случае нужно ввести -60.

Спасибо за инструкции, Александр. Сделаю. Изначально, идея пришла от
подготовки журналов к закачке Clublog в формате *.adi, потом подумал,
что будет полезно как и "резервное копирование".

А если надо быстро получить все связи одного логсета, то самое простое решение это зайти в настройку фильтров (F9) и не назначая НИКАКИХ фильтров нажать Query. В этом случае в открывшемся окне будут ВСЕ связи этого логсета.

Ну оччень маленькая хотелка
В Spot List диапазоны включать не по одному или все, а по всякому, т.е. чтобы можно было нажать одновременно 2 или больше "кнопок".

Например - проход на верхах и хочется смотреть споты на 10 и 12 метрах одновременно.

Александр, это нормально, ведь у УКВистов Grid обычно всегда заполнен, один из важнейших показателей там - именно расстояние и это стараются не пропускать.
Вопрос как бы не в том, чтобы отфильтровать связи, начиная с какого-либо расстояния (хотя это тоже весьма интересно), а в том, чтобы их можно было выставить по ранжиру, начиная с самой дальней. Например, за вчерашнее прохождение, за месяц, за год, или вообще. Но как? Вот если это возможно, и если я не очень сильно этим напрягу, то я бы очень бы попросил. Ну где-то так, отметил хотелку.

С уважением, Евгений Баранов, UA3GGP.

Dear dxsoft-rus,

Хочу поинтересоваться, почему при работе цифрой в TrueTTY, при нажатии ESC, передача идет еще не менее 7 символов и только потом трансивер возвращается на прием?
Даже при FSK так...хотя в CWType практически тут же отпускает...

Евгений, вы смешиваете термины "сортировка" и "фильтрация". Можно сделать отчет по типу тех что в меню Statistic. Т.е. не в логе сортировать. Но все равно нужно писать кусок кода который бы в запросе к БД занимался расчетом расстояния на лету.

Да, Александр. Согласен. Каюсь. Речь наверно о сортировке, фильтрацию можно опустить. Но суть хотелки Вы поняли. Если будет возможность - сделайте, знайте, что она ожидаема, будет востребована и прибавит популярности Вашему творению, поклонником которого я являюсь с самой первой версии.
И естественно, будет принята с большой благодарностью. :)

Здравствуйте, Dxsoft-rus.

1. неоднократно щамечал, если при включенных названных программах и включенном браузере опера или эксплорер даже только с одним кластером - тормохится передача. с хромом вроже не замечал. может нужно с компом позаниматься.

2. начались ДА СРВС. хотел поработать. своим колом и спец. использовал 2 копии ААТест. за одно решил сделать и 2-ю копию CWTYPe, чтобы не лазить постоянно в макросы. сделал. но оказалось, что даже если во время работы первой копии программы вторая закрыта, в ней тоже изменяются настройки! пробовал даже перекинуть вторую копию на другой физический диск. не помогло :-(приходится постоянно перебивать макросы. подумалось.был бы неплохо, ЕСЛИ БЫ CWT брал "MyCall" из настроек ААТест...

3. заметил в ААТест, что если промежуточно сохранить лог в формате адиф могут пропадать связи. хотел вести лог за ДА сквозняком. днем поработал, сделал очередную копию. вечером запускаю ААтест и не вижу связей на 17 м. и нумерация старая. оказалось несколько десятков связей исчезли. причем не после последней копии в адив а предыдущей. в в последней копии связи все. но после очередного открытия ААТ в логе остались связи , сделанные до предпоследней копии.
благо копии сделаны и отосланы на сервер. версия ААТ была 1.95.. продолжил лог в версии 1.105. версии 1.99 пока такого не заметил

4. в режиме dx expedition в окне статистики показываются только диапазоны 160-17м. 15-10м не видно.

Dear Alex_R6CW,

По 2-му пункту:
а) чтобы настройки были разными - создавайте в другом каталоге (на другом диске) папку ААТест и копируйте туда "нулёвые" файлы из дистрибутива (к примеру, скаченного архива).
Если будете, как сейчас, копировать файлы из уже установленной где-то программы, то в другом каталоге (на другом диске) будут те же настройки, что и в первом каталоге!
б) давно есть такой макрос ~[iMyCall]

Удачи!

ААТест у меня несколько папок. разные версии. на одном диске. но
открываю их по одной.
т.к. при одновременном открытии двух ААТ с разными тестами. по ходу
раьоты название теста менялось и становилось одинаковым для обоих
открытых программ.

имеется в виду CWTYPE. вот сдесь. даже если одна из ее копий закрыта.
в закрытой копии позывной все равно менялся на тот, который в
открытой.

Apmrdr>> - тормохится передача.

да. передкача начинается через некоторое время после нажатия кнопки.
время бывает разное. при этом на компе кроме тестовых программ лога и
тайпа запущен только браузер (обычно опрера). сначала грешил на много
открытых закладок. запускал только с кластером. не помогло. пробовал
другие браузеры. оказалось с хромом вроде нормально, не тормозит. но
хром что то не очень приемлю.
грешу не на связку тест-тайп, а на систему. просто вот такой глюк
есть.

как раз и пробовал. создал еще одну папку с небольшой добавкой в имени. изменил там макросы. закрыл. но после открытия первой копии , данные в макросах закрытой иоже поменялись. попробовал папку со второй копией перенести на другой диск, вроде даже физический. все равно не помогло. попробую сейчас макрос ~[iMyCall]. может будет самое то.

просто сейчас получилось так, что нужно по очереди работать разными позывными, вот и наметилась проблемка :-)

> ====

Apmrdr>> пробовал даже перекинуть вторую копию на

Если передача начинается при нажатии клавиши F через некоторое время,
значит или содержимое макроса начинается с одного, двух и более
пробелов, или в окне ввода информации курсор передвинут на один, два и
более пробелов. Браузеры здесь ни при чем.

Кстати держать открытыми два AATеста из разных каталогов одновременно
плюс CWType не получится.
Как CWType будет определять с каким именно AATестом работать? :)
А вот одновременная работа AATест + CWType + AAVoice - возможна,
проверено!

пробелов/сдвигов нет. как раз браузеры в моем случае при чем. сегодня
тоже пробовал. одну- две связи провел. начинает тормозить. отключаю
браузер - все нормально. да он сегодня особо и ни к чему был. все время на
вызов работал.

Здравствуйте, 'Konstantin.

Вы писали 14 декабря 2014 г., 18:14:56:

нет. в один момент времени был открыт один AAT и один CWType.

по очереди работал разными позывными. при этом "не активная пара программ" была закрыта.
разобрался. файл ини получался один и был на диске С в папке документы/установки. скопировал его в исхдные папки CWTyp и все стало нормально. только приходится после запуска нужного CWType заново включать COM порт. этот глюк возник после переноса файла ини. но разбираться было пока некогда разберусь на досуге. а пока на работе по свободе поштудирую хэлпы.

2124. AALog

Yahoo group: dxsoft-rus
Date: 2014-12-16 05:49:44 UTC
From: Serge Systerov
Topic: 166 Message: 2124

Я так же сталкивался иногда с задержкой передачи. Но недавно обнаружил, что после закрытия AALog загрузка процессора возрастает до 60-70 % и стабильно держится на этом уровне (при отсутствии в памяти других задач). Если снова загрузить лог, то загрузка уходит на 2-5 %.

Возможно, во время теста подгружал лог, чтобы посмотреть взятые страны, а потом закрывал его. Давно это было, а теперь так не делаю.

Версия лога 3.2.0.1168, ОС- XPsp3.

Попутно есть предложение. В тестах некоторые собирают только страны. Хорошо бы связать AATest с базой данных AALoga. Скорость сканирования и вывода информации <сработано-нет> не важна. Можно поставить в панели меню крыжик на активацию режима <охотника на dxcc>. Или выпустить отдельную версию, чтобы не утяжелять тестовую программу.

С уважением,

Сергей, ua9ffv

Добрый день

Ну, в принципе, можно будет реализовать из "большого" лога экспорт
сработанных (или подтвержденных) стран/районов и т.д. и потом в AATest
загружать это в таблицу мультов и считать их сработанными.

2127. RE: [dxsoft-rus] AALog

Yahoo group: dxsoft-rus
Date: 2014-12-16 08:16:37 UTC
From: Serge Systerov
Topic: 166 Message: 2127

Добрый день, Александр!

Да, хорошее решение! Будет отличный помощник!

По поводу тормозов. Провел эксперимент. Перегрузил комп., чтобы в памяти ничего не осталось. Запустил Process Explorer из пакета Sysinternals. Затем загрузил AALog. Загрузка процессора установилась в 0-3 %. После закрытия лога увидел, что системный процесс Interrupts взял на себя 70 % загрузки процессора и болтается на этом уровне.

После вновь загрузил лог. По этому процессу загрузка уменьшилась до 0-3 %. Тогда в опциях программы убрал Use OmniRig.

И опять прерывания грузанули процессор до 70 % (при этом лог даже не закрывал). Получается, что-то с настройкой ОмниРига. Я использую версию 1.14:

ОмниРиг работает с Ком-овской 4-х портовой мультикартой. Попробую либо драйвера поискать другие, либо материнский Ком подключу. Через день-другой отпишу о результатах. Спасибо R6CW, заставил немного пошевелиться :-).

А еще через ОмниРиг получаю данные для автоматического управления коммутатором антенн. Но свою программу в этом сеансе не запускал. Так что она ни при чем:

2128. RE: [dxsoft-rus] AALog

Yahoo group: dxsoft-rus
Date: 2014-12-16 08:15:12 UTC
From: R3ARC
Topic: 166 Message: 2128

RX3RZ пишет:

> Интересно. Посмотрел у себя.
> При загрузке процессора в 7% запускаю AALog (ver. 3.4.0.1178)...

Тоже стало интересно.
Вот что у меня:
Загрузка процессора 13%. Запускаю AALog (ver. 3.1.0.1157) - те же 13%.
Иногда прыгает до 14%.

Железо:
процессор - Intel(R) Core(TM)i7 2.67GHz
ОЗУ - 12 ГБ
Операционка Win 7(64)

2129. AALog 3.5 build 1183

Yahoo group: dxsoft-rus
Date: 2014-12-17 16:27:24 UTC
From: Alexander Anipkin
Topic: 2129 Message: 2129

Приветствую

Новая версия выложена на сайты

ВНИМАНИЕ!!! Изменен каталог установки по умолчанию. Для уменьшения проблем при работе с WIndows Vista/7/8 каталог установки по умолчанию - C:\AALog3

- поддержка нового формата dxsummit.fi
+ пересканирование данных только одного диплома (кнопка в окне Awards Manager), при этом выполняет только обновление диплома, никакие поля не пересчитываются.
+ в главном окне добавлена сортировка по полю GRID
+ добавлен экспорт в CSV текущего состояния таблицы Awards Manager
+ поддержка файла с дополнительной информацией о позывных. См. файл notes.txt.
Формат файла: Позывной<пробел>доп. инфо. Информация отображается при выходе из поля позывного. Пропадает либо по тайм-ауту, либо при смене позывного или сохранении.
- Ограничен минимальный размер окна QSL Service
- Поправлен список диплом KDA (после обновления новый список лежит в каталоге ref, нужно очистить старый список диплома и загрузить новый)
- при импорте подтверждений из LoTW и eQSL.cc не спрашивает про контрольные номера

качать:

Доброго Всем!

Журнал это не только работа в эфире. Журнал - это история, которую каждый пишет сам. Журнал греет руки и дарит воспоминания достижений и побед.

Одна из моих побед - экспедиция на Галапагосы в составе команды

HC2ANT/8 (UA1ANA), HC2AO/8, HC2OGT/8 (OG2K), HC2RAT/8 (RA1AGL), HC2RCT/8 (RC5A), HC2RMT/8 (RM0F) и HC2WAT/8 (R4WAA)

Спасибо всем тем, кто был с нами!

Аалог был со мной, куда скидывал логи с разных рабочих мест.
Аалог сейчас со мной, обрабатывая карточки и запросы.

Всем хорошего настроения!

Хочу поблагодарить Александра за работу и просто с наступающими праздниками, в виду этого прошу его опубликовать ссылку на "Donate via PayPal", чтобы сделать ему прятно.

Антон

В порядке важности:

041

Всё началось около года назад, когда я хотел разнести журналы, отработанные из разных DXCC, в разные лог-сеты, чтобы считать AWARD для каждого конкретной DXCC. После этого я столкнулся с проблемой, что при вводе позывного, я не видел, работал ли я с этой станцией ранее или нет - она была в другом журнале. Я предложил показывать в окне "прошлые связи" связи из другого лог-сета. Получил отрицательный ответ. Я решил свою проблему, объединив все журналы в один лог-сет, теперь вводя позывной, я вижу какими-позывными я уже работал с вызываемой станцией. Появилась следующая ситуация. При вызове "Award Manager", у меня нету возможности провести анализ диплома на один конкретный журнал.

Предлагаю в окно "Award Manager" добавить поле типа dropbox с возможностью выбора _анализируемого_журнала_ в конретном лог сете. По умолчанию - "все журналы".

031

предлагаю добавить в QSLing каким образом получена карточка: "received via buro, received direct, received via OQRS" + "received enclosed" окна: 1) "Edit QSO info", "QSLing" 2) "New QSO", "QSLing", "Traditional

QSL rcvd" (по аналогии как сделано с "sent")

Пока без комментариев

Аалог - много-журнальная программа. Я вкладываю в это предложение много смысла. Если много журналов - значит радиолюбитель может быть и мобильным, и быть qsl менеджером, может это быть и журнал "де факто" на коллективке. Поэтому работа с карточками - одна из ключевых пост-функций. На станции, как и отписывают карточки, так их и получают. Отписывая их помечают, что они ушли, как ушли, когда ушли и сколько было вложено. На станцию карточки приходят, бывает одному пожилому радиолюбителю или активной коллективке с двадцатью гипер-активных операторов, у которых по два-три журнала. Они может быть пришли или отправили запрос на отправку (clublog - request buro, request direct). Факт в том, что полей по входящим карточкам, в аалоге сейчас недостаточно - в сравнении с полями исходящих карточек. Я предлагаю, как минимум, добавить поля в полученные: "not received, received via buro, received direct, received via OQRS" + "donation received". ("enclosed" - for SENT donation, add "donation" for RECEIVED donation). С развитием OQRS это всё сильнее и сильнее будет востребовано всеми.

042

Clublog генерирует адиф файл с запросами на рассылку карточек, как через бюро, так и директом. Задача: импортировать скаченный адиф файл в аалог и изменить значения в полях QSLing. Файлы генерируются через "OQRS Management Tools". Файлик для директов выглядит так:

Generated on 2014-12-17 21:47:28 for HC2OGT/8
<adif_ver:5>3.0.0<programid:23>Club log QSL toolsV0.2<EOH>

<STATION_CALLSIGN:8>HC2OGT/8<CALL:5>DF2NU<QSO_DATE:8>20141205
<TIME_ON:6>144800<BAND:3>12M<MODE:3>SSB<RST_SENT:2>59
<QSL_RCVD:1>Y<QSLRDATE:8>20141212<QSL_RCVD_VIA:1>E<QSL_SENT:1>Q
<EMAIL:17>XXXXXXXXXX@... <ADDRESS:70>Rainer
XXXXXXXXXXXXXXXXXXXXXXXXXXXXXERMANY<NOTES:24>Paypal:XXXXXXXXXXXXX
<CURRENCY:3>USD<DONATION:1>5<EOR>

<STATION_CALLSIGN:8>HC2OGT/8<CALL:6>DG8NBR<QSO_DATE:8>20141201
<TIME_ON:6>034500<BAND:3>40M<MODE:3>SSB<RST_SENT:2>59
<QSL_RCVD:1>Y<QSLRDATE:8>20141208<QSL_RCVD_VIA:1>E<QSL_SENT:1>Q
<EMAIL:13>XXXXXXXXXXXX@...<ADDRESS:60>Albert
KaXXXXXXXXXXXXXXXXXXXXXXXXXXXXXMANY<NOTES:24>Paypal:XXXXXXXXXXXXX
<CURRENCY:3>USD<DONATION:1>3<EOR>

Раз связь уже подтверждённая, она локально точно существует. Находим и меняем статус на "Outgoing QSL Requested via OQRS DIRECT". Создаём поле "DONATION RECEIVED", в которое пишем "СУММА ВАЛЮТА". Это желаемый минимум. Можно ещё куда-нибудь писать адрес с электрнкой, но надо ли? Окошко ENCLOSED немножко смущает в непонятливости "кто кому?", ведь карточка исходящая, а денешка входящая - лучше "donation received", "donation sent".

Файлик для БЮРО выглядит так:

```
Generated on 2014-12-17 23:49:45 for HC2OGT/8

```

как я понимаю, здесь изменяется просто значение исходящей карточки в "в очередь" (обыкновенная печать), просто

Попутно, конечно, нужно делать много проверок: какой статус уже? отправлена ли? так или эдак? Как-то двигаться нужно.

037

Подготовка файлов к заливке на clublog. Экспорт в ади файлы всех журналов выбранного лог-сета. Мастер можно построить следующим образом: File, Batch Export. Export to directory, Default format ADIF, ALL contacts, не нужно "get export list" - по умолчанию все связи журнала, НО нужно возможность выбора полей экспорта - "Save/Load fieldlist". Потому что, например для clublog-а, внутренние поля аалог-а не нужны - они увеличивают размер файла. Будучу далеко от цивилизованного интернета, могу сказать, что успевал выпить кружку кофе, пока файлик в 600 Кб закачивался. С ростом популярностьи clublog-а, и других за-облачных систем, уверенный и полуавтоматический экспорт будет экономией времени, рутинных движений.

035

окно "new qso", трансивер отключён. омнириг работает. нахожусь в нормальном режиме записи, не "write log". вписываю позывной, перехожу в поле "диапазон", выбираю "20м", смотрю на трансивер 14.236, вписываю в поле частоты. нажимаю (таб), значение поля сбрасывается на "0.000". Не сбрасывать введёную частоту.

пока без комментариев

Предлагаю ввести режим работы без трансивера, визуализированный пользователю где-нибудь. Типа "online" - "offline". Этим самым можно запускать омнириг и считывать частоту/управлять. Когда трансивер отключен, омнириг - не нужен, он только выдаёт нулевое значение в аалог, что изменяет поле частоты. Также заметил, что при работе с FT1000MP, при переходе из SSB в CW, а потом обратно, в аалоге в поле модуляции остаётся CW, хотя трансивер уже в SSB. Крайний вариант, вообще в поле частоты не писать 0.000, а сбрасывать и оставлять поле пустым, потому что это 1) будет печататься на карточке 2) при экспорте только позывного, времени, частоты и вида модуляции - clublog не засчитвает связи, в которых частота равна нулю, он не может определить диапазон. Делаем новый экспорт списком позывного, времени,, диапазона, частоты и вида модуляции - связи засчитываются.

039

при открытом окне "information for og2k" (lookup in the internet), сработал = добавил лог в журнал, пишу следующего, допустим "oh2fnz"(таб), в окне информации нет изменений. ничего не подгружает. приходится мышкой кликать "иконка" + "lookup on internet" - просвятите, если это где-то нажимается, ставится галочка. можни ли автоматически подгружать информацию из интернета?

Ситуация следующая: написал позывной "OH2FNZ", перешёл в другое поле, ТАБ-ом в "RST sent", в это время в окне "informatio for " произошла автоматичечкое обновление. Сразу страничка видна и фотография. Лучше сделать через галочку, т.к. бывает интернет есть, а тратить трафик не хочется.

018

New QSO - autocomplete №18 QRZ.com subscription - отображение информации работает, но не понимаю какой толк в платной подписке, если через "QRZ.COM (WEB)" зайдя в qrz.com через встроенный браузер, показывается адрес и имя, даже фотка. в платной закладке "QRZ.COM (XML)" - только текст. объясните, пожалуйста, какова была задумка? я представлял себе, что на уровне XML данные будут аж запрыгивать в поля окна "new qso" :-) +пароль можно превратить в звёздочки

Сделано в прошлой версии

работает, так в чём была задумка поддержки платной версии, если бесплатная и так работала?

у бесплатной есть ограничения по количеству запросов (к примеру), плюс все размазано по странице.

Размазано - согласен.
Через галку в настройках можно переносить данные из QRZ.com(XML) или QRZ.ru в поле New QSO (Имя, QTH, Locator и !!!QSL VIA!!!, ещё не сработав станцию, можно ЗНАТЬ как отправлять карточку. Если представить цепочку действий, которые нужно сделать для станций в журнале. Ведь, нужно признать, что QRZ.com является самым актуальным "QSL Manager"

callbook, только потому, что радиолюбители САМИ ОБНОВЛЯЮТ информацию о QSL-обмене, это в их интересах. Времена, когда печатались тысячилистовые справочники (правильные и липовые) прошли. Только из-за этой фишки - Аалог становится не только журналом, а динамическим журналом. Ведь можно открыть связь сделанную много лет назад, нажать "обновить" и информация об QSL manager-е изменится. (... и понять, что посылал не туда ... ;) Кстати, о окошке "edit QSO info", около "QSL via" лупа выдаёт сообщение "no qsl manager for this callsign", может тоже улучшить, добавить QRZ.com/QRZ.ru как источник для "Callbook", "QSL manager databases"?

005

(F7), "search contacts" при выделении нескольких записей и нажатии на чек-бокс "QSL rcvd" или CTRL+R, статус о принятии применяется только к последней выбранной записи. когда на полученной карточке несколько записей об QSO одного позывного, при его поиске выходят несколько связей, что целесообразно их отметить одним нажатием. Сейчас приходится делать 6 нажатий для 3 связей (мышкой)

тут надо решить как поступать, если не нароком выделены свзяи с разным статусом. Например 2 со статусом "rcvd" и 2 "not rcvd". Поведение не очевидно.

(OG2K: я не предлагаю изменять статус всех найденных связей, а только выделенных, например через CTRL+клик) ("эту, эту и эту"), CTRL+R.

Сделал. Если выбраны связи с ОДИНАКОВЫМ текущим статусом, то меняет у всех. Только все-таки это не "QSL manager"

Вот спасибо! Атас!
Всё равно нашёл одно НО. :-) Если в списке у радиосвязей нету никакого статуса, алгоритм не может сравнивать его (статус) с тем одинаковый он или нет. Проще - карточки не получены и не отправлены - у них нет статуса. Когда я выбираю несколько и нажимаю - карточки отправлены (изменение статуса), выскакивает ошибка. Т.е. по вашей задумке, карточки должны быть сначала отправлены, чтобы их потом пачкой отмечать. В принципе идея разумная, но карточки могу быть оптом входящие (за несколько связей), что практикуют множество радиолюбителей - отвечают только на входящие карточки. Огромное спасибо.

020

ситуация: работаю в одном журнале. в закладке "new qso", "5 - more" выставил свой локатор, используемый позывной и имя оператора. поменял журнал, а поля-то не изменились. во второй журнал пишутся поля, изменённые в первом. поля потом через multi-edit исправляю. 1) при открытии журнала, "new qso", "5 - more" подгружать данные из свойств журнала. "my qth" = "grid", "used callsign" = "call", "operator", "power". 2) в "new qso", "5 - more" добавить крестик (x) "запомнить поля для _этого_ журнала", тогда изменённые данные будут запомнены для этого журнала. ввиду того, что журнал может быть одним, а поля

локатора, оператора, позывного и мощности могут менятся в зависимости от места нахождения, аппаратуре, оператора и т.д. - сохранять последние введёные значения, иначе последние подгружать по умолчанию из свойств журнала при его следующем открытии. данные о (х) хранить в свойствах журнала.

тут надо 10 раз подумать над флгоритмом поведения, что б не запутать оператора напрочь.

согласен. предлагаю сделать просто. поля "new qso, 5 - more", ПЕРЕНЕСТИ в свойства журнала. = убрать с панельки. Тогда: 1) в основной журнал всегда будут прописываться ПРАВИЛЬНАЯ информация 2) при смене журнала, значения будут АВТОМАТИЧЕСКИ изменяться 3) не надо будет править, после того, как забыл поменять 4) в свойствах журнала можно добавить и другие поля, которые пользователь может сам выбрать - КАКИЕ добавлять автоматически к новым связям. Например, мне не нужны поля спутников, но нужны поля equipment. Которые спустя какое-то время могут изменяться. Убрал - добавил, изменил значение. Какие поля? По адиф спецификации (http://www.adif.org/304/ADIF_304.htm#Fields).

034

окно "MULTIEDIT" значение "operator" больше чем 10 символов приводит к ошибке "DM.tmpQuery: Can't format message 13:198 -- message system code -4. Arithmetic exception, numeric overflow, or string truncation". а) если позывным работоло больше операторов, например "OH2FNZ OG2K", в моём конретном случае нас было четверо. то записать не удаётся б) выдавать сообщение на человеческом языке "Разрешённая длинна поля 256 символов".

Данное поле предназначено для хранения позывного оператора проведшего ЭТУ связь. Соответственно говорить о большой длине не приходится.

Это вполне понятно.
Сообщение об ошибке присутствует в версии 3.5.0.1183.

010

автоматическая проверка и обновление DXCC и других текущих/критических данных автоматически конкретика: включаю лог, он мне заявляет: дорогой, у нас стало одной dxcc больше, или "меньше".

не понял.

автоматическая проверка обновления на сайте www.country-files.com, автоматический импорт и установка. Вас, в свою очередь, это избавит от необходимости поддерживать актуальной DXCC таблицу, т.к. пользователи это будут делать сами так часто, как им это необходимо. Пользователи будут рады, т.к. информация по дипломам - свежая.

С момента прошлого письма от 19/10-14 записи DXCC обновились пять (5) раз (http://www.country-files.com/category/big-cty/).

028

"new qso", "lookup in the internet", "qrz.com (web)", по фотографии правым кликом "copy photo", обратно в "new qso", "1 - notes" "picture" правым кликом "paste from clipboard" не работает. Никаких ошибок/сообщений не появляется. Через установленный на компьютере firefox "copy-paste" работает. вывод: в встроенном браузере, программа не копирует изображение в буфер.

В версии 3.5.0.1183 тоже самое. Стоит winXP SP3 с IE 8.0.6001.18702 SP3

040

ситуация: в главном журнале, по нажатии кнопки F6, выскакивает окошко с запросом даты. ввожу 06/08 (ентер), имея ввиду "6 августа этого года", выскакивает окошко с сообщением "06/08/ is not a valid date" предложение: заканчивать вводимую дату автоматически текущим годом

-WAITING-

030

filter string can not be edited

027

по таблице DXCC подставлять IOTA в окошко "new qso" есть DXCC префиксы, которые 100% соответствуют островам и имеют только один IOTA номер, например OH0 (Оландский о-ва) - EU-002. В окне "new qso", подставлять автоматически в поле IOTA, если по префиксу позывного, набранного в поле callsign, найдена соответсвующая IOTA. инфа: http://www.rsgbiota.org/xml/tags.php БД (связка DXCC=IOTA) стоит хранить локально и делать запрос на обновление раз в неделю.

пока без комментариев

Не могу не добавить, что Галапагосы (HC8) - AS-004 =)

016

"statistic > date interval for statistic", добавить кнопку "clear all"

пока без комментариев

-THANK YOU-

1689 работает в версии 3.5.0.1183

1715 работает в версии 3.5.0.1183

023 работает в версии 3.5.0.1183

026 работает в версии 3.5.0.1183

024-2 работает в версии 3.5.0.1183

029

Как с клавиатуры а) открыть окно "lookup in the internet" , допустим из окна "new qso"? б) перезагрузить содержимое окна ?

Для 20 и 28 добавил сочетание Ctrl+Alt+I

Спасибо! Это наверное для 029.

015 работает в версии 3.5.0.1183

019

№1677 ПОЛЕ ВВОДА РАПОРТА Приветствую, имеется ли возможность записи в рапорте кроме 59, значение "59+" или "59+10" или "59+10dB" ?? спасибо

fixed bug with "-" and "+" keys in RST fields. You can enter 59+10dB now. To increase/decrease S-report use Ctrl-"+"/Ctrl-"-" keys

после 59, при нажатии ctrl+"+", может появляться "59+10dB" и до "+30дБ" с шагом в 5дБ, а также в обратном направлении.

надо думать как. Поле ведь может содержать любые символы.

Сейчас очень хорошо. :) Закрыли.

-CLOSED-

024

ввод позывного не содержащего цифры. не давать делать, подсвечивать как "неправильный"

Не согласен. Сейчас чего только не выдают. Да и RAEM в эфире бывает.

Охотно соглашусь. Закрыли.

032

"New QSO", добавить открытие "QSL manager" по F7.

В окне New QSO все F-клавиши задействованы для интерфейса с TrueTTY/CwType

Понял. Благодарю за конструктивную критику.

Добрый день

Во первых строках:
После разных мытарств, я решил вернуться к багтрекеру

https://aalog.unfuddle.com
имя: betatester
пароль: Aa123456 (Aa - английские)

Всех прошу дублировать пинки там. Единственное, прошу обязательно заполнять
поле Callsign.

> В порядке важности:
>
> 041
>
> Всё началось около года назад, когда я хотел разнести журналы,
> отработанные из разных DXCC, в разные лог-сеты, чтобы считать AWARD для
> каждого конкретной DXCC. После этого я столкнулся с проблемой, что при

>
Предлагаю в окно "Award Manager" добавить поле типа dropbox с
>
возможностью выбора _анализируемого_журнала_ в конретном лог сете. По
> умолчанию - "все журналы".
>
>
Ну вот сразу и надо было так развернуто объяснять. Теперь смысл хотелки
понятен. _Гораздо_ проще сделать именно показ связей из другого логсета,
чем статистику для отдельного журнала.

> 031

> Стоп. Сейчас при любом экспорте adif вы выбираете поля которые надо
сохранять.
А заливка всего логсета делается просто заходим в редактор фильтров и жмем
Query без введения фильтров. Имеем полный логсет. Делаем экспорт того что
надо. Все.

Ну, на самом деле обновляется не список DXCC, а "кривые" позывные. И
информация об обновлениях не особо удобна для автоматического определения
наличия обновлений. Можно сделать конвертор во внутренний формат лога этих
файлов при ручном подсовывании файла.

From: Alex_R6CW
Topic: 1069 Message: 2140

Здравствуйте, Dxsoft-rus.

на работе бывают свободные окошки. исполдьзую для выписывания карточек.
но чтобы база была актуальна копирую весь лог на фэшку (заодно и back
up :-)). будет ли корректно копировать туда-сюда только один GDB файл?

Да, aalog.gdb достаточно. Если есть желание иметь аналогичное расположение
окон, то еще *.ini
ТОлько если Win Vista/7/8 то надо найти правильный gdb :)

Так можно и прям с флешки с полным комплектом ЛОГа работать. А уж потом в основные папки перекидывать.

С наступающим! :)

Можно и с флэшки. НО! У флэшки ограниченное число циклов чтения/записи, а база пишет/читает довольно активно. И второе, производительность операций чтения/записи у флэшки заметно ниже.

Меня тоже волнует эта проблема.
Связи в логе есть и они полностью соответствуют тем что на сайте LOTW

Тогда мне для понимания проблемы нужен чей-то aalog.gdb (только не в рассылку! :)) с такой проблемой и lotw.tmp который получается после загрузки с LoTW.

2150. import from LoTW

Yahoo group: dxsoft-rus
Date: 2014-12-26 14:02:44 UTC
From: Alex_R6CW
Topic: 2145 Message: 2150

Здравствуйте, Dxsoft-rus.

кажется, понял причину проблемы.
залил лог.
увидел подтверждения в LoTW, позже получаю бумажную карточку. при ее обработке оказывается, что время связи отличается на несколько минут. "как джентльмен" изменяю у себя в логе. позже по какойто причине отредактирорванная связь попадает в LoTW. т.к. время уже отличается, она дублируется. но подтвержденной в системе остается первая связь. а так как певой связи у меня в логе теперь нет по причине ее редактирования , то вторую связь система не подтверждает.

в LoTW при поиске связи находятся обе эти связи, но в строке первой после колонки страна, есть квадратик, а в колонке второй такого квадратика нет. т.е., то, что я отредактировал и оно снова попало в систему - не подтверждается.
пришлось руками перебить все отвергнутые связи, т.е проставил в них время соответсвущее времени подтвержденных в LoTw связей.

подобное в несколько другой вариации уже было.
есть у меня такая заморочка. чтобы меньше лишнего заливать в LoTW, в этом же лог-сете открыт лог, в который заносятся проводимые связи. из них формируется свой адиф, прогоняется через tqsl и заливается в lotw. этот же адиф файлик подливается и в основной лог. в случае, если он подлит в основной лог и не очищен временный лог. при импорте подтверждений из lotw , они почему то попадают в неочищенный временный лог. т.е. отметки появляются только в одном логе.

как исключение, в прошедших днях активности в этом же лог сете создал временный лог для спецпозывного ue55pm, которым работал. после импорта из lotw итам оказались подтверждения ... хотя не уверен, что организаторы централизованно посылали в lotw документы на спецпозывные. естественно и я на спецпозывной не заливал туда связи. но. часть проведенных связей проводил одновременно двумя позывными, для экономии времени. ну это так. для информации.

так, что с самим ААЛогом все в порядке. глюк получился из-за человеческого фактора :-)

Re: [dxsoft-rus] import from LoTW
Здравствуйте, Alexander.

сейчас просмотрел временный файл. почему то там оказались связи только на первый из трех позывных.

вчера вечером, чтобы залить на сайт дипломной программы MWA самую актуальную информацию, сделал импорт данных с lotw на все три позывные. но почему то в файле .тмр отобразились связи только на первый из цепочки.

ну да ладно. теперь это наверное уже не актуально.

2153. RDA complete

Yahoo group: dxsoft-rus
Date: 2015-01-02 20:17:29 UTC
From: OG2K Anton
Topic: 2153 Message: 2153

Приветствую!

Ситуация 1:
Работал контест CQ WW SSB в N1MM, отработав, импортировал в AAlog.

Вопрос 1:
Как оперативно обновить в связях RDA русским станциям?

Ситуация 2:
Работал с станцией 30/03-14 ssb 40m (запись о Subdiv отсутствует).
Работал с станцией 16/08-14 ssb 40m Subdiv MO-14

в поле "new qso" вписываю позывной корреспондента, поле Subdiv.
остаётся "MO-", хотя связь была и в базе есть информация об RDA.

Вопрос 2:
Как сделать, чтобы сработанным станциям с известным RDA, поле
автоматически заполнялось?

Добрый день!
Вопрос тем, кто работает на TS590S в программе TrueTTY RTTY в режиме FSK (FSR) на передачу...
У меня нормально декодируются сигналы лишь в режиме FSR (надо еще разок нажать на кнопку CW/FSK) - у всех так?

73, Константин

В принципе и FSK-R не напрягает :) главное - правильный RTTY
получается.
Интересно правда попрыгать по спотам - буду ли попадать точно на
частоту станции...
Завтра попробую.

2162. AALog 3.6 Build 1187

Yahoo group: dxsoft-rus
Date: 2015-01-09 14:31:22 UTC
From: Alexander Anipkin
Topic: 2162 Message: 2162

Доступна новая версия

+ Добавлена возможностоь дополнительного фильтра в Award Manager. К примеру, можно отфильтровать страны DXCC по континенту. Нужно импортировать новые списки для дипломов. Инструкция http://www.dxsoft.com/ssi/instructions/Awards.htm

+ Можно выбирать тип подтверждения связи (QSL/LoTW/eQSL) которые используются для вычисления New Ones в окне New QSO.

+ Можно выбирать тип подтверждения связи (QSL/LoTW/eQSL) которые используются для отображения закладки bands/modes окна New QSO awards stat

+ Можно выбирать тип подтверждения связи (QSL/LoTW/eQSL) которые используются для вычисления New Ones в окне Spot list

+ При выделенеии нескольких связей и нажатии горячей клавиши смены состояния QSL AALog открывает окно группового редактирования и устанавливает нужное значение.

- При открытии окна Edit QSO из окна "Search contacts" AALog не очищал предыдущее значение "Note for callsign". Исправлено.

- Быстрый поиск в окне "Search in QSL Managers database" использует теперь для поиска то поле, по которому отсортирован список..

+ Колонка указания азимута на корреспондента добавлена в окне Spots list

+ AALog теперь хранит версию БД и обновляет ее автоматически при необходимости.

- Исправлена ошибка возникавшая при длине поля "Operator" > 10 символов в режиме группового редактирования.

- устранена проблема с копированием картинки с QRZ.com

- исправлена проблема с сочетанием CTRL+O в окне "Search contacts"

+ Можно добавить поле с номером связи. ВНИМАНИЕ! Этот номер ОТНОСИТЕ.

+ при поиске по дате в главном окне (F6) можно не вводить год если нужен текущий год

+ в полях даты можно менять день с помощью клавиш "+" и "-"

- исправлены мелкие баги

качать
http://www.dxsoft.com/aal3-upd.zip - обновление

http://www.dxsoft.com/aal3.zip - полный дистрибутив

Только что закачал.

Обнаружилась маленькая ооооочень старая проблемка с ньювановостью по WPX в
Окне ввода новых связей

Ссылки те же.

Не доглядел, один пункт улетел не дописанный до конца
вот это
+ Можно добавить поле с номером связи. ВНИМАНИЕ! Этот номер ОТНОСИТЕ.

читать так:

+ Можно добавить поле с номером связи. ВНИМАНИЕ! Этот номер ОТНОСИТЕЛЬНЫЙ.
Он меняется в зависимости от фильтра и сортировки

Спасибо, завтра сделаю.?
А если ставить full на другой комп, или на этом переустановить, (давно хотел поставить Win7), такая директория появится? Или доп манипуляции нужны. Неоднократно ставил на флешку и работало, поэтому и обратил внимание, что небыло такой директории никогда.

наверное, можно просто скопировать рабочую папку на флэшку (или в другое место) там обновить и посмотреть.
насчет флэшки лично не пробовал, но на работе тоже стоит. базы периодически после обновления, туда-сюда копирую .

2178. еще одна хотелка в ААЛог е

Yahoo group: dxsoft-rus
Date: 2015-01-14 04:43:19 UTC
From: Alex Yatsenko
Topic: 2178 Message: 2178

приветствую, Александр!

по ходу работы с программой возникла хотелка.
особо будет интересна любителям РДА.
в логе ведется учет бумажных карточек, а так же подтверждений в LoTW из eQSLCC.
но есть еще "виртуальные" подтверждения районов:
1. по результатам участия в РДА тесте
2. автозачет на сайте Ааду.
последние 2 пункта приходится "держать в уме" , т.к. фактически связи/районы подтверждены,
но в программе корректно отразить не получается.
возможно ли, например, добавить еще одну колонку, что то типа "автозачет" или что то
подобное, в группе QSL-ing? чтобы можно было отмечать корректно такой статус связей.

--
Alex Yatsenko

2179. вопросик по ААЛогу

Yahoo group: dxsoft-rus
Date: 2015-01-14 04:49:17 UTC
From: Alex Yatsenko
Topic: 2179 Message: 2179

еще один вопросик по программе.
так сложилось, что карточки приходится выписывать с некоторой задержкой, частями.
с некоторых пор стало казаться, что некоторые карточки я уже выписывал. но почему то у них статус изменился с отправленных на неотправленные.
тоже касается и входящих. недавно обрабатывал входящую почту. помню, держал в руках карточки от корреспондента, отмечал, что получил. позже натыкаюсь на эти связи, а там отметки о получении нет. возможна ли такая ситуация? ил пенсионерский склероз стал посещать :-)

Я уже давно думаю над этим. Пока придумать красивого решения не получается.
Есть одна мысль, если ее реализация не сильно подкосит скорость подготовки
статистики для позывного, то типы подтверждений можно будет добавлять
неограниченно.

Еще, как вариант, для комбинированных подтверждений отменить детализацию.
Только есть подтверждение или нет. А сколько - не показывать.
Но этот вариант не нравится мне.

Привет Алекс!

Пока Александр обдумывает стратегическое решение в программе,
можешь переписать необходимые районы и создать новые QSO.

OG2K RA1AUTORDA 14/1-15 1806z SSB 20m 59 AB AB-01 (QSL RCVD)
OG2K RA1AUTORDA 14/1-15 1807z SSB 20m 59 AB AB-02 (QSL RCVD)

и т.д.

2189. хотелки в ААЛоге

Yahoo group: dxsoft-rus
Date: 2015-01-17 14:15:29 UTC
From: Alex_R6CW
Topic: 2189 Message: 2189

Здравствуйте, .

напрашивается хотелка, касающаяся охотников за районами РДА.
для диплома кроме традиционных QSL, LoTW, eQSLcc существует еще два
вида автозачета:

1. автозачет по результатам судейства RDAC
2. автозачет на сайте http://adok.dyndns.org:8000

их в настоящий момент корректно учитывать в ААЛоге не получается.
если связи подтверждены только посредством автозачета.
в крайнем случае нужно делать еще какие то ремарки.

ВОЗМОЖНО ЛИ добавить еще колонку для подобного автозачета, хотя бы
даже для ручного заполнения?

--
С уважением,
Alex_R6CW mailto:prostoham@...

2190. хотелки в ААЛоге

Yahoo group: dxsoft-rus
Date: 2015-01-17 14:19:28 UTC
From: Alex_R6CW
Topic: 2189 Message: 2190

Здравствуйте, Dxsoft-rus.

сорри. повторно отправил вопрос.
забыл в почтовике изменить пароль. что то думаю ветка не активна ...
:-)

2191. печать наклеек/карточек в ААЛог3

Yahoo group: dxsoft-rus
Date: 2015-01-17 14:36:01 UTC
From: Alex_R6CW
Topic: 2191 Message: 2191

Здравствуйте, Dxsoft-rus.

последний раз распечатывал связи на карточках еще в версии
247. наконец то созрел снова :-) а то до 3-х связей
выписывал ручками. благо бывает время на работе :-)
все упиралось в наличие удобного для карточек принтера :-(
но дело не в том.
открыл в ААЛог3 по F5 "менеджер печати" есть небольшая
очередь.
выделил калкой нужзный лог, выбрал шаблон fr3.
но при нажатии на print открывается окно пред просмотра с
чистым листом. пробовал и все позывные выделять и часть,
все равно чистый лист показывает. в хэлпе никаких больше
ньюансов нет.
в старом логе, помнится, в левой колонке с позывными, была
еще колонка для галочек, если нужно не все позывные подряд
печатать.
может тут что то не так делаю ?

From: Alexander Anipkin
Topic: 2182 Message: 2192

это не поможет. Почему-то не изменилась структура БД. но изменилась его версия.

создайте файлик v1.sql
и поместите в него вот это:

```
CONNECT 'aalog.gdb' user 'sysdba' password 'masterkey';
ALTER TABLE AWARDS_KEYS ADD FILTER_VALUE VARCHAR(25);
COMMIT WORK;
EXIT;
```

потом в каталоге где лежит aalog дать команду

```
isql v1.sql
```

--
Best regards

Путь именно такой. Лог был закрыт. После того, как не получилось из F
Переместил папку с логом в корень C
Запустил команду. Результат такой же как из F

2199. печать карточек/наклеек в ААЛог

Yahoo group: dxsoft-rus
Date: 2015-01-17 18:08:47 UTC
From: Alex Yatsenko
Topic: 2199 Message: 2199

вроде как сам и нашел причину проблемы.
причиной стал шаблон.
он был от старой версии ААЛога 247. открылся в новой версии AALabels и переименовался в одноименный *.fr3.
жаль, наверное нужно "рисовать" новый по старому образцу.

Re: [dxsoft-rus] ?????à AALog Здравствуйте, Александр.
Сегодня попробовал проверить Ref. Filter на DXCC обновлял
базу как было рекомендовано ?тоже выскакивает ошибка?
операционная система Win7 32

Вы писали 17 января 2015 г., 22:17:21:

??
Хм. Заархивируйте и положите aalog.gdb где-нибудь в интенете. Я гляну сам на файлик.

Путь именно такой. Лог был закрыт. После того, как не получилось из F
Переместил папку с логом в корень C
Запустил команду. Результат такой же как из F

2201. Re: [dxsoft-rus] ошибка AALog

Yahoo group: dxsoft-rus
Date: 2015-01-18 19:40:55 UTC
From: Alexander Anipkin
Topic: 2182 Message: 2201

Причина ясна, не понятно почему она возникла.

создайте файлик v1.sql
и поместите в него вот это:

```
CONNECT 'aalog.gdb' user 'sysdba' password 'masterkey';
UPDATE DB_VER set VER = 2 where VER > 0;
COMMIT WORK;
EXIT;
```

потом в каталоге где лежит aalog дать команду

```
isql v1.sql
```

эта манипуляция скажет логу что база старая и ее надо обновить.

Если AALog установлен в Program files, то это все создавать в той папке в профиле где лежит aalog.gdb

после этого запустить AALog. Если что-то не так - вывалиться ошибка о ненайденом файле.

2202. Re: [dxsoft-rus] ошибка AALog

Yahoo group: dxsoft-rus
Date: 2015-01-18 19:47:50 UTC
From: Alexander Anipkin
Topic: 2182 Message: 2202

поправка

строку
UPDATE DB_VER set VER = 2 where VER > 0;

надо писать

UPDATE DB_VER set VER = 0 where VER > 0;

целиком так

```
CONNECT 'aalog.gdb' user 'sysdba' password 'masterkey';
UPDATE DB_VER set VER = 0 where VER > 0;
COMMIT WORK;
EXIT;
```

--
Best regards

Alexander Anipkin

2203. настройка размера карточки при печати

Yahoo group: dxsoft-rus
Date: 2015-01-19 10:26:38 UTC
From: Alex_R6CW
Topic: 2203 Message: 2203

Здравствуйте, Dxsoft-rus.

треба совет.

имеется принтер canon LBP-1120.
что то не получается пока настроить размер бумаги для печати карточек.
есть шаблон, расчитанный на размер стандартной карточки 90x140мм. (от Александра RZ4AG)
но при распечатке образца на листе а4 содержимое карточки оказывается в левом верхнем углу. попытался выбрать что либо из предлагаемого в меню принтера
формата, но печатается или слева или по центру листа посередине (по высоте листа) а нужно это все притянуть к правому краю. если тупо вместо а4 вставить карту, то область печати попадает мимо. потому тренируюсь пока на а4. - нужно , чтобы содержимое печаталось возле правого края листа по центру правой вертикальной стороны.

когда был струйный canon, получилось как то легко и быстро. но пришлось заменить на лазерник.

буду очень признателен за подсказки

Re: [dxsoft-rus] настройка размера к 72;рточки при печати
Здравствуйте, Александр.

нет, такого нет. есть exeutive.

пробовал как раз с вашим шаблоном. а там размер как раз стоит custom 90x140мм.

?по разному пробовал. пока никак.раньше использовал струйник той же фирмы. ?там можно было установить размер. да еще вирсия тогда была 247. ?ни то ни другое не сохранилось :-(

Вы писали 19 января 2015 г., 19:32:59:

A Custom size нет?

Здравствуйте, Alexander.

Вы писали 19 января 2015 г., 20:24:06:

прошу прощения за задержку с ответом.

отвлекали домашние дела.

такой формат есть.

заодно дома попробовал на LBP-2900. тоже сразу не получилось :-(

Re: [dxsoft-rus] настройка размера к 72;рточки при печати
Здравствуйте, АЛЕКСАНДР.

Вы писали 19 января 2015 г., 20:24:06:

сейчас попробовал установить в настройках размер страницы и выходной размер ?letter ?letter, потом размер страницы letter, а выходной размер "по размеру страницы". в обоих случаях текст печатается в левом верхнем углу листа а4. если закладывать карточку (пробовал) текст на нее не попадает. чтобы текст попадал на карточку, он должен быть возле правого края листа и посередине от верхнего и нижнего края. т.к. ограничители бумаги двигаются только симметрично от центра.

использовал шаблон rz4ag 12 QSO.fr3 в параметрах страницы у него стоит custom 9x14см.

попробовал шаблон ue9wda 10.fr3 ?у него в настройках стоит размер А4 книжный. сам текст в шаблоне находится вверху страницы посередине. ?попробовал печатать карточку. ее закладывал горизонтально. получается как раз.

пробовал в настройках ставить размер страницы А4, а выходной размер поочередно letter и "по размеру страницы". ?в обоих случаях печаталось одинаково.

что то в первом случае не срабатывает с размером.

помнится на струйнике была ещ возможность отсупами от края регулировать в настройках. тут такого нет :-(

Была похожая беда у HA1AG. Вылечилась установкой драйверов с диска который
шел с принтером. Именно их, а не скачанных с интернета.

2210. Re[2]: [dxsoft-rus] настройка раз мера карточки при печати

Yahoo group: dxsoft-rus
Date: 2015-01-20 06:27:55 UTC
From: Alex Yatsenko
Topic: 2203 Message: 2210

приветствую, Александр.
у меня драйвера с родного диска.
попробую еще в генераторе наклеек изменить размер бумаги в шаблоне. помнится, когда в старой версии печатал на струйнике, как раз там устанавливал нужные отступы, чтобы поля шаблона точно попадали в поля карточки. Андрей мне присылал шаблон ue9wda. он расположен на листе А4 книжного формата. как раз посредине вверху. т.е как раз попадает на карточку. "под себя" немного подвинул его на листе отступами в генераторе наклеек. но Ваш шаблон мне больше нравится. нужно бороться :-) еще задачка - освоить новый генератор наклеек ... :-) старый был попроще.

2211. Re[3]: [dxsoft-rus] настройка раз мера карточки при печати

Yahoo group: dxsoft-rus
Date: 2015-01-20 08:04:59 UTC
From: Alex Yatsenko
Topic: 2203 Message: 2211

привет, Александр.

попробую решить проблему по другому. взял Ваш шаблон на 12 связей. изменил в генераторе размер листа на А4 и поставил отступы слева и сверху 15 и 6 см. текст сместился куда следует. но сейчас на работе, практически не на чем проверить. буду проверять дома, после смены.

Tue, 20 Jan 2015 09:27:55 +0300 от "Alex Yatsenko prostoham@mail.ru [dxsoft-rus]" <dxsoft-rus@yahoogroups.com>:
>

>приветствую, Александр.
>у меня драйвера с родного диска.
>попробую еще в генераторе наклеек изменить размер бумаги в шаблоне. помнится, когда в старой версии печатал на струйнике, как раз там устанавливал нужные отступы, чтобы поля шаблона точно попадали в поля карточки. Андрей мне присылал шаблон ue9wda. он расположен на листе А4 книжного формата. как раз посредине вверху. т.е как раз попадает на карточку. "под себя" немного подвинул его на листе отступами в генераторе наклеек. но Ваш шаблон мне больше нравится. нужно бороться :-) еще задачка - освоить новый генератор наклеек ... :-) старый был попроще.

2212. Re: [dxsoft-rus] ошибка AALog

Yahoo group: dxsoft-rus
Date: 2015-01-26 19:02:20 UTC
From: Сергей
Topic: 2182 Message: 2212

Re: [dxsoft-rus] ?????à AALog Здравствуйте, Александр.
А нельзя ли попонятней обьяснить что сделать
чтобы не было ошибки.
Не совсем понятно что и где надо исправлять.

Вы писали 19 января 2015 г., 00:40:55:

??
Причина ясна, не понятно почему она возникла.

создайте файлик v1.sql?
и поместите в него вот это:

```
CONNECT 'aalog.gdb' user 'sysdba' password 'masterkey';
UPDATE DB_VER set VER = 2 where VER > 0;
COMMIT WORK;
EXIT;
```

потом в каталоге где лежит aalog дать команду

```
isql v1.sql
```

эта манипуляция скажет логу что база старая и ее надо обновить.

Если AALog установлен в Program files, то это все создавать в той папке в профиле где лежит aalog.gdb

после этого запустить AALog. Если что-то не так - вывалиться ошибка о ненайденом файле.

Здравствуйте, Александр.
Сегодня попробовал проверить Ref. Filter на DXCC обновлял
базу как было рекомендовано ?тоже выскакивает ошибка?
операционная система Win7 32

Вы писали 17 января 2015 г., 22:17:21:

??;
Хм. Заархивируйте и положите aalog.gdb где-нибудь в интенете. Я гляну сам на файлик.

__
Путь именно такой. Лог был закрыт. После того, как не получилось из F
Переместил папку с логом в корень C
Запустил команду. Результат такой же как из F
__

2213. AALOG не видит базу данных.

Yahoo group: dxsoft-rus
Date: 2015-01-31 06:52:27 UTC
From: Андрей Лашов
Topic: 2213 Message: 2213

Добрый день.
У меня трагедь - AALOG перестал файл базы данных видеть. В окне выбора лога только дефолтный лог, и тот пустой. Единственная видимая причина - накануне прошло обновление Windows 7.
Помогите, пжл.
Андрей

Добрый день

Вернее не очень... В какую папку установлен лог?
Ищите по диску все aalog.gdb какие есть.

Лог установлен в папку D:\Radio\AAlog
Находил старый файл базы данных, он оказался поврежден. Восстановил его с помощью restore.bat. Лог его также не видит.

Что еще интересно - виндовский поиск совсем не видит файлов с расширением GDB. Интереса ради пробовал искать файлы с другим расширением - .ini, .doc - все находит. А .gdb - нет.

Прекрасно вижу все ваши связи. Последняя 30.01.2015. Проверьте, вы точно запускаете aalog.exe из папки D:\Radio\AAlog? Может у вас копия лежит в Program Files? И Винда, как водится, сочла себя умнее вас.

From: Андрей Лашов
Topic: 2213 Message: 2222

Я переставил лог в D:\AALOg. Более того, поставил лог на другой компьютер с виндой Виста. Запускал лог не с ярлыка, а прямо из папки. Картина везде, увы, одинаковая. В любом случае, Вы меня обнадежили. Не все потеряно.

Шо це таке F3 я не знаю, а вот через Create/open log удалось открыть! Спасибо!
Из чистого любопытства и во избежание в будущем - что это могло быть?

а F3 - это быстрый способ Create/open log.

PS Учите матчасть ;)

2228. ITU - выбор из нескольких зон

Yahoo group: dxsoft-rus
Date: 2015-01-31 09:34:02 UTC
From: Eugene Baranov
Topic: 2228 Message: 2228

Здравствуйте.
Информация для Александра, которую стоит обдумать.
Некоторые территории расположены в нескольких зонах. Например, Хакассия в 31,32. При связи встало 31. Потом QTH оказался в 32. Я поправить - оно никак, не стирается и не меняется. Нажимаю Auto в Change territory -> появляется 31,32.

Вбиваю теоретически возможный позывной r0z - из 12 предложенных зон хватает первое значение и как вариант - только все.

С уважением, Евгений Баранов, UA3GGP.

2229. Re: [dxsoft-rus] ITU - выбор из нескол ьких зон

Вы где изменить пытаетесь? Изменить зону можно в нижней части окна ручного выбора территории.

2230. ITU - выбор из нескольких з он

Yahoo group: dxsoft-rus
Date: 2015-01-31 09:50:36 UTC
From: Eugene Baranov
Topic: 2230 Message: 2230

Здравствуйте.
Прошу прощения, Александр. Я думал это забито для территории и изменится тоже. Понял. Старею. 73!

С уважением, Евгений Баранов, UA3GGP.

Для этого в Окне Ввода и окне Edit QSO, с незапамятных времен, есть кнопка
"Set territory manually" и которая правит территории как вам угодно...
ES1BA

2232. AALog 3.6.2 build 1189

Yahoo group: dxsoft-rus
Date: 2015-02-01 07:52:18 UTC
From: Alexander Anipkin
Topic: 2232 Message: 2232

Приветствую

нашёлся неприятный баг с импортом ADIF. При некоторых случайных условиях
для импортируемых связей ставился статус QSL отправлена.

Новый exe:
http://www.dxsoft.com/download/aal1189.zip

обновление для сомневающихся в себе:
http://www.dxsoft.com/aal3-upd.zip

Ну и для тех у кого проблема с фильтром в Awards manager -
http://www.dxsoft.com/download/v1.zip
распаковать в папку AALog и запустить.

From: Eugene Grebnov
Topic: 2234 Message: 2234

Добрый день!

Печать наклеек.

AALog 3.6.1.1188 AALLabels FastReport 3.24

Имеется несколько журналов для разных позывных (UN2G, UN9FD). В шаблоне для распечатки наклеек хочу сделать следующий текст “XX9XXX confirms the following QSO(s):” Вместо XX9XXX должен поставляться позывной лога из которого печатается наклейка. В шаблоне выбрал Label – значение MyCall-1. Если QSO из журнала UN2G то позывной подставляется, а вот если из журнала UN 9FD, то на месте позывного – пусто.
Каким образом можно преодолеть эту проблемку?

Доброго Евгений,

У вас всё настроено правильно с шаблоном.

Попробуйте посмотреть, какое значение в журнале "UN 9FD" имеет поле "used callsign". скорее всего оно пустое. можно проверить либо через "редактирование связи"/edit qso или добавить столбец в главный журнал "used callsign".

если так, то выберете всё в журнале "UN 9FD", запустите мульти-редактор (F4) и присвойте строчке "used callsign" значение "UN9FD".

повторите операцию

73/A

2237. ААЛог проблема обновления дипломов

Yahoo group: dxsoft-rus
Date: 2015-02-15 14:52:02 UTC
From: Андрей _RK6ABM
Topic: 2237 Message: 2237

Здравствуйте, Dxsoft-rus.

Обновил RDAWARD.ref, взят здесь

http://forum.qrz.ru/apparatnye-zhurnaly/19906-aalog-apparatnyy-zhurnal-ot-rz4ag-162.html

в окне AWARDS MENEGER поле District пустое.

Обновлял так : Гл. Окно - Config - Awards list - двойной клик RDA- клик на кнопку справа от Closed references list - Clear list,

затем Import распакованного файла RDAward. Процесс обновления показывает.

2238. Ошибки при закрытии лога 3.6.2.1189

Yahoo group: dxsoft-rus
Date: 2015-02-15 18:34:08 UTC
From: Alex O
Topic: 2238 Message: 2238

Здравствуйте!

После вчерашней переустановки лог проработал нормально недолго. Сегодня при закрытии опять появились ошибки, скриншоты которых я приводил на qrz.ru.
Как будто бы ничего и не тргогал сегодня. Настроил весь лог под себя вчера с "нуля".
Куда смотреть, как бороться с проблемой?

Windows 8.1, 64 бит

У меня не отображаются цвета (строки в логе) по приходу и отправки qsl.
В старой версии было всё нормально, а сейчас никак.

Настройка с LOTW, автоматически возможна заливка из лога на сайт lotw?
С уважением к Вам.

А потом еще варианты подтверждения добавятся. И тогда что? Не, добавить-то
не проблема для всех комбинаций.
Но давайте посчитаем: 7 цветов только для подтверждений разных... Плюч их
как-тонадо стыковать с состоянием исходящей почты. Получается какая-то
рыбка Красного моря...

From: Eugene Baranov
Topic: 2245 Message: 2251

С приоритетом от Вячеслава согласен. А чтобы не делать аквариум, может сделать, что показывается только высший приоритет? Только факт CFM. На деле, меня, например мало интересует цвет исходящей почты, её проще по другому отслеживать. А вот подтверждения желательно видеть, это уже не от меня зависит.

С уважением, Евгений Баранов, UA3GGP.

2252. AALog 3.6.3 build 1190

Yahoo group: dxsoft-rus
Date: 2015-02-21 06:39:20 UTC
From: Alexander Anipkin
Topic: 2252 Message: 2252

Новая версия загружена на сервера

+ Установить статус "Queued" для всех неотвеченных QSL (в меню Edit)
+ Установить статус "Queued" для всех неотвеченных связей с позывным у которого есть хотя бы одно QSO со статусом "Queued" (в меню Edit)
- поправлен баг с подсказкой "New one" в окне новых связей для дипломов с открытым списком референций (например WPX)
- при выборе нескольких QSO в главном окне и смене QSL статуса, вместе с новым статусом AALog подставляет теперь и текущую дату in the Global edit window.

Download it from:

New setup:
http://www.dxsoft.com/aal3.zip
http://www.hamport.com/aal3.zip

Update from previous versions:
http://www.dxsoft.com/aal3-upd.zip
http://www.hamport.com/aal3-upd.zip

Re: [dxsoft-rus] ???? Здравствуйте, Александр.
Сегодня хотел поработать CW Type+ААлог и появилась проблема данные из
окон имя и QTH New QSO если прописаны руками не передаются в CW Type.
Если скопировать в эти окна что нибудь из поля переданных файлов ?CW Type
то эти данные появляются в макросах~[jName] ~[jQTH]. Тоже самое получается при
совместной работе ААлог + TrueTTY но там ладно по любому в основном данные?
копируем из окна приёма, а если вводить вручную так же не передаются.
Не подскажите в чём может быть причина?

Они и не должны передаваться в поля ввода CwType. Просто используйте соответсвующие макросы - ~[i...] `[i..] в AATest. ~[j...] `[j....] в AALog

Здравствуйте, Александр.
Сегодня хотел поработать CW Type+AAлог и появилась проблема данные из
окон имя и QTH New QSO если прописаны руками не передаются в CW Type.
Если скопировать в эти окна что нибудь из поля переданных файлов ?CW Type
то эти данные появляются в макросах~[jName] ~[jQTH]. Тоже самое получается при
совместной работе AAлог + TrueTTY но там ладно по любому в основном данные?
копируем из окна приёма, а если вводить вручную так же не передаются.
Не подскажите в чём может быть причина?

В настройках AALog стоит use cwtype.
я Вам на другой адрес отправил картинки с настройками.?
Сегодня получил почту и стал заносить данные в лог. Выяснилась такая
штука набираю позывной он появляется в окошке Quick search выделяется
строка с этим позывным в окне журнала, правой кнопкой выпадает меню
выбираю Mark QSL as.. Received или Ctrl+R иконка в графе QSL rcvd ?сразу не
появляется, а только после повторной процедуры. Не совсем удобно дважды
проделывать одно и тоже. Не подскажите в чём может быть причина?

Пришедшую почту (по моему) удобнее отмечать через окно "Search for contacts" ("бинокль" в меню Гл. окна).

в списке соревнований выбираете custom contest, потом выбираете в появившемся окне продолжительность тура и вид контрольного номера.
И не надо ни за чем следить :)

Dear Андрей,

Если передаваемый вами номер - постоянный (SP например), то в меню
config - station поставьте SP в поле User exchange.
И тогда ваш номер SP будет в поле New QSO и отчете, естественно.
Если передаваемый вами номер - порядковый номер связи (001 и т.д.), то
он сразу должен появиться в окне New QSO.

73, Константин

Dear 'Konstantin,

Не сразу заметил про номер...
Если контрольный номер - возраст + порядковый номер связи, то да,
придется цифры возраста добавлять уже после теста (

Не надо ничего руками!
Для первой связи ввести перед 001 возраст типа 12001. Дальше все будет само увеличиваться на единицу

Перед тем как провести первое QSO, в окне ВАШЕГО передаваемого номера, ПЕРЕД порядковым номером связи (перед 001) поставьте цифру возраста.
Не надо будет после теста добавлять

73! Алексей, RT3M

2281. импорт подтверждений из LoTW

Yahoo group: dxsoft-rus
Date: 2015-04-06 08:55:14 UTC
From: Alex_R6CW
Topic: 2281 Message: 2281

Здравствуйте.
заметил у себя такую шт уку.

в одном логсете три моих лога на разные позывные (старые и действующий).
поумолчанию открывается действующий. периодически, при попытке сделать импорт из lotw выскакивает ошибка и случайное 5-значное число.
выяснилось, такое бывает, если появились подтверждения на старые позывные.
вот и сегодня , при попытке сделать импорт на R6CW выскочила ошибка.
переключился на предыдущий лог RW6CW, и там получил ошибку. и только после импорта на RW6BO в остальные логи удалось сделать импорт из LoTW.
AAЛог 3 предпоследний релиз.

2282. [dxsoft-rus] Отсутствие моды JT9

Yahoo group: dxsoft-rus
Date: 2015-04-10 07:51:16 UTC
From: eu1fq
Topic: 2282 Message: 2282

Здравствуйте,
В AALog3 отсутствует мода JT9. Как ее можно ввести?
С пустым значением Mode файл не отправляется на LoTw.
А другую моду не хочется ставить!

2288. IC-706MKII

Yahoo group: dxsoft-rus
Date: 2015-05-14 10:36:24 UTC
From: RK9DC
Topic: 2288 Message: 2288

Не работает AAlog с трансивером (ноут. Самсунг Win 7)
Если в окне ввода позывного пусто, то при вращении валкодера в такт дергаются строчки азимута и расстояния.
Если позывной введен и заполнены строчки Name,QTH, QSL via то дергаются они.
Другие программы (Band Master,HamRadioDeluxe) работают без проблем.
С FT-2000 дома все работает.
Дмитрий

Запустил.Бился долго.
Обнаружил неприятную вещь – AAlog не видит в Omni-Rig настройки RIG2.
У меня стояло RIG1 – FT-2000 RIG2 – IC-706MKIIG , поменял местами – IC-706 заработал.
Пришел домой, подключил к FT-2000 – не работает. Поменял местами – пошло.
Я считаю это не есть хорошо. Аналогичная ситуация с AAtest , но это не так актуально.

Дмитрий 73!

Здра!

да, можно включить :)

new qso, шестерёнка в правом-верхнем,
"other", (x) enable 2 radio support, (ok)
после чего отобразится цифры "1" и "2", можно будет радио переключать
в Оминриге настроенные трансиверы.

Subject: Re: [dxsoft-rus] IC-706MKII

Разумеется. Иначе ААлог опрашивает только 1-е радио.

<dxsoft-rus@yahoogroups.com> написал:

Запустил.Бился долго.
Обнаружил неприятную вещь – AAlog не видит в Omni-Rig настройки RIG2.
У меня стояло RIG1 – FT-2000 RIG2 – IC-706MKIIG , поменял местами – IC-706 заработал.
Пришел домой, подключил к FT-2000 – не работает. Поменял местами – пошло.
Я считаю это не есть хорошо. Аналогичная ситуация с AAtest , но это не так актуально.

Дмитрий 73!

Subject: [dxsoft-rus] IC-706MKII

Не работает AAlog с трансивером (ноут. Самсунг Win 7)
Если в окне ввода позывного пусто, то при вращении валкодера в такт дергаются строчки азимута и расстояния.
Если позывной введен и заполнены строчки Name,QTH, QSL via то дергаются они.
Другие программы (Band Master,HamRadioDeluxe) работают без проблем.
С FT-2000 дома все работает.

2295. Третий трансивер

Yahoo group: dxsoft-rus
Date: 2015-05-14 17:05:33 UTC
From: Eugene Baranov
Topic: 2295 Message: 2295

Здравствуйте.
Скажите, вот включил я третий трансивер, а первые 2 выключены (хотя и не обязательно :). (Но это труднее.)
Вбил частоту вручную, добавил в Draft QSO list. А там уже частота 000000. :(В окне ввода пока по-прежнему. Нажимаю Use - и частота в окне становится по нулям.
Нельзя ли в Draft QSO list вносить реально установленную частоту? Ведь она же там уже или из интерфейса, или ручками вбита. А то это обнуление не радует.

С уважением, Евгений Баранов, UA3GGP.

2296. Re: [dxsoft-rus] Третий трансив ер

Евгений,

у меня тоже бывают ситуации, когда трансивер просто напросто
выключен или интерфейс отключён.

Думаю, что это как-то имеет связь с этим:

"#219 035 New QSO, transceiver not connected - frequency changes 0.000"
https://aalog.unfuddle.com/a#/projects/35717/tickets/by_number/219

2305. дипломная статистика в ААЛог

Yahoo group: dxsoft-rus
Date: 2015-06-03 11:10:16 UTC
From: Alex_R6CW
Topic: 2305 Message: 2305

Здравствуйте, Dxsoft-rus.

почему то не совсем корректно отображается статистика по сработанным
странам по сиску ДХСС в частности.

например у меня есть и подтверждена одна только одна связь на
конкретном диапазоне а в окне стоит 9/9/9, т.е. 9 подтвержденных
связей. можно ли это как то откорректировать?
п.с. подозреваю, что
статистика увеличивается после каких то операций с логом.

2308. Re[2]: [dxsoft-rus] дипломная ста тистика в ААЛог

Yahoo group: dxsoft-rus
Date: 2015-06-03 13:27:28 UTC
From: Андрей Лашов
Topic: 2305 Message: 2308

Александр, я с такой проблемой сталкивался - в логе некоторые страны терялись. Причина была в том, что ААлог не всегда правильно определял страну, если позывной был с нестандартным префиксом, например у меня есть QSO с KG6DX - его лог никак за Гуам признавать не хотел, потому что Гуам - это KH2. Хотя в ЛОТВ была указана верная страна. Приходилось вручную устанавливать страну.

Странно, вроде все работает корректно... Посмотрите, что за лишние связи показываются, может попали позывные с неднозначной территорией... обновите статистику по этому диплому.

Попробуйте префлист (мной подкорректированный), там много чего
поправлено-добавлено. Выкладывал в соотв. теме на qrz.ru... и диплом DXCC
там же.

Вячеслав, приветствую.

Суть в том, что уж список DXCC должен быть супер правильный, это всё таки основной список для всех абсолютно, даже для тех, кого DXCC не интересует. И хочется что бы в AALog всё было как надо :) .

Удачи во всём!
73! Сергей (RJ3AA).

выскажу свое мнение, если не против... речь должна идти не о списке диплома DXCC (а в итоге о файле "Prefix.lst") там все правильно, если кто-то считает что не так, дорогу к "правильному" я указывал неоднократно... Речь должна идти о файле "Call.lst", куда вносятся все "кривые" префиксы. Надо или нет "автоматизировать" этот файл решать Александру... мое мнение - не надо... если работаешь с такими станциями (наверняка не со всеми), то не трудно "вручную" (даже без коррект. "Call.lst") переопределить территорию (Help.ru в помощь), что под силу даже пенсионерам, а загромождать Лог информацией только для того "чтоб было" тоже наверное ни к чему...

2318. Re: [dxsoft-rus] дипломная статисти ка в ААЛог

Yahoo group: dxsoft-rus
Date: 2015-06-06 07:43:14 UTC
From: Sergey Kislov
Topic: 2305 Message: 2318

Вячеслав, добрый день.

Как-то неадекватно этот вопрос вами воспринимается.
Я просто написал, что очень давно обращался по вопросу приведения в нужный порядок DXCC List.
После моего письма T9 стал E7 - отлично!!!
Но ZK2 так и не стал E6.
И ещё наипростейший вопрос, почему FK/C у нас TX0???
Есть DXCC List, меняется он не часто, можно же его привести в соответствие в нашем логе, думаю это просто элементарно.
Можно воспользоваться вашим "Prefix.lst", нет проблем, но уже было столько обновлений, что наверно можно было и в логе всё поправить и никто бы не парился.
Выскажу и я своё мнение - список DXCC всегда должен быть правильным и соответствовать списку DXCC комитета.

Спасибо!
73! Сергей (RJ3AA).

P.S.
Сергей,
прокомментируйте вот это:
https://aalog.unfuddle.com/a#/projects/35717/tickets/by_number/241
/A

Антон, добрый день, понятия не имею что это такое.

Удачи во всём!
73! Сергей (RJ3AA).

выскажу свое мнение, если не против... речь должна идти не о списке диплома DXCC (а в итоге о файле "Prefix.lst") там все правильно, если кто-то считает что не так, дорогу к "правильному" я указывал неоднократно...
Речь должна идти о файле "Call.lst", куда вносятся все "кривые" префиксы.
Надо или нет "автоматизировать" этот файл решать
Александру... мое мнение - не надо... если работаешь с такими станциями (наверняка не со всеми), то не трудно "вручную" (даже без коррект. "Call.lst") переопределить территорию (Help.ru в помощь), что под силу даже пенсионерам, а загромождать Лог информацией только для того "чтоб было" тоже наверное ни к чему...

Первую строчку вашего поста оставлю без комментария...

По поводу TO=FK/C (в окне статистики по DXCC), если хотите видеть FK/C=TO
можете сами поправить (Config - Awards list - DXCC - Closed ref. list -
двойной клик по нужной строчке и ... редактируйте как хотите, потом нажать
Save).
Например здесь: http://www.ng3k.com/Dxcc/dxcc.html
никаких дробей нет...

Вячеслав, ещё раз добрый день.

Вопросов нет, я уже правил и у меня всё было как надо :) , но предположим я в очередной раз купил (а это бывает часто) новый компьютер и мне опять надо напрягать мозг и вспоминать, чего и как я правил. Не лучше ли в очередной версии лога всё поправить и всё будет о'кей.

Вот здесь наверно всё таки лучше смотреть, чем у NG3K, это всё таки первоисточник, а проще и легче всего в LoTW:
http://www.arrl.org/files/file/DXCC/2013%20DXCC%20Current_a.pdf

Удачи во всём!
73! Сергей (RJ3AA).

А я поступаю чуть иначе... файлы дипломов, префлист, бывший префиксы, call list, ini и tabl файлы сохраняю на диске Д или другом носителе и подобных проблем никогда не бывает... и соотв. сохраняю файл базы раз в 10дн. Это мое видение данного вопроса, у Вас оно иное...
А вообще, эти вопросы не ко мне (выше я высказал СВОЕ мнение и не более)... возможно Александр сделает когда нибудь какую-то правку, но для меня это не актуально - я все равно буду использовать "свои" файлы.

Re: [dxsoft-rus] дипломная статисти1l2;а в ААЛог
Здравствуйте, Sergey.

Вы писали 6 июня 2015 г., 18:21:21:

Вячеслав, ещё раз добрый день.

Вопросов нет, я уже правил и у меня всё было как надо :) , но предположим я в очередной раз купил (а это бывает часто) новый компьютер и мне опять надо напрягать мозг и вспоминать, чего и как я правил. Не лучше ли в очередной версии лога всё поправить и всё будет о'кей.

2 копейки. а какие проблемы? в отличие от ААЛог247, ААЛог3 просто копируете всю папку куда Вам хочется.

да и предыдущий можно легко скопировать, только на несколько манипуляций больше. ?

п.с. как и с TQSL ?тоже.

Вот здесь наверно всё таки лучше смотреть, чем у NG3K, это всё таки первоисточник, а проще и легче всего в LoTW:

http://www.arrl.org/files/file/DXCC/2013%20DXCC%20Current_a.pdf

Удачи во всём!

73! Сергей (RJ3AA).

6 июня 2015 г., 11:23 пользователь Vjatseslav Abramov?es1ba.slava@...?[dxsoft-rus] <dxsoft-rus@yahoogroups.com> написал:

??

Первую строчку вашего поста оставлю без комментария...

По поводу TO=FK/C (в окне статистики по DXCC), если хотите видеть FK/C=TO можете сами поправить (Config - Awards list - DXCC - Closed ref. list - двойной клик по нужной строчке и ... редактируйте как хотите, потом нажать Save).

Например здесь:?http://www.ng3k.com/Dxcc/dxcc.html

никаких дробей нет...

6 июня 2015 г., 10:43 пользователь Sergey Kislov?serge.rj3aa@...?[dxsoft-rus] <dxsoft-rus@yahoogroups.com> написал:

??

Вячеслав, добрый день.

Как-то неадекватно этот вопрос вами воспринимается.

Я просто написал, что очень давно обращался по вопросу приведения в нужный порядок DXCC List.

После моего письма T9 стал E7 - отлично!!!

Но ZK2 так и не стал E6.

И ещё наипростейший вопрос, почему FK/C у нас TX0???

Есть DXCC List, меняется он не часто, можно же его привести в соответствие в нашем логе, думаю это просто элементарно.

Можно воспользоваться вашим "Prefix.lst", нет проблем, но уже было столько обновлений, что наверно можно было и в логе всё поправить и никто бы не парился.

Выскажу и я своё мнение - список DXCC всегда должен быть правильным и соответствовать списку DXCC комитета.

Спасибо!

73! Сергей (RJ3AA).

?;?

P.S.

Сергей,?

прокомментируйте вот это:

https://aalog.unfuddle.com/a#/projects/35717/tickets/by_number/241

?/A

Антон, добрый день, понятия не имею что это такое.

Удачи во всём!

73! Сергей (RJ3AA).

выскажу свое мнение, если не против... ?речь должна идти не о списке диплома DXCC (а в итоге о файле "Prefix.lst") ?там все правильно, если кто-то считает что не так, дорогу к "правильному" я указывал неоднократно...

Речь должна идти о файле "Call.lst", куда вносятся все "кривые" префиксы. ?Надо или нет "автоматизировать" этот файл решать?

Александру... мое мнение - не надо... ?если работаешь с такими станциями (наверняка не со всеми), то не трудно "вручную" (даже без коррект. ?"Call.lst") переопределить территорию (Help.ru в помощь), что под силу даже пенсионерам, а загромождать Лог информацией только для того "чтоб было" тоже наверное ни к чему...?

2327. AALog 3.6.5 build 1196

Yahoo group: dxsoft-rus
Date: 2015-06-21 10:27:57 UTC
From: Alexander Anipkin
Topic: 2327 Message: 2327

Новая версия загружена на сервера

+ Во всех окнах с результатами поиска можно сменить статус QSL для нескольких QSO горячей клавишей
+ QSL service - спрашивает подтверждение на смену статуса QSL
- В edit qso при вставке слишком длинного значения QSL via - обрезает до максимально допустимого
+ В окне Global Edit сочетание Ctrl+Enter теперь аналог нажатия "Go"
- Устранена "плавающая" ошибка при закрытии лога
- Исправлена ошибка в Go to date при установленом формате даты типа 'd/m/yy' (формат отображение месяца и дня без ведущих нолей)
+ изменен дизайн Quick search & Go to date в главном окне
+ При коррктировке позывного в окне редактирования, очищаются статусы EQSL.cc и LoTW

Загрузить:

полный пакет:
http://www.dxsoft.com/aal3.zip
http://www.hamport.com/aal3.zip

Обновление:
http://www.dxsoft.com/aal3-upd.zip
http://www.hamport.com/aal3-upd.zip

Re: [dxsoft-rus] Spot List Здравствуйте, Александр.
Сделал как Вы посоветовали всё восстановилось но не надолго!
Получается где-то раз в неделю приходиться проделывать эту процедуру!
Нельзя ли такое обновление сделать автоматическим?
А то приходится сначала запустить лог проверить работу Spot List на всех
диапазонах и после этого использовать программу.

2336. Windows 10, рабочи е столы

Yahoo group: dxsoft-rus
Date: 2015-08-19 10:44:27 UTC
From: shurings@...
Topic: 2336 Message: 2336

Александр, здравствуйте!

Перешел на Win10. Для удобства решил воспользоваться функцией виртуальных рабочих столов (не имею второго монитора), но вот что получается...
Программа сконфигурирована так, что при запуске открываются следующие окна:
главное окно, новое QSO, спот лист, dx-кластер, дипломная статистика.
Создаю рабочий стол №2, открываю там AALog. Программа нормально запускается и функционирует, открыты все вышеуказанные окна. В то же время на рабочем столе №1 открывается часть окон, а именно:
новое QSO, спот лист, dx-кластер, дипломная статистика, т.е. без главного окна программы.
Но данные окна на рабочем столе №1 не нужны совсем.
Хорошо. Закрываю "мешающие" окна программы на столе №1, так эти окна закрываются и на столе №2.
Есть ли возможность "научить" программу работать только на том рабочем столе, где ее открывают или этому мешает ее многооконность?

А в чём сакральный смысл открывать одновременно программу на двух и
более виртуальных столах?
Я ещё понимаю, например, один виртуальный стол для радиолюбительского
софта, второй, например, для мультимедийных програм (для работы по
видеомонтажу), третий - для работы с графикой и т.д.
Но Лог зачем на двух столах одновременно?

Александр, спасибо за ответ.
Галка "single icon on taskbar" стояла.
Попробовал снять, для проверки. Теперь на "нерабочем" столе осталось только окно "дипломная статистика для...". Все остальные окна программа открыла на втором столе и не повторила на нерабочем. Конечно, можно это единственное окно закрыть, чтобы оно не мешалось на нерабочем столе, но пропадает удобство оперативной статистики.

Здравствуйте, Alexander.

А можно сделать, чтобы окно кластера вместе со всеми разом опускалось в трэй?

В таск, конечно.
Может где галку поставить?

Эта стоит, но все равно мап остается на экране.
В таскбаре окно мапа не визуализируется, то есть как бы одно окно, но
сворачивается только все остальное, кроме банда.

From: shurings@...
Topic: 2336 Message: 2345

У меня точно так же ведет себя окно "спот лист" при отмеченной галочке single icon on taskbar". Его приходится отдельно сворачивать/разворачивать. Вот и подумалось использовать другой рабочий стол, чтобы не мучаться со сворачиванием/разворачиванием программы, когда необходимо.

2348. AALog3 Filter setting

Yahoo group: dxsoft-rus
Date: 2015-08-20 12:45:04 UTC
From: Сергей Юлаев
Topic: 2348 Message: 2348

Здравствуйте, Всем.

Попробовав различные варианты, и поняв, что уже начал повторяться
(голову "сломал"), обращаюсь к автору/сообществу...

Нужно видеть одновременно позывные, например, только с префиксами R35, R37, R39 или
с аналогичными условиями, для которых значения выбираются в текстовом
поле Value(s). Т.е. значений может быть несколько...(типа поля Call, IOTA,
QTH и пр.)
Кажется все должно быть просто, а вот не могу сконфигурировать
фильтр... Если из заданных списком (BAND, MODE), несколько выбираются
без проблем.
Не давала покоя фраза Хелпа "действия в прямоугольных скобках выполняются столько раз,
сколько частей фильтра должны быть объединены в один фильтр", но
попытки применить это как "мартышка и очки" :)
Any help

??
Увы я не понял... Покажите на примере

пустой лог, ввожу R35A, R35B, R37C, R39D
хочу все R35
Вкл фильтр >NEW OPTION>CALL>START With или CONT STRNG>VALUE??R35>Add...>Apply
Вижу R35A и R35B - как надо

хочу все только R35 и R37
ввод этих префиксов в поле VALUE в различном порядке вкл запятые, кв. скобки и прочую "отсебятину" после ADD>Apply
приводит к чистой странице: QSO in Log 3 Filtered 0
типа фильтрация по 1, 2, ... N префиксам невозможна...(думаю, я что то не то жму...)
или такое невозможно вообще, но , если в поле VALUE предлагается выбор из списка (там где есть+/- например Band), можно добавить 1, 2,..N значений, фильтр работает
т.е. как оперировать с несколькими произвольными текстовыми переменными в фильтре, а не выбранными из списка?

Может быть, Вы тоже дадите пример как надо на моем примере, а если это действо будет без использования кв. скобок, то очень кратко- с ними то, что можно делать (может пригодится)

Много написал, наверное опять непонятно :))
?коротко: как включить фильтр по 3...N префиксам?
--?

Вы писали 20 августа 2015 г., 20:42:44:

??
Теперь понял... Что-то я как то не предполагал что кому-то захочется так фильтровать. :)
Могу добавить в поле позывной фильтрацию по аналогии со странами DXCC.

Более 10 лет пользуюсь Вашим логом, и не задумывался... А тут в ОЗЧР "нашлепал" "очников" и захотел не просто?
их посчитать, а посмотреть по модам, бендам, турам. Тут и всплыло...Наверное, можно было как то еще выкрутится, но "заморачиваться " не стал - не принципиально. А тут Вы в рефлекторе мелькнули, я вспомнил - спросил...Вот и все.
Посчитаете нужным - добавите как нибудь.?

?Вопрос с квадратными скобками в фильтре снимаю. Пришел к выводу , что это не очень точное описание окна в оригинальном?
HELP , и почти дословный перевод, который и вызвал первоначальные "непонятки". Более тщательный анализ построения фильтра снял вопросы. ?

2362. CwType 2.20 is released

Yahoo group: dxsoft-rus
Date: 2015-09-01 17:02:56 UTC
From: Sergei Podstrigailo
Topic: 2362 Message: 2362

[The full message body has unrecoverable character-encoding damage in Yahoo's archived raw text. Yahoo's separately preserved message snippet follows.]

Hello All, я только что выложил CwType 2.20 на основной сайт и зеркало:
http://www.dxsoft.com/cwtype.zip

2363. TrueTTY/AATest - help!

Yahoo group: dxsoft-rus
Date: 2015-09-12 11:18:57 UTC
From: Konstantin Vakhonin
Topic: 2363 Message: 2363

Дорогие друзья!
Пытаюсь настроить софт для работы в Кубке СРР диги.
Лажа полная :(
При работе BPSK63 в окне AATеста New QSO слева внизу сразу пишет черным цветом Wrong mode on TRX.
Провожу связь.
Пытаюсь занести в лог макросом ~[ls]~[cl]
Не заносится, пишет QSO not saved into log.
Заносится только лишь нажатием клавишей Save в окне New QSO (при работе на CQ каждый работать тот еще геморр).
Крутанешь верньер в режиме PSK63 - сразу исчезает мода из окна New QSO, в окне Contest QSO List тоже пусто.
Повторы уаще не сечет, что в PSK63 что в RTTY.
Проводишь связь, тут же вбиваешь этот же позывной - не показывает что повтор :(

ЧТО делать?

73, Константин
RU4SS

Можно.
Но проблема остается - связь не сохраняется в режиме PSK63.
Только по нажатию кнопки Save.
А почему ААТест с модой PSK63 не дружит?

Пробовал ... as BPSK, PSK63, PSK6 (именно так эти связи в окне Contest QSO List) - результат один.
И повторы не чует ни в одной моде :(это уаще беда.
Как работать - хз...

Всяко уже попробовал...
ААТест моду PSK63 не воспринимает.
Повторы не отслеживаются.
Попробую помучаться в тесте :) мда уж...

Я догадываюсь почему прилетая от TrueTTY отказывается. Но оперативо
починить не смогу, т.к. переписывается модуль работы с кластером и 100%
рабочей версии нет.

Привет!
А что с повторами? Тут же вбиваю этот же позывной и не кажет что повтор.
Кстати в RTTY в окне New QSO тоже отображается надпись Wrong mode on TRX, только черным.
А в BPSK63 - красным цветом.

Геморрно конечно, но отработал :)
Сделал 206 связей в 1 туре, правда 6 номеров раздал дважды :(это бывает когда грабишь с монитора принятый номер и сразу даешь TU, забывая при этом щелкнуть в поле принятого номера и перевести Nr send на единичку на втором компе...селя ви.
Хорошие номера были у R9FT, RD0A, UA6CE...
До завтра!

73, Константин
RU4SS
P.S. Саша, надо цифре больше внимания уделять в AATесте :) особенно PSK; с RTTY вроде все ОК.

Сергей, спасибо за ответы по горячим следам.
Тут на UA4S именно режим AFSK (USB) используется...
Осенью много диги-контестов (RUS-WW-DIGI, RUS-WW-MM), если есть возможность - пофиксите, пожалуйста.
Ну и ждем с нетерпением долгожданных вестей от Александра...ждем, надеемся, верим :)

73, RU4SS

Продолжение следует...
Включаю сегодня утром компы, запускаю сервак...и...
В окне New QSO на обоих компах 001 вместо 201 :(
С ужасом вспомнил, что и в прошлом году было тоже самое.
Сформировал кабриллу за 1 тур, скопировал на флешку default.aat
Затем удалил все связи с обоих компов, запустил сеть по новому и вбил 200 левых связей.
Надеюсь через пол-часа с началом теста нумерация не обнулится.
Мучения продолжаются :)

а не пробовал убить на одном все связи и сделать синхронизацию?
Быстрее бы получилось. Но с очисткой, конечно, интересно :-/

нет.
исправляй косяки :)
а тут в итоге 381 куэсо.

Сформировал кабриллу...
Во всех связях стоит RY :(
Придется вручную править отчет, сверяя каждую связь с окном Contest
QSO List в ААТесте :) веселуха короче.
Извините, что утомил всех своим словесным недержанием.

73, RU4SS

Dear Sergei,

Прошел RUS-WW-DIGITAL Contest, в эти выходные RUS-WW-MM.
Есть какие-то подвижки с софтом?

73, Константин

В данном конкретном тесте проблем с модами нет. Настроить в Truetty слать
BPSK63 как BPSK и все нормально

В этом конкретном тесте ДА.
Но проблема (в целом) с PSK остается, при случае надо решать.

2385. AALog help

Yahoo group: dxsoft-rus
Date: 2015-11-02 15:32:36 UTC
From: eu1fq
Topic: 2385 Message: 2385

Здравствуйте, Alan.

Возникла проблема. При групповом редактировании вместо QSL sent date проставил дату в поле QSL rcvd date и никак не могу удалить эту запись. Изменить могу, а удалить никак. Если оставляю поле чистым, то прога пишет no fields selected!
Помогите, не удалять же вручную 600 записей

2386. AATest 2.0.5

Yahoo group: dxsoft-rus
Date: 2015-11-04 12:11:10 UTC
From: Alexander Anipkin
Topic: 2386 Message: 2386

Добрый день

Загрузил на сервера новый AATest

+ полностью переписана работа с кластером, теперь количество спотов не
влияет на скорость работы.
+ в окне BandMap добавлены столбцы времени спота, автора спота и азимута на
корреспондента. По всем столбцам можно сортировать.
+ можно блокировать от удаления споты, скрывать/показывать споты от RBN.
+ щелчок правой кнопкой мыши показывает что можно сделать в окне Bandmap
+ возможность автологина после подключеня к кластеру
- формат cty.dat для AATest теперь совместим с форматом CT9

Re: [dxsoft-rus] AATest 2.0.5 Здравствуйте, Александр.
Поскажите надо полностью по новой устанавливать?
и соответственно все настройки по новой делать или можно?
поверх предыдущей версии поставить?
И ещё хотелось бы уточнить насчёт фильтров для Бэнд Мап?
планируется ли их добавление?

Добрый день

Загрузил на сервера новый AATest

+ полностью переписана работа с кластером, теперь количество спотов не влияет на скорость работы.
+ в окне BandMap добавлены столбцы времени спота, автора спота и азимута на корреспондента. По всем столбцам можно сортировать.
+ можно блокировать от удаления споты, скрывать/показывать споты от RBN.
+ щелчок правой кнопкой мыши показывает что можно сделать в окне Bandmap
+ возможность автологина после подключеня к кластеру
- формат cty.dat для AATest теперь совместим с форматом CT9

www.dxsoft.com/aatest.zip

Re: [dxsoft-rus] ??????;? AALog Здравствуйте, Александр.
По фильтрам наверно стандартный набор : выбор диапазонов(хотя это,
наверно уже не актуально когда можно выбирать диапазоны),
по видам модуляции, показывать только новые страны и не подтверждённые.
Ещё не плохо бы чтоб цветом были выделены участки по видам модуляции,
позывные с которыми было уже QSO на диапазоне этим видом модуляции
И ещё я уже писал постоянно пропадает маштабирование ctrl+ прокрутка.
Перемещение прокруткой работает, а маштабирование пропадает и?
восстанавливается после перезапуска программы.
И ещё подскажите что то я пропустил выбор подтверждения QSL, LoTW, eQSL
для чего это и как этим пользоваться?

2398. проблема с импортом данных из ЛоТВ

Yahoo group: dxsoft-rus
Date: 2015-12-19 16:49:50 UTC
From: Alex_R6CW
Topic: 2398 Message: 2398

Здравствуйте, .

что то перестал проходить импорт данных из ЛоТВ. выскакивает ошибка 12029.
раньше когда выскакивала, нашел таблетку. стоит три лога, два из них старых. если для какого то из них в лотв появлялось подтверждение, то при попытке скачать свежие подтверждения на текущий лог выскакивала подобная ошибка лечилось проведением процедуры скачивания подтверждений и для двух старых логов. сейчас эта функция пропала.

лог версии 1190.

есть ли другие таблетки?

Попробуйте в шэке зайти на LoTW через Internet Explorer. Именно через него,
не Хром, не Firefox, а именно IE. Скорее всего он так же не зайдет.
Посмотрите в настройках IE выбранные алгоритмы шифрования для HTTPS.
Выберите всё что есть, перезагрузите IE

Re: [dxsoft-rus] проблема с импортом 076;анных из ЛоТ;В
Здравствуйте, Александр.

Вы писали 22 декабря 2015 г., 9:43:25:

через ИЕ (8) захожу без проблем. ?вот опера еще просит какие то подтверждения, если ответить ДА, то тоже захожу. остальными браузерами не пользуюсь. похжая ошибка вываливыалась, когда в ЛоТВ появлялись новые подтверждения на один из старых позывных. сначала нужно было импортировать данные для них, потом проходило и для текущего позывного. лог сет один.

один раз похожий глюк был, если устанавливалась датс начала импорта ранее определенной. но это было давно. сейчас попробовал. так же. с домашнего компа все грузится нормально. системы, браузеры, антивирусники - одинаковые. домашний обновил пару месяцев назад. этот трудится уже несколько лет без кардинальных чисток. проблема вылезла несколько дней назад.

Попробуйте в шэке зайти на LoTW через Internet Explorer. Именно через него, не Хром, не Firefox, а именно IE. Скорее всего он так же не зайдет. Посмотрите в настройках IE выбранные алгоритмы шифрования для HTTPS. Выберите всё что есть, перезагрузите IE

From: Alexander Anipkin
Topic: 2398 Message: 2404

В рассылке всё есть:

Новая версия загружена на сервера

+ Во всех окнах с результатами поиска можно сменить статус QSL для
нескольких QSO горячей клавишей
+ QSL service - спрашивает подтверждение на смену статуса QSL
- В edit qso при вставке слишком длинного значения QSL via - обрезает до
максимально допустимого
+ В окне Global Edit сочетание Ctrl+Enter теперь аналог нажатия "Go"
- Устранена "плавающая" ошибка при закрытии лога
- Исправлена ошибка в Go to date при установленом формате даты типа
'd/m/yy' (формат отображение месяца и дня без ведущих нолей)
+ изменен дизайн Quick search & Go to date в главном окне
+ При коррктировке позывного в окне редактирования, очищаются статусы
EQSL.cc и LoTW
+ В быстром поиске, если в конце позывного ввести пробел, то поиск
осуществляется по ПОЛНОМУ совпадению

2406. AAlog - Lookup in the Internet

Yahoo group: dxsoft-rus
Date: 2015-12-31 06:45:29 UTC
From: Eugene Baranov
Topic: 2406 Message: 2406

Здравствуйте.

При нажатии кнопки появляется надпись в окошке:
* Вы используете устаревший интерфейс, который будет отключен в 2017 году. *
* Для доступа в QRZ.RU Callbook необходимо использовать XML API, *
* см. http://www.qrz.ru/help/api/xml *
****
А в окне 425DXN вообще "Невозможно найти страницу".
Совсем обложили санкциями? :) Чем пользоваться?

Ну ладно.
С наступающим всех! 73!

С уважением, Евгений Баранов, UA3GGP.

2409. Интерфейс via LPT-порт

Yahoo group: dxsoft-rus
Date: 2016-01-05 20:44:07 UTC
From: Konstantin Vakhonin (home)
Topic: 2363 Message: 2409

Добрый день!
Давно использую самодельный интерфейс на LPT-порте.
Схема - как в хелпе к CWType.
При этом CW - на 2 ноге порта; PTT - на 3; земля - на 18.
Этот же интерфейс и нормально работает с TrueTTY.
При установке интерфейса на коллективке возникла необходимость
использования и других логгеров.
И возникла проблемка - некоторые логгеры используют для CW - 17 ногу;
для PTT - 16.

Вопрос - будет ли CWType/TrueTTY работать на 16 и 17 ножках?

73, Константин
RU4SS

Сергей, приветствую!
Наконец-то сегодня в клубе перепаял провода в разъеме ЛПТ-порта на 16
и 17 ножки...
Все работает (PTT и CW) во всех прогах, включая n1mm.
Но...
Почему-то при закрытии CWType (или TrueTTY) трансивер встает на TX.
Ничего не помогает (
Приходится по новой открывать софт.
Или отключить провод от PTT интерфейса к трансиверу.
Тогда трансивер возвращается на RX.
Интересно, что при закрытии n1mm такого нет.
Что посоветуете?

73, Константин

Dear Sergei,

Ну я сперва CWType открывал :) и сразу потом при закрытии такая бяка.

Т.е. предлагаете перепаять в интерфейсе землю с 18 на 1 ногу ?
ОК, попробую в выходные.
О результатах доложусь...
Раз уж такая тема...в этой же схеме, я так понимаю, есть возможность
подключить к ЛПТ-порту еще и эл.манипулятор.
При этом для работы с манипулятора надо будет включить CWType, нажать
педаль и айда манипулировать?

Здравствуйте, Александр.
Заметил что перестала работать функция 425DXN ?Lookup in the Internet.
Пишет не удаётся найти веб-страницу. Не подскажите что может быть?
Сергей.

Вы писали 21 февраля 2015 г., 11:39:20:

?
Новая версия загружена на сервера

+ Установить статус "Queued" для всех неотвеченных QSL (в меню Edit)
+ Установить статус ?"Queued" для всех неотвеченных связей с позывным у которого есть хотя бы одно QSO со статусом "Queued" (в меню Edit)
- поправлен баг с подсказкой "New one" в окне новых связей для дипломов с открытым списком референций (например WPX)
- при выборе нескольких QSO в главном окне и смене QSL статуса, вместе с новым статусом AALog подставляет теперь и текущую дату in the Global edit window.

Download it from:

Здравствуйте, Dxsoft-rus.

решил скинуть в основной лог связи из тестового за прошедший РЕФ.
но при импорте лог выкинул save date error.

попробовал импортировать из файла *.аат. та же история.
проферил более стариые файлы адиф. там дата так же прописана,
формат ГГГГММДД. в логе ДД.ММ.ГГГГ. неделю назад англицкий тест
нормально импортировался.
ЛОТВ глоиально его проглотил.
в чем может быть проблема?
пока буду ждать ответ, попробую на другом компе импортировать.

2440. TrueTTY 2.96h with new experimental mode

Yahoo group: dxsoft-rus
Date: 2016-02-14 15:12:32 UTC
From: Sergei Podstrigailo
Topic: 2440 Message: 2440

Hello All,

I just have uploaded new TrueTTY beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

Some minor bugs were fixed,
some minor improvement was made.

New experimental mode for not so fast, but robust communication FSK4/9
is made.

Mode is like to RTTY and DominoEX in the same time.

4-tones differential incremental manipulation is used,
but only one bit is transmitted in one moment.

A word includes 9 bits of data (8 bit info + 1 bit parity)
and one start/stop flag.

Parameters of mode is Speed and Shift (difference between near tones).

Shift should be equal or multiple of Speed.

Though is no reason to do Shift greater then twice of Speed.

Some later I plan to do mode with 12-bit or 13-bit word
with Hemming code.

--
Best regards,
Sergei

Всем спасибо, тестирование прошло удачно.
Осталось привести списки RDA к нынедействующему и будет выпущен для всех. Думаю два-три дня.

Список RDA от ES1BA правильный, только район NN-68 нужно вычеркнуть.
Всего 2640 районов.

Всем доброго утра.

Я надеюсь не опоздал:
давайте сделаем в списке DXCC вместо TX0 - FK/C.
.....
FK - NEW CALEDONIA

*FK/C - CHESTERFIELD ISLANDS *
FM - MARTINIQUE

.....

Очень буду благодарен.

Сергей (RJ3AA).

2453. AALog 3.6.6

Yahoo group: dxsoft-rus
Date: 2016-02-17 10:04:09 UTC
From: Андрей _RK6ABM
Topic: 2433 Message: 2453

Добрый день!

Вопрос конечно же к Александру RZ4AG.

Повторюсь:

Возможно ли добавить поле- Award references в главное окно,в поиск и в экспорт в файл.

нужно для упрощения составления заявок для дипломов

Приведу пример:

При проведении QSO я заношу референции WWF,RFF,RRA в New
QSO-Custom awards ref.-Award references.

В главном окне такой колонки нет и соответственно в последствии не понятно откуда
работала станция,нужно открывать окно редактирования и смотреть там.Можно дублировать в
QTH или Note,но не хотелось бы.

Далее,при состовлении заявки на диплом допустим надо выбрать
заповедники какой нибудь страны.
Я делаю так- в поиске выбираю связи с этой страной,экспортирую в текстовый файл,затем там
же в поиске
каждое QSO-Edit QSO и
смотрю референцию (если есть),и вручную добиваю в текстовый файл.
Вобщем долго и муторно. Возможно есть проще вариант,но я не знаю.

Хотелось бы просто выбрать в поиске,например:SEARCH STRING-SPFF*
,SEARCH FIELD-Awards references ,получить список всех
сработанных польских референций ,экспортировать в файл и получить
готовую заявку.

Hello All, Выложил очередную бету на основной сайт и зеркало:
http://www.dxsoft.com/truettyb.zip

2457. TrueTTY 2.97 beta

Yahoo group: dxsoft-rus
Date: 2016-02-20 17:35:59 UTC
From: Sergei Podstrigailo
Topic: 2457 Message: 2457

Hello All,

I just have uploaded new TrueTTY beta to the main site and mirror:

http://www.dxsoft.com/truettyb.zip
http://www.hamport.com/truettyb.zip

V2.97
Experimental mode FSK4/13 was made.
This mode uses 13-bit symbols with minimal code
distance 4, so all single and some double
errors can be fixed.
V2.96
Experimental mode FSK4/9 was made.
Some minor improvements and bugfixes were made.

Не знаю о каком окне Вы говорите, но у меня, например, если эту команду (Mark as QSL) правым кликом вызвать из Гл. Окна или Окна Ввода, то отметка "Received" ставится одним левым кликом.

From: Сергей
Topic: 2465 Message: 2465

Здравствуйте Александр .
Из главного окна нажимаю правой кнопкой мыши выпадает меню в нём
выбираю Mark as QSL и в следующем выпадающем меню левой кнопкой на
QSL received - или Ctrl+R метка не всегда ставиться с первого раза.
Но ещё заметил если вызываю по F7 окно Search contacts как
советовали и там нахожу нужную связь и ставлю отметку QSL получена
или галочкой или по выпадающему меню потом закрываю окно и
в открытом окне основном нахожу эту связь отметки что карточка
получена нет.

Проверил, есть такое.
Для любого нового выбранного QSO метка ставится со 2 раза. И только так.
Если уже работал с этим QSO, то свойство ставится сразу.
И это касается только маркера Received.

> Но ещё заметил если вызываю по F7 окно Search contacts как

Андрей, хотелки рассматриваются и заносятся в гроссбух
в 3.6.6 это уже не войдет, так как иначе выпуск обновления затянется.
В дальнейшем - я буду смотреть как это реализовать

2480. [dxsoft-rus] AALog 3.6.6

Yahoo group: dxsoft-rus
Date: 2016-02-21 16:54:35 UTC
From: eu1fq
Topic: 2433 Message: 2480

Здравствуйте, Alan.

Александр, доброго времени суток!
Есть пару хотелок для Вашего "гроссбуха" на будущее рассмотрение.
1. Очень не хватает функции редактирования ЛЮБОГО QSO во вкладке "Previous" из окна "Edit QSO info", а не только того которое открыто. По принципу, как это сделано по клавише F7. Очень помогло бы при разборке и отправке QSL почты.
2. Ячейка отправки/получения eQSL не очень информативна. Зеленая "галочка" и синия "стрелочка" в этой ячейке по своим цветам очень близки по восприятию, особенно на малом экране ноутбука. Хотелось бы более контрастного сочетания цветов, а лучше всего выделить ячейку получения eQSL каким либо цветом, как это сделано в UR5EQF_log. Отправка и получение LoTW и бумажных оставить как есть.
3. Очень хотелось бы "подружить" AAlog с WSJT-X. JT65 и JT9 набирают все большую популярность.
4. Замечен баг, но возможно что это только у меня. При работе AAlog с несколькими мониторами (при любом расширении) невозможно создать ADIF файл. Программа виснет намертво. Помогает только Ctrl-Alt-Del. Все остальные функции в расширенном режиме монитора работают нормально.

Есть такая проблема
поэтому я когда пользуюсь поиском через Search contacts то галочку ставлю не через выпадающее меню книзу окна,
а кликая на сами строки со связями и там в окне редактирования уже ставлю галочки.
Привык и не обращаю внимания уже давно на данный косяк

73! Алексей, RT3M

Yahoo group: dxsoft-rus
Date: 2016-02-25 08:18:30 UTC
From: eu1fq
Topic: 166 Message: 2482

Здравствуйте, Alan.
Может вопрос совсем не в тему, но -
если я формирую в AAlod ADIF файл и отправляю его на HRDLOG.net,то возможны следующие варианты:
- если в AAlog установлена галочка что QSL загружена на LoTW, но пока не подтверждена, то HRDLOG.net не воспринимает файл (ошибка!)
- если в AAlog установлена галочка что QSL загружена на LoTW и подтверждена LoTW, то все нормально.Остальные атрибуты ADIF не влияют на возможность загрузки файла на HRDLOG.net.
Приходится принудительно снимать галочку что QSL загружена на LoTW. Другого способа загрузить файл на HRDLOG.net я не нашел.
В чем может быть проблема?

From: eu1fq
Topic: 166 Message: 2484

Здравствуйте, Alexander.

Вы писали 25 февраля 2016 г., 11:48:01:

я выставляю значение вот этого поля в Y (я так думаю во всяком случае, проверить на работе нет возможности)
Если это так (вы можете посмотреть Adif в любом текстовом редакторе), то все вопросы к HRD

HI!
Объяснение причины понятно.
Но у меня, к сожалению, AAlog в этом поле вместо "Y" формирует по непонятной причине значение "S"
Если я в текстовом редакторе массово заменю "S" на "Y" то все в порядке. HRD файл принимает.
Версия 3.6.5.1196 Win 7
Для пробы попробовал сформировать ADIF другими логами. Все в порядке. Значение этого поля устанавливается в "Y"
Да, забыл, ADIF со значением "S" прекрасно загружается на LoTW.

Пример одного QSO, как AAlog формирует ADIF:

```

2485. AALog 3.7 build 1200

Yahoo group: dxsoft-rus
Date: 2016-02-28 07:25:44 UTC
From: Alexander Anipkin
Topic: 2485 Message: 2485

Новая версия загружена на сервера

Внимание!!!

Не забываем сделать резервную копию aalog.gdb

При первом старте AALog загружается дольше обычного. Это связано с изменением структуры БД.
Кроме этого программа проводит изменения в логе в соответствии с новым списком RDA. Новый список RDA нужно самостоятельно заменить (папка Refs) и выполнить рескан диплома.

- окно поиска в интренете. закладка QRZ.RU. В случае дробного позывного поиск осуществляется по основному позывному
+ во всех списках связей возможно груповое изменение статуса QSL
+ добавлена сортировка по State и Subdivision
- запоминается настройки сортировки в окне QSL service
- в окне QSL service сохраняются значения QSL message
+ в окне QSL service добавлена сортировка по MainPrefix. Это позволяет сортировать QSL по районам России, США, Японии и т.д. Если заполнено поле QSL via, то берется позывной менеджера
- в окне QSL service добавлена быстрая клавиша Ctrl+P для вызова диалога печати.
- окно поиска в интернете. Восстановлена работа 425DXN
- Search window. Добавлен режим автоматического поиска по части позывного (опция Use partial search)
+ Добавлено поле "Type of propagation" для УКВ-истов
- при переходе по споту выключется сплит на трансивере
- если в окне редактирования логв установлен фильтр по лог сету, то новый лог предлагается создать в этом лог сете
- добавлено сообщение об окончании процесса импорта и количестве импортированных и "плохих" связей
- добавлено сообщение об окончании процесса экспорта
- немного изменен текст надписей в окне импорта
- унифицирована горячая клавиша переход в поле Subdiv (Alt+U)
- Окное Edit QSO. Добавлены горячии клавиши для переключения закладок (как в окне New QSO)
- копирование данных о выделенных связях в буфер обмена работает во всех списках связей
+ Окно Search contacts. Если ничего не найдено, то фокус на поле поиска и выделен текст поиска. Можно вводить новый без дополнительных манипуляций
- Окно поиска в интернете. Закладка DXSummit. Подставляется текущий год
- ошибка определения New one в окне New QSO в некоторых случаях
+ автоматическое добавление расширения файла при экспорте в ADIF
- Сортировка связей по MainPrefix работает правильно
- экспорт в ADIF. Неправильно экспортировалось LOTW_QSL_SENT

+ окно BandMap. Ctrl+PgUp, Ctrl+PgDn - меняют отображаемый диапазон.
Клавиша Enter работает так: если New QSO открыто - Enter переносит фокус
туда и подставляет данные. Если Ctrl+Enter, то открывает окно New QSO даже
если оно закрыто

А утилита restore.bat с новой структурой базы работать будет и вообще
есть необходимость в её применении? До этого иногда пользовался, "сжимала"базу
заметно

Новая версия загружена на сервера

Внимание!!!

Не забываем сделать резервную копию aalog.gdb

При первом старте AALog загружается дольше обычного. Это связано с изменением структуры БД. Кроме этого программа проводит изменения в логе в соответствии с новым списком RDA. Новый список RDA нужно самостоятельно заменить (папка Refs) и выполнить рескан диплома.

- окно поиска в интренете. закладка QRZ.RU. В случае дробного позывного поиск осуществляется по основному позывному
+ во всех списках связей возможно груповое изменение статуса QSL

+ добавлена сортировка по State и Subdivision
- запоминается настройки сортировки в окне QSL service
- в окне QSL service сохраняются значения QSL message
+ в окне QSL service добавлена сортировка по MainPrefix. Это позволяет сортировать QSL по районам России, США, Японии и т.д. Если заполнено поле QSL via, то берется позывной менеджера
- в окне QSL service добавлена быстрая клавиша Ctrl+P для вызова диалога печати.
- окно поиска в интернете. Восстановлена работа 425DXN
- Search window. Добавлен режим автоматического поиска по части позывного (опция Use partial search)
+ Добавлено поле "Type of propagation" для УКВ-истов
- при переходе по споту выключется сплит на трансивере
- если в окне редактирования логв установлен фильтр по лог сету, то новый лог предлагается создать в этом лог сете
- добавлено сообщение об окончании процесса импорта и количестве импортированных и "плохих" связей
- добавлено сообщение об окончании процесса экспорта
- немного изменен текст надписей в окне импорта
- унифицирована горячая клавиша переход в поле Subdiv (Alt+U)
- Окное Edit QSO. Добавлены горячии клавиши для переключения закладок (как в окне New QSO)
- копирование данных о выделенных связях в буфер обмена работает во всех списках связей
+ Окно Search contacts. Если ничего не найдено, то фокус на поле поиска и выделен текст поиска. Можно вводить новый без дополнительных манипуляций
- Окно поиска в интернете. Закладка DXSummit. Подставляется текущий год
- ошибка определения New one в окне New QSO в некоторых случаях
+ автоматическое добавление расширения файла при экспорте в ADIF
- Сортировка связей по MainPrefix работает правильно
- экспорт в ADIF. Неправильно экспортировалось LOTW_QSL_SENT
+ окно BandMap. Ctrl+PgUp, Ctrl+PgDn - меняют отображаемый диапазон. Клавиша Enter работает так: если New QSO открыто - Enter переносит фокус туда и подставляет данные. Если Ctrl+Enter, то открывает окно New QSO даже если оно закрыто

Возникнет проблема с многострочными комментариями.
Предлагаю просто добавить возможность вызова небольшого всплывающего окошка
для ввода комментария.

Окно нужно для ввода короткой информации (RX/TX или антенна корреспондента, номер клуба и т.д.)
Тем более, там есть место под такую строчку.

Дмитрий

Новая версия загружена на сервера

Внимание!!!

Не забываем сделать резервную копию aalog.gdb

При первом старте AALog загружается дольше обычного. Это связано с изменением структуры БД. Кроме этого программа проводит изменения в логе в соответствии с новым списком RDA. Новый список RDA нужно самостоятельно заменить (папка Refs) и выполнить рескан диплома.

- окно поиска в интренете. закладка QRZ.RU. В случае дробного позывного поиск осуществляется по основному позывному
+ во всех списках связей возможно груповое изменение статуса QSL
+ добавлена сортировка по State и Subdivision
- запоминается настройки сортировки в окне QSL service
- в окне QSL service сохраняются значения QSL message
+ в окне QSL service добавлена сортировка по MainPrefix. Это позволяет сортировать QSL по районам России, США, Японии и т.д. Если заполнено поле QSL via, то берется позывной менеджера
- в окне QSL service добавлена быстрая клавиша Ctrl+P для вызова диалога печати.
- окно поиска в интернете. Восстановлена работа 425DXN
- Search window. Добавлен режим автоматического поиска по части позывного (опция Use partial search)
+ Добавлено поле "Type of propagation" для УКВ-истов
- при переходе по споту выключется сплит на трансивере
- если в окне редактирования логв установлен фильтр по лог сету, то новый лог предлагается создать в этом лог сете
- добавлено сообщение об окончании процесса импорта и количестве импортированных и "плохих" связей
- добавлено сообщение об окончании процесса экспорта
- немного изменен текст надписей в окне импорта
- унифицирована горячая клавиша переход в поле Subdiv (Alt+U)
- Окное Edit QSO. Добавлены горячии клавиши для переключения закладок (как в окне New QSO)
- копирование данных о выделенных связях в буфер обмена работает во всех списках связей
+ Окно Search contacts. Если ничего не найдено, то фокус на поле поиска и выделен текст поиска. Можно вводить новый без дополнительных манипуляций
- Окно поиска в интернете. Закладка DXSummit. Подставляется текущий год
- ошибка определения New one в окне New QSO в некоторых случаях
+ автоматическое добавление расширения файла при экспорте в ADIF
- Сортировка связей по MainPrefix работает правильно
- экспорт в ADIF. Неправильно экспортировалось LOTW_QSL_SENT
+ окно BandMap. Ctrl+PgUp, Ctrl+PgDn - меняют отображаемый диапазон. Клавиша Enter

работает так: если New QSO открыто - Enter переносит фокус туда и подставляет данные. Если Ctrl+Enter, то открывает окно New QSO даже если оно закрыто

Т.е. вы предлагаете иметь еще одно поле для короткого примечания. Встаёт дополнительный вопрос: это примечание должно быть для позывного или для связи. И у каждого свой ответ на этот вопрос.

Все работало и работает... в автоматическом режиме, хотите в ручном -
Config --- Options ---снимите "галочку" Auto search attached callbooks.

Новая в 77;рсия загружена на серве 88;а

.....
- экспорт в ADIF. Неправильн 86; экспортировалось LOTW_QSL_SENT
.....

--

Д;а, LOTW_QSL_SENT, исправлено.
Но п086;явилась точно такая про073;лема с EQSL_QSL_SENT:1>S ?!!!!
Раньше строка ?EQSL_QSL_SENT в ADIF отсутствовала. Т077;перь она поя;вилась и к тому же с непра074;ильным флагом "S"

73! Никол072;й

Не "появилась", а видимо вы ее просто не замечали. Поправил и тут.

? ? ? ?Александр, доброго вр 77;мени суток!

Нужно еще раз скачать и переустановить версию?

Кроме того ok3;наружил еще один очень н 77;приятный баг при формир 86;вании программой ADIF файла (Версия 3.7.0.1200)
Если в логе проставлена отм;етка "Uploaded to Lotw", а QSL по; LoTW еще не подт074;ерждена,

- то 074;се нормально.
Значение m2;лага LOTW_QSL_SENT "Y". Стр 86;ка LOTW_QSL_RCVD отсутствует.
Как то;лько в логе появляктся ом0;мека "LoTW Confirmed" (черк7;з загрузку с https://lotw.arrl.org или вруч085;ую), то ситуа 94;ия коренным образом мен03;ется.
В самом логе все кр 72;сиво: QSL отпра074;лена на LoTw и подтверждена LoTW.
А вот при фо088;мировании ADIF из этого логк2; получается следующее: с 90;рока LOTW_QSL_SENT пропадает !!!!, а пояк4;ившаяся строка LOTW_QSL_RCVD устана;вливает зна095;ение флага в; ?"R" вместо "Y"!!!
Как результам0;, возникает очень неприя 90;ная ситуация при загруз 82;е своего журнала на таки077; популярные сервисы как,
QRZ.com, clublog.org, hrdlog.net и другие. LoTw вроде как; бы подтверждена, а на эти093; сервисах по;льзователь 074;идит что нет;.
Приходитсп3; изголяться разными спол9;обами что бы исправить э 90;у ситуацию.
С уважением, de EU1FQ, Николай, 73!

Александр, доброго времени суток!

Нужно еще раз скачать и переустановить версию?

Кроме того обнаружил еще один очень неприятный баг при формировании программой ADIF файла (Версия 3.7.0.1200)
Если в логе проставлена отметка "Uploaded to Lotw", а QSL по LoTW еще не подтверждена, - то все нормально.
Значение флага LOTW_QSL_SENT "Y". Строка LOTW_QSL_RCVD отсутствует.
Как только в логе появляктся отмека "LoTW Confirmed" (через загрузку с https://lotw.arrl.org или вручную), то ситуация коренным образом меняется.
В самом логе все красиво: QSL отправлена на LoTw и подтверждена LoTW.
А вот при формировании ADIF из этого лога получается следующее: строка LOTW_QSL_SENT пропадает !!!!, а появившаяся строка LOTW_QSL_RCVD устанавливает значение флага в "R" вместо "Y"!!!
Как результат, возникает очень неприятная ситуация при загрузке своего журнала на такие популярные сервисы как,
QRZ.com, clublog.org, hrdlog.net и другие. LoTw вроде как бы подтверждена, а на этих сервисах пользователь видит что нет.
Приходится изголяться разными способами что бы исправить эту ситуацию.
С уважением, de EU1FQ, Николай, 73!

Да, если включен, то переходит на основной TX.

.

Александр, доброго времени суток!

Нужно еще раз скачать и переустановить версию?

Кроме того обнаружил еще один очень неприятный баг при формировании программой ADIF файла (Версия 3.7.0.1200)
Если в логе проставлена отметка "Uploaded to Lotw", а QSL по LoTW еще не подтверждена, - то все нормально.
Значение флага LOTW_QSL_SENT "Y". Строка LOTW_QSL_RCVD отсутствует.
Как только в логе появляктся отмека "LoTW Confirmed" (через загрузку с https://lotw.arrl.org или вручную), то ситуация коренным образом меняется.
В самом логе все красиво: QSL отправлена на LoTw и подтверждена LoTW.
А вот при формировании ADIF из этого лога получается следующее: строка LOTW_QSL_SENT пропадает !!!!, а появившаяся строка LOTW_QSL_RCVD устанавливает значение флага в "R" вместо "Y"!!!
Как результат, возникает очень неприятная ситуация при загрузке своего журнала на такие популярные сервисы как,
QRZ.com, clublog.org, hrdlog.net и другие. LoTw вроде как бы подтверждена, а на этих сервисах пользователь видит что нет.
Приходится изголяться разными способами что бы исправить эту ситуацию.
С уважением, de EU1FQ, Николай, 73!

2507. 1200

Yahoo group: dxsoft-rus
Date: 2016-03-07 08:18:07 UTC
From: Сергей Надточий
Topic: 2507 Message: 2507

Александр добрый день.
Не знаю может это у меня только но тем не менее помогите разобраться.
Установил с нуля Win7 и устанавил ААлог 3.7.0.1200 встало всё нормально,
захожу в настройки внешние программы DX Atlas, Band Master b Omni rig,
всё нормально, а CWType TrueTTY только ссылки на сайт хотя установлены.
Пробовал и сносить - закачивать по ссылка и потом устанавливать всёравно не видит
ААлог их.

Здравствуйте.
Спасибо после праздников попробую компьютер на работе.
И ещё по поводу BandMap когда щёлкаешь по споту трансивер
у меня FT-2000 переключается на сплит на следующем споте сплит
отключается если выбрать следующий спот снова включается сплит.

From: Alexander Anipkin
Topic: 2523 Message: 2523

Новая версия загружена на сервера

Внимание!!!

Не забываем сделать резервную копию aalog.gdb

- переписан импорт из ADIF. Можно импортировать файлы с большим количеством связей (тестировалось на файле >100 000 QSO
- исправлена ошибка экспорта полей состояния LOTW и EQSL.CC в ADIF
- поправлен префикс лист для префиксов VQ9 (для связей в 70-х годах прошлого века)
- поправлены мелкие баги в интерфейсе.
- поправлен баг с трансиверами Yeasu, когда при щелчке на споте включался сплит.

Загрузить:

полный пакет:
http://www.dxsoft.com/aal3.zip
http://www.hamport.com/aal3.zip

Обновление:
http://www.dxsoft.com/aal3-upd.zip

Александр, совместно с логом использую Band Master.
При щелчке на споте в BM включается сплит, при повторном выключается.
Это было еще в 1196.

Re: [dxsoft-rus] AALog 3.7.1 build 1204 Здравствуйте, 'RK9DC'.
Я сегодня попробовал с новой версией и с Band Map и с Band Master
работает нормально, только если идёт большой поток спотов от скимера виснет и
вешает всю программу, а с простыми кластерами нормально.
Вы писали 10 марта 2016 г., 20:15:52:

Загрузил версию на сайт.
Основная правки в работе кластера и окна спотов.

www.dxsoft.com/download/aatest_2_0_19.zip

у ru4ss какие-то непонятные глюки, прошу проверить.
А Константина прошу описать тут что искать.

Ситуация такая...
Подключаюсь к кластеру R7AB.
Окно Bandmap - небольшое (НЕ на всю высоту монитора).
В настройках кластера - прием со скиммеров определенных стран.
В один момент (минут через 10) - если мышкой начать двигать вниз нижний конец окна Bandmap оказывается, что в этом окне есть еще споты а я их не вижу.
Начинаешь двигать нижний конец окна Bandmap вверх - нижние споты исчезают но скролл появляется не сразу.
Это первая проблема.

Вторая проблема...
При сортировке спотов в окне bandmap по UTC - через минут 7-10 вылезает окно с ошибкой и ААТест подвисает.

Интересно у кого как...

73, Константин

Вернулся из контестового шэка...проверил новый exe-к на 2-х компах.
Что сказать...
ТОЖЕ самое :((
1. После обновления и включения нового exe-ка размер шрифта Nr send в окне New QSO ОГРОМНЫЙ.
Захожу в настройки шрифта в ААТест - вроде все ОК (какие должны быть) ... ладно - жму ОК и размер шрифта меняется на тот, который и прописан в настройках.

2. Запускаю кластер со скиммером, пошли споты.
Споты в окне Bandmap упорядочены по UTC.
Через минут 5 вылезает окно Invalid floating ... operation ... жму оК.
Вылезает другое окно с номером ошибки (Александр знает).

3. Перезагрузил софт.
Опять огромный шрифт)))
Сделал в кластере сортировку по freq.
Посидел минут 20 - вроде все ОК было, не зависал и скролл работал.

Как-то так...ничего хорошего пока у меня (((

А у вас?

У меня когда мап "переполнился", зависло. Спот заполнялся минут 5, раза 3 пробовал, одно и то же.

2544. Re: [dxsoft-rus] AALog 3.7.1 build 1204

Yahoo group: dxsoft-rus
Date: 2016-03-15 10:01:04 UTC
From: Sergei, RD4WM
Topic: 2523 Message: 2544

Здравствуйте!
Скачал обновление и полный пакет, обновился с build 1200 до build 1204.
Обнаружил баг.
В окне Search contacts при поиске QSO (например, PJ2T) не стало "птичек", что QSL отправлены, получены, нет статуса LOTW. В основном окне программы "птички" есть.
Заново переустановил весь пакет AALog 3.7.1 build 1204 - то же самое. Это только у меня так?
В версии 1200 все хорошо.

Сергей RD4WM.

Subject: [dxsoft-rus] AALog 3.7.1 build 1204

Новая версия загружена на сервера

Внимание!!!

Не забываем сделать резервную копию aalog.gdb

- переписан импорт из ADIF. Можно импортировать файлы с большим количеством связей (тестировалось на файле >100 000 QSO
- исправлена ошибка экспорта полей состояния LOTW и EQSL.CC в ADIF
- поправлен префикс лист для префиксов VQ9 (для связей в 70-х годах прошлого века)
- поправлены мелкие баги в интерфейсе.
- поправлен баг с трансиверами Yeasu, когда при щелчке на споте включался сплит.

Загрузить:

полный пакет:
http://www.dxsoft.com/aal3.zip
http://www.hamport.com/aal3.zip

Обновление:

□
Здравствуйте!
Скачал обновление и полный пакет, обновился с build 1200 до build 1204.
Обнаружил баг.
В окне Search contacts при поиске QSO (например, PJ2T) не стало "птичек", что QSL отправлены, получены, нет статуса LOTW. В основном окне программы "птички" есть.
Заново переустановил весь пакет AALog 3.7.1 build 1204 - то же самое. Это только у меня так?
В версии 1200 все хорошо.

Сергей RD4WM.

?
Новая версия загружена на сервера

Внимание!!!

Не забываем сделать резервную копию aalog.gdb

- переписан импорт из ADIF. Можно импортировать файлы с большим количеством связей (тестировалось на файле >100 000 QSO
- исправлена ошибка экспорта полей состояния LOTW и EQSL.CC ?в ADIF
- поправлен префикс лист для префиксов VQ9 (для связей в 70-х годах прошлого века)
- поправлены мелкие баги в интерфейсе.
- поправлен баг с трансиверами Yeasu, когда при щелчке на споте включался сплит.

Загрузить:

полный пакет:
http://www.dxsoft.com/aal3.zip
http://www.hamport.com/aal3.zip

Обновление:
http://www.dxsoft.com/aal3-upd.zip
http://www.hamport.com/aal3-upd.zip

Здравствуйте.

Аналогично, ВСЕ последние версии все метки на месте. Только что перешёл 1204 => 1205, показывает всё нормально.

С уважением, Евгений Баранов, UA3GGP.

Эт че за фигня такая? ;)
Моя работает без всяких там "проверяй прокси". И не сохраняет историю, короче, чистый браузер, стерильный.
Файл принимается правильный, даже запускается правильный, но (см картинку) https://yadi.sk/i/nV8sgigAqDPS4 Тут я струхнул и не стал дальше загружать сразу, но потом все-таки проверил до конца. Обычно ставлю весь комплект копированием, не обращая внимания на установочную информацию.

Видать я замечаю не то, что надо :))))))
Эээ..пустое, все равно промежуточный вариант.

From: Alex_R6CW
Topic: 2576 Message: 2576

Здравствуйте,.

работает пока 2.0.11
не стал перед тестом менять. в ней тоже толком еще не работал.
обратил внимание, что не смотря н аличие позывного в строке CALL d
config - station пришлось вручную выбирать страну.

второе что заметил , в окне new qso в rdxc автоматом не проставляются
теперь буквенные сокращение регионов. это фишка ? хотя, в верху, под
введенным позывным выдается название региона и его буквенное
сокращение. немного непривычно. но в этот раз были станции, работающие
из других субъектов своего ФО без доп. обозначений.

третье - в подсказке по калужзской области выдавалось буквенное
сокращение KU вместо KG.

кластером не пользовался, только отвлекает. потому его работу не
проверял.

Ну, не знаю... у меня v 2.0.21
По первым двум абзацам, все определяется правильно. Правда, у меня "свой",
подкорректированный,?
файл rus.dom.?
В файле cty_rus.dat "опечатка" - надо KU на KG исправить. Но это, не важно; в номер
подставляется из файла rus.dom.?
А где еще это используется -не знаю...(но порядок должен быть :)?

А вот кластер, опять "подкачал" - за тест, три или четыре раза band map зависал.?
И шрифт в окне новой связи очень крупный, и ?не сохраняется при перезагрузке. Уже
писАли...?

ясненько :-)
слышались, вроде, в тесте :-)
нужно менять версию. вроде и эту недавно ставил.

п.с. в режиме экспедиции еще заметил: в окне новой связи появились ВАРЦы, а вот в окне статистики так 6 и осталось. очень помогает ААТест при работе во всяческих активностях :-)

Добрый день.

Прошу вас по возможности в ближайшее время перенести KH5K (Kingman Reef) в Deleted.

Ну и давно уже пора поменять префикс TX0 (Chesterfield Isl.) на FK/C - как положено по списку DXCC.

Всем удачи!
73! Сергей (RJ3AA).

Спасибо Микрософту за наше счастливое детство.

Лог скорее всего установлен в Program Files. Но мудрый Windows считает что
хранить данные надо там, где он считает нужным.
Ищите еще один aalog.gdb в своем профиле. Вот он и есть правильный.

Если есть желание привести все в "нормальный" (что б все в одной папке) -
расскажу.

2595. ААЛОГ не запускается

Yahoo group: dxsoft-rus
Date: 2016-05-15 19:35:09 UTC
From: Oleg Pogorely
Topic: 2595 Message: 2595

Здравствуйте Александр!
Случилось так, что мне пришлось переустановить систему на новый жесткий диск из-за аварии старого. Вернее я восстановил образ диска, который был ранее (в январе) создан Акронисом. Все в т.ч. ААЛОГ заработало без проблем. ААЛОГ был версии 3.6.5.1196. Чтобы внести изменения в журнале которые произошли с января я попытался заменить файл AALOG.GDB на последний из резервной копии, созданной в апреле. ААЛОГ обновил до последней версии 3.7.1.1205. Но программа не запустилась. Система WIN-XP. Раньше такая
замена файла базы и ини файлов проходила без проблем. Но в этом году был ряд обновлений и что-то не сложилось. Как быть?

Это сообщение проверено на вирусы антивирусом Avast.

Здравствуйте, Dxsoft-rus.

перешел некоторое время назад на ААтест ....21.
заметил глюк, кажется сначала в RCCC и потом CQ-M. проявляется на российских станциях.
в первом тесте,вообще при первом QSO выдал QSO B4. потом еще на нескольких позывных повторилось. вот некоторые позывные: RL4A, RV3F, RM4W. во втором тоже несколько раз вылазило, но позывные не записывал. может в 22 версии уже нет его? еще не пробовал

CAT не включился сразу или вообще не подключен.
При первом QSO при этом в окне ввода QSO не показывает ни band ни mode.
У меня 22 версия.
Тут надо фиксить в принципе, а не проблему с dupe.

работаю без CAT (все никак не соберусь подключить :-)

в PCCC глюк был при первой связи. и потом на нескольких позывных. в
CQM уже по ходу теста вылезло.

Забыл добавить, что при этом надо отключить:
Config - Use OmniRig...
Проверьте, может оно там включено было всегда, просто не замечали.
Хотя досконально не проверял, только по указанным вами тестам и позывным, у меня все норм.

привет.
попробую.
правда, пока не уловил связь между CAT и сообщениями о DUPE.
в первом случае получилось несколько подобных связей в самом начале теста, на одном диапазоне, когда дублей точно не было. нужно посидеть потренироватья. как раз на работе будет время :-)

2602. Лог не запускается

Yahoo group: dxsoft-rus
Date: 2016-08-09 19:24:56 UTC
From: dl1ba@...
Topic: 2602 Message: 2602

Привет Александр,
дублирую мой вопрос на qrz.ru . Лог не запускается, причём я ничего не менял - просто в очередной раз пытаясь открыть лог появилось окно с сообщением об ошибке. ОС - Win7 . Резервная копия GDB есть только трехгодичной давности, её не пробовал.

73!

Добрый день

Ну, если база повреждена не сильно, то есть шанс ее вылечить.
Для начала попробуйте самостоятельно

1.сделать копию aalog.gdb!!!

2. Скачать
http://www.dxsoft.com/bak.zip
распаковать в папку с логом и запустить

3. по итогам работы должен появится aalog1.gdb. Его переименовать в
aalog.gdb и попробовать запустить лог.

Привет

распаковать в каталог к логу (вместе с подкаталогом)
www.dxsoft.com/download/3_8.zip
Список изменений - в текстовой файле.
Сценариев особых нет. Окно поиска в интернете протестить виснет или нет, ну
и заценить DXNotebook в связке с dxnews.com.

Subject: [dxsoft-rus] Нужно 3-4 человека для тестирования AALog 3.8

Добрый вечер

Нужно 3-4 человека для тестирования AALog 3.8
Требования:
1. понимать что значит распаковать архив в папку с программой
2. иметь время потестировать в работе (надо до конца недели решить публикуем для всех или нет)

все

Доброе утро.

Не забудьте *KH5K* перенести в Deleted территории.

Сергей.

P.S. И конечно же по всем законам "физики" во все заливки типа LoTW должно заливаться время окончания QSO, которое всегда одно и тоже у корреспондентов, а не начала QSO, которое просто безумно может отличаться...

KH5K каждый может и сам превести куда надо.
надо в списке дипломов для списка DXCC поставить галочку.
Вот что в префикс листе поправлено или нет - проверю

Время выгружаемое в adif для lotw вы выбираете сами.

2632. AALog 3.8.0

Yahoo group: dxsoft-rus
Date: 2016-11-12 19:50:37 UTC
From: Alexander Anipkin
Topic: 2632 Message: 2632

Добрый вечер

Как обещал 3.8

+ в DXNotebook добавлен интерфейс с dxnews.com. По желанию скачиваются новости с этого сайта.
- автоподстановка/автопредложение IOTA в окне New QSO
- при устнаовки статуса станции MM, ее зоны устанавливаются -1
- Если установлен интервал дат, то вся статистика меню Statistic считается для этого интервала
- Добавлена кнопка "Clear All" в окне установке интервала статистики
- Multi QSO edit не сохранял настройки
- При импорте не устанавливался префикс для QSL-бюро
- Добавлен пункт Copy to Clipboard в окне поиска в Internet
- можно настроить показ в окне Previous QSOs всех связей для основного позывного (т.е. работая с sv5/rz4ag, будут показаны все связи с rz4ag со всеми дробями)
- Можно настраивать порядок полей при экспорте
- поиск на qrz.ru информации по основному позывному (дроби отбрасываются)
- Окно поиска (F7) - сохраняется состояние "Use partial search"
- Окно поиска (F7). Можно искать во всех logset
- EDIT QSO INFO - в заголовке окна показывается имя лога в котором расположена связь
- проблема с переносом единственной связи в другой лог решена
- Кнопка "More info" в окне "Awards manager" если имеется комментарий (например страны DXCC входящире в CQ зону)
- новый вид статистики Awards Manager для дипломов в которых нет подиапазонного учета (IOTA, RDA и т.д.).
- CQ/ITU зоны не очищались при автозаполнении зон
- Позывные с которыми еще не было связи отображаются на bandmap красным жирным шрифтом
- поддержка нового формата файла AATest
- Всплывающее окно при открытом New QSO window с информацией что вас проспотили
- New QSO window, если выбрано только одно время для QSO - ненужное скрывается
- убраны (надеюсь) зависания при обращении к web версии QRZ.COM и 425DXN
- обновлен список WAIP (Работал со всей Италией)

2641. Статистика дипломов

Yahoo group: dxsoft-rus
Date: 2016-11-13 13:16:33 UTC
From: Alexander Bakharev
Topic: 2641 Message: 2641

Здравствуйте,
Обновился до 1211
В директории программы появилась папка с new ref
В award list обновил references list через clear - import соответственно
из папки с new ref
Затем сделал обновление статистики. Теперь, статистика для тех дипломов,
для которых списки обновлялись, не отображается. Для тех, листы которых
не обновлялить - всё нормально.
Что я упустил?

Я думаю над дополнительными электронными подтверждениями. Есть некоторые пока вещи которые не получается обойти. Всё упирается в скорость вывода статистики. В менеджере дипломов это не так существенно, статистика при вооде связи главная загвоздка.

Так, проблема понятна. Старые ref файлы приводят к такому эффекту. Эффект
не смертельный.Сейчас подготовлю новые.

2649. импорт из ААТест

Yahoo group: dxsoft-rus
Date: 2016-11-14 09:30:14 UTC
From: Alex_R6CW
Topic: 2649 Message: 2649

Здравствуйте, Alexander.

заметил еще одну проблемку. но она касается и предыдущей версии. дело
было на неделе и сегодня. при попытке импортировать связи из ААТест
через меню ААЛог выскакивает предупреждение об ругается на
диапазон/частоту. точно не запомнил на все импортруемые связи.
причем импорт не проходит даже, если создал адиф файл и попроего
импортировать. нашел таблетку. закрываю-снова открываю ААЛог и все прооходит нормально.
может просто комп подглючивает. давно не переустанавливал систему.
п.с. САТ не подключена.

2651. еще один вопрос по ААЛог

Yahoo group: dxsoft-rus
Date: 2016-11-16 14:32:25 UTC
From: Alex Yatsenko
Topic: 2651 Message: 2651

всем привет.

сижу отмечаю в логе пришедшую бумажную почту. не нахожу по многим позициям своих отметок об отправленной карточке. помню что выписывал. пришла ответная. да и корреспонденты благодарят за полученную карточку. но в логе нет отметки, что отправлял. замечал такое и раньше. в чем может быть проблема. одно время делал копии только баз. но с год назад стал копировать полностью папку ААЛог.
ОС XP.

Александр.
это я заметил еще в конце прошлого года, когда выписывал много карточек. тогда еще обратил внимание, что за ранее выписанные связи информация об отправке карточек отсутствовала.
 сейчас как раз часть почты пришла в ответ на ту массовую отправку. и снова информация об отправке карточек отсутствует. сам пока ни какой системы (страны, даты, диапазоны и т.п.)не вижу.

Всем привет!

Это было и я писал давно об этом. Бяка проявляется, когда ставишь галочку в окне поиска связей (бинокль такой)
вот когда там ставишь статус QSL, то он не запоминается (или не запоминался, если речь о том о чем я подумал)
если прямо в журнале тыкать на связи и в окне редактирования конкретной связи ставить галки - всё ОК

привет, Алексей.

возможно.
часть связей для выписывания карточек выводил через бинокль -F7, а часть через окно редактирования связи, сортируя лог по позывным.

Сейчас проверил - статус QSL почты сохраняется (через "Search for contakts"). У меня вроде с почтой все в порядке (отметок в Логе получено/отправлено более 11000, вроде так и должно быть). При переустановке Лога никогда не пользуюсь адифом (только замена базы).

2660. про ААЛог

Yahoo group: dxsoft-rus
Date: 2016-11-18 06:42:41 UTC
From: Alex_R6CW
Topic: 2660 Message: 2660

Здравствуйте, Alexander.

вчера вечером проверял импорт из LoTW и eQSL. все проходит штатно.

п.с. правда в шэке на одном из компьютеров эта операция не проходит.
так же некорректно работают браузеры. грешу на ативирус. хотя на всех
компах стоит одинаковый.

тоже давно заметил, что не совпадают данные по странам в LoTW и ААЛоге
с включенными только подтверждениями из LoTW.
скрины приложить не могу, просто переписал.

всего 160 80 40 30 20 17 15 12 10 2

ЛОТВ 272 23 107 198 166 210 129 178 114 161 1

ААЛОГ 267 23 107 195 164 206 126 177 114 158 0

верхнстрока, то что подтверждено в самом ЛОТВ, нижняя данные по
подтверждениям в ЛОТВ из ААЛОГ.

нужно проверять кпункт. попробую найти время для этого

Topic: 2660 Message: 2661

Здравствуйте, Alexander.

с дипломной статистикой немного разобрался.
взял самое простое 2м диапазон.
в логе связь была подтверждена. в дипломной статистике 2м числилось,
но не было ФМ.
но , самое главное при поиске и редактировании связи в графе диапазон
было пусто, хотя стояла частота 144. диапазон был скрубрал в нужном
месте галочку и все появилось.
так что нужно смотреть конкретно по всем позициям.

Здравствуйте, Alexander.

Вы писали 18 ноября 2016 г., 10:13:18:

Смотрите "кривые" позывные. Типа французских TO, TX

с этими регулярно борюсь :-)

сейчас проверил диапазон 17м

в ААЛпочему то оказались не подтвержденными 2 территории 9M2 и 9X, хотя данные о связи совпадают с ЛОТВ. там эти связи подтверждены.

и еще одна задачка. 3Y0X остров Петра. ?в очередной раз в логе перенесен в Буве. вернул на место. не первый раз он оказывается ? не в той территории. уже не раз замечал именно его .

По поводу расхождений на сайте LoTW и в Логе... сейчас посмотрел у себя:
действительно в логе по диапазонам показывает на 1-2 подтверждения меньше.
Вылечил очень просто... скачал вновь подтверждения с LoTW начиная примерно
с даты регистрации там (поставил с даты 01.01.2010).
Теперь все цифры один в один.

Здравствуйте, Alexander.

залил заново базу в лотв. благо еще старая версия tqsl.
остров петра пришось перезалить с правильным названием отдельно,а то
пропал из дипломной статистики. малайзия появилась, а вот руанпочему
то нет. хотя в лотв все связи с этой станцией подтверждены,в ААЛОГе
нет отметок о подтверждении в лотв.

2667. работа в связке ААЛог с CWType

Yahoo group: dxsoft-rus
Date: 2016-11-20 17:54:15 UTC
From: Alex_R6CW
Topic: 2667 Message: 2667

Здравствуйте, Alexander.

при повседневной работе в эфире работаю с манипулятора и ввожу связи в
лог вручную.

если нужно порабоать в днях активности, или спецпозывным, то использую связку ААТест и
CWType. все устраивает. кроме момента, когда при кортком QSO необходимо
внести в лог доп информацию, например имя корреспондента.
на днях попробовал связать ААЛог с CWType. вроде получилось. но
выявилось пару моментов. (может где то можпочитать?)
1. вбитый в окне новой связи позывной не захватывается
CWType-ом.(попробую еще)

2. при закрытии сначала ААЛог-а, потом CWType, значок "X" в окне
последнего не активен. можно закрыть только по правой кнопке. и то
выкидывает предупреждение , что COM порт занят .... и предлагает
подумать :-)

так и должно быть ?

2677. AALog 3.8.1 build 1218

Yahoo group: dxsoft-rus
Date: 2016-11-30 19:23:39 UTC
From: Alexander Anipkin
Topic: 2677 Message: 2677

Выложено "быстрое обновление"

- поправлена ошибка при импорте данных из LoTW и прочих adif
- при запуске второй копии программы AALog ругается и закрывает ее
+ в статистику QSL/подтверждений по годам добавленf статистика LoTW
+ ускорен выбор территории для неоднозначного позывного (типа TO1A, TX8F и т.д.). Для быстрого выбора нужно щелкнуть правой кнопкой мыши на строке с предложенными странами и в меню выбрать нужную страну.

2679. Не сохраняется изображение в закладке 'P icture'

Yahoo group: dxsoft-rus
Date: 2016-12-01 06:59:11 UTC
From: Dimitry Borzenko
Topic: 2679 Message: 2679

В закладку 'Picture' можно вставить фото, но при нажатии 'Apply' или 'OK'
изображение изчезает и не сохраняется!
Пробовал версию 3.8.1.1211 и 3.8.1.1218.

Спасибо.

2680. Re: [dxsoft-rus] Не сохраняется изо бражение в закладке 'Picture'

From: Vjatseslav Abramov
Topic: 2679 Message: 2680

Проверил в 1218, картинки сохраняются и после перезагрузки лога тоже
никуда не исчезают, все прежние картинки тоже на месте.

У меня не сохраняются, может потому что пробная версия?

Есть ограничения по размеру (резолюции) изображения ?

Использую Windows 7 x64.

Я привел пример копирования фото из закладки QRZ.com - проблем никаких нет.
Тоже Windows 7 x64.
А теперь засомневался... вроде раньше можно было копировать в лог картинки
и из других мест...
Подождем Александра.

QSL получена электронно. QSL! Не lotw подтверждение, не eQSL подтверждение, а QSL. Соответственно она и помечается как QSL. Для подтверждений LoTW и eQSL есть соответствующие поля в спецификации ADIF.

допустим, получены подтверждение с лотв и eqsl. Какая из них электронная QSL?

Функция теоретически возможна, но практически не реализовывалась.
Во-первых, на сервере должен стоять полноценный FireBird 2.5.
Во-вторых, надо немного допилить сам лог на предмет поиска БД не в текущем каталоге, а там где скажут.

Если практически не реализовывалась, то стоит эту функцию вычеркнуть из списка функций и возможностей в хелпе.

Извольте.
1. Band (Freq) RX и Band (freq)TX

2.Возможность выбирать имя спутника и его мод из списка, щелкнув при этом на соответствующие поля Sat Name, Sat mode (желательно чтоб эти поля были привязанные к каким либо текстовым файлам, чтоб можно было

добавлять/исправлять), поля должны быть активны только если выбран SAT как Propagation Mode.

3. В закладку “More” добавить My_RIG(с возможностью выбора ранее определённых), Azimuth и Elevation антенны, Random эта связь или нет.

4. Добавить новые колонки для основного окна MY_GRID(для тех кто работает с разных квадратов и ведет общий лог), My_RIG, Azimuth, Elevation, Random.

Для New QSO окна думаю достаточно.

Для статистики, там много что надо, это отдельная тема.

Спасибо.

2702. Попытка добавления нового Мода - вешает программу!

Yahoo group: dxsoft-rus
Date: 2016-12-03 14:34:46 UTC
From: Dimitry Borzenko
Topic: 2702 Message: 2702

Версия 1281.

Config -> Mode list окно открывается где-то с права за пределами окна,
виден только край.
Перетаскиваю, нажимаю "New" и все больше ни с одним окном лога ничего не
возможно сделать!

Предполагаю что окно "New" открывается где то за пределами экрана, поэтому
ни чего не возможно сделать.

В предыдущей версии эта функция работала хорошо!

Успехов.

Здравствуйте, Alex_R6CW.
У меня тоже обнавлённая версия 1218
Попробовал сохранить в режиме WriteLog
всё норамально сохраняется. Специально дату ,
время и частоту вносил вручную .

Привет Сергей.

Окно открывается посредине только когда один монитор!

А когда два он открывается между ними, и что самое интересное окно
открывается в крайней правой стороне основного

экрана, даже если дополнительный монитор сконфигурирован быть слева!

Автор уже починил эту проблему, я так думаю.

Subject: Re: [dxsoft-rus] Попытка добавления нового Мода - вешает программу!

Здравствуйте, 'Dimitry.
У меня тоже всё работает нормаль окно посередине экрана всё перемещается.

Вы писали 03 декабря 2016 г., 19:34:46:

Версия 1281.
Config -> Modelist окно открывается где-то с права за пределами окна, виден
только край.
Перетаскиваю, нажимаю "New" и все больше ни с одним окном лога ничего не
возможно сделать!
Предполагаю что окно "New" открывается где то за пределами экрана, поэтому
ни чего не возможно сделать.
В предыдущей версии эта функция работала хорошо!

Успехов.

2717. врайтлог

Yahoo group: dxsoft-rus
Date: 2016-12-04 06:51:13 UTC
From: Alex Yatsenko
Topic: 2717 Message: 2717

сейчас на работе проверил версии 1211 и 1218.
в обоих режим работает нормально.
а дома почему то клинил. хотя и стоял режим врайтлог, но в окне новой связи вручную введенные дата и время не сохранялись. может нужно было на всякий случай перезагрузить лог.
послезавтра попробую (2 дня на смене) еще вшэке, где это было обнаружено.

2718. Не смог импортировать ADIF.

Yahoo group: dxsoft-rus
Date: 2016-12-04 11:14:07 UTC
From: Dimitry Borzenko
Topic: 2718 Message: 2718

Так и не получилось импортировать ADIF файл.

Все другие логи , Logger32, BBLogger, Log4OM, UR5EQF, UCXLog, LogHX, могут импортировать а ААЛог нет!
Пробовал также импортировать фаил созданный вышеприведенными логами , та же проблемма - "Out of memory" после нескольких тысяч(1000-5000) связей.

Такое поведение считаю знаком с "ВЕРХУ" - неиспользовать этот лог.

Успехов.

Проблема существует при импорте больших файлов (экспортировал из ААЛога 120000 при импорте этого файла в Лог,Лог затыкается у меня на 63000-64000 с обновлением статистики.). Александр подтверждает это (у него где-то на 70000).

Спасибо за ваши ответы!

У меня в адиф файле немного долее 40000, адиф файл проверен и исправлен программой ADIF Master.

У меня 64-х битная система, может в этом проблема?

2726. AATest 2.1.0

Yahoo group: dxsoft-rus
Date: 2016-12-04 16:30:58 UTC
From: Alexander Anipkin
Topic: 2726 Message: 2726

AATest 2.1.0

- работа с кластером стабильна и работает быстро
+ чтобы перейти на частоту следующего/предыдущего спота находясь в окне ввода связи используется alt+down arrow/up arrow, для переключения на частоту выделенного спота используется клавиша двойной кавычки (")
+ Если активен CAT и есть споты на bandmap AATest показывает позывные около текущей частоты. Фон красный если это повтор, зеленый - если мульт, обычный в других случаях. Что бы скопировать позывной в поле позывного нажмите "="
+ можно настроить что бы AATest автоматически очищал поле позывного при смене частоты на более чем указанное число герц
+ Ctrl+R возвращает TRX на частоту последнего CQ

У меня тоже W-7/64.
Экспортирую весь журнал (120000) потом импортирую - затык лога на 63000-64000.
Сейчас из этого журнала экспортировал 49000, потом импорт - все импортировалось (с обновлением статистики) без проблем

2728. RE: [dxsoft-rus] Не смог импорти ровать ADIF.

Yahoo group: dxsoft-rus
Date: 2016-12-04 16:59:37 UTC
From: Dimitry Borzenko
Topic: 2718 Message: 2728

Спасибо Слава.
Я экспортировал с других журналов, а импортировал в AA.
Пробовал на разных компах, проблема одна и таже , значит она в моих файлах или во мне.

From: dxsoft-rus@yahoogroups.com [mailto:dxsoft-rus@yahoogroups.com]
Sent: Sunday, December 04, 2016 6:39 PM
To: dxsoft-rus@yahoogroups.com
Subject: Re: [dxsoft-rus] Не смог импортировать ADIF.

У меня тоже W-7/64.

Экспортирую весь журнал (120000) потом импортирую - затык лога на 63000-64000.

Сейчас из этого журнала экспортировал 49000, потом импорт - все импортировалось (с обновлением статистики) без проблем

4 декабря 2016 г., 18:06 пользователь 'Dimitry Borzenko' 4z5cp@bezeqint.net <mailto:4z5cp@bezeqint.net> [dxsoft-rus] <dxsoft-rus@yahoogroups.com <mailto:dxsoft-rus@yahoogroups.com> > написал:

Спасибо за ваши ответы!

У меня в адиф файле немного долее 40000, адиф файл проверен и исправлен программой ADIF Master.

У меня 64-х битная система, может в этом проблема?

4 декабря 2016 г., 17:23 пользователь 'Vasily V. Kozerodov /RW4NW/' rw4nw72@gmail.com <mailto:rw4nw72@gmail.com> [dxsoft-rus] <dxsoft-rus@yahoogroups.com <mailto:dxsoft-rus@yahoogroups.com> > написал:

Здравствуйте, Дмитрий!

В моих логах суммарно более 150 тысяч QSO различными позывными сигналами.
Почти все связи (99,999%) импортированы из различных логов именно посредством формата ADIF, как наиболее универсального формата.
AALog работает в соответствии со стандартом формата ADIF.
Проблем с импортированием связей ни разу не было независимо от количества тысяч QSO в

файле, в том случае если файл ADIF сформирован согласно стандарту ADIF.
Проблемы начинались в том случае, ЕСЛИ был некорректно сформирован файл в формате ADIF в других программах аппаратного журнала!!!

2730. QSL service дополнение.

Yahoo group: dxsoft-rus
Date: 2016-12-05 07:29:41 UTC
From: Dimitry Borzenko
Topic: 2730 Message: 2730

Добрый день.
Александр, добавте пожалуйста опцию записи в адиф фаил тех QSL которые находятся в очереди на печать.
Т.е. около кнопки "Print" добавить кнопку , типа "Save to ADIF file".
Очень удобно для работы с GlobalQSL сервисом.(после записи файла выбрал все связи и изменил статус на "Sent via Buro", быстро и удобно!).

Спасибо.

2731. (no subject)

Yahoo group: dxsoft-rus
Date: 2016-12-05 10:08:45 UTC
From: Rodnikov Sergei
Topic: 2731 Message: 2731

В логе очень мощная система фильтрования. После пометки связей как поставленных в очередь для печати, примените фильтр в котором поставьте для 'QSL sent' значение Queued. Дальше выделяете отфильтрованное и выгружаете в ADIF/

2732. RE: [dxsoft-rus] QSL service доп олнение.

Yahoo group: dxsoft-rus
Date: 2016-12-05 11:16:57 UTC
From: Dimitry Borzenko
Topic: 2731 Message: 2732

Спасибо Сергей.

Как исхитриться я знаю, тросто более логично и проще через "QSL service".

Если автор захочет – сделает, нет, так буду одевать штаны через голову.

Компьютер должен служить человеку, а не человек должен подстраиваться под него.

Это мое мнение, которое может не совпадать с мнением других.

Успехов.

2738. вопрос по импорту из lotw и eqsl

Yahoo group: dxsoft-rus
Date: 2016-12-06 17:42:25 UTC
From: Alex_R6CW
Topic: 2738 Message: 2738

Здравствуйте, Alexander.

по крайней мере до версии 1218 с импортом из этих систем дела
состояли так.
импорт из лотв - нужно было заходить по очереди в лог на каждый
постоянный позывной в одном логсете и прводить пимпорта.
при импорте из ещсл импортировались сразу все подтверждения на все
позывные из одного логсета. сейчас ппосле очередной заливки связей,
оказалось, что теперь при импорте из лотв импортируются связи на один
позывной, даже еслши на один позывной несколько логов в одном логсете.
т.е. после недавних дней активности, на эти связи сделал пока
дополнительный лог в том же лог сете. Зпри импорте, по традиции,
отдельно в каждый лог на действующий позывной , импортировались связи
в оба лога на действующий позывной. до этого на действующий позывной
был только один лог. и еще несколько на старые постоянные
позывные.

еще был один ньюанс.
перезалил в лотв на действующий позывной. с тех пор, если я ставлю в
импорте дату начала -дату этой операции, то импортируется вся база
подтвержденных связей из лотв. повторял пру дней назад и по ошибке
набрал снова эту дату - пришлось снова около часа ждать, когда импорт.
попробую еще на другом компе для чистоты эксперимента.

2740. импорт данных из LoTW

Yahoo group: dxsoft-rus
Date: 2016-12-06 18:59:38 UTC
From: Alex Yatsenko
Topic: 2740 Message: 2740

сейчас проверил еще на одном компе,уже дома.
тоже самое. если ставлю дату начала импорта 01.11, то импортируются все данные из лотв. как раз в это время отправлял всю базу в лотв. если дату ставлю позже, то импортируются самые свежие данные. выходит, проблема не в компьютере.

Ну правильно, дата получения подтверждения у вас изменилась на дату когда вы залили свой лог. Эту дату выставляет LoTW. Соответственно, когда вы ставите датой начала эту дату, то вам и насыпает по полной программе. Это логика работы LoTW, от меня ничего не зависит.

2749. RE: [dxsoft-rus] Попытка добавле ния нового Мода - вешает программу!

Yahoo group: dxsoft-rus
Date: 2016-12-07 20:31:26 UTC
From: Dimitry Borzenko
Topic: 2702 Message: 2749

Такой же проблемой страдают “QSL info search”, “Internal callbook” и “Internal QSL managers database”.

Поправьте пожалуйста.

From: Vjatseslav Abramov
Topic: 2702 Message: 2750

Странно... столько проблем...
По порядку, у меня (специально сейчас проверил):
*1- **Попытка добавления нового Мода *- В окно Modes list через
кнопку New внес
доп. моду (несуществующую), все сохранилось (Лог не зависает).
*2- Такой же проблемой страдают **“QSL info search*” - В это окно ничего не
добавляется, в нем показывается информация (на любой позывной) из
различных источников
(если таковая в них имеется).
3-* Такой** же проблемой страдают ** “Internal callbook” -* через кнопку
New заносятся и сохраняются все данные - никаких проблем нет. (Лог не
зависает).
*4- Такой же проблемой страдают **“Internal QSL managers database”*. -
тоже, через кнопку New заносятся и сохраняются все данные - никаких
проблем нет. (Лог не зависает).

P.S. W-7/64, Монитор один, Папка Лога находится (сразу) на диске С.

По импорту из адиф - если адиф создан из в.1218 (не зависимо от размера),
то импорт происходит без проблем. Проблема существует, если адиф из более
ранних версий (у меня из 1216 и из версии от декабря 2015, больше не на чем
было проверить) или сторонних программ (проверял через LogHX).

2751. RE: [dxsoft-rus] Попытка добавле ния нового Мода - вешает программу!

Yahoo group: dxsoft-rus
Date: 2016-12-08 19:54:57 UTC
From: Dimitry Borzenko
Topic: 2702 Message: 2751

Ничего странного нет.

Я написал это Александру.

Он понял в чем проблема, дело в том что при двух мониторах , перечисленные окна открываются за пределами экрана, и поэтому невозможно ничего сделать, их не видно!!

Как я могу сделать адиф файл из ААлога если я его не могу импортировать, у меня нет лога !

Я создал новый лог и пытаюсь в него импортировать адиф созданный другой программой.

Все это уже не важно, Александр нашел в чем проблема, когда будет у него время он поправит.

Успехов.

From: Vjatseslav Abramov
Topic: 2702 Message: 2752

Про то, что окна У Вас открываются за пределами дисплея Александр ответил,
я же написал, что никаких проблем с ними нет потому, что в первом сообщении
Вы не упомянули о втором мониторе.

Теперь по поводу странностей:

1-Вопросов по внутр. справочнику, справочнику менеджеров и инфо по QSL у
меня (уверен, что не только у меня) нет с 2001.

Про адиф я написал, что проблемы появились со сторонними адифами и адифами
из более ранних версий ААЛога (ранее 1218).

2753. RE: [dxsoft-rus] Попытка добавле ния нового Мода - вешает программу!

Yahoo group: dxsoft-rus
Date: 2016-12-08 21:11:15 UTC
From: Dimitry Borzenko
Topic: 2702 Message: 2753

Наверное я плохо изъясняюсь.

После того как Александр сказал что он поправил окно нового Мода я попросил его поправить еще дополнительных 3, мною перечисленных в предыдущем мейле.

Успехов

Subject: Re: [dxsoft-rus] Попытка добавления нового Мода - вешает программу!

Про то, что окна У Вас открываются за пределами дисплея Александр ответил, я же написал, что никаких проблем с ними нет потому, что в первом сообщении Вы не упомянули о втором мониторе.

Теперь по поводу странностей:

1-Вопросов по внутр. справочнику, справочнику менеджеров и инфо по QSL у меня (уверен, что не только у меня) нет с 2001.

Про адиф я написал, что проблемы появились со сторонними адифами и адифами из более ранних версий ААЛога (ранее 1218).

8 декабря 2016 г., 21:54 пользователь 'Dimitry Borzenko' 4z5cp@bezeqint.net <mailto:4z5cp@bezeqint.net> [dxsoft-rus] <dxsoft-rus@yahoogroups.com <mailto:dxsoft-rus@yahoogroups.com> > написал:

Ничего странного нет.

Я написал это Александру.

Он понял в чем проблема, дело в том что при двух мониторах , перечисленные окна открываются за пределами экрана, и поэтому невозможно ничего сделать, их не видно!!

Как я могу сделать адиф файл из ААлога если я его не могу импортировать, у меня нет лога !

Я создал новый лог и пытаюсь в него импортировать адиф созданный другой программой.

Все это уже не важно, Александр нашел в чем проблема, когда будет у него время он поправит.

Успехов.

Subject: Re: [dxsoft-rus] Попытка добавления нового Мода - вешает программу!

Странно... столько проблем...

По порядку, у меня (специально сейчас проверил):

1- Попытка добавления нового Мода - В окно Modes list через кнопку New внес доп. моду (несуществующую), все сохранилось (Лог не зависает).

2- Такой же проблемой страдают “QSL info search” - В это окно ничего не добавляется, в нем показывается информация (на любой позывной) из различных источников (если таковая в них имеется).

3- Такой же проблемой страдают “Internal callbook” - через кнопку New заносятся и сохраняются все данные - никаких проблем нет. (Лог не зависает).

4- Такой же проблемой страдают “Internal QSL managers database”. - тоже, через кнопку New заносятся и сохраняются все данные - никаких проблем нет. (Лог не зависает).

P.S. W-7/64, Монитор один, Папка Лога находится (сразу) на диске C.

По импорту из адиф - если адиф создан из в.1218 (не зависимо от размера), то импорт происходит без проблем. Проблема существует, если адиф из более ранних версий (у меня из 1216 и из версии от декабря 2015, больше не на чем было проверить) или сторонних программ (проверял через LogHX).

7 декабря 2016 г., 22:31 пользователь 'Dimitry Borzenko' 4z5cp@bezeqint.net <mailto:4z5cp@bezeqint.net> [dxsoft-rus] <dxsoft-rus@yahoogroups.com <mailto:dxsoft-rus@yahoogroups.com> > написал:

Такой же проблемой страдают “QSL info search”, “Internal callbook” и “Internal QSL managers database”.

Поправьте пожалуйста.

Версия 1281.

Config -> Mode list окно открывается где-то с права за пределами окна, виден только край. Перетаскиваю, нажимаю “New” и все больше ни с одним окном лога ничего не возможно сделать!

Предполагаю что окно “New” открывается где то за пределами экрана, поэтому ни чего не возможно сделать.

В предыдущей версии эта функция работала хорошо!

Успехов.

2755. RE: [dxsoft-rus] перенос окна, к оторое за пределами экра на

Yahoo group: dxsoft-rus
Date: 2016-12-09 09:57:27 UTC
From: Dimitry Borzenko
Topic: 2702 Message: 2755

Спасибо.
“QSL info search”, “Internal callbook” и “Internal QSL managers database” окна переместились и запомнили новую позицию.
“Modes list” окно и окно “New” перетащить можно, но позицию не запоминают(каждый раз когда открываю “Modes list” - оно за пределами экрана).

Спасибо еще раз за напоминание, перемещения окон с помощью клавиатуры! :)

2762. Вопрос по статистике AALog

Yahoo group: dxsoft-rus
Date: 2016-12-12 06:58:13 UTC
From: Alexander Anipkin
Topic: 2762 Message: 2762

Вопрос ко всем присутствующим.нужно как можно больше ответов.

Сейчас в AALog можно смотреть статистику в виде
1. wkd/cfm так
2. сколько связей/сколько карточек отправлено/сколько получено.

Насколько часто вы пользуетесь 2 видом статистики в окнах New QSO, Edit QSO и в Главном окне? Если его сделать "по требованию" (то есть выводить только когда пользователь явно попросил для конкретного позывного), то это позволит отказаться от ведения промежуточной статистики и генерить ее на лету, ускорить импорт из ADIF и прочих форматов, сделать статистику точнее, реализовать неограниченное количество типов подтверждения QSO (автозачет RDA, подтверждения с сайта ClubLog, подтверждение активаторов IOTA и т.д.)

Окно Award manager не изменится

Извините, но о какой статистике идет речь?
"Previous contacts" или что то другое.
Дайте как пример что есть статистика в виде 1 и 2.

Спасибо.

2766. Вопрос по статистике AALog

Yahoo group: dxsoft-rus
Date: 2016-12-12 07:45:35 UTC
From: Eugene Baranov
Topic: 2766 Message: 2766

Я Вас приветствую.
Александр,
Совершенно не востребованы. Статистикой проще заняться, когда руки до этого дойдут и оно потребуется. А в логе главное - оперативность. Многофункциональность добавляет сервиса, но ухудшает возможности, как в японских трансиверах, замечаешь, что какой - либо функцией не пользовался несколько лет... .

С уважением,
Евгений Баранов UA3GGP. 73.

Вопрос ко всем присутствующим.нужно как можно больше ответов.

Сейчас в AALog можно смотреть статистику в виде

2770. Картинки QSLок

Yahoo group: dxsoft-rus
Date: 2016-12-12 08:54:01 UTC
From: Dimitry Borzenko
Topic: 2770 Message: 2770

Добрый день.

Была идея картинки отсканированных карточек привязать к связям в логе.

Но заметил что картинка становится частью базы данных и она растет в среднем 0.5МБ на картинку.

Т.е. со временем база данных может вырости до нескольких Гбайт, как это повлияет на скорость обработки?

Кто либо использует лог с прикрепленными картинками?

Использовал другой лог, там картинки были в отдельной директории с позывными как имя файла типа xxxxxx_1, xxxxx_2, и т.д.

Спасибо.

Здравствуйте.
наконец то подключил трансивер к компу по USB.
захотелось настроить CAT под ААЛог и ААТест.
установил вышеназванную программу. НО возник вопрос.
будет ли она работать через виртуальный порт?в настройках прописал
его. но рнзультатат не видно. или нужен только COM кабель ?
еще, в программ очень скромный список кенвудов. я поставил "kenwood".
буду очень признателен за подсказки.

Если номер виртуального порта больше 8 то сконфигурируйте виртуальный порт
на 5,6 или 7 порт.
Многие программы не работают с портами больше чем 8.

Re: [dxsoft-rus] Вопрос по статистик 77; AALog
Здравствуйте, .

Вы писали 12 декабря 2016 г., 10:48:03:

аналогично, режим 2 очень редко.

Ок.

Режим ?1 это "Award statistic for callsign" ?со скрытыми деталями (Hide details).

Режим ?2 это "Award statistic for callsign" ?с ?деталями.

?

Режим 2 мне нужен очень очень редко.

Надо поставить скорость так же как настроено в трансивере. Не помню меню. И в трансивере надо установить что обмен идет по USB. До дома дойду, скажу точнее (если еще надо будет)

Здравствуйте.

сейчас попробовал в AATест 2.0.25 и log-ur5eqf выставить порты, но ни там ни там не работает. в AATест в окне новой связи индикатор CAT не активен, хотя стоит галка.

отсюда и вопрос. будет ли работать CAT в 590-м через USB кабель и виртуальный COM порт? с программой АРЦП-590 работает все в обе стороны. или еще что то нужно дополнительно? или проще воткнуть еще и COM кабель?

Здравствуйте, Alexander.

еще раз спасибо за ссылки. скачал с сайта dxatlas.
он молча встал в прорам файлз, а не куда я хотел.
по сравнению с hamport, при запуске екзешника сразу открывается окно
конфигурации, потом исчезает. в аатест заново сконфигурировал порт
590 появился в списке. по сравнению с кенвуд уровни RTS and DTR HIGH
вместо лоу. в аатесте все заработало, большое спасибо всем ! на
очереди аалог

Hamport это просто "визуализатор", он использует омниригг и сам его для себя ставит.
Если вам не нравится место OmniRig в Program Files, просто скопируйте папку в новое место, деинсталируйте OmniRig и запустите OmniRig.exe из нового места. Лучше как администратор. И будет работать из того места где хотите.

2793. AW: [dxsoft-rus] Вопр ос по стати стике AALog

Yahoo group: dxsoft-rus
Date: 2016-12-12 16:23:24 UTC
From: Wilhelm Jost
Topic: 2793 Message: 2793

Приветствую всех!
Александр, у меня это окошко постоянно включено (выскакивает одновременно с окном "New QSO". Пользуюсь постоянно.
Но, если изменения несут такую выгоду - тогда я за них.
С уважением, Вилли DF7GG.

Alexander Anipkin alan@... [dxsoft-rus] <dxsoft-rus@yahoogroups.com> schrieb am Mo, 12.12.2016:

Betreff: [dxsoft-rus] Вопрос по статистике AALog
An: dxsoft-rus@yahoogroups.com
Datum: Montag, 12. Dezember, 2016 07:58 Uhr

Вопрос ко всем
присутствующим.нужно как можно
больше ответов.

Сейчас в AALog можно
смотреть статистику в
виде 1. wkd/cfm так 2.
сколько связей/сколько карточек
отправлено/сколько
получено.
Насколько часто вы
пользуетесь 2 видом статистики в
окнах New QSO, Edit QSO и в Главном окне?
Если его сделать "по
требованию" (то есть выводить
только когда пользователь явно
попросил для конкретного
позывного), то это позволит
отказаться от ведения
промежуточной статистики и
генерить ее на лету, ускорить
импорт из ADIF и прочих форматов,
сделать статистику точнее,
реализовать неограниченное
количество типов подтверждения
QSO (автозачет RDA, подтверждения с
сайта ClubLog, подтверждение
активаторов IOTA и т.д.)
Окно Award manager не
изменится

--Best
regards

Alexander
Anipkin

2795. RE: [dxsoft-rus] Вопрос по стати стике AALog

Yahoo group: dxsoft-rus
Date: 2016-12-12 17:17:18 UTC
From: Sergey Marey
Topic: 2762 Message: 2795

Добрый день.

Окно второго вида статистики у меня постоянно «висит» рядом с окном New QSO, в окне Edit QSO нередко пользуюсь вкладкой Awards, где информация выводится также во втором варианте.

Причина этого, вероятно, в том, что я р\любитель начинающий; в моём логе часто встречаются «дипломные единицы» (страны, например, или области России), которые подтверждены, но только однажды. Окно принимается для принятие решений вида «лезть ли в этот пайлап?» ☺ Цифры, показывающие, сколько карточек отправлено, сколько получено, иногда дают дополнительную информацию о состоянии QSL-обмена на стороне корреспондента.

73! Сергей

Вопрос ко всем присутствующим.нужно как можно больше ответов.

Сейчас в AALog можно смотреть статистику в виде
1. wkd/cfm так
2. сколько связей/сколько карточек отправлено/сколько получено.

Насколько часто вы пользуетесь 2 видом статистики в окнах New QSO, Edit QSO и в Главном окне?

Re: [dxsoft-rus] HAMPORT и kenwood 590
Здравствуйте, Alexander.

Вы писали 12 декабря 2016 г., 18:53:08:

Hamport это просто "визуализатор", он использует омнириг и сам его для себя ставит.

понятно.

Если вам не нравится место OmniRig в Program Files, просто скопируйте папку в новое место, деинсталируйте OmniRig и запустите OmniRig.exe из нового места. Лучше как администратор. И будет работать из того места где хотите.?

наверное папка так и должна называться ? OmniRig. а у меня стояла в нужном месте папка ?Hamport. из нее и пытался устанавливать. ?радио - программы обчно не держу на диске С. попробую отправить "в нужное место" :-)

спасибо !

Date: 2016-12-13 11:32:44 UTC
From: 4z5cp@...
Topic: 2770 Message: 2801

Добрый день.

Что скажет автор программы?

---In dxsoft-rus@yahoogroups.com, <4z5cp@...> wrote :

Добрый день.
Была идея картинки отсканированных карточек привязать к связям в логе.
Но заметил что картинка становится частью базы данных и она растет в среднем 0.5МБ на картинку.
Т.е. со временем база данных может вырости до нескольких Гбайт, как это повлияет на скорость обработки?
Кто либо использует лог с прикрепленными картинками?

Использовал другой лог, там картинки были в отдельной директории с позывными как имя файла типа xxxxxx_1, xxxxx_2, и т.д.

Спасибо.

Где посмотреть общий список я не знаю.

Если автор говорит что мечанизм будет переделан, то понятно что не надо сейчас заниматься прикриплением картинок(много работы а толка не будет), будем ждать.

Спасибо.

Подобный пункт есть в общем списке, посмотрите там много чего уже есть...

13 декабря 2016 г., 13:32 пользователь 4z5cp@bezeqint.net [dxsoft-rus] <dxsoft-rus@yahoogroups.com> написал:

Добрый день.

Что скажет автор программы?

---In dxsoft-rus@yahoogroups.com, <4z5cp@...> wrote :

Добрый день.

Была идея картинки отсканированных карточек привязать к связям в логе.

Но заметил что картинка становится частью базы данных и она растет в среднем 0.5МБ на картинку.

Т.е. со временем база данных может вырости до нескольких Гбайт, как это повлияет на скорость обработки?

Кто либо использует лог с прикрепленными картинками?

Использовал другой лог, там картинки были в отдельной директории с позывными как имя файла типа xxxxxx_1, xxxxx_2, и т.д.

Спасибо.

Ok. Тогда зайти в Tools|Awards list выбрать WAZ , потом зайти в список зон. Очистить его. И потом импортировать из файла CQAward.ref который в каталоге REF

From: Федоров Николай
Topic: 2726 Message: 2821

Александр здравствуйте! В предстоящих на этой неделе RAEM CONTEST нужно передавать сложный номер. Номер QSO + QTH LOC. При слитной передаче возможен ошибочный прием. На форуме по RAEM для программ TR4W, 5MContest,N1MM даются рекомендации для разделения сложного сочетания. Я в прошлом году тоже пробовал разделять,но у меня ничего не получилось.Александр,подскажите,что нужно сделать для разделения сочетания.С уважением Николай UA9W.

04.12.2016, 19:31, "Alexander Anipkin alan@g.dxsoft.com [dxsoft-rus]" <dxsoft-rus@yahoogroups.com>:

AATest 2.1.0

- работа с кластером стабильна и работает быстро
+ чтобы перейти на частоту следующего/предыдущего спота находясь в окне ввода связи используется alt+down arrow/up arrow, для переключения на частоту выделенного спота используется клавиша двойной кавычки (")
+ Если активен CAT и есть споты на bandmap AATest показывает позывные около текущей частоты. Фон красный если это повтор, зеленый - если мульт, обычный в других случаях. Что бы скопировать позывной в поле позывного нажмите "="
+ можно настроить что бы AATest автоматически очищал поле позывного при смене частоты на более чем указанное число герц
+ Ctrl+R возвращает TRX на частоту последнего CQ

Добрый вечер

сначала скачать 2.1.1 и потом использовать макрос:
~[tx]`[sp135]~[isVarNumberSent] 44N46O`[rx]
пробелов между ~[isVarNumberSent] и координатами можно насовать сколько хочешь. Ну и скорости менять, если есть такое желание

~[isVarNumberSent] - передает ТОЛЬКО переменную часть номера

Добавлю, что для корректного отображения мод в AATесте в режиме BPSK (31, 63, 125) пропишите, раз и навсегда, в TrueTTY (Setup/Other):
Send mode BPSK-31 as BPSK31
Send mode BPSK-63 as BPSK63
Send mode BPSK-125 as BPSK125

Посылал на хэмпорт.
Пришлось откатывать систему. Установил новый ААЛОГ. Пустой без единой
связи имеет в окне статистики WAZ обычное окно. Ввел одну связь для пробы
- статистика есть. Все нормально. Дальше. Меняю 3 файла aalog.gdb,
aalog.ini, table.ini на ранее сохраненные. ЛОГ приобретает обычный вид,
статистика DXCC и пр. работает, WAZ нет.
Александр, может поможет эта имфо.

Спасибо за новую версию!

Мой лог импортировался!!!! J

Осталась загвоздка при импортировании связей с тагом "E" отравленные електронно – они импортируются как отправленные

через бюро!!! J

Надо решить эту проблему, при импорте дать возможность пользователю решить, как импортировать связи отправленные электронно, как LOTW,EQSL или вместе.

Спасибо еще раз за продолжение поддержки лога и надеюсь на дальнейшее его развитие.

2830. Не могу удалить оператора через Multi QS O edit.

Yahoo group: dxsoft-rus
Date: 2016-12-26 16:36:49 UTC
From: Dimitry Borzenko
Topic: 2830 Message: 2830

Добрый вечер.

После импорта с разных логов в графе "Operator" появился мой позывной (в VQLog был My Callsign).

С помощью фильтра нашел все такие связи, выделил их всех , и запустил Multi QSO Edit.

Я могу поменять оператора на что я хочу, но на пустое НЕТ!
Возможно это из за того что образовались повторы из за разницы в колонке "Operator", т.е. существуют одинаковые связи разница которых только Operator".

Спасибо.

```
создать в notepad файл с вот таким содержимым в папке aalog:

CONNECT 'aalog.gdb' user 'sysdba' password 'masterkey';

Select firsttbl.callsign, firsttbl.qsodate, firsttbl.time_on from logtable
firsttbl, logtable secondtbl
where
firsttbl.callsign = secondtbl.callsign and
firsttbl.qsodate = secondtbl.qsodate and
firsttbl.band_id = secondtbl.band_id and
firsttbl.mode_id = secondtbl.mode_id and
firsttbl.time_on = secondtbl.time_on and
firsttbl.qso_id <> secondtbl.qso_id
order by
firsttbl.callsign, time_on;

EXIT;

потом создать dupe.cmd в папке aalog с таким текстом:
isql.exe -in имя_вашего_файла > имя_файла_со_списком_dupes

запустить. смотреть файл с дупами

Внимание! Это схема работает со всей базой. Т.е. если у вас лог для
нескольких позывных - то запрос надо усложнять

2836. Избавиться от повторов

Yahoo group: dxsoft-rus
Date: 2016-12-26 18:47:29 UTC
From: Andy
Topic: 2830 Message: 2836

Здравствуйте, 'Dimitry.

Вы писали 26 декабря 2016 г., 20:28:10:

> Слава и Андрей - Спасибо!! :)
> Осталось теперь понять как избавится от повторов .

Как незнакомый с тонкостями ЛОГа, я бы так пошел:
1. Сохранил копию ЛОГа .GDB
2. Выгрузил весь ЛОГ а АДИФ, залив все поля в него
3. Удалил все связи
4. Импортировал ЛОГ с простановкой двух верхних чекбоксов в окне импорта. Писать долго...

Вуаля! (сходил..проверил, сработало)

Копия нужна в случае, если мало ли не все данные экспо/импортировались. А вообще копия нужна Всегда!

А может есть one-step-way?

Пока писал, ты уже нацарапал :)
Фи! Вручную!!!
А мой метод то проще :)))) Хотя камни тоже могут быть при импорт/экспорте.
Да, и не все захотят связываться с SQL макросами.

2840. RE: [dxsoft-rus] Избавиться от п овторов

Yahoo group: dxsoft-rus
Date: 2016-12-26 19:27:25 UTC
From: Dimitry Borzenko
Topic: 2830 Message: 2840

Спасибо ребята за методы!!!

Но так как один из логов(УКВ) у меня в VQLog то туда же импортирую и КВ лог, VQLog имеет утилиту по удалению повторов!
Затем экспортирую в АДИФ и импорт в ААЛог.
Импорт у ААЛога очень медленный (больше часа на 40000), поэтому создам правильный файл в другом логе.

Спасибо.

Что б было быстро - отключите обновление дипломной статистики. Правда потом
придется все равно пересчитывать. Скорость - плата за универсальность

2842. Развитие лога.

Yahoo group: dxsoft-rus
Date: 2016-12-27 09:05:37 UTC
From: Dimitry Borzenko
Topic: 2842 Message: 2842

Добрый день.

Хотелось бы услушать от автора лога информацию о развитии лога, будет ли оно.
Есть много запросов по поводу дополнений и улучшений которые были несколько лет назад и не воплощенные до сих пор.

Меня лично интересуют дополнительные поля (все приминительно для УКВ по стандарту АДИФ 3.0.4, пользователь сам выберет что отображать) и возможность прикрепить (а лучше отсканитовать) фото QSL карточки для данной связи.

Всех с Наступающим Новым Годом!

Успехов и Здоровья!

ОК.

Ну раз задали вопрос - то слушайте.

У меня есть основная работа (сюрприз!) которая приносит основные средства к существованию. с 8-30 до 17-30. Плюс дорога до дома.
Как вы думаете, сколько у меня остается времени вечером? Даже если предположить что на работе я не устаю.

Далее... В выходные мне, как и всем, хочется отдохнуть и надо сделать какие-то домашние дела.

Развите лога осуществляется в оставшееся время, которое приходится делить еще и с AATest.

Кроме того, далеко не все реализованные хотелки были введены в систему. Да и из введенных реализованы 68%

Увы, я не фирма аналогичная разработчикам HRDLog

Добрый день.

У меня притензий нет, а был только вопрос.

Для меня HRD Log - вообще не лог а отстой, поэтому и спросил на счет развития вашего лога.

Доброго здравия.

Я просто развернуто ответил на вопрос.
Лог развивается в пределах наличия свободного времени (обычно) и изредка от внезапно нахлынувшего энтузиазма.

2855. AATест

Yahoo group: dxsoft-rus
Date: 2017-01-15 07:37:19 UTC
From: Alex Yatsenko
Topic: 2855 Message: 2855

всем привет.
поддержал вчера немного "Старый новый год"".
самая новая версия, или почти самая новая 2.1.1. вроде так.
работал на одном диапазоне. из 100 связей почти десяток лог показывал повторы. ы реальности повторов не было. сейчас на работе, по памяти так программа отреагировала на 9A1AA, UA9LDD, YL5X. остальные позывные не помню. в это же время в бандмапе эти позывные тоже "неправильно" отмечались. просто не обращал внимания.. еще, в подсказке заметил один позывной, кажется RA4UAC, показывался 2 раза, хотя написан был одинаково. попробую скачать крайнюю версию и понажимать еще именно в этом тесте перечисленные позывные.

Date: 2017-01-15 08:09:10 UTC
From: Alex Yatsenko
Topic: 2855 Message: 2856

скачал, проверил программу. все работает нормально.
возможно, дома в папке AAтест что то оставалось от старых версий. перед установкой новой версии оставлял старые ини файлы.возможно, в них причина моего глюка.

Скорее всего проблема в том, что был выбран пункт Clear Log. Он не очищал
список дупов (сейчас поправил) и осталась информация о связях от прошлого
теста.

приветствую, Александр.
обычно так и делаю . очистил лог от предыдущего теста. выбрал нужный и вперед.
но такая штука не всегда бывает. по памяти, второй раз подобное. в прошлом году тоже один раз было.

понятно. буду иметь ввиду.
в остальном, только приятные впечатления от программы.
п.с. в форумах после тестов народ регулярно жалуется на продукты других производителей.
постоянно какие то глюки.
из приятного еще кластер и бэндмап. правда недавно их стал пользовать (консерватор).
п.с. сколько работаю с AATест, не припомню каких то проблем. пробовал и в сетевом варианте.
тоже работает нормально. :-)
п.п.с. небольшое пожелание, от ленивых :-) если бы кроме кабриллы был еще и ермак. хотя,
при желании, все правится ручками :-)

Ермак - это Cabrillo с небольшими добавками. Для основных российских тестов программа запрашивает дополнительные данные для генерации корректного Ермака. Если где-то не запрашивает, то давайте список - это дело 5 минут.

да, все правильно.
самый последний тест, за который организаторы просили Ермак - RAEM.
не было времени :-(искать правильное написание требуемых строчек, пришлось отправлять через онлайн сервис.

Вот список тестов по категории CPP, в которых ЕРМАК. Но он не очень одинаковый
для всех тестов, есть индивидуальность, поэтому наверное надо основные
строки сделать, остальное, отличительное, пусть уж сам оператор дописывает,
списки тут:
http://www.srr.ru/CONTEST/ermak/

CQ-M International DX Contest
Digital Pentathlon
PSK63 Sprint
RAEM
RUSSIAN 160 Meter Contest
Russian DIGITAL+SSTV
Russian DX Contest
Russian RADIO WW RTTY Contest
Russian SSTV contest
Russian WW PSK Contest
Russian YL/OM Contest
UA2 QSO Party
Wake-Up! QRP Sprint
АМУР
Белгородское молодежное первенство
Весенний Полярный спринт
Владимирский тест
Идет охота на Волков
КВ первенство Приморского края
КВ первенство Тульской области
КВ Соревнования Новокузнецкого радиоклуба
Конкурс на приз ФГУП \РЧЦ ЮФО\
Кубок Russian Extreme
Кубок Арктики
Кубок АТАМАН
Кубок Батурина
Кубок братьев Феофановых
Кубок Находки
Кубок памяти UA1DZ
Кубок Пряхина В.Я.(UA9VB)
Кубок Российской Федерации на КВ (CW)

Кубок Российской Федерации на КВ (SSB)
Кубок СРР по цифровым видам связи
Кубок Ставропольского края
Кубок Урала
Мемориал Льва Крышина UA0QO
Мемориал Ю.В.Фогеля
Молодежное первенство Кемеровской области
Молодежное первенство РФ
Молодежные соревнования "ВЕСНА"
Молодежные соревнования Дружба
Молодежные соревнования ЗВЕЗДЫ КУБАНИ
Молодежные соревнования Золотая осень
Молодежные соревнования Их помнит мир спасённый
Молодежные соревнования памяти Уфимцева
Молодежные соревнования Патриот
Осенний спринт
Открытое первенство Пензенской области
Открытый Чемпионат нулевого района России
Очно-заочный чемпионат России по радиосвязи на КВ
Памяти адмирала Невельского
Память
Партизанский радист
Первенство Белгородской области
Первенство города Волжского
Первенство Дальнего Востока
Первенство им.Н.Ф.Ватутина
Первенство на кубок КАЗАЧОК
Первенство Приморского края на КВ
Первенство Саратовской области
Первый радиоклуб
Первый Салют
Полярный радист
Русская рулетка
Самарские молодежные радиосоревнования
Соревнования клуба 777 (CW)
Соревнования клуба 777 (SSB)
Соревнования молодежных радиостанций (YOC)
Соревнования СОЮЗ КЛУБОВ
Ставропольское Молодежное первенство
Старый Новый Год
Чемпионат Азиатской части РФ (CW)
Чемпионат Азиатской части РФ (SSB)
Чемпионат Восточной Сибири и Дальнего Востока
Чемпионат Калужской области
Чемпионат РАС Урала Сибири Дальнего Востока
Чемпионат РФ (CW)
Чемпионат РФ (SSB)
Чемпионат Смоленской области
Чемпионат Ставропольского края
Чемпионат Тамбовской области

Чемпионат Удмуртии
Чемпионат Якутии

Андрей, 80% этих тестов в аатест нет :)
Потому как они имеют практически сходные правила и описываются custom contest

Добрый день, Александр!
Можно одну просьбу ;-))))
В закладке Custom contest добавить продолжительность туров: 2, 3, 4 часа.
Потому как есть тесты с различной продолжительностью туров. Программа от этого
будет еще гибче.....

2877. ClubLog

Yahoo group: dxsoft-rus
Date: 2017-02-14 17:58:49 UTC
From: ua9ffv@...
Topic: 2877 Message: 2877

Есть одна,
думаю многим очень полезная, хотелка.

Хотелось бы
иметь удобный инструмент для отправки в ClubLog подтверждений. Скажем, получил за OQRS, или директ, или бюро карточки. Для
обновления статистики в ClubLog требуется найти все и выбрать через CTRL. Потом сделать экспорт в ADIF. Связи обычно разбросаны. А если
получена сотня, то их приходится долго выискивать. Очевидно, сейчас все
выбирают скопом все связи за N лет и перезаливают. Все равно это долго и много операций… Причем не будешь же из-за одной – двух QSL создавать ADIF и возиться с его отправкой.

Предлагаю в
окне Edit QSO info, когда делается отметка QSL received
при нажатии Today
делать автоматическое
обновление базы (чтобы не жать Apply) и рядом с Today добавить кнопку Add
to ADIF. По ней обновленная
статистика о QSO добавлялась бы в буфер. В меню Files немного изменить логику и дать возможность просмотра этого буфера и, если все ОК, то автоматически отправлять
его в ClubLog. Думаю, что после успешной отправки буфер можно
автоматически очищать.

Да, еще
забыл про подтверждения LoTW. Такие связи, при импорте LoTW рапорта, надо автоматом добавлять в
этот буфер.

Может быть,
даже не создавать эту кнопку, а любые подтверждения автоматом сбрасывать в
буфер?

С
уважением, Сергей

Topic: 2877 Message: 2878

Будет немного по другому. Я добавлю новое поле - которое автоматически ставит сегодняшнюю дату при изменении связи. Соответственно можно будет отсортировать по этому полю и выбрать что нужно.
Ну и как бонус скачивание подтверждений с CLUB Log и проверка нет ли у сработаной станции OQRS на Club Log

Да, пожалуй это будет оптимальное решение! ... И плюс отправка изменений из AALog в ClubLog. К сожалению автоматизировать LoTW не удастся из-за подписывания на ключе. Хотя, если "перетереть" с ними эту тему может позволят. Ключ ведь доступен и в реестре хранится, наверное.

...В догонку к ответу. Сейчас на работе, и открыл копию установки TrustQSL. Там вижу сертификат ca-bundle.crt. В нем есть RSA открытый ключ длиной 2К. Очевидно им можно воспользоваться для шифрования отправляемого adif. Думаю, что алгоритм в открытом доступе. Возможно, и в LoTW можно будет сделать автоматическую отправку...

2881. Функция "Один значок на панели задач"

Yahoo group: dxsoft-rus
Date: 2017-02-15 19:00:10 UTC
From: Dimitry Borzenko
Topic: 2881 Message: 2881

Один значок на панели задач хорошая вещь, нажал на значок и лог свернулся , нажал еще раз и он развернулся.

В файле помощи написано что функция работает для всех компонентов лога.

Вот только если открыто окна лога "Previous QSOs" , Award statistic", ",Spot list" то они остается когда вся программа свертывается.

Так же программа не сворачивается , при нажатии на значок на панели задач , когда открыт файл помощи или "Filter setting", "Dx notebook" и т.д.

Так должно быть?

Или какие то окна не являются компонентами лога?

Спасибо.

Добрый день, Александр!

Наблюдаю такой же эффект. Последняя связь из ADIF файла программы JTDX 17.5.1 не импортируется.
Но как только в текстовом редакторе в конце всех записей добавляю еще одну пустую строчку - импортируется все.

https://yadi.sk/d/GAhsiQtM3EVLFE https://yadi.sk/d/GAhsiQtM3EVLFE

В ссылке файл с одной связью. Не импортируется ничего, пока не добавишь строчку.

??
За 20 лет существования журнала никому двусторонней сортировки не понадобилось.
Соответственно и не делалось.

Доброе утро.
Сортировка проводится только в одном направлении???
По дате – внизу новые, сверху старые.
По диапазонам – внизу высокий ,вверху низкий диапазон .
Направление сортировки не меняется.
Так задумано ?
?
Спасибо.

Проблема найдена. И поправлена. Пока, как промежуточное решение, в конце файла
adif добавить пару пустых строк (в конце пару раз Enter)

Здравствуйте.

Скажите пожалуйста какой файл в AALog содержит все ЛОГи.
На компе слетела система. Вся директория с AALog целая, и надо просто переписать файлик с ЛОГами в новый комп.

Просто скопировать папку с AALog на новую машину.
Если стояло на Win7 в каталоге Program Files, то надо из профиля
пользователя скопировать aalog.gdb

From: Andrey Pervakov
Topic: 2898 Message: 2902

Я раньше так и делал. Копировал всю папку AALog и все работало.
В этот раз так же скопировал всю папку - запускаю и выскакивает окошок "Runtime Error R6034....." - что то про некорректную библиотеку. Раз 50 это окошко закрываю и только потом запускается ЛОГ.

Установил ЛОГ по новой и переписал aalog.gdb - все открывается, работает. Спасибо, проблема решена.

From: Dimitry Borzenko
Topic: 2903 Message: 2903

Версия 1220.

Окно “New mode properties” скрывается где то за правой границей основного монитора, доп. монитор стоит слева.

Можно подвинуть с помощью клавиатуры, но при следующем запуске добавления мода, окна опять не видно(не запоминается местоположения окна ☹)

Успехов .

Короче, по непонятым причинам, admины сервера QRZ удавили учетку aalog.
Теперь каждый желающий пользоваться xml поиском ОБЯЗАН получить учетную
запись xml.
Получить можно в личном кабинете QRZ.ru

возможность ввода имени и пароля для qrz.ru будет в след. версии AALog. Она
уже почти готова, идет отладка одной из функций.

Чтобы не искать - вот тут: https://www.qrz.ru/personal/settings
Но надо сначала войти в аккаунт на сайте.
Видать они там вручную гвозди забивают, ибо сначала принимается заявка, потом
ждать надо.
А ЛОГ, как я понял, еще не заточен под вход учетку XML.

2909. вопрос про AATест

Yahoo group: dxsoft-rus
Date: 2017-03-18 11:19:14 UTC
From: Alex Yatsenko
Topic: 2909 Message: 2909

всем привет.

вопрос Александру.

почему то в своей версии 2.1.1 не нашел сегодня мемориал Попова. пршлось задействовать другой тест.
просматривая положение RDXC на qrz.ru, в списке логов, поддерживающих данный тест, не заметил свой любимый :-) AATест.
это чей то недочет ? сам лог уже подготовил к тесту :-)

Приветствую, всех!

Каждый год Вятские радиолюбители просят рассказать о настройках вышеупомянутых программ. В этом году оформил страницу с описанием настроек http://r4n.su/?page_id=816
На странице описана настройка связки программ AATEST , CWTYPE , Omnirig для работы в Чемпионате Кировской области по радиосвязи на КВ.
Если откинуть особенности местечкого теста, то можно применять и для других тестов.

2912. работа ААТест с базой АА Лог

Yahoo group: dxsoft-rus
Date: 2017-03-28 05:59:54 UTC
From: Alex Yatsenko
Topic: 2912 Message: 2912

вопрос к автору.
Александр.
не рассматривалась ли возможность работы ААТест с базой/логом ААЛог-а.
суть вопроса. часть наших коллег работает в тестах не ради места, а для поиска нужных/интересных корреспондентов. чтобы не плодить многократные повторные связи band/mode. было бы очень полезно при вводе позывного видеть, была ли уже связь с данным корреспондентом вообще, а не только в этом тесте. насколько это сложно. мой сосед использует для этого связку N1MM и DX4win. но нет особого желания устанавливать для этого кучу логов. если уже есть AAxxxxxx. :-)

Можно даже по такому случаю отдельную кнопочку предусмотреть: нажал - и идет проверка в основном логе, еще нажал - и снова работаешь с базой конкретного теста. Нет тест, а песня!

Считаю все это фигнЁй. Пипочки , кнопочки. Скучные тесты. И в скучнных тестах может и не быть нужного вам Call для диплома. Дипломов сотни штук для их выполнения - тысячи Call's . Или у вас перед глазами весит портянка с Call's которые нужны для диплома! Все это ху! все это должно делаться программно по написанному зарание сценарию, какие Call нужны для того, или иного диплома. Например: в AAtest в записную книжку ручками забиваете Call's которые вам нужны для выполнения того или иного диплома. (Поработали недельку и будет вам счастье.) Как только в AAtest, и в записной книжке повился нужный вам Call он автоматом отправляется в ААлог в диплом с прописанными заранее вами условиями, для выполнения того или иного диплома.

2918. Re[2]: [dxsoft-rus] работа ААТест с базой ААЛог

Yahoo group: dxsoft-rus
Date: 2017-03-29 05:30:40 UTC
From: Alex Yatsenko
Topic: 2913 Message: 2918

наверное в этом есть логика. когда участник работает в тесте на результат, ему эта база ни к чему. а когда с другими целями, а таких тоже много, то можно оставить запущенным и ААЛог для проверки уникальности позывных/связей. при этом активно пользоваться только ААТест.

2919. Нужно несколько желающих по тестить AALog 3.8.3

Yahoo group: dxsoft-rus
Date: 2017-04-01 10:05:47 UTC
From: Alexander Anipkin
Topic: 2919 Message: 2919

Приветствую

Нужно некоторое количество людей которые могут потестировать функцию автоматического (фонового) поиска в интернете при вводе позывного в окне новых связей.
Программа может падать :)
Цель - понять когда именно она падает :)
Поиск по:
hamqth.com
qrz.com
hamcall.net

желательна подписка на XML интерфейс qrz.com или hamcall.net

--
Best regards

Alexander Anipkin

2925. на заметку про ААЛог

Yahoo group: dxsoft-rus
Date: 2017-04-15 05:35:55 UTC
From: Alex Yatsenko
Topic: 2925 Message: 2925

после переезда в новый шэк при работе на 30м начал отваливаться USB порт. антенна та же, КСВ вроде ничего себе. ну это разберемся. но на практике получается так. в окне новой связи остается видимой частота последней радиосвязи, например, 10.117. если теперь поменять диапазон, например на 40м, в соответствующем поле установится частота 7.000. если записать связь в лог, то связь запишется с диапазоном 40м, но с частотой 10.117 - частотой крайней связи на 30м. и так, пока не перезагружу лог и трансивер..

Для этого есть форритовые защелки на все провода.
Явно наводка и только на этом бэнде. такое бывает.
ЛОГ тут ни при чем.

кабель вроде хороший, с ферритами с двух сторон. понятное дело, что не в логе проблема. фишка в том, что он продолжает сам ставить последнюю частоту перед отвалом порта и дальше. хотя диапазон потом ставится вручную. приходится заново редактировать связь, изменяя частоту. так как она потом не совпадает с реально выбранным диапазоном.

Дело не в хорошести кабеля. Оплеточные токи при рассогласовке антенны вещь
весьма неприятная. Ставьте больше ферритов, но не только на ВЧ кабель, а больше
на кабеля, соединяющие комп с разными устройствами, особенно по CAT.

Андрей. с кабелями и наводками все понятно.
суть вопроса в чем. проведена одна связь на 30м - порт отвалился - лог запомнил эту крайнюю частоту - при переходе на другой диапазон, где нет наводок, при ручной установке диапазона (и частоты по умолчанию) в момент записи связи в лог лог сам изменяет эту частоту на частоту 30 метрового диапазона. хотя в это время установлен совсем другой диапазон. и в логе находится запись о связи с диапазоном 40м (или другой), но с частотой 10117 (например). чтобы устранить этот глюк нужно перезагрузить лог. с остальными полями проблем нет.

с победой над наводками проблема исчезнет. :-)
с антенной ничего не делал. раньше антенна была западней шэка метрах в 30, теперь северней, метрах в 15. лишний кабель свернут в бухту около шэка, можно сказать запорный дроссель :-)
пока срочные весенние работы, потому антенные работы не на первом месте :-(

Я Вас приветствую.

А похожая тема уже давно поднималась, 2 года назад.

[А не сложно сделать, чтобы при выключенном трансивере он помнил последний band и mode, который был при включенном трансивере? Так было бы удобнее.]

Напомню, трансиверов на столе 4, а подключены к логу только 2. Если подключенные по CI-V трансиверы выключены, то лог начинает со 160 метров, и каждый раз ручками... А у него ещё особенность: если вначале установишь Band, а потом Mode, то он стартовую частоту оставит для SSB... Не очень удобно каждый раз при включении лога несколько раз за день тыркать на несколько кнопок и помнить их последовательность. Утомляет.

С уважением, Евгений Баранов, UA3GGP.

P.S. Да, с праздником тех, кто был причастен. Они помнят, с каким. :)

после очередной радиосвязи на 30м все повторяется на других диапазонах. в момент внесения связи в лог любая частота 3500, 7000, 14000 заменяется на частоту первой связи на 30м.
я не считаю это большой проблемой для себя. но поделился своим наблюдением.

Евгений, подобное наблюдается, если установлен OMNI RIG но на момент загрузки лога трансивер выключен. в окне новой связи стоит 160m SSB. без этой программы лог вроде запоминает последние диапазон и моду. а так вообще, нужно сначала включать трансивер а затем запускать лог. старое комповое правило - сначала включаем перифирию, потом комп :-)

Я Вас приветствую.

Я согласен. Но поясню: OMNI RIG не отключается (это ещё более неудобно делать несколько раз в день), а периферия имеется не у всех трансиверов. Да и OMNI RIG больше 2 штук не тянет, увы, тоже слаб. :(А любой трансивер может быть включен в любую секунду. Вот и вертись. Поэтому хотелось бы пожелать логу простого удобного алгоритма работы с интерфейсом/без оного.
73.

С уважением, Евгений Баранов, UA3GGP.

From: Eugene Baranov
Topic: 2931 Message: 2935

Я Вас приветствую.

Я уж думаю, что примитивным временным решением могло бы стать введение возможности выбора в окне New QSO новой кнопки "Use OmniRig for TRX control/ни хрена не Use." :) Наверно бы облегчило жизнь. Но ведь лог часто включается после того, как уже работаешь на трансивере, не включенном в интерфейс, чтобы записать QSO, а включённые в интерфейс трансиверы в этот момент выключены....
Но вот то, что если вначале установишь Band, а потом Mode, то он стартовую частоту оставит для SSB... Это наверно стоит подправить... В любом случае. Лишить Band приоритета над Mode, сделать их равноправными.

С уважением, Евгений Баранов, UA3GGP.

2936. вопрос про ААТест

Topic: 2941 Message: 2941

Здравствуйте, Alexander.

стоит версия 1118. завметил вот что. в окне нового QSO у нас одно поле время. а в окне редактирования связи два поля - начала и окончания QSO. бывает так, что пока лог грузится уже провожу с кем то связь, запомнив время. после загрузки сначала ввожу новый позывной, записываю в лог. после чего открываю эт запись в окне редактирования и правлю время и т.д. при этом нужно последовательно обойти поле начала и кона связи. во 2 версии вроде было, если перемещаешься из поля начало связи в поле конец связи при помоши кнобки ТАБ, в последней устанавливалось такое же время.

еще одна хотелка, касающаяся, в частности разых активаторов. сработал я с каким нибудь /р или /м. но при предыдущей связи у него стоял другой регион. я сразу же меняю регион например SP на NV в ручной установке территории. но в в полях STATE и SUBDIV остается старый регион и нужно дополнительно обходить эти поля и править их вручную. возможно ли этот момент "автоматизировать" ?

Добрый день

по первому вопросу - вводить "старые" связи лучше предварительно нажав ctrl+alt+w - программа не будет использовать текущее время. Обратно вернуться - так же.
Автоматич. выравнивание времен работало только в окне ввода

по второму - согласен.

Александр, спасибо за ответ.
по первому вопросу, если связи ввожу с бумажки то так и делаю.

Здравствуйте.

После переустановки AALog на новый комп, при запуске, вылезает окошко: "Error convert to DB version 14", закрываю его и все работает. Что сделать чтобы этого окошка не было, и что оно значит?

Это не все, а только те что засчитываются на диломы "Города Герои" и
"Города воинской славы"
Полного списка в быстро преобразуемом виде я не нашел.

2973. вопрос по ААЛог

Yahoo group: dxsoft-rus
Date: 2017-05-08 08:13:42 UTC
From: Alex Yatsenko
Topic: 2973 Message: 2973

все нет времени подробно поизучать хэлп к программе потому прошу сильно не пинать за содержание вопроса.

в ААТест-е можно выбрать позывной из банд плана и он появится в окне новой связи и трансивер настроится на частоту спота.

в ААЛог-е из встроенных программ видно только телнет кластер. на частоты спотов можно перестраиваться только вручную? или процесс можно "автоматизировать", как в ААТест-е ? не применяя дополнительных программ.

Здравствуйте, Андрей.

Вы писали 8 мая 2017 г., 13:47:15:

большое спасибо за подсказку. пришлось попутно победить бандмауэр
дрвэб. не давал подключиться ккластеру. теперь все отлично. и бэнд мап
заработал :-) заодно проверил, как из лога споты посылаются. :-)

> Здравствуйте, Alex.

2999. хотелки для будущих верс ий ААЛог

Yahoo group: dxsoft-rus
Date: 2017-05-10 05:20:01 UTC
From: Alex Yatsenko
Topic: 2999 Message: 2999

приветствую, Александр.

удалось вкусить прелестей использования бэндмэпа. :-)
антивирусный бэндмауэр не давал кластеру в ААЛог-е работать. победил. тут же ощутился один момент - не очень удобно отправлять споты из окна новой связи. почти как в смартфоне :-(нужно лезть в меню. а если связь короткая, чтобы зафиксировать ее время, нужно окно закрыть/ ввести ее в лог, потом снова открывать. по крайней мере , я по другому не придумал, как это сделать оперативней. :-(потому возник вопрос - нельзя ли в последующих версиях сделать или комбинацию горячих клавиш или кнопочку в окне новой связи, для отправки спота в кластер?.

Вячеслав, а зачем тогда форумы?
в англоязычной части форума задаются еще более примитивные вопросы и ничего. народ более благожелателен и толерантен. :-)
про команды в телнет кластере я в курсе. они меня не интересуют. если Вы заметили я писал об оперативной отправке спотов из окна нового QSO в ААЛог. в ААТест такое есть с помощью горячих клавиш. это из хэлпа к ААТест:
Вы можете сами добавить споты в список (если используется связка трансивер-ПК). Введите позывной в окно New QSO и нажмите Shift+Enter , чтобы сохранить информацию о позывном и частоте в списке спотов.
в хэлпе к ААЛог подобного не нашел.

>>удалось вкусить прелестей использования
бэндмэпа. :-)
>>антивирусный бэндмауэр не давал кластеру в ААЛог-е работать.
победил. тут же ощутился один момент - не очень удобно отправлять споты из

окна новой связи. почти как в смартфоне :-(нужно лезть в меню. а
если связь короткая, чтобы зафиксировать ее время, нужно окно закрыть/ ввести
ее в лог, потом снова открывать. по крайней мере , я по другому не придумал,
как это сделать оперативней. :-(потому возник вопрос - нельзя ли в
последующих версиях сделать или комбинацию горячих клавиш или кнопочку в окне
новой связи, для отправки спота в кластер?.

From: OG2K Anton
Topic: 2999 Message: 3012

ОТКРЫТОЕ ПИСЬМО

Le Hingle, France
10/5-17

Всем,

более результативно будет создать сайт руководства пользователя, созданный пользователями для пользователей, без участия Александра.
файл помощи обновляется редко, или очень редко, да это и не дело разработчика/програмиста.

я предлагаю:
1) создать вики-сайт посвященной _пользованию_ программ аалог/аатест
2) назначить ответственных за создание структуры / скелета раздела эксплуатации
3) дать знать Александру, что при добавлении новой функции, он создает новую страницу, где пользователи описывают как этим пользоваться

техническую часть возьму на себя (движок вики и хостинг)

предлагаю назначить отвественных:
1) Славу
2) себя
3) -SS за аатест
и самых активных

результат:
1) Александр освободиться об необходимости вести писанину файла помощи
2) пользователи будут находить информацию о возможностях программы структурировано и организовано
3) каждый сможет найти то, что хочет
4) и дополнить то, чего нет

"нет тупых вопросов, ..."

73/A

3022. проблема с запуском ААЛога

Yahoo group: dxsoft-rus
Date: 2017-06-10 07:39:09 UTC
From: Alex_R6CW
Topic: 3022 Message: 3022

Здравствуйте, Alexander.

неожиданно возникла проблема.
после работы ночью немного попикал. закрыл программу,
выключил комп.
утром включаю. появляется синяя табличка с
бегущей
полосой. полоса добегает до конца , несколько секунд и
синяя табличка исчезает. лог не запускается. не вылетает
ни каких ошибок. перекинул лог на второй комп. там все в
порядке. штатно запускается и работает. скопировал
обратно с новыми связями. на основном так же не
запускается. проверил бандмауэр дрвэб. там все в порядке,
на всякий случай отключал. что то или кто то мешает.
п.с. наверное нужно переустановить систему. ато
притормаживать комп стал, всякие чистки не помогают :-(

проблемка при импорт077; adif GD!

Обновился до версии 3.8.2.1220. Заметил такое. Приношу домой с коллективки adif лог.
Импортирую связи и замечаю что посл. qso не загружается.
Удаляю все связи кроме последней, повторяю импорт - не грузится ни в какую.
Стоит добавить пробел в конце adif файла, связь загружается. На предыдущей версии всё было ОК.
Как бы не критично, но может кто подскажет в чём непонятка?

Спасибо.

3033. problem

Yahoo group: dxsoft-rus
Date: 2017-06-29 06:32:56 UTC
From: Andrey Pervakov
Topic: 2898 Message: 3033

Здравствуйте.

Один позывной при импорте из адифа AALog никак не желает воспринимать - это MM0LID.
Приложил файл с ним.
Позывной был записан как W5/MM0LID/MM - вообще игнорируется.
Убрал /MM - то же самое.
Оставил просто W/MM0LID - не записывается.
Обозначил просто как MM0LID - программа записывает как MM0L.

Что это???

Похоже это только у Вас, что-то случилось с базой...
У меня подобный позывной PY2/MM0LID есть в журнале, позывной W5/MM0LID/MM
тоже заносится в журнал без проблем.

Ну так и у меня ААЛог.
Интересуют лейблы для 3-й версии.
Чтобы без доработок подошли к бумаге Ломонд.
3x10 или 4x10 лейблов на листе формата А4.
Маленьким шрифтом 3-4 связи чтобы помещались на лейбле.
Есть что-нибудь такое?

73, RU4SS
P.S. RZ4AG прислал похожий, но нужны доработки, немного не вписывается на бумагу Ломонд :(

3041. Лейблы на QSL's - Label generator

Yahoo group: dxsoft-rus
Date: 2017-07-03 07:23:13 UTC
From: OG2K Anton
Topic: 2999 Message: 3041

Доброго.

В комплект ААЛог-а входит редактор шаблонов для печати информации радиосвязей (наклеек или напрямую на карточку), который называетя "Label generator". Его обычное размещение "C:\Program Files\AALog3\AALlabels.exe".

Им и можно отредактировать шаблоны. Сначала стоит подогнать на чистой А4, прикладывая на свет и проверяя. А потом печатать на наклейки.

/A

Здравствуйте, Alexander.
попробовал написать на Ваш адрес, но дублирую и сюда, т.к. с alan....
пришел отлуп. сбойнул аатест. после штатного выхода из программы через
несколько часов при старте сбойнул база связей не открывается. было
158 или 166, теперь статистика показывает 149. в окне списка связей
глюки. попробовал подгрузить файлы эз этой копии в заведомо рабочую -
та тоже начала сбоить. пробовал изменить дату не получилось.
попробовал импортировать связи из него в ААЛог. тот завис на процедуре
импорта. нужна Ваша помощь. обычно делал файлы адиф перед выключением,
а сегодня не сделал и полторы сотни связей ухнуло :-(работал СПС в DX
mode.

Читать надо сообщения внимательно.
Эта версия поддерживает 2 формата лога, старый и новый. Иногда программа не может понять лог в старом или новом формате. Тогда она задает этот вопрос. Что бы пользователь подсказал. Т.е. в 99% случаев надо говорить "да". За исключением случая когда вы пытаетесь открыть лог за прошлые годы созданный в старой версии.

да вот же. в английском не очень силен :-(с наскоку не понял, а переводчик поленился включить. первый раз такое предупреждение/вопрос получал.

еще глупый вопрос. default.aat.old заменил на default.aat.
а на что следует менять default.old? по размеру подходил bacup.dat . его
и заменил. может не нужно было ?

спасибо за подсказку! от меня и моих корреспондентов :-)

3049. Непонятка

Yahoo group: dxsoft-rus
Date: 2017-07-25 15:43:15 UTC
From: Гриня Папуасов
Topic: 3049 Message: 3049

Добрый день.

Такая фигня:
1. было забито QSO, сегодня я ничего не смог в него внести, ни менеджера, ни QTH, ни локатор...
2. забил это QSO заново и всё поправил, а старое удалил...
3. захожу в лог, а удалённое QSO опять на месте...
в общем оно не удалятся, каждый раз появляется заново.

Удачи!
73! Сергей (RJ3AA).

Это похоже повреждение базы.
Выйти из AALog
1. СДЕЛАТЬ РЕЗЕРВНУЮ КОПИЮ aalog.gdb (именно так БОЛЬШИМИ БУКВАМИ)
2. скачать www.dxsoft.com/bak.zip и распаковать в папку с AALog
3. запустить restore.bat. Должен появится aalog1.gdb. Он будет несколько меньше старого aalog.gdb это нормально.
4. Убедится еще раз, что есть резервная копия aalog.gdb и переименовать aalog1.gdb в aalog.gdb
5. запустить лог

Александр, спасибо!

Завтра попробую, эта ошибочка была на компьютере на работе.
Но т.к. я уже "старый" пользователь, то у меня лог ещё раза 3 сохранён, в разных местах. ☐
Если получится, то супер, если нет, то как бы всё есть.
Хотя как-то года 4 назад, вы мне присылали такую же ссылочку, тогда всё помогло.

Удачи!
73! Сергей (RJ3AA).

Здравствуйте, Alexander.

еще побеспокою. часто при запуске ААТест выскакивают предупреждения типа acces violatin ..... по адресу ..... в модуле ..... вот и сейчас выскакивало последовательно три предупреждения. во всех адреса и модули разные. о чем это может говорить ?

From: UX3IW Igor Voronov
Topic: 3054 Message: 3054

Добрый день всем!

Взял у товарища (р,л.) ноут. Там стоял ААлог с его регистрацией.
Я его лог удалил,поставил новую версию,Запускаю,открывается чистый лог ,но с его позывным....
Подскажите,как и где можно удалить его регистрацию?

Добрый день

В момент запуска AALog бежит полоска загрузки. На ней щелкнуть 2 раза мышью. Откроется пустое окно регистрации. Можно ввести свои данные или оставить его пустым, лог станет незарегистрированным
